Australian Productivity Commission  
LB2 Collins St. East  
Melbourne VIC 8003  
Australia

Re: Rejection of Winlink

I find it inconceivable, illogical and contrary to the overwhelming evidence that the Commission could have reached a decision opposing Winlink adoption in Australia.

A gross error which makes Australia look look like a thirld world nation and a laughing stock.

Shame on you!

Fortunately, Australians (particularly sailors and outback travellers) are sufficiently ingenious to find a ways to circumvent this inconvenience, or robust enough to simply ignore it.
