

Productivity Commission
Wheat Export Marketing Arrangements Inquiry
Dear Ms

It was not a great surprise reading the draft report as I suspected this to be a token inquiry. You have totally ignored grower issues and pander to the trade. This year alone there have 4 media articles regarding the slipping quality of Australian wheat been exported. It is with great reluctance that I feel like I'm wasting my time writing this submission. You seem to have taken notice of many pages of professionally written submissions much of which is meaningless Jibber Jabber from trade and ignored heart felt grower submission.

The report reads to me like "Come on trade want do you want? Yeah no worries. We can do that. Hey we'll put a levy on the growers they can pay for what you want"

The Government forced this on us against 80% of grower wishes and remember
IT IS OUR GRAIN

I'm still to find a grower who is happy with this system.

The report has brushed growers of in every point they bought up by saying "we'll get use to it" or "we are small growers". Well for the records I'm not a small grower and have larger growers in my region and not one of them are happy with the new system

I will refuse to pay any new levies. This mess is the Governments and trader's idea let them pay for it. What has happen to the User Pays principles? WE HAD THE BEST SYSTEM IN THE WORLD AND IT WAS STOLEN AWAY FROM US IN THE NAME OF FREE TRADE.

I'm disgusted by your draft report.

Yours Sincerely

Rodney Guest
