

Mental Health Inquiry

11/10/2020

Dear Productivity Commissioner,

As an Uncle to my 6 sister's children's children, I fully oppose any effort to bring into law, drugging of children at the of 0 - 3 years old. Are there any tests done in recent years to prove that this is the ONLY way that they (the children) are actual mentally ill? To my knowledge this whole proposal was not on radio as a discussion or on A.B.C. program "The Down" to show that you are very open about your wishes.

I am NOT happy - there's no evidence of mental illness.
