

10/1/20

Dear Productivity Commissioners,
in regards to the proposed
Mental Health Inquiry. I recently
watched a News programme regarding
the proposed Mental Health
screening of 0-3 year olds & I
personally find it absurd this is
being considered to justify the
Government spending it will
require & I sincerely hope you
look further into the consequences
of such an unproven to work scheme
to spend & waste Tax payers
money implimenting profiteering
for pharmaceutical companies.

Not to mention the effects
of drugging babies & children.

②
Personally the drugging doesn't
work & is a mask of nutritional
problems from eating too many
sweets & chocolates.

Drugs are not lollies or
chocolates & are in fact
poisons to a greater or
lesser degree.

Please look at proven info
on drugs working ever,
unless you consider a
docile, personality vacant
child filtering drugs thru
their liver desirable.

Please put funds into worthwhile

③

other projects like nutritional examinations by Doctors.

Please deny a cash cow for Pharmaceutical Price companies put in place by you the productivity Commissioner.

Yours Sincerely,

B. NETTLE.
