

# 13A Services for people with a disability — attachment

Definitions for the indicators and descriptors in this attachment are in section 13.6 of the chapter. Data in this chapter are examined by the Disability Services Working Group, but have not been formally audited by the Secretariat. A peer review process is also undertaken by the Disability Services Working Group in the development of the data definitions. Unsourced information was obtained from the Australian, State and Territory governments.

This file is available in Adobe PDF format on the Review web page ([www.pc.gov.au/gsp](http://www.pc.gov.au/gsp)). Users without Internet access can contact the Secretariat to obtain these tables (see details on the inside front cover of the Report).

Table 13A.1

Schooling or employment restriction										
Proportion	%	9.1	11.1	12.8	11.8	13.5	13.9	6.6	np	10.9

(a) Core activities comprise communication, mobility and self care.

(b) Data are age standardised.

(c) For the 2003 ABS Survey of Disability, Ageing and Carers, Australia, the sample in the NT was reduced to a level such that NT records contributed appropriately to national estimates but could not support reliable estimates for the NT. As a result, estimates for the NT are not published separately by the ABS.

**np** Not published.

<b>Total</b>	<b>%</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>

- (a) Service user data are estimates after a statistical linkage key is used to account for individuals who received more than one service on the snapshot day. Totals may not be the sum of the components since individuals might have accessed both a government and a non-government service on the snapshot day or services from more than one State or Territory for accommodation support, community support and community access services.
- (b) Totals include six users of two accommodation support services in SA that were not identified as government or non-government.
- (c) Data for users of CSDA services funded by the states and territories exclude psychiatric services identified by the jurisdiction.
- (d) Data for the following service types: advocacy, information/referral, combined advocacy/information, print disability/alternative formats of communication, service evaluation/training, peak bodies, research/development and others were not collected in 2001. Data for users of the following CSDA funded service types were not collected: advocacy, information/referral, combined information/advocacy, mutual support/self-help groups, print disability/alternate formats of communication, research and evaluation, training and development, peak bodies and other support services in 2002.
- (e) See previous reports for notes relating to data before 2001.
- (f) Reclassification of disability service types in 2002 resulted in some elements of community support transferring to community access, affecting user counts for these service types.
- (g) Australian Government administered services classified as 'government' are not provided by the Australian Government but by organisations classified as Australian Government related, such as universities.
- (h) Australian Government data for 2002 was preliminary and covered 99 per cent of Australian Government funded services.

**na** Not available. – Nil or rounded to zero.

**Table 13A.4 Users of Commonwealth State/Territory Disability Agreement (CSTDA) government and non-government provided services, by service type, from 1 January 2003 to 30 June 2003 (a), (b), (c), (d), (e), (f)**

	<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
(a)	Service user data are estimates after a statistical linkage key is used to account for individuals who received services from more than one service type outlet from 1 January 2003 to 30 June 2003. Totals for Australia may not be the sum of the components since individuals might have accessed services in more than one State or Territory during the six month period. Totals for services administered by State and Territory governments may not be the sum of the government and non-government components as the auspicing agency was 'not stated' for some service users. Totals for each State and Territory or service group may not be the sum of the government and non-government components since individuals might have accessed both government and non-government provided services during the six month period.									
(b)	Total of all State and Territory government administered services includes 177 service users in NSW whose service type was not stated.									
(c)	Data for service users of CSTDA services funded by the states and territories exclude psychiatric services identified by the jurisdiction.									
(d)	Data for service users of the following CSTDA funded service types were not collected: advocacy, information/referral, combined information/advocacy, mutual support/self-help groups, print disability/alt. formats of communication, research & evaluation, training & development, peak bodies and other support services.									
(e)	Service user data collected under the CSTDA NMDS from 1 January 2003 to 30 June 2003 are not comparable with data from the previous CSDA MDS snapshot day collections.									
(f)	These data need to be viewed with care, being the first data available under the new CSTDA NMDS. Data will improve in future years as the collection process is refined.									
(g)	Australian Government administered services classified as 'government' are not provided by the Australian Government but by organisations classified as Australian Government related, such as universities.									
	– Nil or rounded to zero.

(a) Service user data are estimates after a statistical linkage key is used to account for individuals who received more than one service on the snapshot day. Where primary disability group was inconsistently recorded for the same user, the person was allocated a primary disability group according to a standard method (see AIHW 2002). Row totals may not be the sum of the components since individuals might have accessed services from more than one jurisdiction on the snapshot day.

(b) Data for users of CSDA services funded by the states and territories exclude psychiatric services identified by the jurisdiction.

(c) Data provided by the Commonwealth are preliminary and cover 99 per cent of Commonwealth funded services.

(d) See previous reports for notes relating to data before 2001.

– Nil or rounded to zero.

- (a) Service user data are estimates after a statistical linkage key is used to account for individuals who received more than one service on the snapshot day. Where disability groups were inconsistently recorded for the same person all recorded types were included. Totals may not be the sum of the components since individuals might have accessed services from more than one jurisdiction on the snapshot day. Total percentages add to more than 100 per cent because a service user may nominate one or more 'other significant' disability groups in addition to a primary disability group.
- (b) Data for users of CSDA services funded by the states and territories exclude psychiatric services identified by the jurisdiction.
- (c) Data provided by the Australian Government are preliminary and cover 99 per cent of Australian Government funded services.
- (d) See previous reports for notes relating to data before 2001.  
– Nil or rounded to zero.

Table 13A.9

**Table 13A.9 Users of CSDA community accommodation and care services as a proportion of all accommodation support service users, on a snapshot day (per cent) (a), (b), (c), (d)**

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
1999	58.1	77.0	85.0	72.9	45.8	63.2	100.0	100.0	69.2
2000	62.0	79.2	85.6	75.2	51.6	61.3	100.0	100.0	71.5
2001	64.1	79.4	87.6	74.6	51.6	74.0	100.0	100.0	73.0
2002	65.6	81.0	76.3	74.0	59.5	75.7	100.0	100.0	72.9

- (a) Service user data are estimates after a statistical linkage key is used to account for individuals who received more than one service on the snapshot day. Where the accommodation service type was inconsistently recorded for the same user, the user was counted as receiving an institutional/residential or hostel accommodation support service. Totals may not be the sum of the components because individuals might have accessed services from more than one jurisdiction on the snapshot day.
- (b) Community accommodation and care services include group homes, attendant care, outreach/other in-home/drop-in support, alternative family placement and other accommodation support for data prior to 2002. Community accommodation and care services include group homes, attendant care/personal care, in-home accommodation support, alternative family placement and other accommodation support for 2002 data.
- (c) Data for users of CSDA funded accommodation support services exclude psychiatric services identified by the jurisdiction.
- (d) See previous reports for notes relating to data before 2001.

