First Home Ownership Inquiry

Please note that Australia is: today best place to live, but without to own a home could become one of the worst to live in it. So my wisdom propose to put a cap on priorities prices — I suggest private homes — over \$M to be included in the G.S.T. This tax to be used to help first home buyers and it also will discourage people to buy \$20M homes or \$1B homes.

Your sincere and with love for Australia.
