

13/1/20

To whom It May concern.

I am writing in protest of the proposed screening of children 0-3 years old.

This is totally against human rights. Children of this age (in fact any age) should not be subjected to this. In fact no human being should be.

There is too much evidence against the psychiatric drugging of anyone. This leads to more depression, more suicides, more violent behaviour.

You cannot possibly say that because a child is very active, maybe doesn't sleep well every night or is fussy with his food - that he has some sort of mental health issue.

Children are children! They get upset, they get tired, they get hungry. This is not a mental health issue. It is life. Even over active children, who have been diagnosed with such things as ADHD should not have been so grossly mis-diagnosed. Have their diets been checked, have other things been checked before they are given mind altering psychotropic drugs.

Psychiatry is not the answer and the

Screening of children is definitely not free

Answer.

I challenge all psychologists & all people in  
favor of this invasive proposal to Honorable,  
take the drugs & have the treatment being offered.

I am very very sure ~~no~~ one will!!!.

This proposal is just trying to make teachers

out of revenge so that they can't Honorable

be in charge of their own lives & make decisions

and think for themselves.

I am totally, totally against this &

it should definitely not be put through

Parliament or anywhere.

It is a joke that it is even being

considered.
