

# 10A Safe and supportive communities — attachment

The tables in this file accompany the report, *Overcoming Indigenous Disadvantage: Key Indicators 2009*, prepared by the Steering Committee for the Review of Government Service Provision. Background and definitions are available in the report, which is available on the Review website ([www.pc.gov.au/gsp](http://www.pc.gov.au/gsp)).

This file is available in both Microsoft Excel and Adobe PDF formats on the Review website ([www.pc.gov.au/gsp](http://www.pc.gov.au/gsp)). Users without Internet access can contact the Secretariat to obtain these tables (details inside the front cover of the report).

## Attachment contents

---

### **10A.1 Participation in organised sport, arts or community group activities**

- Table 10A.1.1** Persons aged 15 years and over in non-remote areas: participation in exercise, age standardised
- Table 10A.1.2** Indigenous persons aged 15 years and over in non-remote areas: participation in exercise
- Table 10A.1.3** Persons aged 15 years and over in non-remote areas: participation in exercise, by age group, 2004-05
- Table 10A.1.4** Persons aged 15 years and over in non-remote areas: participation in exercise, by sex, 2004-05, age standardised
- Table 10A.1.5** Persons aged 15 years and over in non-remote areas: participation in exercise, by selected characteristics, 2004-05, age standardised

### **10A.2 Access to traditional lands**

- Table 10A.2.1** Indigenous people aged 18 years or over in non-remote areas: selected cultural characteristics, by remoteness areas, 2004-05
- Table 10A.2.2** Indigenous people aged 18 years or over in non-remote areas: selected cultural characteristics, by age groups, 2004-05
- Table 10A.2.3** Indigenous people aged 18 years or over in non-remote areas: selected cultural characteristics, 1994, 2002, 2004-05

### **10A.3 Alcohol consumption and harm**

- Table 10A.3.1** Alcohol consumption by short-term and long-term risk status, people aged 14 years or over, Australia
- Table 10A.3.2** Alcohol involvement in Indigenous and non-Indigenous homicides
- Table 10A.3.3** Hospital separations related to alcohol use (per 1000 population), Australia (includes Queensland, WA, SA, and public hospitals in NT)
- Table 10A.3.4** Hospital separations related to alcohol use (per 1000 population), for selected jurisdictions (Queensland, WA, SA, and public hospitals in NT), 2001-02 and 2002-03
- Table 10A.3.5** Hospital separations related to alcohol use (per 1000 population), for selected jurisdictions (Queensland, WA, SA, and public hospitals in NT), 2003-04 and 2004-05
- Table 10A.3.6** Hospital separations related to alcohol use (per 1000 population), for selected jurisdictions (Queensland, WA, SA, and public hospitals in NT), 2005-06 and 2006-07
- Table 10A.3.7** Hospital separations related to alcohol use (per 1000 population), Australia (includes NSW, Victoria, Queensland, WA, SA, and public hospitals in the NT)
- Table 10A.3.8** Hospital separations related to alcohol use (per 1000 population), for selected jurisdictions (NSW, Victoria, Queensland, WA, SA, and public hospitals in the NT), 2004-05, 2005-06 and 2006-07
- Table 10A.3.9** Alcohol consumption for people aged 18 years or over, age standardised, 2004-05
- Table 10A.3.10** Alcohol consumption at short term risky to high risk levels, people aged 18 years or over, 2004-05
- Table 10A.3.11** Risky to high risk alcohol consumption for people aged 18 years or over, age standardised 2004-05
- Table 10A.3.12** Risky to high risk alcohol consumption for people aged 18 years or over, by sex and age, 2004-05

