

11/JAN/2020

DEAR SIR/MADAMS OF THE PRODUCTIVITY COMMISSION,
I WOULD LIKE TO EXPRESS THAT I AM NOT
IN AGREEMENT WITH THE PROPOSAL OF PUTTING
BABIES / TODDLERS UP TO THREE YEAR OLDS FOR
MENTAL HEALTH SCREENING, WITH THE POSSIBLE
RISK OF THE BABIES/CHILDREN BEING GIVEN
PSYCHIATRIC DRUGS.

WITH ALL RESPECT SIR/MADAM I DEFINITELY
DON'T THINK WE SHOULD TAKE THE RISK.
FOR THE FOLLOWING REASONS WHICH I CAN
THINK OF RIGHT NOW:

1) IRREGULAR FEEDING, DIFFICULTY SLEEPING, TANTRUMS,
LOOSING ONE'S TOYS, HYPERACTIVITY, ALL THESE
AND MORE CAN BE ANNOYING TO PARENTS AND
GROWN UPS BUT HOW CAN ONE PROVE
SCIENTIFICALLY THAT THEY ARE MENTAL
ILLNESSES?

2) THE RISK OF OUR FUTURE CHILDREN BEING
PUT ON PSYCHIATRIC DRUGS WITH THEIR ATTENDANT
SIDE EFFECTS AND PERMANENT PROSPECTS OF
DRUG ADDICTION IS TOO GASTLY TO CONTEMPLATE.

DEAR SIR, IF YOU HAVE ANY SMALL
CHILDREN IN YOUR FAMILY, I DO NOT WISH ON
THEM THAT THEY SUFFER BECAUSE OF
THIS PROPOSAL.

I THINK THAT CHILDREN SHOULD BE
GIVEN REAL LOVE AND NOT TESTS THAT MAKE
THEM THINK THEY ARE CRAZY AND DRUGS THAT
WILL EVENTUALLY MAKE THEM CRAZY AND UNABLE
TO FUNCTION IN LIFE

RESPECTFULLY
GENNARO LANGELLA
