

Issue: Kids 0-3 years old to be screened for “Mental Illness” what craziness is this??

I submit that kids of this age cannot be successfully tested of any Mental Illness with a questionnaire which looks at a “normal” child's behaviour. Labelling them like this turns them into a Victim/Customer for Psychiatry and their Creed for money and control.

If you of the Commission want to help Kids/Young People which are supposed to be the Future of this Nation be poisoned by Drugs from early on without having any chance for a good life at all.

To make sure Kids have a good healthy Mental Life other things are important.

1. Health Food, Vitamins, stop Chemical Food poisoning
2. Upbringing in a healthy Familie
3. a School system which teaches Life related stuff
4. Governments have their Ethics & Justice in, not being Criminal in governing
5. Teach Ethics & Justice in School
6. Stop 5G networks
7. Stop Psychiatry

Regards
