

To whom it may concern,

RE: Productivity Commission 'Future foundations for giving' draft report

In relation to this draft report. I do want to illustrate the huge negative impact it would have if proceeding with reducing or removing the DGR status for these schooling, childcare, aged care etc bodies. I am aware that these private organisations actually look after a huge amount of people and that the public system is actually (for want of a better word) overwhelmed already.

Obviously, any major change like this to these facilities would mean that:

- a. The costs for each attendee would have to be increased, and/or:
- b. The quality of life, schooling, care etc would have to be reduced, and/or:
- c. Some of these facilities would need to close, and/or:
- d. Keeping up with current developments/technology would not be possible, and/or:
- e. More people would be forced into 'other ways' to survive, and/or,
- f. More pressure put on public/ fully funded/ overwhelmed facilities.

Therefore I really believe it would set on a downward spiral.

Thank you for your time, please genuinely consider my serious concerns about this.

Sincerely,

Daniel Dartnall.
