

For Commissioners David Robertson and Neil Byron:

I am a member of the Seven Seas Cruising Association and wanted to let you know that the submission before you presented by Mr. Anthony Van Vugt, an Australian member of our organization is a very good proposal... one which I support. Reliable communications enhances everyone's enjoyment and safety at sea... WinLink 2000 is my primary means of digital communication at sea - I consider it essential. Having an Australian WinLink 2000 station available to me will make our voyage across the Pacific to your country safer and more enjoyable.

Please recommend that the ACA Determination be amended accordingly.