## Attachment contents

- 
- Table 10A.3.13** Alcohol induced deaths, death rates, age standardised, 2003–2007
- Table 10A.3.14** Average daily alcohol consumption and associated risk levels
- 10A.4 Drug and other substance use and harm**
- Table 10A.4.1** Illicit drug use for people aged 14 years and over
- Table 10A.4.2** Drug involvement in Indigenous and non-Indigenous homicide
- Table 10A.4.3** Substance use for Indigenous persons aged 18 years and over in non-remote areas, by sex
- Table 10A.4.4** Main types of hospital separations related to drug use, Queensland, WA, SA, and public hospitals in NT
- Table 10A.4.5** Age standardised hospital separations related to drug use, Queensland, WA, SA, and public hospitals in NT
- Table 10A.4.6** Main types of hospital separations related to drug use, NSW, Victoria, Queensland, WA, SA, and public hospitals in the NT
- Table 10A.4.7** Age standardised hospital separations related to drug use, NSW, Victoria, Queensland, WA, SA, and public hospitals in the NT
- Table 10A.4.8** Drug induced deaths, death rates, age standardised, 2003–2007
- 10A.5 Juvenile diversions**
- Table 10A.5.1** NSW, alleged juvenile offenders (aged 10–17 years) proceeded against by police, by offence type, 2006
- Table 10A.5.2** NSW, alleged juvenile offenders (aged 10–17 years) proceeded against by police, by offence type, 2007
- Table 10A.5.3** NSW, juvenile diversions for offenders (aged 10–17 years), 2004 and 2005
- Table 10A.5.4** NSW, juvenile diversions for offenders (aged 10–17 years), 2006 and 2007
- Table 10A.5.5** Victoria, method of processing juvenile alleged offenders, 2004–05
- Table 10A.5.6** Victoria, method of processing juvenile alleged offenders, 2005–06
- Table 10A.5.7** Victoria, method of processing juvenile alleged offenders, 2006–07
- Table 10A.5.8** Victoria, method of processing juvenile alleged offenders, 2007–08
- Table 10A.5.9** Victoria, method of processing juvenile alleged offenders, by type of offence, 2006–07
- Table 10A.5.10** Victoria, method of processing juvenile alleged offenders, by type of offence, 2007–08
- Table 10A.5.11** Victoria, method of processing juvenile alleged offenders, by remoteness area, 2006–07
- Table 10A.5.12** Victoria, method of processing juvenile alleged offenders, by remoteness area, 2007–08
- Table 10A.5.13** Queensland, method of processing juvenile offenders, by type of offence, 2007–08
- Table 10A.5.14** Queensland, method of processing juvenile offenders, by type of offence, 2006–07
- Table 10A.5.15** WA, total number of contacts with the juvenile justice system, by type of contact, 1995–2002
- Table 10A.5.16** WA, number and proportion of juvenile diversions by sex, 1995–2002

## Attachment contents

- 
- Table 10A.5.17** WA, number and proportion of juvenile diversions, by type of offence, 1995–2002
- Table 10A.5.18** WA, juvenile cautions, by type of offence, 2005
- Table 10A.5.19** WA, juvenile cautions, by type of offence, 2006
- Table 10A.5.20** WA, annual breakdown of juvenile cautions issued, 1994–2006
- Table 10A.5.21** WA, number and proportion of juveniles cautioned, by sex and age group, 2006
- Table 10A.5.22** SA, number and proportion of juvenile diversions, 2004 to 2006
- Table 10A.5.23** SA, police apprehensions by type of major offence and method of processing, 2006
- Table 10A.5.24** SA, proportion of offenders diverted via formal caution or transfer to family conference, by type of major offence 2006
- Table 10A.5.25** SA, police apprehensions by type of major offence and method of processing, 2005
- Table 10A.5.26** NT, juvenile apprehensions and the proportion diverted, 2002 to 2005
- 10A.6 Repeat offending**
- Table 10A.6.1** Number and proportion of prisoners with known prior adult imprisonment under sentence, by gender and State/Territory, 30 June 2008
- Table 10A.6.2** Number and proportion of prisoners with known prior adult imprisonment under sentence, by gender and State/Territory, 30 June 2007
- Table 10A.6.3** Proportion of prisoners with known prior adult imprisonment under sentence, 2000 to 2008
- Table 10A.6.4** Prisoners by legal status, prior imprisonment and most serious offence/charge, 2008
- Table 10A.6.5** Prisoners by legal status, prior imprisonment and most serious offence/charge, 2007
- Table 10A.6.6** NSW, juvenile re-offenders who first appeared in Children's Court in 1999
- Table 10A.6.7** Queensland, re-offending rates for maltreated juveniles who received a police caution, by gender
- Table 10A.6.8** Queensland, juveniles who had a finalised court appearance, by nature of first contact and gender
- Table 10A.6.9** WA, number and proportion of juveniles re-offending, by type of first contact with the justice system
- Table 10A.6.10** SA, proportion of juveniles in the 1984 cohort apprehended at least once by police, by gender and Indigenous status
- Table 10A.6.11** SA, number and proportion of juveniles in the 1984 cohort which were apprehended as juveniles (0–17 years), by the number of apprehensions, gender and Indigenous status

