
Errata – Report on Government Services 2007

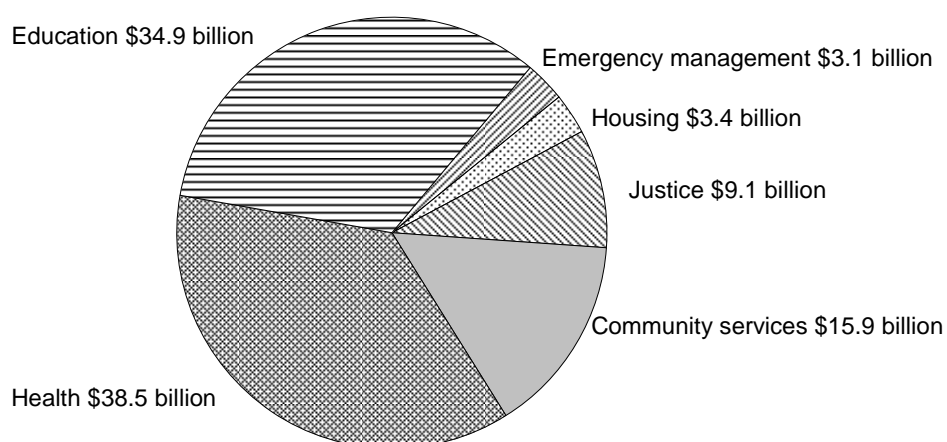

The following amendment was made to the 2007 Report since it was released in January 2007.

Chapter 1 — The approach to performance measurement

Text and figure 1.1 relating to estimated government recurrent expenditure have been corrected. The revised text and figure are reproduced below.

The services in the Report absorb a significant level of government expenditure. While not all data here relate to the same time period, the services in this 2007 Report accounted for approximately \$104.9 billion (figure 1.1), representing around 59.5 per cent of government recurrent expenditure⁴ in 2005-06. (This is equivalent to about 10.9 per cent of gross domestic product.)

Figure 1.1 **Estimated government recurrent expenditure on services covered by the 2007 Report^{a, b, c}**

a Data for 2005-06 were not available for all services. Table 2.1 in chapter 2 indicates the latest year for which data are available for each service area. **b** Community services expenditure excludes juvenile justice. **c** The estimate for health expenditure includes only the health services discussed in the health chapters of the Report: public hospitals, primary and community health services, breast cancer screening and specialised mental health services.
