
Resources Sector Regulation

Commissioned study

Brief Comments

20 July 2020

- 1 The ridiculous EPBC ACT is costing Australia Billions every year due to unnecessary delays.
Please abolish this Ridiculous EPBC ACT as is it costing Billions of Dollars and Millions of Jobs due to unnecessary and silly Environmental approvals.

A \$21 Trillion Investment is needed in Infrastructure and Construction, and Mines will provide the Revenue needed for this Infrastructure. This investment will create Millions of jobs and generate huge taxes for the Government to provide services and goods needed for Australia. Please remove the red tape that is the EPBC ACT as it is a curse for the Australian economy as economy and jobs are most important for Australians.

31 July 2020

- 2 Australia's Mining and Manufacturing \$20 Trillion Dollars have been stuck in silly Environmental delays due to the ridiculous EPBC ACT.

All Mining and Manufacturing need to be Fast Tracked so that Revenue and Self Sufficiency can be generated and Australia is not dependent on any other Nation.

<https://www.smh.com.au/politics/federal/australia-bottom-of-league-table-on-manufacturing-self-sufficiency-20200727-p55fsm.html>

\$20 Trillion of Unused Natural Resources is hurting our economy and Jobs. Infrastructure, Mining, Manufacturing and Construction Major Projects must be Fast Tracked and Environment Approvals must be removed.

<https://www.investopedia.com/articles/markets-economy/090516/10-countries-most-natural-resources.asp>

With Iron Ore and Mineral prices at record highs, this is the ideal time to Fast Track All Mining and Infrastructure Projects which will also create jobs and Trillions of Dollars Royalty Money.