Table 10A.1.1 Persons aged 15 years and over in non-remote areas: participation in exercise, age standardised (a),

(b), (c)

Proportion (%)	Unit	1995 (d)		2001		2004-05	
		Indigenous	Non-Indigenous	Indigenous	Non-Indigenous	Indigenous	Non-Indigenous
Sedentary/low level exercise (includes no exercise)	%	72.2	69.2	71.3	68.4	77.9	69.3
Exercise participation (e)	%	27.8	30.8	28.7	31.6	21.0	30.7
<b>Total (f)</b>	<b>%</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>

## Relative Standard Error (RSE) (%)

Sedentary/low level exercise (includes no exercise)	%	6.8	0.3	2.9	0.6	1.8	0.7
Exercise participation (e)	%	10.4	0.6	6.1	1.3	5.8	1.5

- (a) Based on frequency, intensity and duration of exercise in the two weeks prior to the interview.  
 (b) Estimates with a RSE of 25 per cent to 50 per cent should be used with caution. Estimates with a RSE greater than 50 per cent are considered too unreliable for general use.

(c) 1995 RSE based on the estimate not the proportion as in 2001 and 2004-05.

- (d) Differences between 1995 Indigenous and non-Indigenous data are not statistically significant.  
 (e) Moderate and high exercise participation levels.  
 (f) Includes 'not stated' responses.

Source: ABS (unpublished), derived from *National Health Surveys, 1995 and 2001* (Indigenous components); ABS (unpublished), derived from *National Health Survey, 2004-05*; ABS (unpublished), derived from *National Aboriginal and Torres Strait Islander Health Survey, 2004-05*.

Table 10A.1.1

Table 10A.1.2

**Indigenous persons aged 15 years and over in non-remote areas: participation in exercise (a), (b), (c)**

	1995		2004-05	
	Proportion (%)	RSE (%)	Proportion (%)	RSE (%)
Sedentary/low level exercise (includes no exercise)	69.7	5.7	74.7	1.5
Exercise participation (d)	30.3	8.7	24.3	5.0

RSE Relative standard error.

- (a) Based on frequency, intensity and duration of exercise in the two weeks prior to the interview.
- (b) Estimates with a RSE of 25 per cent to 50 per cent should be used with caution. Estimates with a RSE greater than 50 per cent are considered too unreliable for general use.
- (c) 1995 RSE based on the estimate not the proportion as in 2004-05.
- (d) Moderate and high exercise participation levels.

Source: ABS (unpublished), derived from *National Health Surveys, 1995 and 2001* (Indigenous components); ABS (unpublished), derived from *National Health Survey, 2004-05*; ABS (unpublished), derived from *National Aboriginal and Torres Strait Islander Health Survey, 2004-05*.

(a) Not consumed alcohol in the previous 12 months.

(b) The alcohol risk levels are defined by the National Health and Medical Research Council (NHMRC) (see Australian Alcohol Guidelines, October 2001). The average daily consumption of alcohol associated with the risk levels is as follows: low risk (males) - 50ml or less; low risk (females) - 25ml or less; medium risk (males) - more than 50ml, up to 75ml; medium risk (females) - more than 25ml, up to 50ml; high risk (males) - more than 75ml; and high risk (females) - more than 50ml. A standard drink is defined as a full serve of alcoholic beverages containing 10 grams of alcohol, equivalent to 12.5 millilitres (ml) of alcohol, for example, a 375 ml can/bottle of mild strength beer, or a 100 ml glass of wine.

(a) Homicide includes murder and manslaughter, but excludes driving causing death.

(b) Where an offender has been identified. Excludes data where Indigenous status of victim or offender, or alcohol involvement is unknown. In the case of multiple offenders, table includes the first offender only.

(c) Indigenous homicides are where both victims and offenders of homicide are either Indigenous and/or Torres Strait Islanders.

