

To Productivity Commission Enquiry
into Mental Health

The Commissioner.

Dear Sir / Madam,

I am concerned about young children being subjected to mental health screening both before and after ~~set~~ starting school.

I used to tutor English to students many years ago and was not happy with those students who were on medication. I found them very hard to teach compared with those who were not on medication.

I feel that, by going ahead with this proposal would be a waste of money and would not achieve anything of any value.

I, therefore, respectfully request that the commissioner not go ahead with the proposal.

Ron Mann
Retired.
