**(a)** A description of the method and data sources underlying the estimates presented in this table are provided in appendix A of the *Australian Government Expenditure by State and Territory* supplement to the *2010 Indigenous Expenditure Report*. Further information on expenditure definitions and scope, and on the Indigenous Expenditure Report proration method and guidelines is provided in the *Expenditure Data Manual* and the *Service Use Measure Definitions Manual*, respectively. All three of these publications are available for download from <http://www.pc.gov.au/ier>.

**(b)** Total Australian expenditure estimates are from the 2010 Report, which are based on national service use data. This may not equal the sum of state and territory estimates because of differences in the allocation of Australian Government expenditure and the patterns of service use across states and territories.

**(c)** Expenditure per head of population is not the same as expenditure per user, and must not be interpreted as a proxy for unit cost. Indigenous expenditure per person is the expenditure related to Indigenous people divided by the Indigenous population. Non-Indigenous expenditure per person is the expenditure related to non-Indigenous people divided by the non-Indigenous population. Total expenditure per person is total expenditure divided by the total population. The population data used for these calculations is provided in appendix B (table B.1) of the *Australian Government Expenditure by State and Territory* supplement to the *2010 Indigenous Expenditure Report*.

**(d)** The ratio of total Indigenous expenditure per person to total non-Indigenous expenditure per person. This reflects the combined effects of differential use patterns and costs between Indigenous and non-Indigenous people (subject to the limitation of the data and methodology).

**(a)** A description of the method and data sources underlying the estimates presented in this table are provided in appendix A of the *Australian Government Expenditure by State and Territory* supplement to the *2010 Indigenous Expenditure Report*. Further information on expenditure definitions and scope, and on the Indigenous Expenditure Report proration method and guidelines is provided in the *Expenditure Data Manual* and the *Service Use Measure Definitions Manual*, respectively. All three of these publications are available for download from <http://www.pc.gov.au/ier>.

**(b)** Total Australian expenditure estimates are from the 2010 Report, which are based on national service use data. This may not equal the sum of state and territory estimates because of differences in the allocation of Australian Government expenditure and the patterns of service use across states and territories.

**(c)** Expenditure per head of population is not the same as expenditure per user, and must not be interpreted as a proxy for unit cost. Indigenous expenditure per person is the expenditure related to Indigenous people divided by the Indigenous population. Non-Indigenous expenditure per person is the expenditure related to non-Indigenous people divided by the non-Indigenous population. Total expenditure per person is total expenditure divided by the total population. The population data used for these calculations is provided in appendix B (table B.1) of the *Australian Government Expenditure by State and Territory* supplement to the *2010 Indigenous Expenditure Report*.

**(d)** The ratio of total Indigenous expenditure per person to total non-Indigenous expenditure per person. This reflects the combined effects of differential use patterns and costs between Indigenous and non-Indigenous people (subject to the limitation of the data and methodology).

**(e)** The Australian Government recorded no expenditure for this GPC in 2008-09.

*Source:* Steering Committee for the Review of Government Service Provision estimates.

Total expenditure per person is total expenditure divided by the total population. The population data used for these calculations is provided in appendix B (table B.1) of the *Australian Government Expenditure by State and Territory* supplement to the *2010 Indigenous Expenditure Report*.

**(d)** The ratio of total Indigenous expenditure per person to total non-Indigenous expenditure per person. This reflects the combined effects of differential use patterns and costs between Indigenous and non-Indigenous people (subject to the limitation of the data and methodology).

**(e)** The Australian Government recorded no expenditure for this GPC in 2008-09.

*Source*: Steering Committee for the Review of Government Service Provision estimates.

-------------	------------	------------	------------	-----------	-----------	------------	------------	-----------	------------------------------

**(a)** A description of the method and data sources underlying the estimates presented in this table are provided in appendix A of the *Australian Government Expenditure by State and Territory* supplement to the *2010 Indigenous Expenditure Report*. Further information on expenditure definitions and scope, and on the Indigenous Expenditure Report proration method and guidelines is provided in the *Expenditure Data Manual* and the *Service Use Measure Definitions Manual*, respectively. All three of these publications are available for download from <http://www.pc.gov.au/ier>.

**(b)** Total Australian expenditure estimates are from the 2010 Report, which are based on national service use data. This may not equal the sum of state and territory estimates because of differences in the allocation of Australian Government expenditure and the patterns of service use across states and territories.

**(c)** Expenditure per head of population is not the same as expenditure per user, and must not be interpreted as a proxy for unit cost. Indigenous expenditure per person is the expenditure related to Indigenous people divided by the Indigenous population. Non-Indigenous expenditure per person is the expenditure related to non-Indigenous people divided by the non-Indigenous population. Total expenditure per person is total expenditure divided by the total population. The population data used for these calculations is provided in appendix B (table B.1) of the *Australian Government Expenditure by State and Territory* supplement to the *2010 Indigenous Expenditure Report*.

**(d)** The ratio of total Indigenous expenditure per person to total non-Indigenous expenditure per person. This reflects the combined effects of differential use patterns and costs between Indigenous and non-Indigenous people (subject to the limitation of the data and methodology).

**(e)** The Australian Government recorded no expenditure for this GPC in 2008-09.

Table F.6

Table F.6 **Australian Government direct and indirect expenditure on industry regulation and support, 2008-09<sup>(a)</sup>**

<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aus Gov<sup>(b)</sup></i>
-------------	------------	------------	------------	-----------	-----------	------------	------------	-----------	------------------------------

**(a)** A description of the method and data sources underlying the estimates presented in this table are provided in appendix A of the *Australian Government Expenditure by State and Territory* supplement to the *2010 Indigenous Expenditure Report*. Further information on expenditure definitions and scope, and on the Indigenous Expenditure Report proration method and guidelines is provided in the *Expenditure Data Manual* and the *Service Use Measure Definitions Manual*, respectively. All three of these publications are available for download from <http://www.pc.gov.au/ier>.

**(b)** Total Australian expenditure estimates are from the 2010 Report, which are based on national service use data. This may not equal the sum of state and territory estimates because of differences in the allocation of Australian Government expenditure and the patterns of service use across states and territories.

**(c)** Expenditure per head of population is not the same as expenditure per user, and must not be interpreted as a proxy for unit cost. Indigenous expenditure per person is the expenditure related to Indigenous people divided by the Indigenous population. Non-Indigenous expenditure per person is the expenditure related to non-Indigenous people divided by the non-Indigenous population. Total expenditure per person is total expenditure divided by the total population. The population data used for these calculations is provided in appendix B (table B.1) of the *Australian Government Expenditure by State and Territory* supplement to the *2010 Indigenous Expenditure Report*.

**(d)** The ratio of total Indigenous expenditure per person to total non-Indigenous expenditure per person. This reflects the combined effects of differential use patterns and costs between Indigenous and non-Indigenous people (subject to the limitation of the data and methodology).

**(e)** The Australian Government recorded no expenditure for this GPC in 2008-09.
