

# AUSTRALIA'S PRODUCTIVITY

## 2014-15

### LABOUR PRODUCTIVITY

Economy wide

+ 1 . 0 %

Market sector

+ 1 . 9 %

### COMBINED INPUTS OF LABOUR AND CAPITAL

Multifactor productivity

+ 0 . 8 %

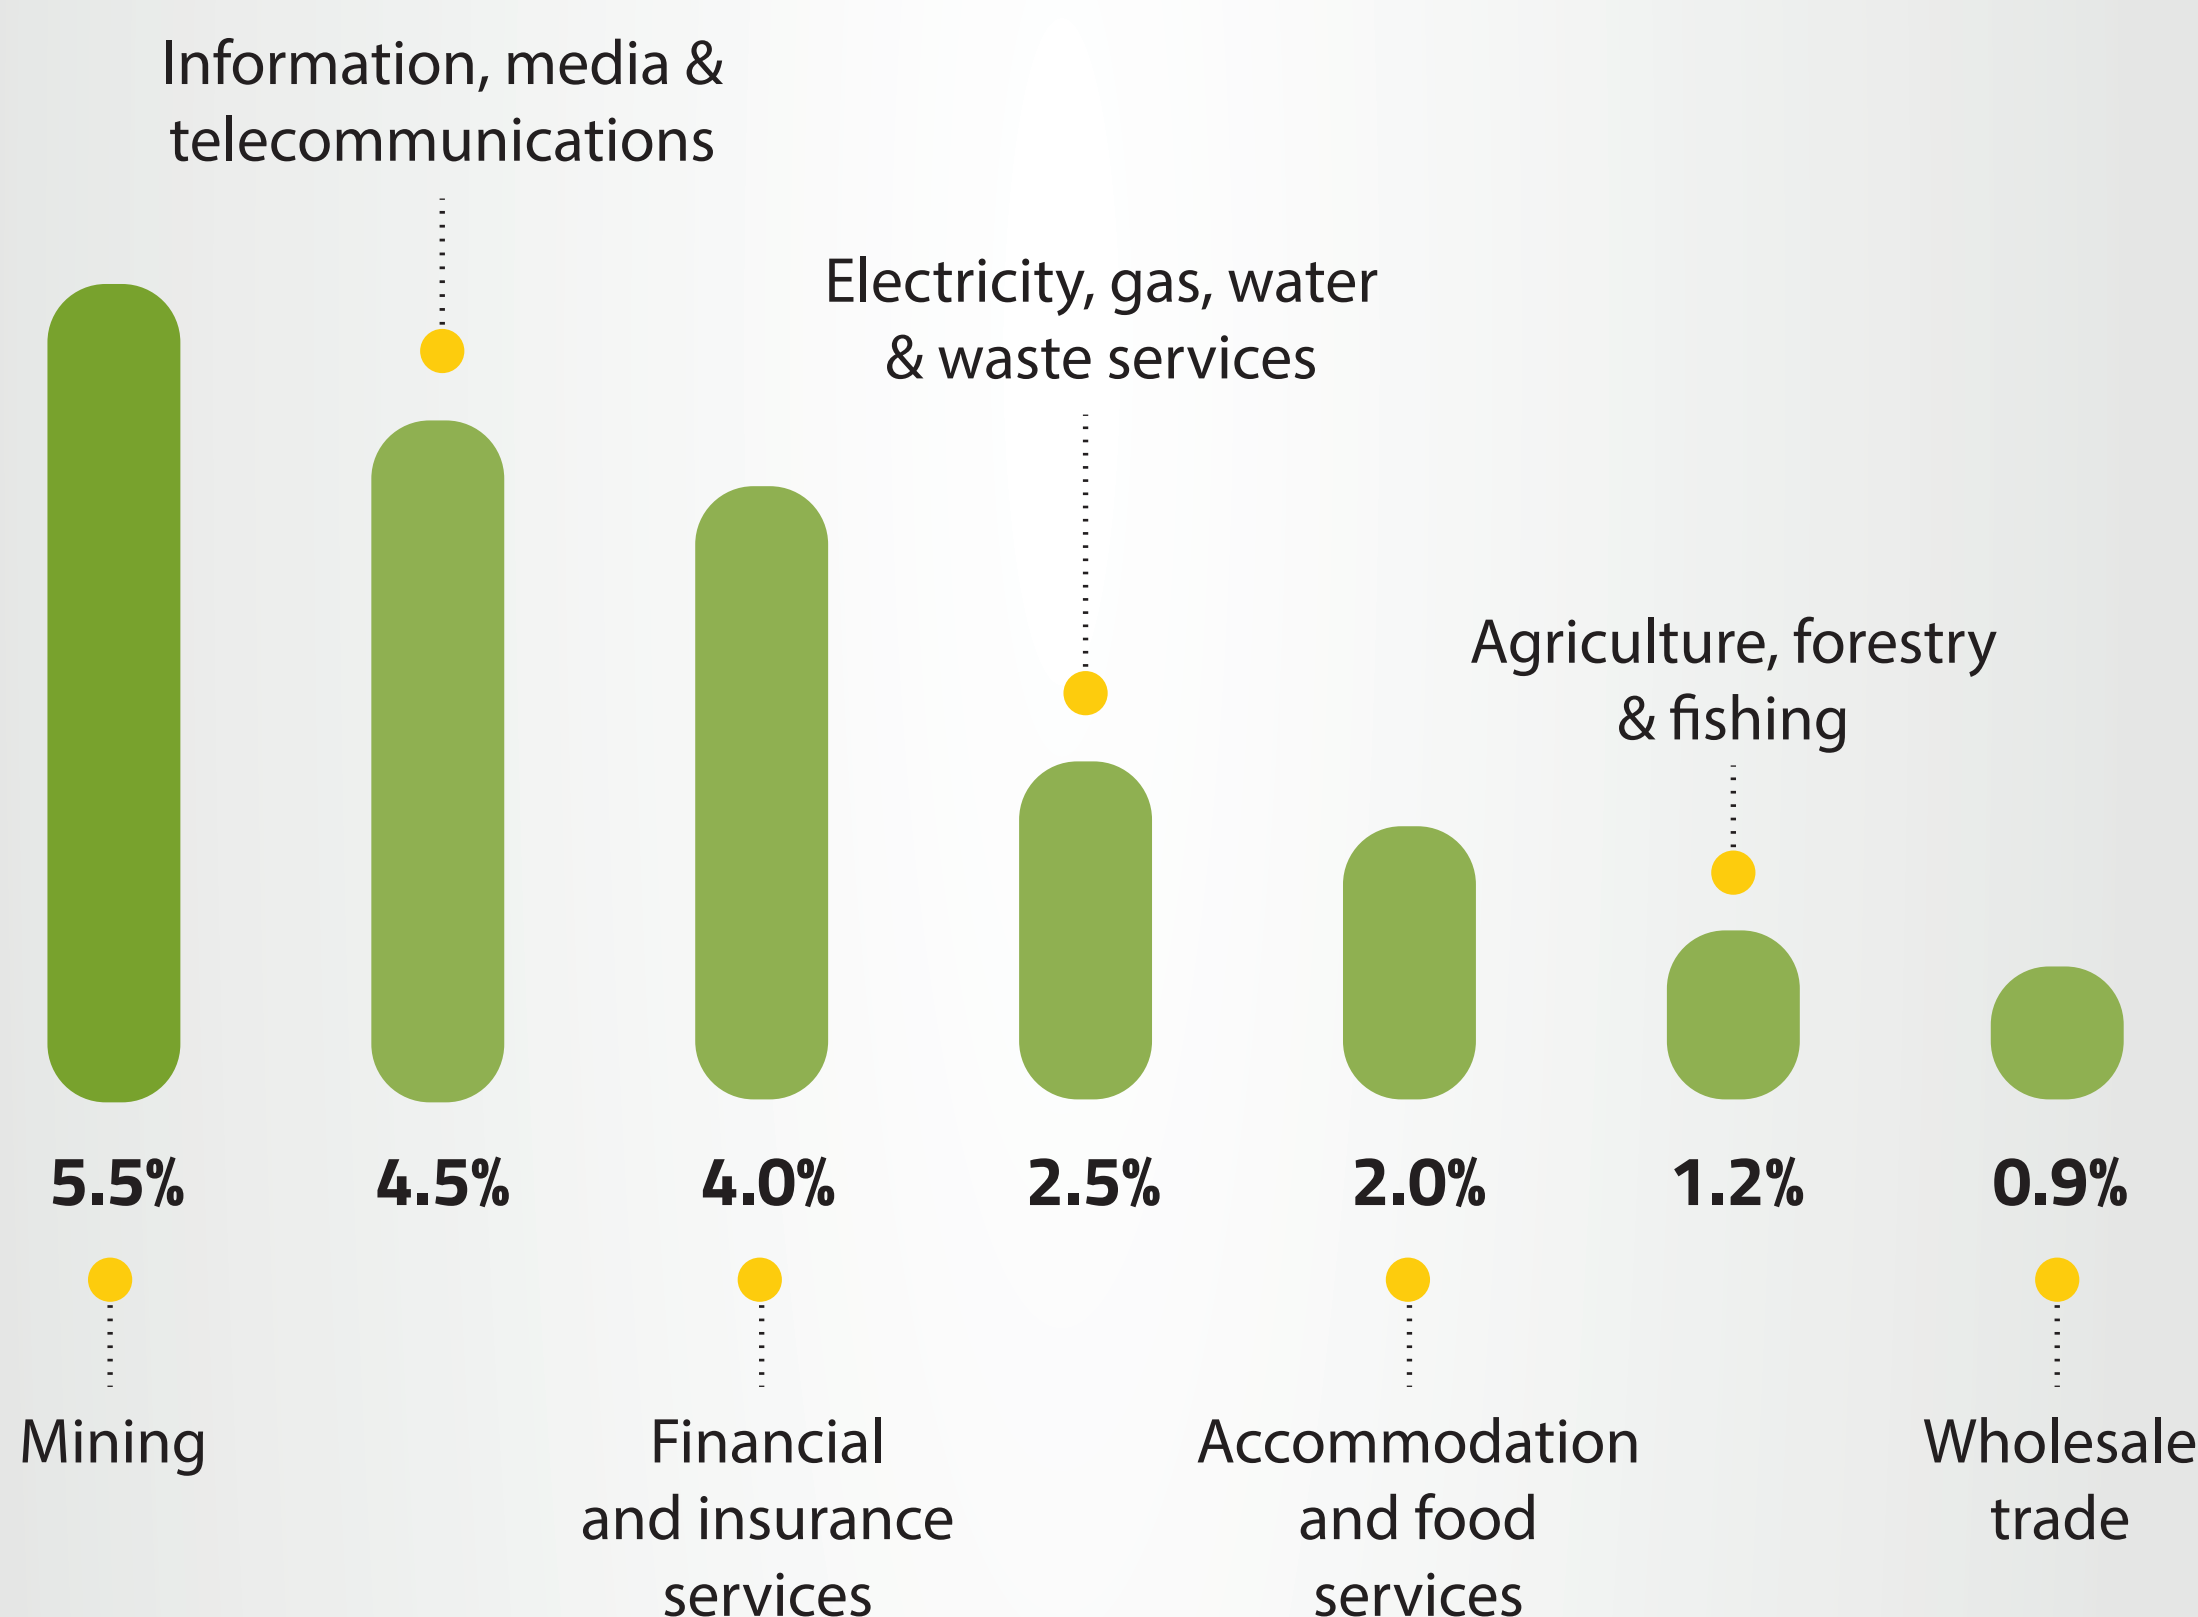

MINING HAD  
THE HIGHEST  
GROWTH

+ 5 . 5 %

AND

### POSITIVE GROWTH IN MOST OTHER INDUSTRIES

BUT

INCOME  
PER PERSON  
DECREASED BY

- 0 . 9 %

SO

Australia's income growth has been  
**falling** with our terms of trade.

Without a lift in productivity,  
**slower growth** will likely prevail.
