

11/1/20

Dear Sir/Madam,

I am writing this letter to you as a concerned father and soon to be grandfather in regards to the mental health inquiry and the proposal to screen all children from 0-5.

My concern is in regards to the checklist that is being proposed to screen children.

Every child at some point during the screening processes is going to manifest one of those traits which would result in these children being on psychiatric drugs.

This is a very wrong and bad solution and this proposal should not be pushed thru.

We should be loving our children not drugging our children.

Regards,

ANT TAYLOR
