

Freight Equalisation

As Chairman of the North West Primary Industry Branch of the Liberal Party I do hereby wish to make a submission on the above subject.

Several of the members of this branch have tried to export vegetables to South East Asia and Korea and after freight to Melbourne is added to connect with international shipping they are priced out of the equation.

Another problem is with freight equalisation on stock feed where the \$850 rebate only is applied to invoices with certain value.

Kindest Regards,

Greg McDonald
