(a) Rates are based on the indirect standardisation method, applying age-group imprisonment rates derived from Prison Census data.

(b) Rates are based on the daily average prisoner, periodic detainee or offender populations supplied by states and territories, calculated against adult population figures at December 2007 for people aged 17 years or over for Queensland and for people aged 18 or over in all other jurisdictions, reflecting the age at which people are remanded or sentenced to adult custody. (Source: ABS National Centre for Crime and Justice Statistics).

(c) NSW figures exclude ACT prisoners held in NSW prisons. ACT data are presented as total prisoners.

(d) The rate ratio is calculated by dividing the Indigenous age standardised rate by the non-Indigenous age standardised rate.
