

Inquiry into waste generation and resource efficiency  
LB2 Collins St East  
MELBOURNE VIC 8003

To whom it may concern.

I am offering a suggestion which concerns street lighting. As I have a hearing disability I will not be attending the commission proceedings, nor do I have Email.

I observe that the street lights in this area, also in parts of Sydney where I have stayed, are turned on in daylight an hour or so before dark. In the mornings they are left on for a similar time after reasonable daylight. Reducing the street light period to a sensible time would of course reduce the consumption of electricity. The timing could be adjusted according to the season.

Best wishers for the inquiry.

Yours Sincerely

Ruth Mary  
Wentworth Falls, NSW
