# C Justice sector overview

## CONTENTS

<b>C.1 Introduction</b>	<b>C.1</b>
<b>C.2 Sector performance indicator framework</b>	<b>C.12</b>
<b>C.3 Cross-cutting and interface issues</b>	<b>C.42</b>
<b>C.4 Future directions in performance reporting</b>	<b>C.42</b>
<b>C.5 List of attachment tables</b>	<b>C.43</b>
<b>C.6 References</b>	<b>C.43</b>

### **Attachment tables**

Attachment tables are identified in references throughout this sector overview by a 'CA' prefix (for example, table CA.1). A full list of attachment tables is provided at the end of this sector overview, and the attachment tables are available on the Review website at [www.pc.gov.au/gsp](http://www.pc.gov.au/gsp).

## **C.1 Introduction**

This sector overview provides an introduction to justice services, comprising police services (chapter 6), civil and criminal courts' administration (chapter 7) and adult corrective services (chapter 8). It provides an overview of the justice sector, presenting both contextual information and high-level performance information.

### **Policy context**

The justice system is usually divided into criminal and civil justice. Under the federal system of government in Australia, the states and territories assume responsibility for the administration of criminal justice within each individual State and Territory and, as a result, there is no single criminal justice system operating

---

across Australia. The eight states and territories have separate and independent systems of police, courts, prisons, community corrections systems and juvenile justice centres. There are also some criminal justice services that operate at national level, for example, the Australian Federal Police has jurisdiction for certain offences regardless of whether these are committed in a particular State or Territory. National law enforcement functions are also provided by other Commonwealth agencies, such as the Australian Crime Commission (ACC). There are also federal courts and tribunals with national jurisdiction for both civil and criminal matters, however, the majority of court and law enforcement matters are dealt with by services administered at State and Territory government level.

Civil justice services are provided at State and Territory government levels, as well as at the federal level. There is a wide variety of services available for civil dispute resolution and the vast majority of civil matters are resolved outside of courts.

The operations of the civil and criminal justice systems require the provision of government services for crime prevention, detection and investigation, judicial processes and dispute resolution, prisoner and offender management, and rehabilitation services. These are mainly delivered through the three service delivery agency types that are reported in this Report — police services, courts and corrective services. Other agencies also deliver some of these functions, although more restricted in scope. For example, government departments may investigate and prosecute particular offences directly, as in the case of social security fraud or tax evasion.

### *Police services*

Police services are the principal means through which State and Territory governments pursue the achievement of a safe and secure environment for the community. This is through the investigation of criminal offences, response to life threatening situations, provision of services to the judicial process and provision of road safety and traffic management. Police services also respond to more general needs in the community — for example, working with emergency management organisations and a wide range of government services and community groups, and advising on general policing and crime issues. Additionally, police are involved in various activities which aim to improve public safety and prevent crime.

### *Courts*

Courts provide independent adjudication of disputes and application of the law within an environment that protects human rights. This is a necessary role to ensure

---

that the principles of justice operate in society. Court administration provides services which support the judiciary and court users through the efficient and effective management of court resources and court caseloads.

### *Corrective services*

Corrective services implement the correctional sanctions determined by the courts and releasing authorities such as parole boards. Corrective services agencies operate (or contract with private operators for the operation of) prison facilities, and in some states and territories periodic detention centres, and are also responsible for managing offenders on community corrections' orders. Corrective services agencies administer services and programs which aim to reduce prisoners' and offenders' risk of re-offence, and also provide advice to courts and releasing authorities.

### **Sector scope**

The justice sector services covered in this Report (box C.1) comprise both criminal and civil jurisdictions. Services in the criminal jurisdiction are delivered by police, courts and corrective services. In the civil jurisdiction, police deliver services for infringements, and courts deals with civil law matters.

#### **Box C.1 Justice sector services covered in this Report**

In this Report:

- Police reporting covers the operations of police agencies of each State and Territory government but excludes the national policing function delivered by the Australian Federal Police and other national non-police law enforcement bodies such as the Australian Crime Commission (ACC).
- Courts reporting covers service delivery in the State and Territory supreme, district/county and magistrates' courts (including children's courts, coroner's courts and probate registries). The Federal Court of Australia, Family Court of Australia, Family Court of WA and the Federal Magistrates Court of Australia are included, but the High Court of Australia and tribunals and specialist jurisdiction courts such as Indigenous courts, circle sentencing courts and drug courts operating at State and Territory level are generally excluded.
- Corrective services reports on adult custodial facilities and community corrections, including prison services provided through contractual arrangements with private providers.

---

Justice services for children and young offenders are covered under youth justice in chapter 15 of the Report. Other government services that contribute to criminal and civil justice outcomes but are not covered in this Report are:

- legal aid services
- public prosecutions
- alternative dispute resolution services, such as conciliation and mediation
- offices of fair trading or consumer affairs, which operate to minimise incidences of unlawful trade practices
- victim support services, which assist victims' recovery from crime (although the processing of applications for compensation is included in the civil case processing information)
- various social services and community organisations that help people released from prison to re-integrate into society, support families of people who are in prison, and assist people who have contact with the criminal justice system
- Australian Crime Commission and federal functions of the Australian Federal Police
- the operations of tribunals and registries (except for probate and court registries) and judicial outcomes
- operations of the High Court of Australia and specialist jurisdiction courts (except for family courts, children's courts and coroners' courts)
- law enforcement functions delivered by national agencies such as the Australian Transaction Reports and Analysis Centre (AUSTRAC) or Department of Immigration (in relation to illegal immigrants).

## **Profile of the Justice sector**

Detailed profiles for each of the three services in this Report comprising the justice sector are reported in chapters 6, 7 and 8 and cover:

- size and scope of the individual service types
- roles and responsibilities of each level of government
- funding and expenditure.

