Dear Sirs

**Submission to the Productivity Commission investigating the Economic Regulation of Airports**

I have lived in Woolwich for the last thirty years and the aircraft noise has become louder and louder over the years and I strongly oppose any suggestion to remove the existing curfew.

As it is I am unable to sleep until the last plane of the evening has flown over and I now have to rise well before 6am, so that I can meditate without interruption.

There are regulations regarding work practices and this should also apply to plane noise we all deserve peaceful right to enjoyment of our homes and neighbourhood without the constant rumble of planes.

It is quite unacceptable that a draft report of 'Sydney Airport Master Plan to 2039' was held at Hunters Hill Town Hall with only 24 hours' notice. This has such a huge impact on residents of not only of Hunters Hill but surrounding suburbs and much of Sydney and it is simply not fair to expect the residents of Sydney to accept more noise and air pollution from aircraft movements without having a say! Even as I am writing this submission the planes are constantly flying over the top of my home.

I refuse to accept the proposition that Sydney Airport Shareholders should effectively have the power to authorise aircraft movements in the middle of the night over our homes.

Yours Faithfully

Coleen Tracey