Table 13A.10

Table 13A.10 **Users of CSTDA community accommodation and care services as a proportion of all accommodation support service users, from 1 January 2003 to 30 June 2003 (per cent) (a), (b), (c), (d), (e)**

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
2003	68.5	84.7	81.3	86.0	72.0	80.6	100.0	100.0	78.4

- (a) Service user data are estimates after a statistical linkage key is used to account for individuals who received services from more than one service type outlet from 1 January 2003 to 30 June 2003. Individuals might have accessed services from more than one State or Territory over the six month period. Individuals might have accessed services from both accommodation service type categories.
- (b) Data for service users of CSTDA funded accommodation support services exclude psychiatric services identified by the jurisdiction.
- (c) Community accommodation and care services include group homes, attendant care/personal care, in-home accommodation support, alternative family placement, and other accommodation support.
- (d) Service user data collected under the CSTDA NMDS from 1 January 2003 to 30 June 2003 are not comparable with data from the previous CSDA MDS snapshot day collections.
- (e) The service user data used to derive this indicator have quality issues related to the development of the new CSTDA NMDS. These issues include differences in the proportion of service outlets that responded across jurisdictions. This indicator thus needs to be interpreted with care.

Average annual growth rate between 1999 and 2002										
Growth rate	%	2.9	4.4	-0.4	-5.3	6.1	6.5	2.5	0.3	2.4

- (a) Service user data are estimates after a statistical linkage key is used to account for individuals who received more than one service on the snapshot day. Totals may not be the sum of the components because individuals might have accessed services from more than one jurisdiction on the snapshot day.
- (b) Data are estimates. Population estimates of 9000 or less have a relative standard error of 25 per cent or more.
- (c) The potential population estimates (national age and sex rates applied to each jurisdiction) for accommodation services are the number of people aged less than 65 years, with profound and/or severe core activity limitation, adjusted for the Indigenous factor for that jurisdiction.
- (d) Data for users of CSDA funded accommodation support services exclude psychiatric services identified by the jurisdiction.
- (e) See previous reports for notes relating to data before 2001.
- (f) WA user data for 1999 to 2001 are inflated by between 123 and 466 users due to incorrect coding by two providers over this time period. This error has been corrected for 2002 data.

- (a) Service user data are estimates after a statistical linkage key is used to account for individuals who received more than one service on the snapshot day.
- (b) Data are estimates. Population estimates of 9000 or less have a relative standard error of 25 per cent or more.
- (c) The potential population estimates (national age and sex rates applied to each jurisdiction) for employment services are the number of people aged 15–64 years with a severe or profound core activity limitation, multiplied by both the Indigenous factor and the labour force participation rate for that jurisdiction. Due to this adjustment the sum of the potential populations of the jurisdictions is not necessarily equal to the national total.
- (d) See previous reports for notes relating to data before 2001.

- (a) Service user data are estimates after a statistical linkage key is used to account for individuals who received more than one service on the snapshot day. Totals may not be the sum of the components because individuals might have accessed services from more than one jurisdiction on the snapshot day.
- (b) Data are estimates. Population estimates of 9000 or less have a relative standard error of 25 per cent or more.
- (c) The potential population estimates (national age and sex rates applied to each jurisdiction) for community access services are the number of people aged 15–64 years, with a severe or profound core activity limitation, multiplied by the Indigenous factor for that jurisdiction.
- (d) Community access services in 2001 include users using the community access service types continuing education/independent living training/adult training centre, post-school options/social and community support/community access and other community access and day programs. Community access services in 2002 include users using the community access service types learning and life skills development and other community access, but not recreation/holiday programs.
- (e) Data for users of CSDA funded community access services exclude psychiatric services identified by the jurisdiction.
- (f) Data may have different inclusions for different jurisdictions which may explain the variability across jurisdictions. Data are therefore not strictly comparable.

(a) Service user data are estimates after a statistical linkage key is used to account for individuals who received more than one service on the snapshot day. Where the level of support need was inconsistently recorded for the same user, the person was allocated a level of support according to a standard method. Row totals may not be the sum of the components because individuals might have accessed services from more than one State or Territory on the snapshot day.

**Table 13A.19 Users of CSDA accommodation support services on a snapshot day, by severity of core activity limitation (a), (b), (c), (d), (e)**

	<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
(b)	Data exclude 243 users in 2000-01 and 239 users in 2001-02 who did not report a need for support with self care, mobility or communication. User totals do not, therefore, necessarily match those in other tables.									
(c)	Severity of core activity limitation is derived using data on level of support needed in one or more of the support areas: self care, mobility and communication. Users with profound core activity limitation reported always needing support in one or more of these areas. Users with severe core activity limitation reported sometimes needing support in one or more of these areas. Users with moderate or no core activity limitation reported needing no support in all of these areas.									
(d)	Data for users of CSDA funded accommodation support services exclude psychiatric services identified by the jurisdiction.									
(e)	See previous reports for notes relating to data before 2001.

(a) Service user data are estimates after a statistical linkage key is used to account for individuals who received more than one service on the snapshot day. Where the level of support need was inconsistently recorded for the same user, the person was allocated a level of support according to a standard method. Row totals may not be the sum of the components because individuals might have accessed services from more than one State or Territory on the snapshot day.

**Table 13A.21 Users of CSDA employment services on a snapshot day, by severity of core activity limitation (a), (b), (c), (d), (e)**

	<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
--	-------------	------------	------------	------------	-----------	-----------	------------	------------	-----------	-------------

- (b) Data exclude 342 users in 2001 and 283 users in 2002 who did not report a need for support with one or more of these areas: self care, mobility or communication. User totals do not, therefore, necessarily match those in other tables.
- (c) Severity of core activity limitation was derived using data on the level of support needed in one or more of the following support areas: self care, mobility and communication. Users with a profound core activity limitation reported a continual need for support in one or more of these areas. Users with a severe core activity limitation reported occasional or frequent need for support in one or more of these areas. Users with moderate or no core activity limitation reported needing no support in all of these areas.
- (d) Where the level of support need was inconsistently recorded for the same user, the person was allocated a level of support according to a standard method.
- (e) See previous reports for notes relating to data before 2001.