(d) Non-Indigenous homicides are where both victims and offenders are not Indigenous. Includes victims and offenders who are Caucasian, Asian and Maori/Pacific Islanders.

(e) Inter-racial homicides are where either the victim or the offender is Indigenous. Includes homicides involving: an Indigenous offender and non-Indigenous victim, and non-Indigenous offender and an Indigenous victim.

- (a) For 2001-02 to 2004-05 data, principal diagnoses are based on ICD-10-AM (3rd edition) codes. For 2005-06 and 2006-07 data, ICD-10-AM (fifth edition) codes F10, K70, K75 and T51 are based on principal diagnosis. External cause codes X45, X65 and Y15 are based on any external cause reported.
- (b) The hospital separation rates (per 1000 population) were directly age standardised using 2001 Australian population.
- (c) Hospital separation is the discharge, transfer, death or change of episode of care of an admitted patient (see glossary for a detailed definition).
- (d) Non-Indigenous data includes separations where Indigenous status were not reported.
- (e) Data are based on state of usual residence.
- (f) Overlapping may exist between separations by toxic effect of alcohol and separations based on external causes X45, X65, or Y15.

Table 10A.3.3

Table 10A.3.3

**Hospital separations related to alcohol use (per 1000 population), Australia (includes Queensland, WA, SA, and public hospitals in NT) (a), (b), (c), (d), (e), (f), (g)**

	<i>Males</i>		<i>Females</i>		<i>All persons</i>	
	<i>Indigenous</i>	<i>Non- Indigenous</i>	<i>Indigenous</i>	<i>Non- Indigenous</i>	<i>Indigenous</i>	<i>Non- Indigenous</i>

(g) For 2005-06 and 2006-07 data, separations for which care type was reported as newborn with no qualified days, and records for hospital boarders and posthumous organ procurement have been excluded.

– Nil or rounded to zero. .. Not applicable. **na** Not available.

- (a) Principal diagnoses are based on ICD-10-AM (3rd edition) codes.
- (b) The hospital separation rates (per 1000 population) were directly age standardised using the 2001 Australian population.
- (c) Hospital separation is the discharge, transfer, death or change of episode of care of an admitted patient (see glossary for a detailed definition).
- (d) Non-Indigenous data includes separations where Indigenous status were not reported.
- (e) Data are based on state of usual residence.
- (f) Overlapping may exist between separations by toxic effect of alcohol and separations based on external causes X45, X65, or Y15.
  - Nil or rounded to zero. np Not published due to less than 5 separations.

(a) ICD-10-AM (fifth edition) codes F10, K70, K75 and T51 based on principal diagnosis. External cause codes X45, X65 and Y15 based on any external cause reported.

(b) The hospital separation rates (per 1000 population) were directly age standardised using the 2001 Australian population.

(c) Hospital separation is the discharge, transfer, death or change of episode of care of an admitted patient (see glossary for a detailed definition).

(d) Non-Indigenous data includes separations where Indigenous status were not reported.

(e) Data are based on state of usual residence.

(f) Overlapping may exist between separations by toxic effect of alcohol and separations based on external causes X45, X65, or Y15.

(g) Separations for which care type was reported as newborn with no qualified days, and records for hospital boarders and posthumous organ procurement have been excluded.

— Nil or rounded to zero. np Not published due to less than 5 separations.

Source: AIHW National Hospital Morbidity Database (unpublished).

(a) ICD-10-AM (fifth edition) codes F10, K70, K75 and T51 based on principal diagnosis. External cause codes X45, X65 and Y15 based on any external cause reported.

(b) The hospital separation rates (per 1000 population) were directly age standardised using 2001 Australian population.

Table 10A.3.7

**Hospital separations related to alcohol use (per 1000 population),  
Australia (includes NSW, Victoria, Queensland, WA, SA, and public  
hospitals in the NT) (a), (b), (c), (d), (e), (f), (g)**

	<i>Males</i>		<i>Females</i>		<i>All persons</i>	
	<i>Indigenous</i>	<i>Non- Indigenous</i>	<i>Indigenous</i>	<i>Non- Indigenous</i>	<i>Indigenous</i>	<i>Non- Indigenous</i>

(c) Hospital separation is the discharge, transfer, death or change of episode of care of an admitted patient (see glossary for a detailed definition).

