
Errata – Report on Government Services 2005

The following amendments were made to the 2005 Report.

Chapter 5 – Police services

Page 5.37, figure 5.27(b) ‘Housebreaking’ has been amended (see below). The related text and data did not require amendment.

Figure 5.27 Proportion of people who consider the identified issues to be either a 'major problem' or 'somewhat of a problem' in their local area, 2003-04

Source: ACPR (unpublished); tables 5A.41–5A.43.

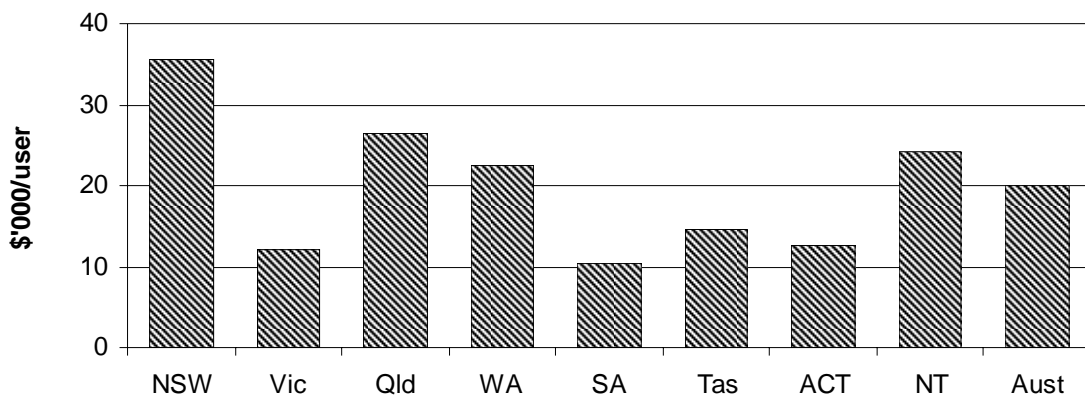

Chapter 13 – Services for people with a disability

Page 13.46–p.13.47, \$18 038 should be \$19 881 for the government contribution per user of non-government provided services — other community settings nationally and \$33 should be \$10 249 for the SA government contribution per user of non-government provided services — other community settings (see amended text and figure below).

Government contribution per user of non-government provided services — other community settings

Nationally, estimated annual government funding of non-government provided accommodation support services in other community settings was \$19 881 per service user in 2002-03. Across jurisdictions, government funding per service user ranged from \$35 491 in NSW to \$10 249 in SA (figure 13.22).

Figure 13.22 **Estimated annual government funding per user of non-government provided accommodation support services in other community settings, 2002-03^{a, b, c, d}**

^a Estimated annual figures were derived from 2002-03 financial year data and service user data collected from 1 January 2003 to 30 June 2003. ^b Data reflect government contributions to non-government provided services. ^c Data exclude 44 service users in Victoria whose agency sector (government/non-government) was not stated. ^d The service user data used to derive this indicator have quality issues, so estimates of jurisdictional efficiency need to be interpreted with care.
