Document Description/Message

**RE: Review of Legislation Regulating the Architectural Profession.**

I have received with no surprise but considerable concern a letter from the AACA to all Architects received May 17,2000 and regard this issue as so important as to warrant a reply and registration of protest.

As a Fellow of the Institute of Architects since 1977 who studied for 8 years as a night student to obtain my qualification as a registered professional architect I am appalled at your proposal which if enacted will render a large portion of my efforts as meaningless.

At a time when State Governments are demanding higher Architectural standards and calling for developers to use Architects in the design of their projects, it is ironic that the Productivity Commission is recommending that the Architects title become meaningless.

I wish to register my strongest to this destructive proposal.

Signed: Grahame Fuller FRAIA. Architect.