(d) Non-Indigenous data includes separations where Indigenous status were not reported.

(e) Data are based on state of usual residence.

(f) Overlapping may exist between separations by toxic effect of alcohol and separations based on external causes X45, X65, or Y15.

(g) Separations for which care type was reported as newborn with no qualified days, and records for hospital boarders and posthumous  
– Nil or rounded to zero.

Source: AIHW National Hospital Morbidity Database (unpublished).

- (a) ICD-10-AM (fifth edition) codes F10, K70, K75 and T51 based on principal diagnosis. External cause codes X45, X65 and Y15 based on any external cause reported.
- (b) The hospital separation rates (per 1000 population) were directly age standardised using the 2001 Australian population.
- (c) Hospital separation is the discharge, transfer, death or change of episode of care of an admitted patient (see glossary for a detailed definition).
- (d) Non-Indigenous data includes separations where Indigenous status were not reported.
- (e) Data are based on state of usual residence.
- (f) Overlapping may exist between separations by toxic effect of alcohol and separations based on external causes X45, X65, or Y15.
- (g) Separations for which care type was reported as newborn with no qualified days, and records for hospital boarders and posthumous organ procurement have been excluded.
- Nil or rounded to zero. np Not published due to less than 5 separations.
- Source: AIHW National Hospital Morbidity Database (unpublished).

RSE=Relative standard error.

**Table 10A.3.9 Alcohol consumption for people aged 18 years or over, age standardised, 2004-05 (a), (b)**

- 
- (a) Estimates with a relative standard error of between 25 per cent to 50 per cent should be used with caution. Estimates with a relative standard error greater than 50 per cent are considered too unreliable for general use.
- (b) Age standardised Indigenous data for the very remote area are not provided by the ABS as non-Indigenous data for the very remote area are not available (they were not collected in the 2004-05 NHS). The records for the very remote areas have been attributed appropriately to national estimates.
- (c) The alcohol risk levels are defined by the National Health and Medical Research Council (NHMRC) (see Australian Alcohol Guidelines, October 2001). Data on the three risk levels reported in the table are derived based on average daily intake of alcohol over the 7 days of the reference week prior to the interview. The average daily consumption of alcohol associated with the risk levels is as follows: low risk (males) - 50ml or less; low risk (females) - 25ml or less; medium risk (males) - more than 50ml, up to 75ml; medium risk (females) - more than 25ml, up to 50ml; high risk (males) - more than 75ml; and high risk (females) - more than 50ml. A standard drink is defined as a full serve of alcoholic beverages containing 10 grams of alcohol, equivalent to 12.5 millilitres (ml) of alcohol, for example, a 375 ml can/bottle of mild strength beer, or a 100 ml glass of wine.
- (d) Includes 'time since last consumed alcohol' not known and alcohol risk level not known.
- Nil or rounded to zero (including null cells). **na** Not available.

*Source: ABS National Aboriginal and Torres Strait Islander Health Survey 2004-05, Cat. no. 4715.0.55.005 (unpublished); ABS National Health Survey 2004-05: Summary of Results, Cat. no. 4362.0 (unpublished).*

Table 10A.3.10

Table 10A.3.10 Alcohol consumption at short term risky to high risk levels, people aged 18 years or over, 2004-05 (a)

	Non age standardised						Age standardised		
	Males		Female		Males		Females		
	Indigenous	Non-Indigenous	Indigenous	Non-Indigenous	Indigenous	Non-Indigenous	Indigenous	Non-Indigenous	Indigenous
Drank alcohol at risky to high risk levels at least one occasion in last 12 months (%)	64*	48*	46*	30*	56*	48*	40*	31*	
Drank alcohol at risky to high risk levels at least once a week in last 12 months (%)	24*	12*	15*	14*	12*	12*	14*	5*	
Total (b) (%)	100	100	100	100	100	100	100	100	100
Total (b) (no.)	120 479	7 357 683	137 818	7 495 573	120 479	7 357 683	137 818	7 495 573	

(a) The alcohol risk levels are defined by the National Health and Medical Research Council (NHMRC) (see Australian Alcohol Guidelines, October 2001). The consumption of alcohol associated with the short term risk levels is as follows: short term risky drinking for males is consumption in excess of 6 but less than 11 standard drinks on any one day, for females is consumption in excess of 4 but less than 7 standard drinks on any one day; short term high risk drinking for males is consumption of 11 or more standard drinks on any one day, for females is consumption in excess of 7 or more standard drinks on any one day. A standard drink is defined as a full serve of alcoholic beverages containing 10 grams of alcohol, equivalent to 12.5 millilitres (ml) of alcohol, for example, a 375 ml can/bottle of mild strength beer, or a 100 ml glass of wine.