### *Overview of the criminal justice system*

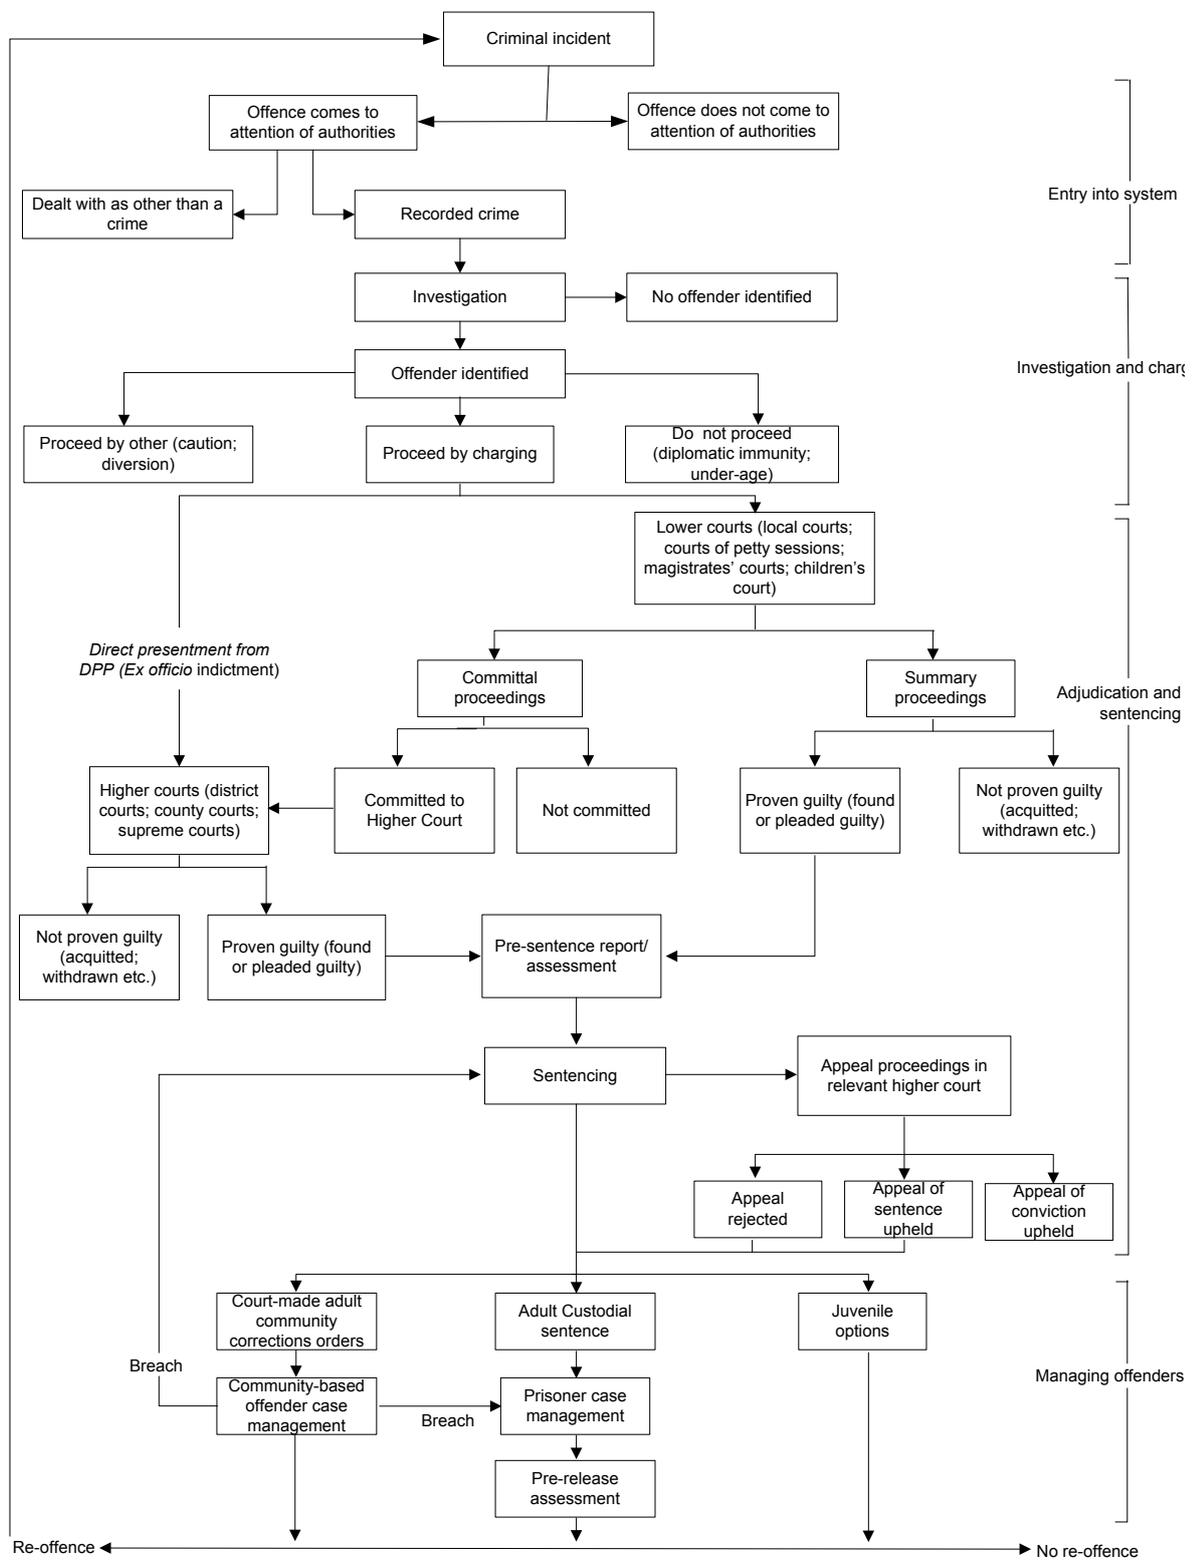

The criminal justice system involves the interaction of many entities and their processes and practices are aimed at providing protection for the rights and

---

freedoms of all people. For most people who come into contact with it, the criminal justice system is a sequentially structured process.

Figure C.1 shows the typical flow of events in the criminal justice system. The roles of police, courts and corrective services, and the sequencing of their involvement, are clearly shown. This depiction is broadly indicative and, for brevity and clarity, does not seek to capture all the complexities of the criminal justice system or variations across jurisdictions.

Figure C.1 Flows through the criminal justice system<sup>a, b, c</sup>

<sup>a</sup> Does not account for all variations across Australian, State and Territory governments' criminal justice systems. <sup>b</sup> The flow diagram is indicative and does not seek to include all the complexities of the criminal justice system. <sup>c</sup> Youth justice is covered in the Protection and support services chapter (chapter 15).

---

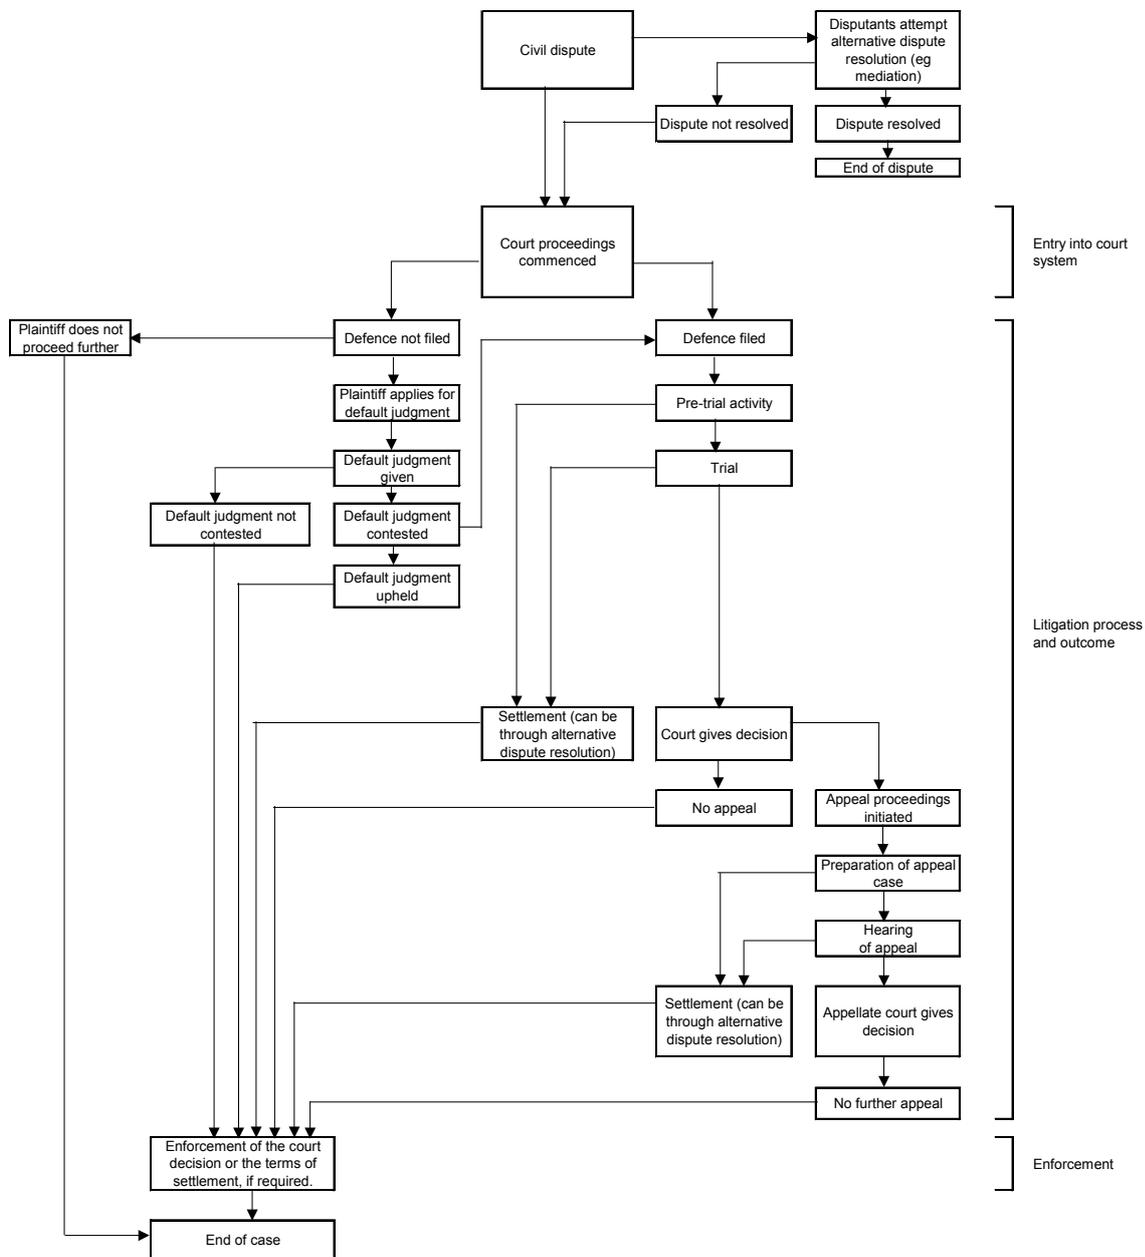

### *Overview of the civil justice system*

In the civil justice system, courts deal with civil law matters. The civil justice system involves the interaction of a number of practices, procedures and case management processes aimed at achieving fair, accessible and effective dispute resolution.