<b>Total</b>	<b>%</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>

- (a) Service user data are estimates after a statistical linkage key is used to account for individuals who received services from more than one service type outlet from 1 January 2003 to 30 June 2003. Row totals may not be the sum of the components because individuals might have accessed services from more than one State or Territory during the period.
- (b) Data excludes 1294 service users who did not report on a need for support with any of the areas: self-care, mobility, or communication. Hence service user totals may differ from other tables.
- (c) Severity of core activity limitation was derived using data on the level of support needed in one or more of the following support areas: self care, mobility and communication. Users with a profound core activity limitation reported a continual need for support in one or more of these areas. Users with a severe core activity limitation reported occasional or frequent need for support in one or more of these areas. Service users with moderate or no core activity limitation reported needing no support in all of these areas.
- (d) Severity of core activity limitation relates to the level of support needed in the areas of self care, mobility and communication. It does not necessarily relate to the level of support needed to find or maintain employment.
- (e) Service user data collected under the CSTDA NMDS from 1 January 2003 to 30 June 2003 are not comparable with data from the previous CSDA MDS snapshot day collections.

Table 13A.23

**Table 13A.23 Users of CSDA accommodation support services on a snapshot day, per 1000 people, by Indigenous status (a), (b), (c), (d), (e)**

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
Indigenous people using accommodation services per 1000 Indigenous population aged under 65 years									
1999	1.31	1.54	1.01	2.96	1.52	1.35	0.62	1.22	1.48
2000	1.22	1.24	0.73	1.02	1.68	1.75	0.87	1.09	1.08
2001	1.22	2.26	0.92	1.22	1.77	0.68	1.13	1.13	1.19
2002	1.15	1.47	0.92	1.06	1.95	0.84	0.52	1.24	1.13
All people using accommodation services per 1000 total population aged under 65 years									
1999	0.99	1.35	0.72	1.28	1.53	1.51	0.96	0.67	1.11
2000	1.03	1.35	0.66	1.20	1.49	1.84	0.98	0.58	1.10
2001	1.04	1.36	0.94	1.17	1.50	1.73	0.94	0.60	1.16
2002	1.02	1.34	0.93	1.11	1.81	1.93	1.01	0.64	1.17

- (a) Service user data are estimates after a statistical linkage key is used to account for individuals who received more than one service on the snapshot day. Where Indigenous status was inconsistently recorded for the same user, the user was counted as an Indigenous Australian. Totals may not be the sum of the components because individuals might have accessed services from more than one State or Territory on the snapshot day.
- (b) Data for Indigenous users per 1000 are derived by dividing the number of Indigenous service users by the number of Indigenous Australians aged under 65 years, multiplied by 1000.
- (c) ABS population projections are used for 2001 and 2002 population data. Indigenous population data in each State or Territory for 2002 is obtained by multiplying the percentage of Indigenous people to ABS 2001 Census data on the projected population for 2002. The percentage of Indigenous people in each State or Territory is based on ABS Estimated Resident Population data for June 2002.
- (d) Data for all users exclude 943 users in 2001 and 854 users in 2002 whose Indigenous origin was 'not known' or 'not stated', thus totals may differ from other tables.
- (e) Data for users of CSDA funded accommodation support services exclude psychiatric services identified by the jurisdiction.

Table 13A.24

**Table 13A.24 Users of CSTDA accommodation support services, per 1000 people, by Indigenous status, from 1 January 2003 to 30 June 2003 (a), (b), (c), (d), (e), (f)**

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
Indigenous people using accommodation services per 1000 Indigenous population aged under 65 years									
2003	1.4	10.6	1.0	2.9	2.2	1.5	0.3	1.6	2.1
All people using accommodation services per 1000 total population aged under 65 years									
2003	1.2	1.5	1.2	1.8	2.5	2.6	1.1	0.9	1.4

- (a) Service user data are estimates after a statistical linkage key is used to account for individuals who received services from more than one service type outlet from 1 January 2003 to 30 June 2003. Individuals might have accessed services from more than one State or Territory over the six month period. Where Indigenous status was inconsistently recorded for the same user, the user was counted as an Indigenous Australian.
- (b) Data for Indigenous users per 1000 are derived by dividing the number of Indigenous service users by the number of Indigenous Australians aged under 65 years, multiplied by 1000.
- (c) Data for all service users exclude 588 service users whose Indigenous status was not reported, thus totals may differ from other tables.
- (d) Data for users of CSTDA funded accommodation support services exclude psychiatric services identified by the jurisdiction.
- (e) Service user data collected under the CSTDA NMDS from 1 January 2003 to 30 June 2003 are not comparable with data from the previous CSDA MDS snapshot day collections.
- (f) The service user data used to derive this indicator have quality issues related to the development of the new CSTDA NMDS. These issues include differences in the proportion of service outlets that responded across jurisdictions. This indicator thus needs to be interpreted with care.

**Table 13A.26 Users of CSTDA employment services, per 1000 people, by Indigenous status, from 1 January 2003 to 30 June 2003 (a), (b), (c), (d)**

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
Indigenous people using employment services per 1000 Indigenous population aged 15–64 years									
2003	5.5	9.8	3.9	3.9	5.4	4.0	4.5	2.2	4.6
All people using employment services per 1000 total population aged 15–64 years									
2003	3.7	4.4	3.9	4.1	4.7	4.5	3.5	2.7	4.0

- (a) Service user data are estimates after a statistical linkage key is used to account for individuals who received services from more than one service type outlet from 1 January 2003 to 30 June 2003. Where Indigenous status was inconsistently recorded for the same user, the user was counted as an Indigenous Australian. Individuals might have accessed services from more than one State or Territory during the six months.
- (b) Data for Indigenous users per 1000 are derived by dividing the number of Indigenous service users by the number of Indigenous Australians aged 15–64 years, multiplied by 1000.
- (c) Data for all service users exclude 2117 service users whose Indigenous status was not reported, thus employment services users per 1000 total population aged 15–64 years may differ from other tables.
- (d) Service user data collected under the CSTDA NMDS from 1 January 2003 to 30 June 2003 are not comparable with data from the previous CSDA MDS snapshot day collections.

