

* where "Mainstream PSYCHIATRY" is defined as any form of Psychiatry that uses the DSM

"Mainstream PSYCHIATRY"* is exposed as being unscientific as it has no answers to some very basic questions. These **QUESTIONS** concern quite well-known phenomena associated with Mental Illnesses. [The Inmates are Running the Asylum - film](#)

QUESTIONS

explanations

ANSWERS

1 Why is it common for people suffering from a Mental Illness to **'hear voices'**?

in psychiatry *'hearing voices'* is a possible symptom of **schizophrenia** - see [SUCCESSFULschizophrenia.org](#)

someone who's near-fully or fully enlivened their Throat Chakra is **ClairAudient** → *'hearing voices'* is a precursor to the **2nd Initiation**

2 Why do people suffering from a Mental Illness think that they are a **"Messenger from/of God/Jesus"**? (or **"only answer to Jesus"** as) (was the case with Luke BATTY's) (father - Greg ANDERSON)

"birth of Christ consciousness in the cave of the Heart"

1st Initiation

* - link to **QUESTION 4**

↑ (enlivening the **Heart Chakra**) ↑ I have deduced that the (Spiritual) Initiations are linked to the Chakras & so enlivening each Chakra partially qualifies one for the associated Initiation.

7 **Psychiatry almost ignores the SUB-conscious!** When someone tells me they're having Mental Problems the **QUESTION*** I immediately ask is, **"What have you done that's AMAZING?"**

7a **Jungian Analysts deal with the Unconscious.**

3 Why is it common for people suffering from a Mental Illness to have *'hallucinations'*?

in psychiatry *'hallucinations'* is **"perception in the absence of any stimulus"** - they can be either auditory or *visual* OR both! - see [Hallucinations](#)

someone who has enlivened their **Throat Chakra** is **ClairAudient** or **Brow Chakra** is **ClairVoyant** -

3rd Initiation

If ever there's one single thing which exposes Psychiatry for being what it is, **unscientific**, it is this! **"M-theory"**, a respected Principle in Cosmology where there is an infinite number of dimensions, is simply either ignored or not considered at all in this **ANTI-science called Psychiatry!** The *'Mental Patient'* is simply accessing information/experience from another dimension(s).

In modern-day parlance it's called channelling or simply being psychic!

4 Why is it common for people who have had a Mental Illness to have done something amazing?

These people are highly developed already and therefore they are approaching/have commenced the test for experiencing and eventually recovering from Mental Illness.

You'd think that a Psychiatrist would've noticed this correlation between Mental Problems & High Achievement

[The association between serious mental illness & creativity first appeared in literature in the 1970s this is predated to at least the time of Aristotle.](#)

In the shamanic view, Mental Illness signals "the birth of a healer," ..

6 Why do **Panic Attacks** generally last for a set period for each individual?

The physiology of each human differs and **only a certain amount of enlivenment** of the **Heart Chakra**, **Throat Chakra** or **3rd Eye/Brow Chakra**, or any combination of these Chakras, is therefore possible!

6 **Panic Attacks**

I contend that there seems to be a set period for the length of these paralysing Panic Attacks for each person. Mine lasted for 20 minutes exactly before they began to diminish. The Mental Anguish was not over by any means but after this time had elapsed, since the commencement of the Panic Attack, I knew that things would improve.

Sir John KIRWIN had Panic Attacks which lasted 2 minutes. I knew someone from my Art Therapy Class who told me that his were about the same length as mine – but the first one was longer. Googling reveals that these Panic Attacks typically last for about 30 minutes. From Beyond Blue – “Panic attacks reach a peak within about 10 minutes and usually last for up to half an hour, ...”. I asked one of the people working for BATYR, who was written about in a newspaper article as having experienced Panic Attacks how long his Panic Attacks lasted and he answered, **“Six minutes.”**

More study is required before any definitive conclusion(s) can be made between any connection between the physiology of a person experiencing a Panic Attack and the length of these Panic Attacks.
