

13A Disability services — attachment

Definitions for the indicators and descriptors in this attachment are in section 13.7. Data in this chapter are examined by the Disability Services Working Group, but have not been formally audited by the Secretariat. A peer review process is also undertaken by the Disability Services Working Group in the development of the data definitions. Unsourced information was obtained from Commonwealth and State and Territory governments.

The data contained in this attachment may be subject to revision. The web page version of the Report contains the most up-to-date data where changes have occurred. This attachment can be found at www.pc.gov.au/service/gsp/2001/attach13A.pdf. Users without Internet access can contact the Secretariat to obtain up-to-date versions of these tables (details inside front cover of the Report).

^a A statistical linkage key has been used to count a person only once if more than one service was accessed on the snapshot day. Where primary disability type was inconsistently recorded the person was allocated a primary disability group using a standard method (see AIHW 2000).

^b CSDA services funded by the States and Territories exclude specifically identified psychiatric services.

^c Commonwealth data will be available on the Review website after publication of the Report.

Source: AIHW (2000).

Total no.	11 605	14 874	5 817	6 199	4 138	1 248	638	248		44 767

^a A statistical linkage key has been used to count a person only once if more than one service was accessed on the snapshot day. Where primary disability type was inconsistently recorded the person was allocated the primary disability group that was most often recorded. If there were two or more such groups, one of these was randomly allocated. Individuals may have more than one disability type.

^b CSDA services funded by the States and Territories exclude specifically identified psychiatric services .

^c Commonwealth data will be available on the Review website after publication of the Report.

--	------------	-------------------------	------------	-----------	-----------	------------	------------	-----------	-------------	-------------

^a Allocation for 2000 does not include funds previously directed to Independent Living Training.

^b Government administrative expenditure is an estimate only and is based on a FaCS model of staffing plans, as at September 1999. There have been a number of organisational changes since which have impacted on the accuracy of this figure. 1999-00 administrative expenditure is not directly comparable with previous years due to a shift from cash to accrual reporting of expenditure and a change of responsibility for disability programs from the former Department of Health and Family Services to the Department of Family and Community Services, where a different methodology for cost attribution is applied.