*Source:* ABS 2002, *Australian Demographic Statistics*, Cat no. 3101.0, Canberra; ABS 2004, *Experimental projections of the Aboriginal and Torres Strait Islander population 30 June 2001 to 30 June 2009*, Cat. no. 3238.0, Canberra; AIHW (unpublished).

Table 13A.27

**Table 13A.27 Users of CSDA community access services on a snapshot day, per 1000 people, by Indigenous status (a), (b), (c), (d), (e), (f), (g)**

	NSW	Vic	Qld	WA	SA	Tas	ACT	NT	Aust
Indigenous people using community access services per 1000 Indigenous population aged 15–64									
2001	1.4	3.9	1.1	0.5	0.5	0.9	1.3	0.5	1.1
2002	1.3	2.4	1.0	0.4	1.4	0.8	0.4	0.5	1.0
All people using community access services per 1000 total population aged 15–64									
2001	0.8	2.1	0.9	0.5	0.5	1.6	0.6	0.3	1.1
2002	0.8	2.0	0.8	0.5	0.8	1.7	0.8	0.3	1.1

- (a) Service user data are estimates after a statistical linkage key is used to account for individuals who received more than one service on the snapshot day. Where Indigenous status was inconsistently recorded for the same user, the user was counted as an Indigenous Australian. Totals may not be the sum of the components because individuals might have accessed services from more than one State or Territory on the snapshot day.
- (b) Data for Indigenous users per 1000 are derived by dividing the number of Indigenous service users by the number of Indigenous Australians aged 15–64 years, multiplied by 1000.
- (c) ABS population projections are used for 2001 and 2002 population data. Indigenous population data in each State or Territory for 2002 is obtained by multiplying the percentage of Indigenous people to ABS 2001 Census data on the projected population for 2002. The percentage of Indigenous people in each State or Territory is based on ABS Estimated Resident Population data for June 2002.
- (d) Community access services in 2001 include users using the community access service types continuing education/independent living training/adult training centre, post-school options/social and community support/community access and other community access and day programs. Community access services in 2002 include users using the community access service types learning and life skills development and other community access, but not recreation/holiday programs.
- (e) Data for all users exclude 372 users in 2001 and 728 users in 2002 whose Indigenous origin was 'not known' or 'not stated', therefore totals may differ from other tables.
- (f) Data for users of CSDA funded community access services exclude psychiatric services identified by the jurisdiction.
- (g) Data may have different inclusions for different jurisdictions, which may explain the variability across jurisdictions. Data are therefore not strictly comparable.

Source: AIHW 2001, *First National Results on Services Provided under the Commonwealth–State Disability Agreement: National Data*, cat. no. DIS 24, Canberra; AIHW 2002, *First National Results on Services Provided under the Commonwealth–State Disability Agreement: National Data, 2002*, Canberra.

Table 13A.28

**Table 13A.28 Users of CSTDA community access services, per 1000 people, by Indigenous status, from 1 January 2003 to 30 June 2003 (a), (b), (c), (d), (e), (f), (g)**

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
Indigenous people using community access services per 1000 Indigenous population aged 15–64									
2003	2.7	11.2	2.0	5.0	4.4	2.3	5.3	2.7	3.5
All people using community access services per 1000 total population aged 15–64									
2003	1.6	2.4	1.6	4.2	3.4	3.6	2.1	1.6	2.2

- (a) Service user data are estimates after a statistical linkage key is used to account for individuals who received services from more than one service type outlet from 1 January 2003 to 30 June 2003. Where Indigenous status was inconsistently recorded for the same user, the user was counted as an Indigenous Australian. Individuals might have accessed services from more than one State or Territory during the six months.
- (b) Data for Indigenous users per 1000 are derived by dividing the number of Indigenous service users by the number of Indigenous Australians aged 15–64 years, multiplied by 1000.
- (c) Data for all service users exclude 7615 service users whose Indigenous status was not reported, thus totals may differ from other tables.
- (d) Service users who accessed the service type 'recreation/holiday programs' (service type 3.02) were not required to complete the item on Indigenous status; however those who did provide a response are included in the data.
- (e) Data for users of CSTDA funded community access services exclude psychiatric services identified by the jurisdiction.
- (f) The service user data used to derive this indicator have quality issues related to the development of the new CSTDA NMDS. These issues include differences in the proportion of service outlets that responded across jurisdictions. This indicator thus needs to be interpreted with care.
- (g) Service user data collected under the CSTDA NMDS from 1 January 2003 to 30 June 2003 are not comparable with data from the previous CSDA MDS snapshot day collections.

*Source:* ABS 2002, Australian Demographic Statistics, Cat no. 3101.0, Canberra; ABS 2004, *Experimental projections of the Aboriginal and Torres Strait Islander population 30 June 2001 to 30 June 2009*, Cat. no. 3238.0, Canberra; AIHW (unpublished).

**Table 13A.29 Users of CSDA accommodation support services on a snapshot day, per 1000 people, by country of birth (a), (b), (c), (d), (e), (f), (g)**

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
People born in a non-English speaking country using accommodation services per 1000 people aged under 65 years who were born in a non-English speaking country									
1999	0.2	0.2	0.2	0.4	0.4	0.4	0.2	0.2	0.2
2000	0.2	0.2	0.3	0.2	0.4	0.6	0.2	0.4	0.2
2001	0.1	0.2	0.3	0.3	0.4	0.6	0.2	0.4	0.2
2002	0.1	0.3	0.2	0.4	0.6	0.5	0.3	0.2	0.2
All people using accommodation services per 1000 total people aged under 65 years									
1999	1.0	1.4	0.9	1.3	1.5	1.6	1.0	0.7	1.2
2000	1.1	1.4	0.8	1.0	1.5	1.6	1.0	0.6	1.1
2001	1.1	1.4	0.8	1.1	1.4	1.5	0.9	0.6	1.2
2002	1.1	1.5	0.9	1.1	1.7	1.6	1.0	0.6	1.2

