

Hello, my name is Thomas and I am a year 10 at Griton Grammar School, I think the curriculum should be changed by adding a basic first aid that all schools have to teach, preferably in primary school, I believe children need this skill as many of them will be in a position to save somebody's life.

Please listen to me and try to pass this because I think it is extremely important and I believe more important to learn then sonnets and Pythagoras.

Your sincerely Thomas