Courts are not the primary means by which people resolve their disputes. The vast majority of disputes are settled outside of the formal court system. Methods of resolution can include legal advice and help, internal complaint mechanisms, external dispute resolution and ombudsmen, tribunals, family dispute resolution services, and alternative dispute resolution processes such as mediation, negotiation and arbitration (Australian Government Attorney-General's Department 2009).

Figure C.2 is an indicative model of the flows through the civil justice system; it has been simplified because specific steps are complex, vary between jurisdictions, and cannot all be captured in a single figure. While the emphasis in figure C.2 is on the flow of disputes which proceed to court, the role of alternative dispute resolution processes is considerable in civil justice.

Figure C.2 Flows through the civil justice system<sup>a, b</sup>

<sup>a</sup> Does not account for all variations across Australian, State and Territory governments' civil justice systems. <sup>b</sup> The flow diagram is indicative and does not seek to include all the complexities of the civil justice system.

### Government funding

In this Report funding reported for policing functions and for all corrective services is provided through State and Territory governments. Court administration and services to the judiciary are funded by State and Territory governments or the Australian Government depending on the jurisdiction of the court.

### *Real recurrent expenditure on justice services in this Report*

Recurrent expenditure relates to the annual service costs for the parts of the justice system covered in this Report, and excludes payroll tax. Real recurrent expenditure is derived by applying a Gross Domestic Product (GDP) Implicit Price Deflator (IPD) to the recurrent expenditure data. Details on the GDP IPD can be found in the statistical appendix and table AA.51. Total real recurrent expenditure (less revenue from own sources) for those parts of the justice system covered in this Report was \$14 billion in 2011-12 (table C.1).

**Table C.1 Real recurrent expenditure (less revenue from own sources) on justice services by Australian, State and Territory governments (2011-12 dollars)<sup>a, b, c, d</sup>**

	2007-08	2008-09	2009-10	2010-11	2011-12	Average annual growth rate
	\$m	\$m	\$m	\$m	\$m	%
Police services	8 175	8 369	8 879	9 013	9 459	3.7
Courts — criminal	680	705	727	727	780	3.5
Courts — civil <sup>e</sup>	658	628	653	634	654	-0.2
Corrective services	2 783	2 937	3 030	2 982	3 126	2.9
<b>Total justice system</b>	<b>12 297</b>	<b>12 639</b>	<b>13 288</b>	<b>13 356</b>	<b>14 019</b>	<b>3.3</b>
	%	%	%	%	%	
Police services	66.5	66.2	66.8	67.5	67.5	..
Courts — criminal	5.5	5.6	5.5	5.4	5.6	..
Courts — civil <sup>e</sup>	5.4	5.0	4.9	4.7	4.7	..
Corrective services	22.6	23.2	22.8	22.3	22.3	..
<b>Total justice system</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>..</b>

<sup>a</sup> Totals may not sum as a result of rounding. <sup>b</sup> Expenditure data for all services include depreciation, but exclude payroll tax and user cost of capital. This treatment has been adopted to aid comparability in the above table and may differ from the treatment used in tables within individual chapters. <sup>c</sup> Excludes expenditure on justice services outside the scope of this Report (for example, specialist courts, legal aid, public prosecutions). <sup>d</sup> Real expenditure based on the ABS gross domestic product price deflator (2011-12 = 100). <sup>e</sup> Civil real net recurrent expenditure for court administration includes the Federal Court of Australia, the Family Court of Australia and the Federal Magistrates Court but excludes real net recurrent expenditure on probate matters. .. Not applicable.

Source: Australian, State and Territory governments (unpublished); tables 6A.10, 7A.12-13, 8A.12 and AA.51.

A number of factors contribute to the significant differences in expenditure across jurisdictions. These include factors beyond the control of jurisdictions (such as geographic dispersion, economies of scale and socio-economic factors), as well as differences in justice policies and/or the scope of services that justice agencies deliver. For example, event management and some emergency response services are provided by police only in some jurisdictions.

*Efficiency — real recurrent expenditure (less revenue from own sources) per person*

The efficiency of the justice system is reflected in the level of resources used to deliver those services. Unit cost indicators for individual justice services in the Report are presented in the related chapters, but some outcomes result from interactions among the individual services. One indicator of efficiency is annual government recurrent expenditure per person on justice services. Data in table C.2 are calculated from real recurrent expenditure (less revenue from own sources) data for corrective services, criminal and civil court administration and police services, and ABS population estimates, to derive per person results.

Nationally, real expenditure (less revenue from own sources) per person on the areas of justice reported on in 2011-12 was \$624 (table C.2).

**Table C.2 Real recurrent expenditure (less revenue from own sources) per person on justice services, 2011-12<sup>a, b, c, d, e</sup>**

	<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
Police services	\$	422	371	414	499	409	384	429	1 052	421
Courts — criminal	\$	30	33	32	51	38	33	35	86	35
Courts — civil <sup>f, g</sup>	\$	17	19	11	30	13	11	31	50	29
Corrective services	\$	137	107	129	217	129	126	121	481	139
<b>Total justice system</b>	<b>\$</b>	<b>606</b>	<b>530</b>	<b>586</b>	<b>797</b>	<b>588</b>	<b>554</b>	<b>616</b>	<b>1 669</b>	<b>624</b>
Police services	%	69.6	70.0	70.7	62.6	69.5	69.3	69.7	63.0	67.5
Courts — criminal	%	5.0	6.2	5.4	6.4	6.4	5.9	5.7	5.2	5.6
Courts — civil <sup>f, g</sup>	%	2.8	3.6	1.8	3.8	2.1	2.0	5.0	3.0	4.7
Corrective services	%	22.6	20.2	22.0	27.2	21.9	22.7	19.6	28.8	22.3
<b>Total justice system</b>	<b>%</b>	<b>100.0</b>								

<sup>a</sup> Totals may not sum as a result of rounding. <sup>b</sup> Expenditure data for all services include depreciation, but exclude payroll tax and user cost of capital. This treatment has been adopted to aid comparability in the above table and may differ from the treatment used in tables within individual chapters. <sup>c</sup> Population is estimated by taking the midpoint population estimate of the 2011-12 financial year. <sup>d</sup> Excludes expenditure on justice services outside the scope of this Report (for example, specialist courts, legal aid, public prosecutions). <sup>e</sup> Real expenditure based on the ABS gross domestic product price deflator (2011-12 = 100). <sup>f</sup> The Australian total includes net court administration expenditure for the Federal Court of Australia, the Family Court of Australia, and the Federal Magistrates Court of Australia, which are not attributed to State or Territory jurisdictions. <sup>g</sup> WA civil net court administration expenditure includes the Family Court of WA, so is not directly comparable with other jurisdictions.

---

## **Social and economic factors affecting demand for services**

### *Criminal jurisdiction*

Links have been drawn between criminal activity and social and economic factors such as poverty, levels of substance abuse, unemployment, and levels of social and community cohesion (Weatherburn 2001). Levels of demand on justice services are also driven by changes in legislative and policy environments introduced in response to social concerns such as levels of crime and fear of crime.

It was estimated that in 2005 the costs associated with crime in Australia amounted to approximately \$21.3 billion (Rollings 2008). When combined with the costs of criminal justice, victim assistance, security and insurance the total estimated cost of crime to the community amounted to almost \$36 billion. Expenditure by governments on criminal justice accounted for just over one quarter of the estimated overall costs (Rollings 2008).

### *Civil jurisdiction*

Demand for civil justice services is influenced by the types of legal issues people experience, which in turn are influenced by social and economic factors. Demand also varies with the way in which people respond to legal issues — do nothing, deal with the issue independently or seek advice or legal assistance (Australian Government Attorney-General's Department 2009). A survey of legal needs undertaken in New South Wales in 2003 (Law and Justice Foundation 2006) found that in disadvantaged areas, legal needs for civil issues were generally higher for people with chronic illness or disability. Age, Indigenous status and personal income also had varying influences on both the type of legal issue experienced and whether people chose to seek assistance.

In addition to expenditure by State and Territory governments on civil justice, the Australian Government contributes substantially to the federal civil justice system. In 2007-08 over \$1 billion was spent on federal civil courts, tribunals, legal aid, Indigenous programs, community legal centres, commonwealth ombudsman, legal aid, community legal centres and insolvency and trustee services (Australian Government Attorney-General's Department 2009). Expenditure on the federal courts (the High Court, the Federal Court of Australia, the Family Court and the Federal Magistrates Court) comprised just over a quarter of the total federal gross expenditure on civil justice.

