

AUSTRALIA'S PRODUCTIVITY, IS IT SLIPPING?

Labour productivity (2017-18) (per hour worked)

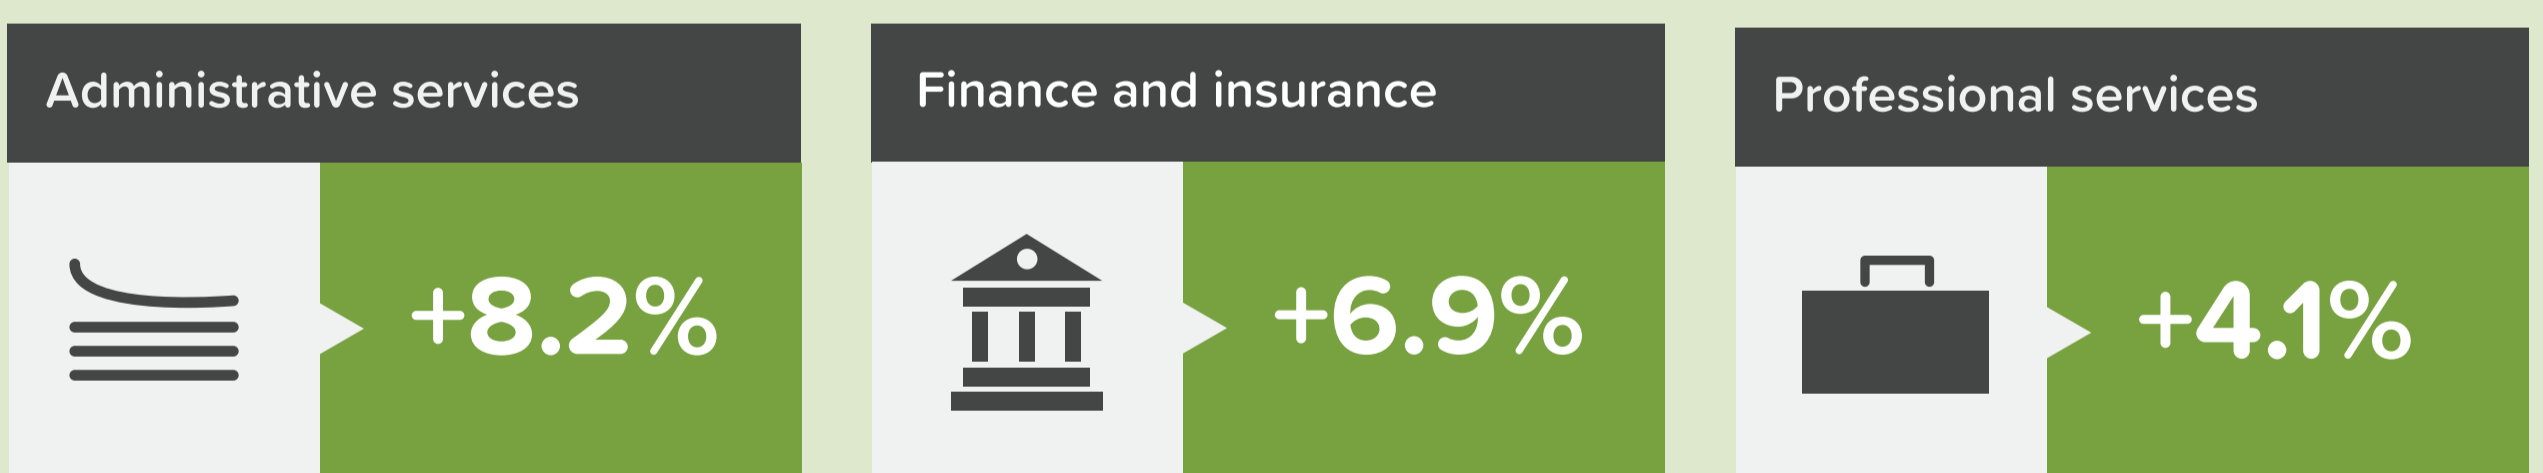

Multifactor productivity (2017-18) (per combined input of labour and capital)

Mining labour productivity growth has slowed and is now in the red

However, there was positive growth in many other industries

Since 2001, internationally our labour productivity growth has performed well compared to other economies such as within the G7.
