

Brief submission

Private and Public systems cover different needs and should not be confused or integrated. I need a cataract op??? Private will do fine ! I have a chronic intractable medical condition? Thank goodness for the Public System!

I see people who have gone private burdened with ongoing expenses ...and others who they come back to.

The systems are not dealing fairly with people , in not informing them clearly the benefits and disadvantages of going Private ,

Medicare saves lives . It gives us specialists time and opportunity to investigate troublesome conditions without extra unexpected expenses for necessary investigations whereas Private expenses may deter the patient from continuing . Want any more????
