Subject: For Submission

Greetings,

We sincerely believe that integrating amateur radio high frequency email with the Internet does not take away from other aspects of a country's communications infrastructure but rather adds to it. Most of the message traffic generated is new and would not otherwise have been transmitted via other means.

In addition, HF email promotes safety for cruising vessels since it allows dissemination of weather information and provides for low power, highly readable communications in instances of difficult propagation.

Sincerely,

Vernon Rodgers, KC2ESP
Marie Rodgers, KC3MAR
S/V Second Sally, U.S. 602736