- (a) Service user data are estimates after a statistical linkage key is used to account for individuals who received more than one service on the snapshot day. Where country of birth was inconsistently recorded for the same user, the user was counted as having been born in a non-English speaking country.
- (b) Data for service users born in a non-English speaking country were based on responses for country of birth with English Proficiency Groups 2–4 (this includes all countries except Australia, New Zealand, Canada, United Kingdom, South Africa, Ireland or the United States of America).
- (c) Data for service users born in a non-English speaking country per 1000 are derived by dividing the number of service users born in a non-English speaking country by the number of Australians aged under 65 years who were born in a non-English speaking country, multiplied by 1000.
- (d) The State and Territory data on people born in a non-English speaking country are derived from the corresponding 1996 Australian Census proportional distribution of population of states and territories applied to the ABS national estimate of 2000 country of birth data. For 2001, estimates are adjusted for expected increases in the total population and the number of people born in a non-English speaking country. Estimates exclude people whose country of birth was not stated or who were visitors to Australia from overseas.
- (e) Data for all Australians exclude people whose birthplace was not stated or who were visitors to Australia from overseas.
- (f) Data for all users exclude 754 users for 2001 and 337 users for 2002 whose birthplace was 'not known' or 'not stated', therefore, totals may differ from other tables.
- (g) Data for users of CSDA funded accommodation support services exclude psychiatric services identified by the jurisdiction.

Users	%	21.9	30.4	34.9	11.9	9.8	52.3	0.3	47.6	25.1

- (a) The State and Territory data on the rural and remote population are derived by the AIHW from ABS statistical local area population estimates for June 2000 and 2001.
- (b) Data for rural and remote users were based on the residential postcode of the user except for SA, the ACT and the NT in 2001, which were based on the postcode of the service outlet. A postcode is classified as rural or remote if more than 50 per cent of the population in the postcode area are so classified.
- (c) Data for rural and remote users per 1000 rural and remote people are derived from the rural and remote user data divided by the rural and remote Australians data multiplied by 1000.
- (d) Service user data are estimates after a statistical linkage key is used to account for individuals who received more than one service on the snapshot day. Totals may not be the sum of the components since individuals might have accessed services from more than one State or Territory on the snapshot day.
- (e) Data for all users exclude 626 users in 2001 and 210 users in 2002 whose postcode was not known, therefore, totals may differ from other tables.
- (f) Data for users of CSDA accommodation support services exclude psychiatric services identified by the jurisdiction.

(a) The State and Territory data on the Australian population are derived by the AIHW from ABS statistical local area population estimates for June 2002.

(b) Data on service users in each geographic location were estimated based on service users' residential postcodes. Some postcode areas were split between two or more geographic locations. Where this was the case the data were weighted according to the proportion of the population of the postcode area in each geographic location.

**Table 13A.34 Users of CSTDA accommodation support services from 1 January 2003 to 30 June 2003, by geographic location, per 1000 people (a), (b), (c), (d), (e), (f), (g), (h)**

	<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
(c)	Service user data are estimates after a statistical linkage key is used to account for individuals who received services from more than one service type outlet from 1 January 2003 to 30 June 2003. Row totals may not be the sum of the components since individuals might have accessed services from more than one State or Territory over the six month period.									
(d)	Data for all service users exclude 357 service users whose postcode was not reported, thus totals may differ from other tables.									
(e)	Data for users of CSTDA funded accommodation support services exclude psychiatric services identified by the jurisdiction.									
(f)	Data on service users per 1000 people are derived by dividing the number of service users in a geographic location by the number of people aged under 65 years in that geographic location, multiplied by 1000. The 'outer regional and remote' classification was derived by adding outer regional, remote and very remote data.									
(g)	Service user data collected under the CSTDA NMDS from 1 January 2003 to 30 June 2003 are not comparable with data from the previous CSDA MDS snapshot day collections.									
(h)	The service user data used to derive this indicator have quality issues related to the development of the new CSTDA NMDS. These issues include differences in the proportion of service outlets that responded across jurisdictions. This indicator thus needs to be interpreted with care.									
	.. Not applicable. – Nil or rounded to zero.

(a) The State and Territory data on the rural and remote population are derived by the AIHW from ABS statistical local area population estimates for June 2000 and 2001.

(b) Data for rural and remote users were based on the residential postcode of the user. A postcode is classified as rural or remote if more than 50 per cent of the population in the postcode area are so classified.

(c) Data for rural and remote consumers per 1000 rural and remote people are derived from the rural and remote consumer data divided by the rural and remote Australians data multiplied by 1000.

(d) Service user data are estimates after a statistical linkage key is used to account for individuals who received more than one service on the snapshot day. Totals may not be the sum of the components because individuals might have accessed services from more than one jurisdiction during the period.

(e) Data for all users exclude 292 users in 2001 whose postcode was not known, therefore, totals may differ from other tables.

(a) The State and Territory data on the Australian population are derived by the AIHW from ABS statistical local area population estimates for June 2002.

(b) Data on service users in each geographic location were estimated based on service users' residential postcodes. Some postcode areas were split between two or more geographic locations. Where this was the case the data were weighted according to the proportion of the population of the postcode area in each geographic location.

**Table 13A.36 Users of CSTDA employment services from 1 January 2003 to 30 June 2003, by geographic location, per 1000 people (a), (b), (c), (d), (e)**

	<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
(c)	Service user data are estimates after a statistical linkage key is used to account for individuals who received services from more than one service type outlet from 1 January 2003 to 30 June 2003. Row totals may not be the sum of the components since individuals might have accessed services from more than one State or Territory over the six month period.									
(d)	Data on service users per 1000 people are derived by dividing the number of service users in a geographic location by the number of people aged under 65 years in that geographic location, multiplied by 1000. The 'outer regional and remote' classification was derived by adding outer regional, remote and very remote data.									
(e)	Service user data collected under the CSTDA NMDS from 1 January 2003 to 30 June 2003 are not comparable with data from the previous CSDA MDS snapshot day collections.									
	.. Not applicable. – Nil or rounded to zero.