---

## Service-sector objectives

The overarching objectives of the justice sector are:

- safe communities
- a fair, equitable and accessible system of justice.

The objectives of the criminal and civil justice system are provided in box C.2. By contrast with criminal justice, civil cases involve participants using the legal system to settle disputes, and the types of parties and possible dispute resolution approaches vary considerably. Specific objectives for each of the three justice services can be found in chapters 6 (police services), 7 (courts) and 8 (corrective services).

### Box C.2 Objectives of the criminal and civil justice system

The objectives of the criminal justice system are to:

- prevent, detect and investigate crime
- administer criminal justice that determines guilt and applies appropriate, consistent and fair sanctions to offenders
- provide a safe, secure and humane custodial system and an effective community corrections system.

The objectives of the civil justice system are to:

- resolve civil disputes and enforce a system of legal rights and obligations
- respect, restore and protect private and personal rights
- resolve and address the issues resulting from family conflicts and ensure that children's and spousal rights are respected and enforced.

## C.2 Sector performance indicator framework

This sector overview is based on a sector performance indicator framework (figure C.3). This framework is made up of the following elements:

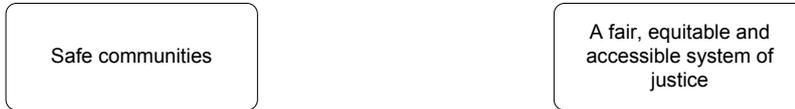

- Sector objectives — two sector objectives, safe communities and a fair, equitable and accessible system of justice, are based on the key objectives of the Justice sector
- Sector-wide indicators — three sector-wide indicators relate to the first sector objective and two indicators relate to the second sector objective

- 
- Information from the three service-specific performance indicator frameworks in the three justice chapters. Discussed in more detail in chapters 6, 7 and 8, the service-specific frameworks provide comprehensive information on the equity, effectiveness and efficiency of specific government services.

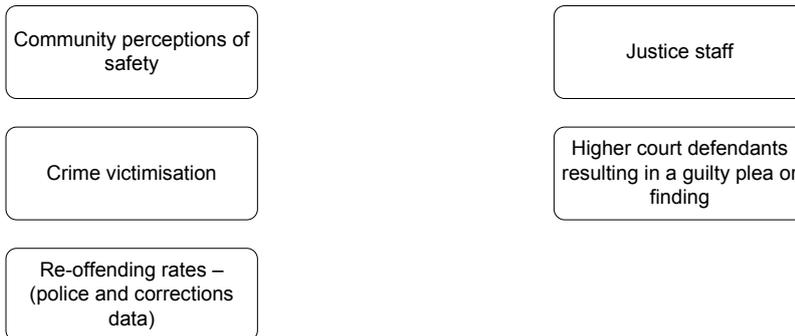

This sector summary provides an overview of relevant performance information. Chapters 6, 7 and 8 and their associated attachment tables provide further information, including disaggregation of some indicators by Indigenous status.

**Figure C.3 Criminal and civil justice sector performance indicator framework**

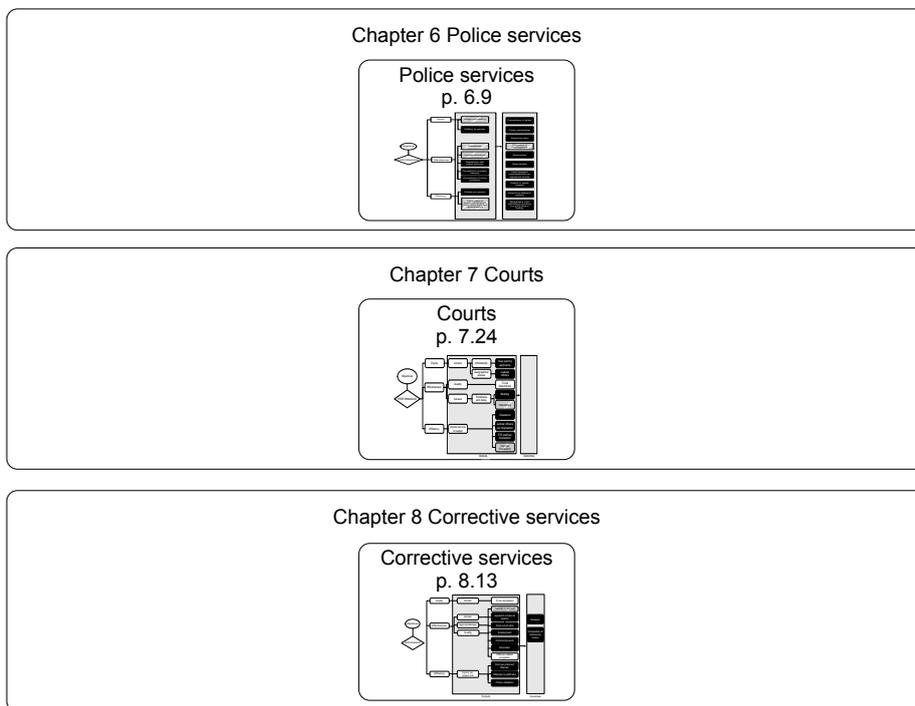

Sector objectives

Sector-wide indicators

Service-specific performance indicator frameworks

---

## Sector-wide indicators

### *Community perceptions of safety*

‘Community perceptions of safety’ is an indicator of governments’ objective to maintain public safety (box C.3).

#### **Box C.3 Community perceptions of safety**

‘Community perceptions of safety’ is defined by two separate measures:

- the proportion of people who felt ‘safe’ or ‘very safe’ at home
- the proportion of people who felt ‘safe’ or ‘very safe’ in public places.

A high or increasing proportion of people who felt ‘safe’ or ‘very safe’ for either measure is desirable.

Perceptions of safety might not reflect reported crime, as reported crime might understate actual crime, and many factors (including media reporting and hearsay) might affect public perceptions of crime levels and safety.

Data reported for this indicator are comparable.

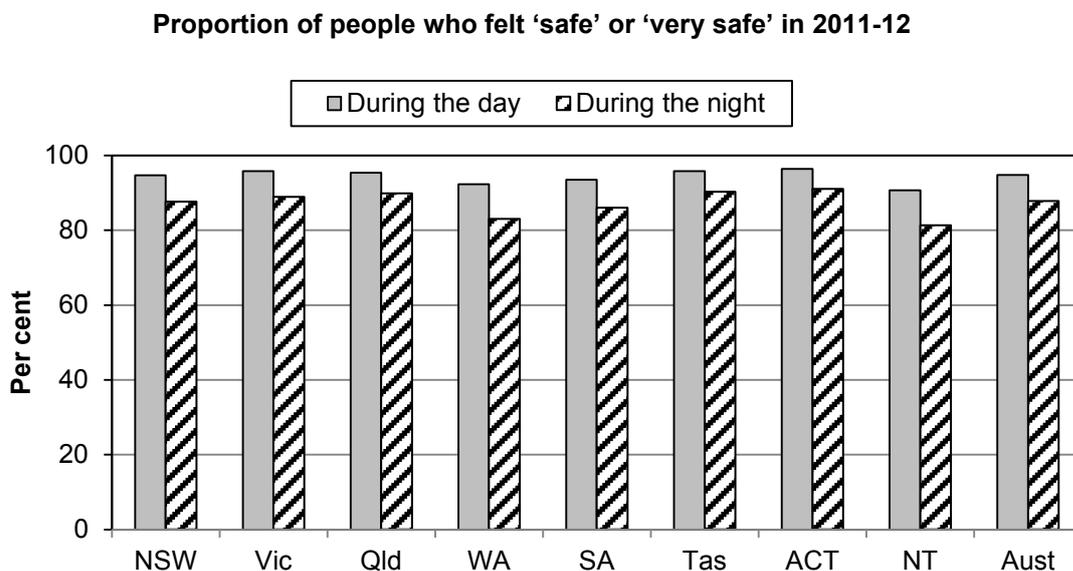

*Source:* Chapter 6.

Data for this indicator are derived from the National Survey of Community Satisfaction with Policing (NSCSP). The NSCSP collects information on public perceptions of crime and safety problems in the community and local area.

Nationally in 2011-12:

- 94.8 per cent of people felt ‘safe’ or ‘very safe’ at home alone during the day (figure C.4)
- 87.8 per cent of people felt ‘safe’ or ‘very safe’ at home alone during the night (figure C.4)
- 51.6 per cent of people felt ‘safe’ or ‘very safe’ when walking alone locally during the night (figure C.5)
- 25.4 per cent of people felt ‘safe’ or ‘very safe’ when travelling on public transport during the night (figure C.5).