(b) Total include people who did not drink alcohol in the last 12 months, those who reported time since last drank alcohol as 'not known' and those who drank alcohol in the last 12 months, but the risk levels were reported as 'not known'.

\* Represents results with statistically significant differences in the Indigenous/non-Indigenous comparisons.

Table 10A.3.13

**Table 10A.3.13 Alcohol induced deaths, death rates, age standardised, 2003–2007  
(a), (b), (c), (d)**

	<i>Indigenous</i>					<i>Non-Indigenous(e)</i>				
	NSW	Qld	WA	SA	NT	NSW	Qld	WA	SA	NT
Males	41.0	43.3	75.9	57.6	105.7	8.1	7.4	7.2	7.2	10.0
Females	19.2	19.4	36.0	np	53.0	2.0	2.1	1.9	1.8	4.2
Persons	29.7	30.5	54.7	33.9	77.7	4.9	4.7	4.5	4.4	7.4

(a) Causes of death attributable to alcohol are based on codes of the International Statistical Classification of Diseases and Related Health Problems, 10th Revision (ICD-10).

(b) Indirect standardised death rate per 100 000 population.

(c) Denominators used in the calculation of rates for the Indigenous population are *Experimental Estimates and Projections, Aboriginal and Torres Strait Islander Australians*, Cat. no. 3238.0 (low series). There are no comparable population data for the non-Indigenous population. Denominators used in the calculation of rates for comparison with the Indigenous population have been derived by subtracting Indigenous population estimates/projections from total estimated resident population and should be used with care, as these data include population units for which Indigenous status were not stated.

(d) Data on deaths of Indigenous people are affected by differing levels of coverage of deaths identified as Indigenous across states and territories. Care should be exercised in analysing these data, particularly in making comparisons across states and territories and between the Indigenous and non-Indigenous data.

(e) Non-Indigenous includes deaths with a not stated Indigenous status.

**np** Not published.

- (a) Homicide includes murder and manslaughter, but excludes driving causing death.
  - (b) Where an offender has been identified. Excludes cases where Indigenous status of victim or offender, or drug involvement is unknown. In the case of multiple offenders, table includes the first offender only.
  - (c) Indigenous homicides are where both victims and offenders of homicide are either Indigenous and/or Torres Strait Islanders.
  - (d) Non-Indigenous homicides are where both victims and offenders are not Indigenous. Includes victims and offenders who are Caucasian, Asian and Maori/Pacific Islanders.
  - (e) Inter-racial homicides are where either the victim or the offender is Indigenous. Includes homicides involving: an Indigenous offender and non-Indigenous victim, and non-Indigenous offender and an Indigenous victim.
- Nil or rounded to zero.

RSE=Relative standard error.

- (a) Data from the 2002 National Aboriginal and Torres Strait Islander Social Survey (NATSISS).
- (b) Includes pain killers, tranquillisers and sleeping pills.
- (c) Includes heroin, cocaine, petrol, LSD/synthetic hallucinogens, naturally occurring hallucinogens, ecstasy/designer drugs, and other inhalants. Includes methadone in 2004–05.
- (d) Sum of components may be more than total as persons may have reported more than one type of substance used.
- (e) Includes 'whether used in last 12 months' not known.
- (f) Includes 'whether ever used substances' not known.
- (g) People who accepted the substance use form.
- (h) Data from the ABS National Aboriginal and Torres Strait Islander Health Survey (NATSIHS) 2004–05. Questions in the 2004–05 NATSIHS are based on those used in the 2002 NATSISS. However, differences in non-response should also be considered, with the NATSIHS having 22 per cent non-response compared to 10 per cent for the NATSISS.
- (i) Estimates with a relative standard error of 25 per cent to 50 per cent should be used with caution. Estimates with a relative standard error greater than 50 per cent are considered too unreliable for general use.
  - Nil or rounded to zero (including null cells).