(a) In Victoria, 2000 data do not include funds previously directed to Independent Living Training. In relation to 2002 data: recreation, and intake and response services (previously allocated under community support) are allocated under community access; community support services include early intervention and specialist children's services programs; information and advocacy (included under community support in 2001) is included under a new category advocacy, information and print disability; other support includes the Inclusive Communities, and Aids and Equipment programs in 2002 and 2003. In relation to 2003-04 data, expenditure on accommodation support services reflects current institutional redevelopments; expenditure on respite services does not include attribution of an asset charge, and transfer payments from the Australian Government include funding for Disability Advisory Council.

(b) Method of apportioning government administration expenditure in Queensland changed in 1999-2000 and again in 2000-01 as a result of improved financial reporting systems and with the establishment of Disability Services Queensland. Payroll tax data for Queensland include paid payroll tax and accrued payroll tax.

(c) Western Australia's 2000-01 expenditure for accommodation support, community support, community access and respite reflects increased State business plan funding, including Commonwealth unmet need funding. An improved cost allocation and payments database has been used for WA data since 2001-02. This has resulted in a refinement and in some cases a major realignment of costs previously reported. Within accommodation support, other accommodation costs have been realigned to community support, however, this shift in costs has been more than offset by additional funding provided for growth, indexation and wage parity increases within government provided places. Community support now includes local area coordination (LAC) funding previously reported against respite services. Direct expenditure and administrative expenditure on some LAC programs in 2002-03 have been further allocated to day activity services and advocacy, information and print disability.

(d) For WA, the increase in expenditure between 2002-03 and 2003-04 for administration, and accommodation support, community support, community access and respite services reflects a growth in funds and indexation (including wage increases). The increase in expenditure between 2002-03 and 2003-04 for advocacy, information and print disability reflects indexation (including wage increases). The decrease in expenditure between 2002-03 and 2003-04 for other support reflects improved allocation of costs to specific outputs. The increase between 2002-03 and 2003-04 in transfer payments received from the Australian Government reflects a growth in funds and indexation.

(e) Expenditure for SA decreased from 2000-01 to 2001-02 because some funding was transferred out of disability services (from accommodation support) and reporting changed (in community support, advocacy, information and print disability and other support) to be consistent with the CSTDA – Schedule A State Funding). Administration and total expenditure excludes some government agencies receiving funding from the Department of Human Services (DHS). Departmental overhead costs are not included in 2000-01 data and are included in 2001-02 data. Prior to 2001-02, only the Central Office and Intellectual Disability Services Council administrative costs were included.

Table 13A.37

**Table 13A.37 Nominal government expenditure, by service type (\$'000)**

	NSW	Vic (a)	Qld (b)	WA (c), (d)	SA (e)	Tas (f)	ACT (g)	NT (h)	S/T (i)	Aus Gov	Aust
--	-----	---------	---------	-------------	--------	---------	---------	--------	---------	---------	------

(f) For Tasmania, expenditure data on respite services in 2002-03 was adjusted for incorrect reporting on the therapy service data by one funded organisation prior to 2002-03; Divisional overheads are included in the 2002-03 administrative expenditure data for the first time.

(g) In the ACT, only services under the Disability Services funding program are counted; services funded through the Home and Community Care program are excluded.

(h) For the NT, in 2002-03 a realignment of costs attributed to services purchased under the individualised funding model occurred, from the community support service type to the specific service type purchased, and this continues to occur, with a focus on community access and community support. This is as a result of improved data collection and reporting systems. In 2002-03, the NT changed from cash to accrual accounting therefore limiting comparison of expenditure to previous years. 2000-01 expenditure data included advance payments for the first quarter of 2001-2002 resulting in under-reporting of expenditure in 2001-02. This should be taken into consideration when comparing 2002-03 data.

(i) Total of states and territories.

.. Not applicable. – Nil or rounded to zero.

Source: Australian, State and Territory governments (unpublished).

(a) Real expenditure is derived using nominal expenditure and applying gross domestic product deflators as outlined in the Statistical Appendix.

(b) In Victoria, 2000 data do not include funds previously directed to Independent Living Training. In relation to 2002 data: recreation, and intake and response services (previously allocated under community support) are allocated under community access; community support services include early intervention and specialist children's services programs; information and advocacy (included under community support in 2001) is included under a new category advocacy, information and print disability; other support includes the Inclusive Communities, and Aids and Equipment programs in 2002 and 2003. In relation to 2003-04 data, expenditure on accommodation support services reflects current institutional redevelopments; expenditure on respite services does not include attribution of an asset charge, and transfer payments from the Australian Government include funding for Disability Advisory Council.

(c) The method of apportioning government administration expenditure in Queensland changed in 1999-2000 and again in 2000-01 as a result of improved financial reporting systems and with the establishment of Disability Services Queensland. Payroll tax data for Queensland include paid payroll tax and accrued payroll tax.

(d) Western Australia's 2000-01 expenditure for accommodation support, community support, community access and respite reflects increased State business plan funding, including Commonwealth unmet need funding. An improved cost allocation and payments database has been used for WA data since 2001-02. This has resulted in a refinement and in some cases a major realignment of costs previously reported. Within accommodation support, other accommodation costs have been realigned to community support, however, this shift in costs has been more than offset by additional funding provided for growth, indexation and wage parity increases within government provided places. Community support now includes local area coordination (LAC) funding previously reported against respite services. Direct expenditure and administrative expenditure on some LAC programs in 2002-03 have been further allocated to day activity services and advocacy, information and print disability.

(e) For WA, the increase in expenditure between 2002-03 and 2003-04 for administration, and accommodation support, community support, community access and respite services reflects a growth in funds and indexation (including wage increases). The increase in expenditure between 2002-03 and 2003-04 for advocacy, information and print disability reflects indexation (including wage increases). The decrease in expenditure between 2002-03 and 2003-04 for other support reflects improved allocation of costs to specific outputs. The increase between 2002-03 and 2003-04 in transfer payments received from the Australian Government reflects a growth in funds and indexation.

(f) Expenditure for SA decreased from 2000-01 to 2001-02 because some funding was transferred out of disability services (from accommodation support) and reporting changed (in community support, advocacy, information and print disability and other support) to be consistent with the CSTDA – Schedule A State Funding. Administration and total expenditure exclude some government agencies receiving funding from the DHS. Departmental overhead costs are not included in 2000-01 data and are included in 2001-02 data. Prior to 2001-02, only the Central Office and Intellectual Disability Services Council administrative costs were included.