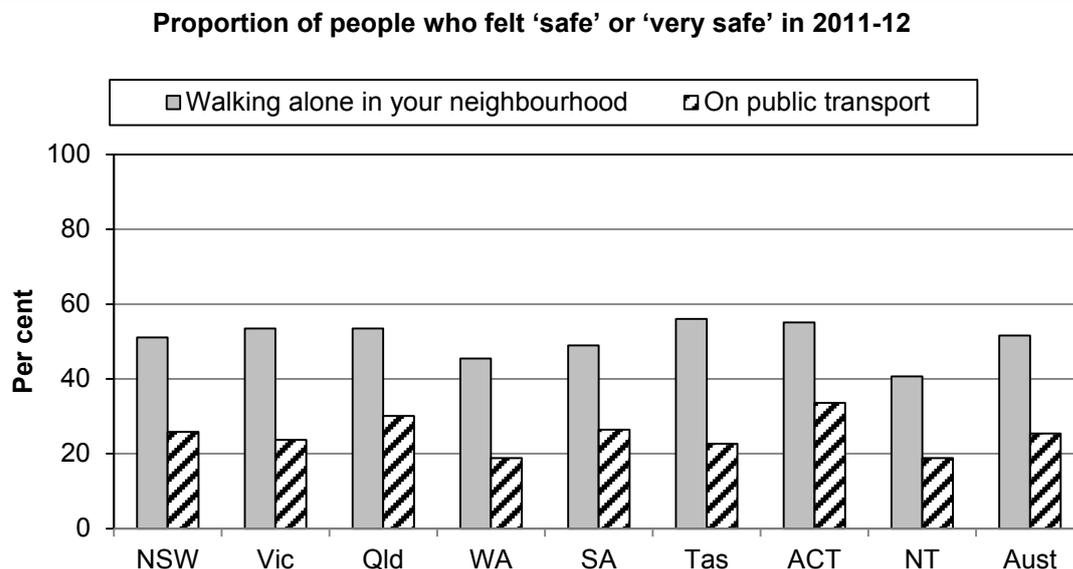

Figure C.4 Perceptions of safety at home alone<sup>a, b</sup>

<sup>a</sup> Data are for people aged 15 years or over. <sup>b</sup> Survey results are subject to sampling error. Refer to the Statistical appendix section A.5 for information to assist in the interpretation of these results.

Source: ANZPAA (unpublished) NSCSP; table CA.1.

Figure C.5 Perceptions of safety in public places during the night<sup>a, b, c</sup>

<sup>a</sup> Data are for people aged 15 years or over. <sup>b</sup> Survey results are subject to sampling error. Refer to the Statistical appendix section A.5 for information to assist in the interpretation of these results. <sup>c</sup> Tasmania, the NT and the ACT rely on buses as the primary means of public transportation.

Source: ANZPAA (unpublished) NSCSP; table CA.2.

---

### *Crime victimisation*

‘Crime victimisation’ is an indicator of governments’ objective to reduce the incidence of crime against people and property (box C.4).

#### **Box C.4 Crimes against the person and against property**

‘Crime victimisation’ in this sector overview is an indicator for which two measures of crime against the person and two measures of crime against property are reported. These data are sourced from ABS crime victimisation survey data:

- estimated victimisation rate for physical assault per 100 000 people aged 15 years or over
- estimated victimisation rate for sexual assault per 100 000 people aged 18 years or over
- estimated household victims of break-in/attempted break-in per 100 000 households
- estimated victims of motor vehicle theft per 100 000 households

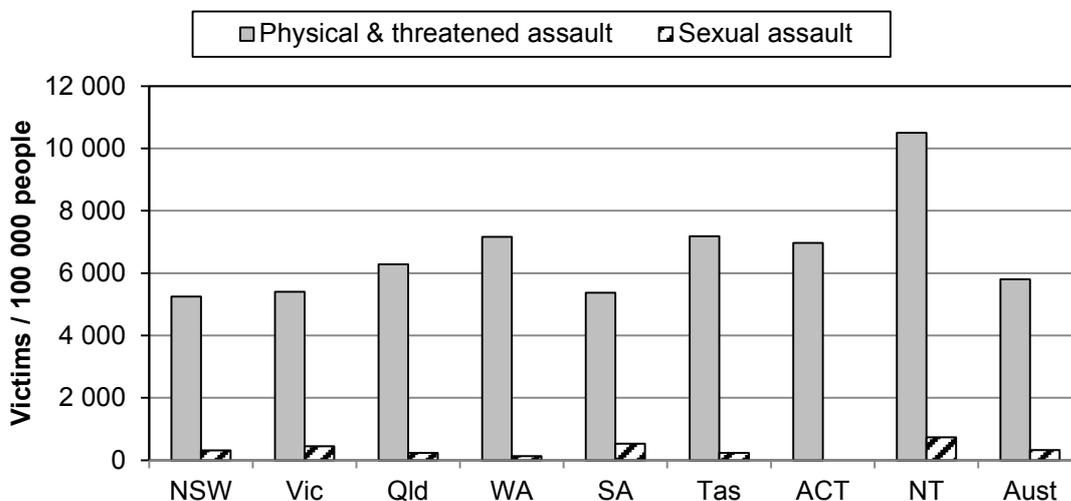

Data reported for this indicator are comparable.

*Source:* Chapter 6.

Based on ABS crime victimisation survey data, nationally in 2010-11, there were

- 5808 victims of physical and threatened assault per 100 000 people (figure C.6)
- 326 victims of sexual assault per 100 000 people (figure C.6)
- 2845 victims of break-in per 100 000 households (figure C.7)
- 2191 victims of attempted break-in per 100 000 households (figure C.7)
- 824 victims of motor vehicle theft per 100 000 households (figure C.7).

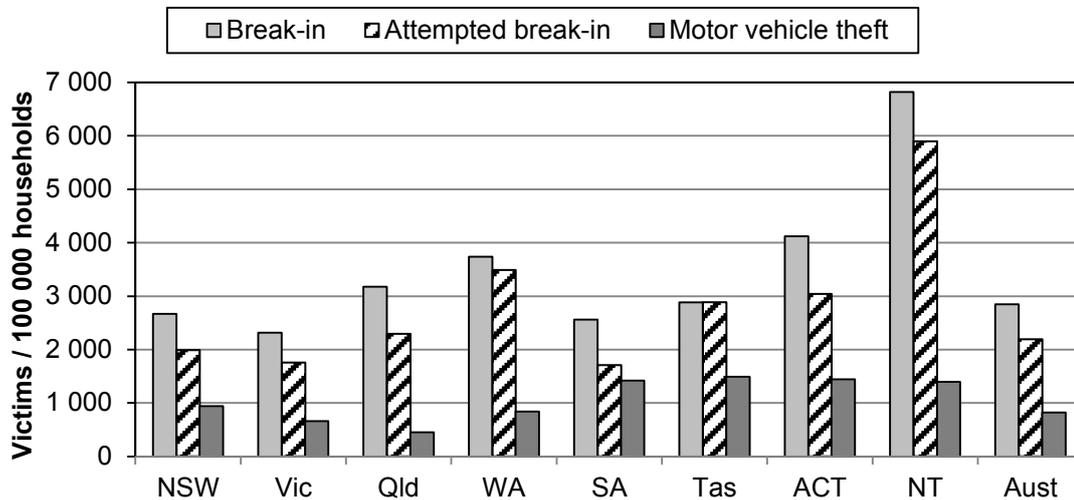

Figure C.6 Estimated victims of physical and sexual assault, 2010-11<sup>a, b, c, d</sup>

<sup>a</sup> A victim is defined as a person reporting at least one of the offences included in the Crime Victimization Survey. Persons who have been a victim of multiple offence types during the reference period were counted once for each offence type for which they were a victim of at least one incident. Individuals may be counted multiple times across offence types and consequently the estimated total number of victims cannot be calculated from this graph. <sup>b</sup> Threatened assault includes face-to-face incidents only. <sup>c</sup> NT data refer to mainly urban areas only. <sup>d</sup> Some robbery and sexual assault rates include data points with large standard errors so that comparisons between jurisdictions and between years should be interpreted with caution. For ACT, the nil or rounded to zero estimate for sexual assault is still subject to error, and despite having a relative standard error of zero (as sampling error is not measured for counts of zero) may differ from the estimate that would be obtained if all persons in the population were included in the survey.

Source: Based on survey data from ABS *Crime Victimization, Australia 2010-11*, Cat. no. 4530.0; tables 6A.27, CA.3.

