

In general terms OzEmail strongly supports the Productivity Commission's draft report on the broadcasting industry. We feel it is vital that broadcasting legislation encourage competition and open-ness, especially with the advent of Digital TV. Whether OzEmail is ultimately a player in the Datacasting arena or not, we believe that it is of the utmost importance to our nation that a Datacasting Industry be given every opportunity to develop.

We look forward to discussing this further with the Commissioners at 4.00pm Tuesday 7th Dec.
