✓ To The Commissioner of Productivity

I am writing to you about the enquireing of mental health.

Screening children from 0-3 is ridiculous & a waste of the tax payers money.

Your symptoms for so called disorders are all natural for Babys 0-3

They will have difficulty feeding if the wrong baby food is provided & sleeping difficulty if the child is hungry etc etc

If the Screening is done mistakes can be done and is all unnecessary.

Please do not Screen our children and let them grow up naturally.

Kind Regards

JOE AZZOPARDI