- (a) ICD-10-AM codes for poisoning, mental/behavioural disorders and other conditions are based on Principal diagnoses. External cause codes for accidental poisoning are based on any external cause reported.
- (b) The hospital separation rates (per 1000 population) were directly age standardised using the 2001 Australian population.
- (c) Data are based on state of usual residence.
- (d) Separations for which care type was reported as newborn with no qualified days, and records for hospital boarders and posthumous organ procurement have been excluded.
- (e) Includes separations where Indigenous status were not reported.
- Nil or rounded to zero (including null cells). **np** Not published.
- Source: AIHW National hospital morbidity database (unpublished).

Table10A.4.8

**Table10A.4.8 Drug induced deaths, death rates, age standardised,  
2003–2007(a), (b), (c), (d)**

	<i>Indigenous</i>					<i>Non-Indigenous(e)</i>				
	NSW	Qld	SA	WA	NT	NSW	Qld	SA	WA	NT
Males	14.7	np	21.5	np	np	6.7	4.9	7.0	5.4	5.8
Females	7.8	3.8	np	np	np	3.9	2.8	4.9	3.3	3.6
Persons	11.1	3.3	13.9	5.4	4.5	5.3	3.8	5.9	4.3	4.7

- (a) Causes of death attributable to drug-induced mortality are based on codes of the International Statistical Classification of Diseases and Related Health Problems, 10th Revision (ICD-10).
- (b) Indirect standardised death rate per 100 000 population.
- (c) Denominators used in the calculation of rates for the Indigenous population are *Experimental Estimates and Projections, Aboriginal and Torres Strait Islander Australians*, Cat. no. 3238.0 (low series). There are no comparable population data for the non-Indigenous population. Denominators used in the calculation of rates for comparison with the Indigenous population have been derived by subtracting Indigenous population estimates/projections from total estimated resident population and should be used with care, as these data include population units for which Indigenous status were not stated.
- (d) Data on deaths of Indigenous people are affected by differing levels of coverage of deaths identified as Indigenous across states and territories. Care should be exercised in analysing these data, particularly in making comparisons across states and territories and between the Indigenous and non-Indigenous data.
- (e) Non-Indigenous includes deaths with a not stated Indigenous status.

**np** Not published.

Source: ABS Deaths Registration Database (unpublished).

Table 10A.5.4

**Table 10A.5.4 NSW, juvenile diversions for offenders (aged 10–17 years), 2006 and 2007 (a), (b), (c), (d)**

	Indigenous												Non-Indigenous												Unknown												Total													
	Uni			Male			Female			Unkn			Total			Male			Female			Unkn			Total			Male			Female			Unkn			Total			Male			Female			Unkn			Total	

- (a) This table represents persons of interest (POIs) or alleged offenders who have come to the attention of NSW Police for a recorded criminal incident (driving offences are excluded). Some POIs are formally proceeded against to court and some are proceeded against other than to court whilst others are not proceeded against. The POIs included in the table above have all been proceeded against. POIs are not a count of unique offenders. Where an individual is involved in multiple criminal incidents throughout the year they will appear as a POI multiple times.
- (b) Under the Young Offenders Act 1997, when police apprehend a young person they must first consider whether the young person is entitled to be diverted under the Act by way of warning, caution or youth justice conference.
- (c) This table shows various legal processes NSW Police can employ against alleged offenders.
- (d) The Total includes Youth Justice Conference, Caution - Young Offenders Act, Warning and Infringement Notice.  
– Nil or rounded to zero. **Unkn** Unknown.

- (a) A 'contact' was counted for every event in which a juvenile was cautioned or referred to a JJT, irrespective of the number of offences for which the caution or referral was made.
- (b) A diversion includes both 'cautioning' and 'referrals to JJTs' by the police. JJTs handle juveniles who have committed minor offences, or who are in the early stages of offending (i.e. divert juveniles from court).
- (c) Indigenous status is based on the attending officer's subjective assessment of the offender's appearance and is recorded for operational purposes only.

