Dear Sir,

I am a registered Architect and I support the view of the Architects Board of Western Australia in that it is paramount that registration of Architects is retained and that the most appropriate is a Uniform Act across Australia administered by local State or Territory Boards.

While the registration of members of other professions is not being considered at present it is possible that the registration of doctors, lawyers, accountants, engineers, pharmacists, etc. may not be retained in the future. Heaven forbid!

Yours faithfully