**Figure C.7 Estimated victims of break-in, attempted break-in and motor vehicle theft, 2010-11<sup>a, b, c</sup>**

<sup>a</sup> A victim is defined as a household reporting at least one of the offences included in the Crime Victimization Survey. Households that have been a victim of multiple offence types during the reference period were counted once for each offence type for which they were a victim of at least one incident. Individuals may be counted multiple times across offence types and consequently the estimated total number of victims cannot be calculated from this graph. <sup>b</sup> NT data refer to mainly urban areas only. <sup>c</sup> Break-in is defined as an incident where the respondent's home, including a garage or shed, had been broken into. Break-in offences relating to respondents' cars or gardens are excluded. Motor vehicle theft is defined as an incident where a motor vehicle was stolen from any member of the respondent's household. It includes privately owned vehicles and excludes vehicles used mainly for commercial business/business purposes.

Source: Based on *Crime Victimization, Australia 2010-11*, Cat. no. 4530.0; tables 6A.28, CA.4.

### Re-offending rates

The extent to which people who have had contact with the criminal justice system are re-arrested, re-convicted or receive further sentences can be viewed as a partial indicator of governments' objective to improve public safety by reducing the incidence of crime (box C.5). The data reported here are sourced from corrective services and police agencies. There are no data currently available on return to courts.

---

### Box C.5 Re-offending rates

'Re-offending rates' are defined as the extent to which people who have had contact with the criminal justice system are re-arrested, re-convicted, or return to community corrections. In this sector overview re-offending is measured by:

- the proportion of offenders who were proceeded against more than once by police during 2010-11
- the proportion of adults released from prison during 2009-10 who returned to corrective services (either prison or community corrections) within two years
- the proportion of adults who were discharged from community corrections orders during 2009-10 who returned with a new correctional sanction within two years.

Repeat offender data are difficult to interpret. A low proportion of repeat offenders may indicate an effective justice system discouraging repeat offending. However, a high proportion of repeat offenders may indicate more effective policing.

Repeat offending rates are not weighted to account for the nature of the re-offence, for example, a return to prison for a traffic offence is counted in the same manner as a return for a more serious offence such as armed robbery. Rates of return to corrective services also do not take into account any further:

- arrests
- re-offending that leads to outcomes that are not administered by corrective services, for example, fines
- correctional sanctions for a repeat offender who has previously been sentenced to only non-correctional sanctions, for example, fines.

The data presented are comparable across jurisdictions, but there are jurisdictional differences in how alleged offenders are dealt with and the range of court and non-court actions available to police.

*Source:* ABS (2012) Recorded Crime – Offenders, 2010-11, Cat. no. 4519.0; State and Territory governments (unpublished).

#### *Offenders proceeded against more than once by police*

An offender can be proceeded against multiple times during a given period. Table C.3 provides data on the number of times offenders, aged 10 years and over, were proceeded against in 2010-11. The data represent each separate occasion that police initiated a legal action against an offender. In each State and Territory, the majority of offenders (around three quarters) were proceeded against only once during 2010-11.

**Table C.3 Number of times offenders were proceeded against during 2010-11 (per cent)<sup>a</sup>**

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA<sup>b</sup></i>	<i>SA<sup>c</sup></i>	<i>Tas</i>	<i>ACT<sup>d</sup></i>	<i>NT</i>

### *Adult offenders released from prison*

The most recent data for adult offenders released from prison who returned to corrective services within two years relate to prisoners released during 2009-10 who returned to corrective services by 2011-12 (table C.4). Nationally, 39.3 per cent of released prisoners had returned to prison within two years, while 46.1 per cent had returned to corrective services.

**Table C.4 Prisoners released during 2009-10 who returned to corrective services with a new correctional sanction within two years (per cent)<sup>a</sup>**

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
Prisoners returning to:									
— prison	42.5	35.1	37.7	36.1	29.1	36.4	40.8	52.4	39.3
— corrective services <sup>b</sup>	46.9	44.6	43.1	49.8	41.3	48.0	56.1	53.2	46.1

<sup>a</sup> Refers to all prisoners released following a term of sentenced imprisonment including prisoners subject to correctional supervision following release, that is, offenders released on parole or other community corrections orders. Data include returns to prison resulting from the cancellation of a parole order. <sup>b</sup> Includes a prison sentence or a community corrections order.

Source: State and Territory governments (unpublished).

Table C.5 provides a time series on the proportion of adult offenders released from prison who returned to prison under sentence within two years. Approximately 4 in 10 released prisoners return to prison within two years and this ratio has remained relatively stable since 2007-08.

**Table C.5 Prisoners released who returned to prison under sentence within two years (per cent)**

	<i>NSW</i> <sup>a</sup>	<i>Vic</i> <sup>b, c</sup>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i> <sup>c</sup>
2007-08	43.0	35.5	33.6	42.3	33.2	36.0	..	44.8	38.8
2008-09	42.9	34.0	37.9	44.7	32.2	36.4	..	47.3	40.0
2009-10	42.4	33.7	33.5	45.3	30.2	31.7	..	47.9	38.5
2010-11	43.3	37.1	35.2	44.2	29.8	36.2	na	47.1	39.8
2011-12	42.5	35.1	37.7	36.1	29.1	36.4	40.8	52.4	39.3

<sup>a</sup> NSW data for 2010-11 have been revised to include a small number of prisoners discharged from prison into the Community Offender Support Program. <sup>b</sup> Victoria's data for 2007-08 to 2010-11 have been updated to take into account a small number of returned prisoners whose recorded status changed from unsentenced to sentenced after the data for that year had been submitted and who therefore fell within the scope of the counting rule. <sup>c</sup> Australian averages have been amended accordingly. Both the jurisdictional and the national percentages have changed only marginally as a result of these revisions. **na** Not available. **..** Not applicable.

Source: State and Territory governments (unpublished).

### *Adult offenders discharged from community corrections orders*

Table C.6 provides data on offenders who were discharged after serving orders administered by community corrections, including post-prison orders such as parole or licence, and then returned with a new correctional sanction within two years. Nationally, of those offenders who were released during 2009-10, 14.2 per cent had returned with a new correctional sanction to community corrections, and 24.1 per cent had returned to corrective services by 2011-12.

**Table C.6 Offenders discharged from community corrections orders during 2009-10 who returned with a new correctional sanction within two years (per cent)**

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
Offenders returning to:									
— community corrections	11.8	14.3	17.1	12.6	16.0	18.7	18.7	8.6	14.2
— corrective services <sup>a</sup>	21.5	21.3	32.2	17.6	24.2	23.8	21.3	28.2	24.1

<sup>a</sup> Includes a prison sentence or a community corrections order.

---

### *Justice staff*

‘Justice staff’ employed relative to the population is an indicator of governments’ aim to provide justice services in an equitable and efficient manner (box C.6). Staffing for police and courts are reported per 100 000 population.

#### **Box C.6 Justice staff for police and courts**

Justice staff for police and courts are defined by two measures:

- Police staff are categorised according to operational status. An operational police staff member is any member whose primary duty is the delivery of police or police-related services to an external client (primarily members of the public but may also include other government departments). Specialised activities may be outsourced or undertaken by administrative (unsworn) staff. The number of operational and total police staff are presented relative to the population.
- Judicial officers relates to access to the number of judicial officers available to deal with cases in relation to population size. A judicial officer is defined as an officer who can make enforceable orders of the court. The number of judicial officers is expressed in full time equivalent units and where judicial officers have both judicial and non-judicial work, it refers to the proportion of time allocated to judicial work. The number of FTE judicial officers is presented relative to the population. A higher proportion of judicial officers in the population indicates potentially greater access to the judicial system.

