

11-Jan-2020

Dear Productivity Commission,

I would like to express my opinion on screening questions for 0 to 3 year old children.

Irregular feeding, difficulty sleeping, whining, crying, temper tantrums, shyness, sleeping with the lights on and hyperactivity.

Are the above really symptoms?

It seem to me, that they are all too common for 0 to 3 years old children. please do not go ahead with the program.

Best Regards
Jennifer Anoki-Chen.
