

I have cared for so many for so long now I need care but with arthritis from head to foot, spinal damage/bipolar I dont qualify my issues are either seen as not permanent (not true) or medical conditions (a lot of disabilities are but are disabling non the less. I cant stand for long /sit for long etc etc etc I need help . Yet there are others with similar or less issues who have qualified. I dont see specialists because there is nothing they can do. My GP knows me and my issues etc but she isn't good enough for the NDIS . I cant cope any more, just ask for a review , just re apply . I shouldn't have to its a fraud
