

To the productivity commission.

I'm writing to express my concern and strong disagreement to the screening of 0 to 3 years olds in Australia as I have read in THE AUSTRALIAN Pg 5.

My reasons are due to the classifications of 'disorders' have no scientific valid diagnosis for emotional and social development.

I am a mother and grandchildren and find the 'abnormal', 'disorders' to be things listen are quite normal developments, such as crying with the loss of a toy. I find these to be too ridiculous to believe that any one with any common sense would have anything to do with and can only bring harm to the normal development of a child.

I really want this section of the bill taken out for the sake of our future Australian generation. Our Children are our future, our future rulers and businesses.

Thank you I sincerely request honest and humane consideration.

Regards

Brenda Shinn