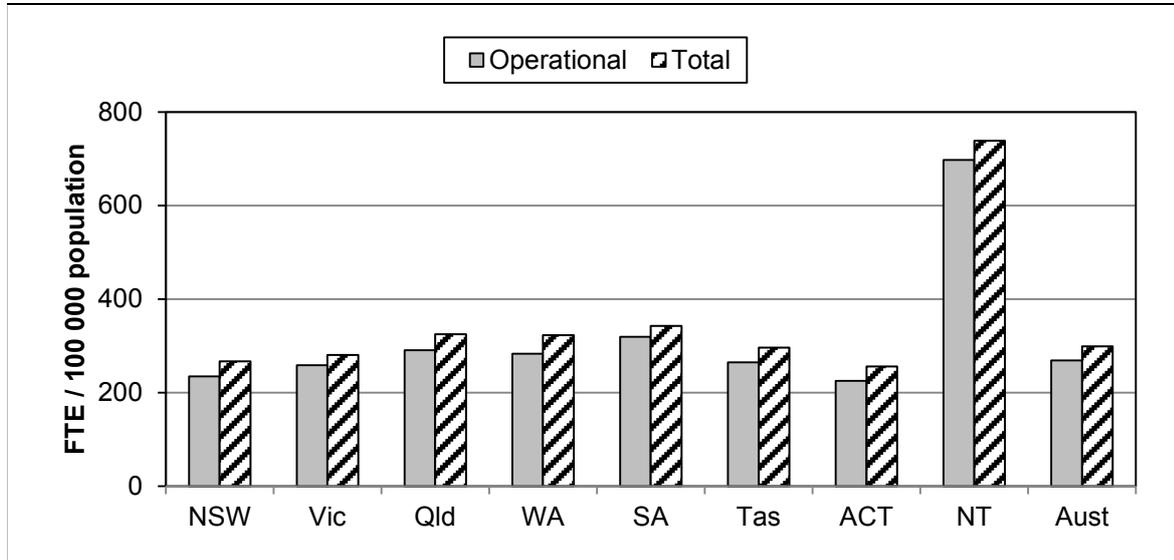

Data reported for this indicator are comparable.

*Source:* Chapters 6 and 7.

### *Police staff*

Nationally, there was a total of 60 364 operational and 6792 non-operational staff in 2011-12. Approximately 90 per cent of police staff were operational in Australia in 2011-12. Nationally, on average, there were 268 operational police staff per 100 000 people (figure C.8). The number of staff per 100 000 people varies across jurisdictions, in part, due to differing operating environments.

**Figure C.8 Police staff per 100 000 population, 2011-12<sup>a</sup>**

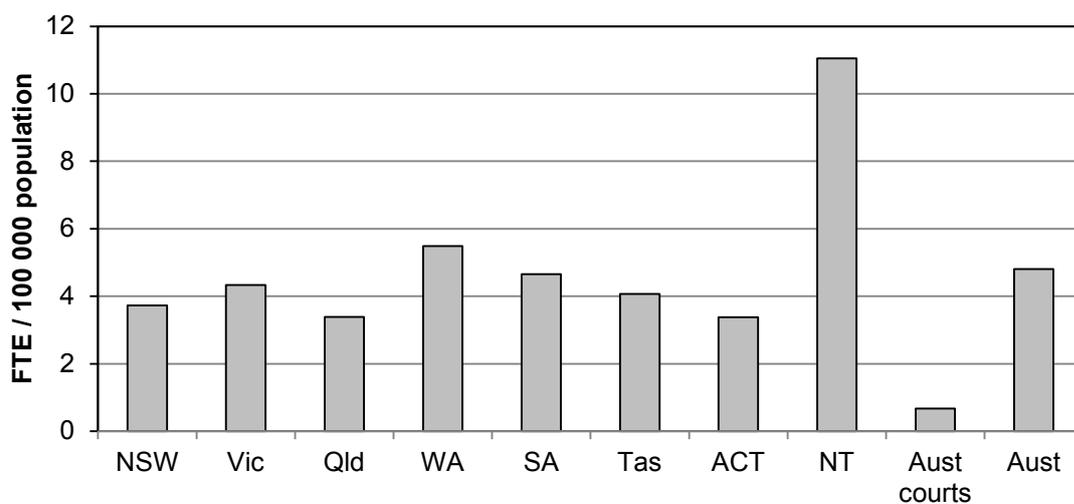

<sup>a</sup> Data comprise all FTE staff except in the NT where data are based on a headcount at 30 June.

Source: State and Territory governments (unpublished); table CA.5.

### *Judicial officers*

Nationally, there were 4.8 FTE judicial officers per 100 000 population in 2011-12 (figure C.9). Factors such as geographical dispersion, judicial workload and population density should be considered when comparing data on judicial officers.

**Figure C.9 Judicial officers per 100 000 population, 2011-12**

Source: State and Territory governments (unpublished); table CA.6.

---

*Higher court defendants resulting in a guilty plea or finding*

‘Higher court defendants resulting in a guilty plea or finding’ is an indicator of governments’ objective to achieve efficient and effective court case management for judicial processing (box C.7).

**Box C.7 Higher court defendants resulting in a guilty plea or finding**

‘Higher court defendants resulting in a guilty plea or finding’ is defined as the number of higher courts finalised adjudicated defendants who either submitted a guilty plea or were found guilty, as a proportion of the total number of higher courts adjudicated defendants.

A high or increasing proportion of higher courts adjudicated defendants submitting a guilty plea or being the subject of a guilty finding is desirable.

This indicator does not provide information on the number of defendants where police have identified a likely offender, but choose not to bring the likely offender to trial due to a variety of factors, nor to cases that have been finalised by a non-adjudicated method.

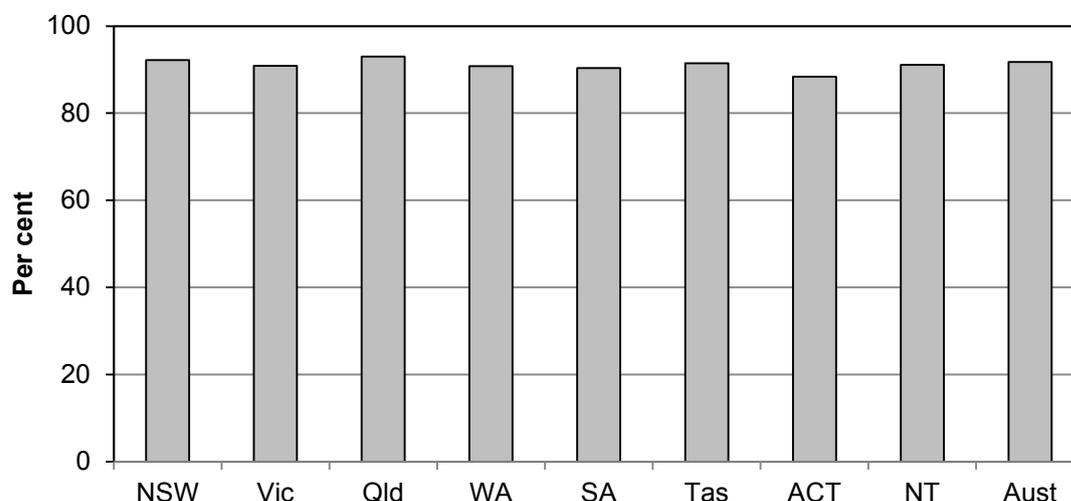

Data reported for this indicator are comparable.

The proportion of higher court finalised adjudicated defendants who either submitted a guilty plea or were found guilty in 2010-11 was 92 per cent nationally and similar across jurisdictions (figure C.10).

---

Figure C.10 **Proportion of higher court finalised adjudicated defendants resulting in a guilty plea or finding, 2010-11<sup>a, b</sup>**

---

<sup>a</sup> A defendant can be either a person or organisation against whom one or more criminal charges have been laid. <sup>b</sup> Higher courts comprise the Supreme Court and the District courts.

## Service-specific performance indicator frameworks

This section summarises information from the three justice service specific indicator frameworks:

- police services (see chapter 6 for more detail)
- courts (see chapter 7 for more detail)
- corrective services (see chapter 8 for more detail).

Each performance indicator framework provides comprehensive information on the equity, effectiveness and efficiency of specific government services.

Additional information is available in each chapter and associated attachment tables to assist the interpretation of these results:

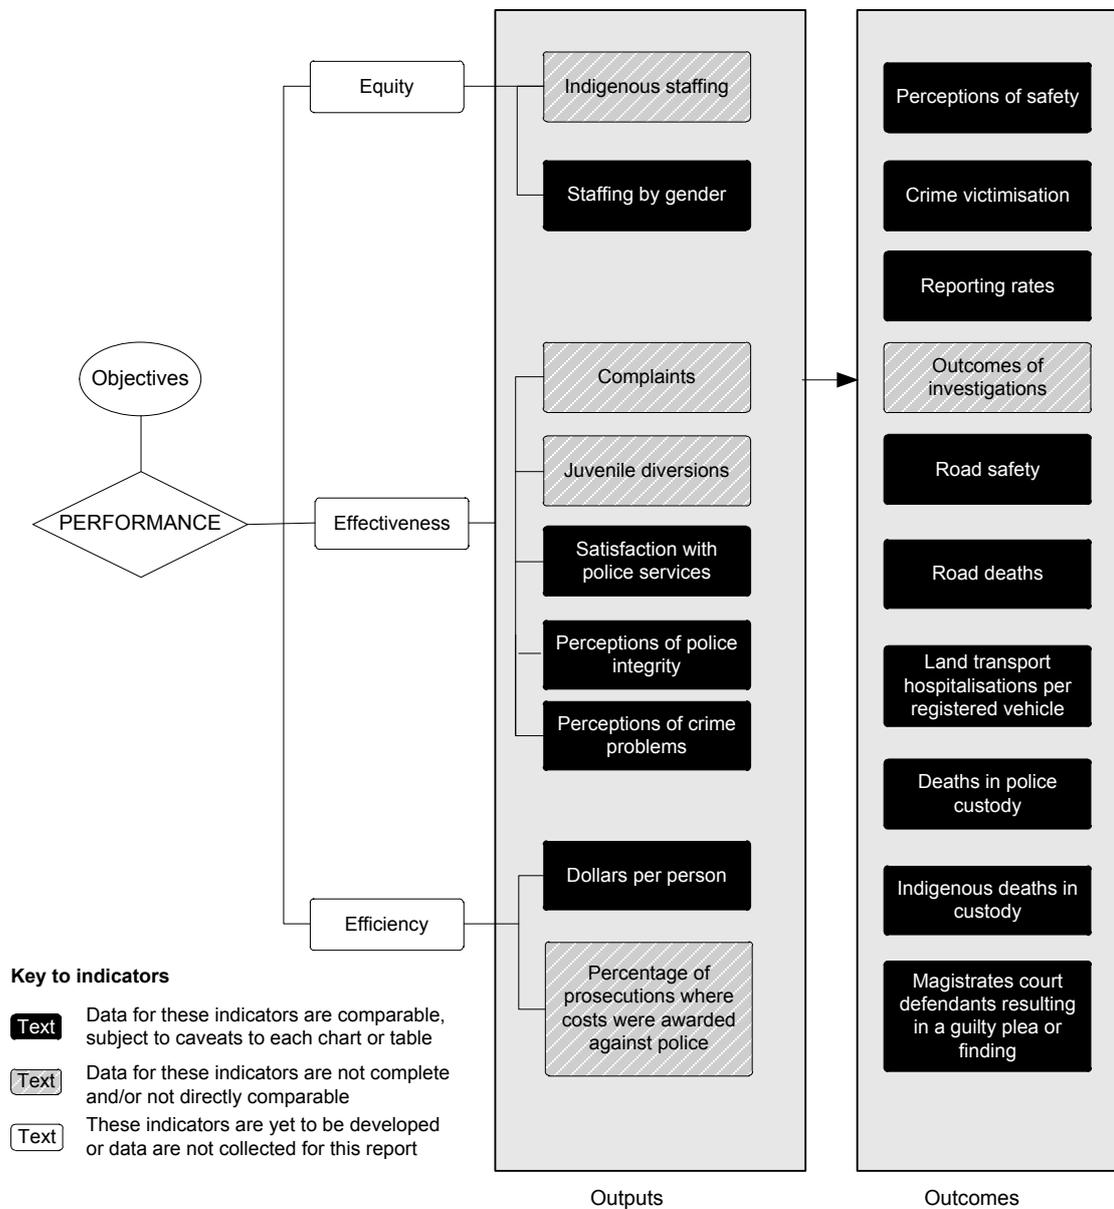

- indicator interpretation boxes, which define the measures used and indicate any significant conceptual or methodological issues with the reported information
- caveats and footnotes to the reported data
- additional measures and further disaggregation of reported measures
- data quality information for many indicators, based on the ABS Data Quality Framework.

A full list of attachment tables and available data quality information are provided at the end of chapters 6, 7 and 8.

### Police services

The performance indicator framework for police services is presented in figure C.11.

Figure C.11 Police services performance indicator framework

An overview of the police services performance indicator results for 2011-12 is presented in table C.7.

### **C.3 Cross-cutting and interface issues**

Although service areas are represented in separate chapters in this Report, performance results are to some extent interdependent. Changes to the functions and operations of each element of the justice system can affect the other parts of the system, for example, the effect of:

- police services on the courts through the implementation of initiatives such as the issue of police cautions and other diversionary strategies
- police and courts on corrective services, such as use of court diversion schemes, bail and the range of sentencing options available
- correctional systems' services on courts sentencing decisions through court advice services.

There is a trend toward the delivery of justice services through partnerships between agencies, in order to address complex issues and client needs. For example, bail or housing support programs, Neighbourhood Justice centres in Victoria, specialist courts such as Indigenous and drug courts, adoption of restorative justice principles.

### **C.4 Future directions in performance reporting**

This justice sector overview will continue to be developed in future reports.

The Police services, courts and corrective services chapters contain a service-specific section on future directions in performance reporting.

# CA Justice sector overview - attachment

Definitions for the indicators and descriptors in this attachment are in the Justice Sector Overview and chapters 6, 7 and 8. Data for past years have been revised for some jurisdictions, where this has occurred, totals and any derived data have been recalculated. For this reason data for past years presented in this Report may vary from figures published in earlier editions of this Report.

This file is available in Adobe PDF format on the Review web page ([www.pc.gov.au/gsp](http://www.pc.gov.au/gsp)). Users without Internet access can contact the Secretariat to obtain these tables (see details on the inside front cover of the Report).

(a) A victim is defined as a person reporting at least one of the offences included in the Crime Victimization Survey 2010-11. Persons who have been a victim of multiple offence types during the reference period were counted once for each offence type for which they were a victim of at least one incident. Individuals may be counted multiple times across offence types and consequently the estimated total number of victims cannot be calculated from this table.

(b) Nos. per 100,000 were calculated using as denominators, the relevant populations published in ABS data cube 45300D006.

(c) Some robbery and sexual assault rates include data points with large standard errors so that comparisons between jurisdictions and between years should be interpreted with caution. A nil estimate in a survey (see ACT) is still subject to error, and despite having a relative standard error of 0 (as sampling error is not measured for counts of zero) may differ from the estimate that would be obtained if all persons in the population were included in the survey.

(d) Threatened assault includes face-to-face incidents only.

— nil or rounded to zero

TABLE CA.4

**Table CA.4 Estimated victims of selected property crimes, reported and unreported (number in '000 and number per 100 000 households), 2010-11 (a), (b), (c), (d), (e), (f), (g)**

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
<i>Number '000</i>									
Break-in	72.9	49.6	54.1	32.8	16.8	6.0	5.7	4.4	242.4
Attempted break-in	54.3	37.6	39.0	30.6	11.2	6.0	4.2	3.8	186.7
Motor vehicle theft	25.7	14.2	7.7	7.4	9.3	3.1	2.0	0.9	70.2
Theft from motor vehicle	76.8	73.5	51.2	48.1	23.0	4.8	8.1	5.5	291.1
Malicious property damage	223.6	174.7	119.0	95.6	60.5	20.1	19.2	10.1	722.8
Other theft	80.4	76.2	61.0	33.2	16.9	8.7	4.8	3.5	284.8
<i>No. per 100 000 households</i>									
Break-in	2 669	2 316	3 178	3 739	2 560	2 886	4 121	6 822	2 845
Attempted break-in	1 988	1 756	2 291	3 488	1 707	2 886	3 037	5 891	2 191
Motor vehicle theft	941	663	452	844	1 417	1 491	1 446	1 395	824
Theft from motor vehicle	2 811	3 432	3 008	5 483	3 505	2 309	5 857	8 527	3 417
Malicious property damage	8 185	8 157	6 991	10 898	9 220	9 668	13 883	15 659	8 484
Other theft	2 943	3 558	3 584	3 785	2 575	4 185	3 471	5 426	3 343

- (a) A victim is defined as a household reporting at least one of the offences included in the Crime Victimization Survey 2010-11. Households that have been a victim of multiple offence types during the reference period were counted once for each offence type for which they were a victim of at least one incident.
- (b) NT data refer to mainly urban areas only.
- (c) A victim of break-in is defined as a household experiencing at least one break-in/attempted break-in. Break-in is defined as an incident where the respondent's home including a garage or shed had been broken into. Break-in offences relating to respondents' cars or gardens are excluded.
- (d) A victim of motor vehicle theft is defined as a household reporting at least one motor vehicle theft. Victims were counted once only, regardless of the number of incidents of motor vehicle theft. Motor vehicle theft is defined as an incident where a motor vehicle was stolen from any member of the respondent's household. It includes privately owned vehicles and excludes vehicles used mainly for commercial business/business purposes.
- (e) The crime rate is expressed as the no. per 100 000 households as reported in ABS data cube 45300D006.
- (f) Motor vehicle theft for the ACT and NT has a relative standard error of 25% to 50% and should be used with caution.
- (g) The offences included in "other theft" can vary between states and territories. It can include the offence of 'theft from a person' which is not a property crime.