**Table 13A.38 Real government expenditure, by service type (2003-04 dollars) (\$'000) (a)**

	NSW	Vic (b)	Qld (c)	WA (d), (e)	SA (f)	Tas (g)	ACT (h)	NT (i)	S/T(j)	Aus Gov	Aust
--	-----	---------	---------	-------------	--------	---------	---------	--------	--------	---------	------

(g) For Tasmania, expenditure data on respite services in 2002-03 has been adjusted for incorrectly reporting on the therapy service data by one funded organisation prior to 2002-03; Divisional overheads are included in the 2002-03 administrative expenditure data for the first time.

(h) In the ACT, only services under the Disability Services funding program are counted; services funded through the Home and Community Care program are excluded.

(i) For the NT, in 2002-03 a realignment of costs attributed to services purchased under the individualised funding model occurred, from the community support service type to the specific service type purchased, and this continues to occur, with a focus on community access and community support. This is as a result of improved data collection and reporting systems. In 2002-03, the NT changed from cash to accrual accounting therefore limiting comparison of expenditure to previous years. 2000-01 expenditure data included advance payments for the first quarter of 2001-2002 resulting in under-reporting of expenditure in 2001-02. This should be taken into consideration when comparing 2002-03 data.

(j) Total of states and territories.

2000-01	97 079	72 977	106 503	69 731	64 181	..	..	..	84 366
2001-02	111 834	74 597	66 375	96 313	60 803	..	..	..	90 609
Cost per user of government provided accommodation support services in group homes									
2001-02	112 753	79 368	95 810	96 366	63 507	129 709	84 796	..	91 463
Cost per user of government provided accommodation support services in other community settings									
2001-02	47 991	22 246	38 418	42 482	..	22 258	26 977	..	31 270
Government funding per user of non-government provided accommodation support services in institutional/residential settings									
1999-2000	32 070	33 953	17 676	23 659	35 078	29 667	..	..	29 973
2000-01	35 024	39 517	21 743	25 089	23 281	31 421	..	..	30 701
2001-02	35 173	42 900	10 908	46 161	26 965	19 776	..	..	29 649
Government funding per user of non-government provided accommodation support services in group homes									
2001-02	70 272	60 583	37 374	57 551	34 059	64 452	59 665	63 762	60 068
Government funding per non-government provided accommodation support services in other community settings									
2001-02	42 713	29 621	39 456	40 405	4 307	26 778	14 179	8 118	36 288

(a) Data are based on net expenditure (expenditure minus receipts) divided by the number of users on a snapshot day (rather than average number of users during the year). Data for non-government provided services reflect cost to government and not full cost of providing the accommodation. Governments make a contribution towards non-government provided services.

(b) Prior to 2001-02 data reflect cost per user of accommodation support services in institutional/large residential settings. Due to refinements made to the counting rules for accommodation data, the 2001-02 data are not strictly comparable with data for previous years. The change from 1998-99 reflects the refinement of the process (based on accrual accounting) used to allocate expenditure between institutions and community accommodation.

(c) Increased costs in NSW 2000-01 and 2001-02 data reflect devolution expenditure on transitional accommodation and crisis support to people residing in institutions and being relocated. This will reduce as the relocation program accelerates.

(d) Prior to 2001-02 data for Victoria are not comparable with previous reports, which used data from departmental administrative collections. Data for 2001-02 on non-government provided accommodation support services in other community settings include the in-home accommodation support program not previously reported.

Table 13A.40

**Table 13A.40 Nominal government expenditure per user of CSDA accommodation support services (dollars) (a), (b)**

	NSW (c)	Vic (d)	Qld (e)	WA (f)	SA (g)	Tas (h)	ACT (i)	NT (j)	Aust
(e)	The decrease in Queensland government expenditure per user of government provided accommodation support services in institutional/residential settings is due to transitional changes in models of accommodation support provided.								
(f)	In WA an improved cost allocation and payments database has been used for data in 2001-02. This has resulted in a refinement and in some cases a major realignment of costs previously reported. Accommodation support also reflects growth, indexation and parity funding provided for wage increases.								
(g)	In SA data for 2001-02 are net of fees and client contributions only and only reflect places funded by the DHS. There were no government provided accommodation support services in other community settings in SA in 2001-02.								
(h)	There were no government provided accommodation support services in institutional/residential settings in Tasmania in 2000-01 and 2001-02.								
(i)	There were no government provided accommodation support services in institutional/residential settings in the ACT in 1999-2000, 2000-01 and 2001-02.								
(j)	In the NT, there are no government provided accommodation support services and there are no non-government provided accommodation support services in institutional/residential settings. Expenditure variations in 2001-02 for the disability service types reflect changes in service provision under an individual funding model. Payments under the model are categorised as community support (as per CSTDA NMDS definitions) and are not included specifically in the service type purchased (for example, supported accommodation). Some non-government organisations received three quarterly payments in 2001-02. One quarterly payment was paid in advance in 2000-01. These factors affect the ability to make meaningful comparisons to previous financial years.								

.. Not applicable.

- (a) Data are based on net expenditure (expenditure minus receipts) divided by the number of users on a snapshot day (rather than average number of users during the year). Data for non-government provided services reflect cost to government and not full cost of providing the accommodation. Governments make a contribution towards non-government provided services.
- (b) Prior to 2001-02 data reflect cost per user of accommodation support services in institutional/large residential settings. Due to refinements made to the counting rules for accommodation data, the 2001-02 data are not strictly comparable with data for previous years.
- (c) Increased costs in NSW 2000-01 and 2001-02 data reflect devolution of expenditure on transitional accommodation and crisis support to people residing in institutions and being relocated. This will reduce as the relocation program accelerates.
- (d) Prior to 2001-02 data for Victoria are not comparable with previous reports, which used data from departmental administrative collections. Data for 2001-02 on non-government provided accommodation support services in other community settings include the in-home accommodation support program not
- (e) The decrease in Queensland government expenditure per user of government provided accommodation support services in institutional/residential settings is due to transitional changes in models of accommodation support provided.
- (f) In WA an improved cost allocation and payments database has been used for data in 2001-02. This has resulted in a refinement and in some cases a major realignment of costs previously reported. Accommodation support also reflects growth, indexation and parity funding provided for wage increases.
- (g) In SA data for 2001-02 are net of fees and client contributions only and only reflect places funded by the DHS. There were no government provided accommodation support services in other community settings in SA in 2001-02.
- (h) There were no government provided accommodation support services in institutional/residential settings in Tasmania in 2000-01 and 2001-02.
- (i) There were no government provided accommodation support services in institutional/residential settings in the ACT in 1999-2000, 2000-01 and 2001-02.