Total	no.	389	262	651
Proportion diverted				
Males	%	39.3	46.9	41.7
Females	%	68.1	83.9	76.0
Total	%	42.9	55.7	47.3

- (a) Data refers to apprehension cases rather than individual persons, therefore, there may be a number of cases that relate to one person.
- (b) Indigenous data are based on self-identification by the juvenile.
- (c) Where cases did not result in a diversion, these cases either proceeded to court or were resolved in some other manner (it is not an indicator of the number of matters referred to the courts).

(a) Prisoners who have had previous imprisonment in another State or Territory may not be counted as having prior imprisonment. Some states and territories may also include episodes on remand as prior imprisonment. See glossary of Prisoners in Australia (ABS Cat. no. 4517.0) for complete definition of prior imprisonment.

(b) Includes ACT prisoners held in NSW prisons. The ACT in NSW figures are a subset of the NSW figures and are not separately counted in the Australian totals.

(c) Excludes breaches of periodic detention orders greater than 3 months.

(d) The majority of full-time prisoners sentenced in the ACT are held in NSW prisons.

(e) Includes prisoners whose prior imprisonment status is unknown.

– Nil or rounded to zero.

(a) Prisoners who have had previous imprisonment in another State or Territory may not be counted as having prior imprisonment. Some states and territories may also include episodes on remand as prior imprisonment. See glossary of Prisoners in Australia (ABS Cat. no. 4517.0) for complete definition of prior imprisonment.

(b) Includes ACT prisoners held in NSW prisons. The ACT in NSW figures are a subset of the NSW figures and are not separately counted in the Australian totals.

(c) Caution should be exercised in interpreting data as 2006 data for Queensland are under enumerated. National data are impacted by this under enumeration.

(d) From 2006, excludes breaches of periodic detention orders greater than three months.

(e) The majority of full-time prisoners sentenced in the ACT are held in NSW prisons.

**na** Not available for publication but included in totals where applicable, unless otherwise indicated.

<b>Detention</b>				
Number of juveniles in cohort	no.	9	21	55
Number of re-offenders	no.	5	7	23
Proportion of re-offenders in cohort	%	55.6	33.3	41.8
<b>Total</b>				
Number of juveniles in cohort	no.	2 051	12 445	15 082
Number of re-offenders	no.	1 345	5 295	7 172
Proportion of re-offenders in cohort	%	65.6	42.5	47.5

(a) The above data are based on two cohorts of juveniles first entering the WA justice system in either 1995 or 2000. Follow-up times for the 1995 and 2000 cohorts were 7.5 and 2.5 years, respectively. Reoffending is measured by the proportion of the group who re-offended before the end of the study or follow-up period. The 2000 cohort was slightly larger in size than the 1995 cohort (7811 and 7271 offenders, respectively).

(b) Totals include juveniles of unknown Indigenous status.

Table 10A.6.10

**Table 10A.6.10 SA, proportion of juveniles in the 1984 cohort apprehended at least once by police, by gender and Indigenous status (a), (b), (c)**

	<i>Unit</i>	<i>Indigenous</i>	<i>Non-Indigenous</i>	<i>Total</i>
<b>Males</b>				
Apprehended at least once	no.	166	2 518	2 684
Population of Cohort	no.	263	10 420	10 683
Proportion apprehended at least once	%	63.1	24.2	25.1
<b>Females</b>				
Apprehended at least once	no.	74	731	805
Population of Cohort	no.	277	9 942	10 219
Proportion apprehended at least once	%	26.7	7.3	7.9
<b>Persons</b>				
Apprehended at least once	no.	240	3 249	3 489
Population of Cohort	no.	540	20 362	20 902
Proportion apprehended at least once	%	44.4	15.9	16.7

- (a) Data from the 1984 cohort are assessing the extent to which juveniles have had formal contact with the SA juvenile justice system, which commences when they are officially apprehended by police, either by way of an arrest or report. The above data are not measuring the actual levels of offending, as not all apprehended youths are subsequently found guilty or admit guilt.
- (b) The follow-up period for the 1984 cohort was 18 years (until 2002). The size of the cohort population was calculated using South Australian population figures provided by the ABS.
- (c) Data with unknown Indigenous status was included under non-Indigenous (361 males and 160 females).
