MESSAGE

Dear Ms Gentle

Please accept my thanks and appreciation for this days receipt of the

DRAFT REPORT

It will take weeks to digest each facet of the report, as each will be related by activity of money and the desire to control all facets of audio and visual communication through out Aust. by so called service providers.

We are a small fish in a pond the size of the Pacific ocean we can very easily go down.

We are one of the very few, community resources for community information, we are not chart. We are not a brain scramble scenario pushing kids and teens off a mental cliff of ego pushing chart, with a letter expression that appears fashionable to impressionable individuals

• TO THE POINT •

The A.B.A should be independant of Gov, control the A.B.A should never be privatized to off shore service providers (or part thereof)

The A.B.A must have total control on all audio and visual communication in Aust (NOT VESTED INTREST) Licenses, must never be in the control or councils or associations, NEVER (see page 94 P/2)

It does not matter how long meetings continue, the diversity of people, oppions, and the subject matter, I can only wish you luck, keep it Aust.