- (a) Data are based on adjusted net expenditure (expenditure minus receipts) divided by the number of service users from 1 January 2003 to 30 June 2003. Expenditure data were adjusted to account for differences across jurisdictions in the proportion of service outlets that provided data for the CSTDA NMDS collection and differences in the time period for which expenditure and service user data were collected (12 months and six months respectively). The adjustment factors are provided in table 13A.43.
- (b) Data for non-government provided services reflect the cost to government and not the full cost of providing the accommodation. Governments make a contribution towards non-government provided services.
- (c) This indicator is derived using service user data collected under the CSTDA NMDS from 1 January 2003 to 30 June 2003 and is not comparable with the equivalent indicator derived using data from the previous CSDA MDS snapshot day collections.
- (d) The service user data used to derive this indicator have quality issues, so estimates of jurisdictional efficiency need to be interpreted with care.
- (e) Data for accommodation support services in other community settings exclude 44 service users in Victoria whose agency sector (government/non-government) was not stated. Data for accommodation support services in group homes exclude three service users in WA whose agency sector (government/non-government) was not stated.
- (f) There were no government provided accommodation support services in other community settings in SA in 2002-03.
- (g) There were no government provided accommodation support services in institutional/residential settings in Tasmania and the ACT in 2002-03.
- (h) There were no government provided accommodation support services or non-government provided accommodation support services in institutional/residential settings in the NT in 2002-03.
- .. Not applicable.

Administration expenditure as a proportion of total expenditure (including actual and imputed payroll tax)										
2001-02	9.3	8.0	8.4	4.3	6.8	4.9	11.3	9.7	7.7	7.7
2002-03	9.7	8.1	8.1	5.2	6.4	7.2	9.9	4.4	7.6	7.6
2003-04	11.2	8.1	8.0	5.3	6.4	5.2	9.3	4.1	7.4	8.5

- (a) See table 13.1 for an explanation of different methods of apportioning departmental costs.
- (b) The method for apportioning government administration expenditure in Queensland changed in 2000-01 as a result of improved financial reporting systems and with the establishment of Disability Services Queensland. Payroll tax data for Queensland include payroll tax, accrued payroll tax and long service leave on-costs recovered payroll tax.
- (c) In WA, the decrease in 2000-01 administration expenditure reflects a reduction in corporate services costs and the elimination of costs associated with the implementation of the GST in 1999-2000; the increase in 2001-02 administration expenditure mainly reflects the realignment of policy costs previously allocated across all outputs. The increase in administration expenditure for 2003-04 reflects a growth in funds and indexation (including wage increases).
- (d) Data for SA include administration expenses (indirect service delivery costs) relating to all government agencies receiving funding from the department. Reports in previous years included only the Central Office and Intellectual Disability Services Council administrative costs. Improved allocation of corporate overheads occurred again in 2000-01 within the government sector.
- (e) Improved allocation of corporate overheads occurred again in 2000-01 within the ACT government sector. The ACT incurred additional one-off overhead costs in 2000-01 due to the Inquiry into Disability Services in the ACT.
- (f) The NT administrative expenditure prior to 2001-02 is estimated only and is based on average staffing levels. In 2002-03, the method of apportioning administrative expenditure changed from cash to accrual accounting, resulting from a realignment of some costs previously reported under this category to direct service delivery.
- (g) Australian Government administrative expenditure is an attribution of cost based on average staffing levels.

<b>Total expenditure on CSTDA services including actual and imputed payroll tax per user</b>	<b>\$</b>	<b>36 469</b>	<b>30 076</b>	<b>24 456</b>	<b>14 065</b>	<b>14 339</b>	<b>27 524</b>	<b>34 405</b>	<b>29 908</b>	<b>26 150</b>

(a) Government expenditure per service user for Australia, excludes Australian Government expenditure on State and Territory administered services that was not provided as transfer payments.

(b) The service user data used to derive this indicator have quality issues, so estimates of jurisdictional efficiency need to be interpreted with care.

(c) Payroll tax data for Queensland includes paid payroll tax and accrued payroll tax.

(d) Payroll tax relates to NT Government service provision and does not include expenditure for program management and administration.

.. Not applicable.

(a) Pensions, allowances and payments were not funded under the CSTDA. Totals may not sum as a result of rounding.

(b) All invalid or unknown postcodes are included in NSW customer figures. International services are included in Tasmania.

(c) The Disability Support Pension is a means tested income support payment for people aged 16 or over who have a physical, intellectual or psychiatric impairment (meeting set criteria) resulting in an inability to work or to be re-skilled for work for at least the next two years (as a result of impairment), or who are participating in the supported wage system. Special rules apply to the vision impaired.

(d) The Mobility Allowance is a non means tested income supplement to assist with transport costs for people aged 16 or over with a disability who are in employment, vocational training, a combination of vocational training and employment, job search activities or voluntary work, and who are unable to use public transport without substantial assistance.

**Table 13A.51 Recipients of Disability Support Pension, Mobility Allowance, Carer Payment, Carer Allowance and Sickness Allowance ('000) (a)**

	<i>NSW (b)</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas (b)</i>	<i>ACT</i>	<i>NT</i>	<i>Other</i>	<i>Aust</i>
(e) The Carer Payment provides income support to people who, as a result of the demands of their caring role, are unable to support themselves through substantial workforce participation.										
(f) The Carer Allowance is a supplementary payment available to people who provide daily care and attention at home for an adult or child with a disability or severe medical condition. Data includes Health Care Card only customers.										
(g) Sickness Allowance is a means tested income support payment for people aged 21 or over who are temporarily incapacitated from doing their normal work or study, due to illness or injury, and have a job or study to return to when they are fit.
