

22 Jan 2020

Dear sir, or Madame,

I would like to make it known that I DO NOT believe the screening of young children (0-3 years), will be of much benefit and in fact, it is waste of money. We have found from the screening was scrapped in 2015, that it doesn't work. We need something different not the same thing which we know doesn't work.

Looking at the list of symptoms for children with possible mental illness, it is calling every child mentally ill!!

Whining and crying are just child's regular life and many children who have had these "Symptoms" have grown up to lead stable happy lives or becoming a leader of this world!

PLEASE DO NOT PASS THE BILL FOR SSCREENING CHILDREN 0-3!

Best,
