

Airport Regulation Inquiry
Productivity Commission
P O Box 1428 Fax 02 6240 3377
Canberra City ACT 2601

The Commissioners,

I apologise for the delay in sending this letter to you.

During my presentation Mr Sutton expressed some surprise at the parking charges I had put in the Appendix to my submission. Quite frankly I was also more than a little surprised when I first saw them. I explained how I came by them. Eric Wilson who supplied them to me had emailed a number of Parking places and the figures I gave came from the email replies he had received. I have asked Eric if he would be kind enough to forward his email replies to you and I believe he has done this.

I thought I should do some checking as I had presented them to you, and I rang each of the parking sites.

Ace Airport parking confirmed that \$15 was correct but here is a reduction for later days depending on the period of the parking.

Secure Parking explained that their charges are a flat rate of \$10 I understand that is a no attendant but it is fully automatic of the usual type now very common where a ticket is collected on entry and the fee collected at a pay station before leaving ie similar to Melbourne Airport system

Wilson's parking charges seem to differ considerably depending on the site and fees for two relatively close sites can be quite different. The person I spoke to could not advise the reason for this. The \$10 I quoted was for an entry before 9AM and a departure after 3PM which is very likely to be the same pattern as business travellers going interstate for a day. and this is why that particular rate was chosen.

Please contact me if I can be of further help.

Norman Geschke
