

13A Services for people with a disability — attachment

Definitions for the indicators and descriptors in this attachment are in section 13.7 of the chapter. Data in this chapter are examined by the Disability Services Working Group, but have not been formally audited by the Secretariat. A peer review process is also undertaken by the Disability Services Working Group in the development of the data definitions. Unsourced information was obtained from Commonwealth, State and Territory governments.

This file is available in Adobe PDF format on the Review web page (www.pc.gov.au/gsp). Users without Internet access can contact the Secretariat to obtain these tables (see details on the inside front cover of the Report).

This attachment is a revised version subsequent to publication of the 2003 Report. The data in the original attachment corresponds with chapter 13 of the 2003 Report. Commonwealth, State and Territory government data in most tables have been revised with the provision of updated Commonwealth employment data because of the application of the statistical linkage key.

Table 13A.3 **Consumers of government and non-government services on a snapshot day, by service type, (number) (a), (b), (c), (d), (e), (f)**

	NSW	Vic	Qld	WA	SA	Tas	ACT	NT	Aust
All services 2002									
Government	5 028	4 494	1 548	2 002	2 462	309	272	60	16 174
Non-government	12 868	17 875	7 248	5 104	4 477	1 577	592	338	50 052
Total	17 343	20 871	8 629	6 626	6 655	1 829	797	389	63 098

- (a) Consumer data are estimates after use of a statistical linkage key to account for individuals who have received more than one service on the snapshot day. Totals may not be the sum of the components since individuals may access both a government and a non-government service on the snapshot day or services from more than one State or Territory for accommodation support, community support and community access services.
- (b) Totals include six consumers of two accommodation support services in SA that were not identified as government or non-government.
- (c) Data for consumers of CSDA services funded by the States and Territories exclude psychiatric services specifically identified by the jurisdiction.
- (d) Data for the following service types: advocacy, information/referral, combined advocacy/information, print disability/alternative formats of communication, service evaluation/training, peak bodies, research/development and others were not collected in 2001. Data for consumers of the following CSDA funded service types were not collected: advocacy, information/referral, combined information/advocacy, mutual support/self-help groups, print disability/alternate formats of communication, research and evaluation, training and development, peak bodies and other support services in 2002.
- (e) See previous reports for notes relating to pre-2001 data.
- (f) Reclassification of disability service types in 2002 resulted in some elements of community support transferring to community access, affecting consumer counts for these service types.
- (g) Data provided by the Commonwealth in 2001 are preliminary and cover 99 per cent of Commonwealth funded services. Commonwealth data were not available for 2002.

– Nil or rounded to zero.

- (a) Consumer data are estimates after use of a statistical linkage key to account for individuals who have received more than one service on the snapshot day. Where primary disability group was inconsistently recorded for the same consumer, the person was allocated a primary disability group according to a standard method (see AIHW 2002a). Row totals may not be the sum of the components since individuals may access services from more than one jurisdiction on the snapshot day.
- (b) Data for consumers of CSDA services funded by the States and Territories exclude psychiatric services specifically identified by the jurisdiction.
- (c) Data provided by the Commonwealth are preliminary and cover 99 per cent of Commonwealth funded services.
- (d) See previous reports for notes relating to pre-2001 data.

Table 13A.6

Table 13A.6 Consumers of community-based or 'in-home' accommodation support services as a proportion of all accommodation consumers, (per cent) (a), (b), (c), (d), (e)

	NSW	Vic	Qld	WA	SA	Tas	ACT	NT	Aust
1995	51.3	64.2	79.6	60.3	42.7	54.4	92.0	100.0	57.4
1996	54.0	77.0	77.1	66.0	46.5	54.4	na	100.0	61.9
1997	53.9	70.3	79.6	58.2	46.6	56.1	100.0	100.0	67.2
1998	56.8	75.7	83.8	66.9	45.1	66.0	100.0	100.0	66.0
1999	57.2	77.0	85.0	73.4	45.7	69.0	100.0	100.0	69.0
2000	61.8	79.3	85.6	75.2	51.6	61.3	100.0	100.0	71.4
2001	64.1	79.4	87.6	74.6	51.6	74.0	100.0	100.0	73.0
2002	65.6	81.0	76.3	74.0	59.5	75.7	100.0	100.0	72.9

- (a) Consumer data are estimates after use of a statistical linkage key to account for individuals who have received more than one service on the snapshot day. Where the accommodation service type was inconsistently recorded for the same consumer, the consumer was counted as receiving an 'institutional/residential or hostel' accommodation support service. Totals may not be the sum of the components because individuals may access services from more than one jurisdiction on the snapshot day.
- (b) Community based or 'in-home' accommodation support services include group homes, attendant care, outreach/other 'in-home'/drop-in support, alternative family placement and other accommodation support for data prior to 2002. Community-based or 'in-home' accommodation support services include group homes, attendant care/personal care, 'in-home' accommodation support, alternative family placement and other accommodation support for 2002 data.
- (c) Data for consumers of CSDA funded accommodation support services exclude psychiatric services specifically identified by the jurisdiction.
- (d) Data for 1995–98 were based on services received (recipients, not consumers). The 1999–2002 data are consumer data.
- (e) See previous reports for notes relating to pre-2001 data.

na Not available.

Table 13A.7

Table 13A.7 Labour force participation, 1998 (per cent) (a), (b), (c), (d)

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
Labour force participation rate									
People with a profound/severe core activity restriction	32.0	32.0	42.0	37.0	33.0	22.0	52.0	45.0	34.7
General population (e)	61.9	63.6	65.1	66.7	59.5	58.9	72.3	68.7	63.3
Employment rate									
People with a profound/severe core activity restriction	93.0	90.0	87.0	87.0	80.0	85.0	92.0	85.0	89.0
General population (e)	92.8	92.0	91.4	92.9	90.4	89.6	94.1	96.0	92.1

- (a) Aged 15–64 years, living in households. Core activities comprise communication, mobility and self care.
- (b) There were differences between the two surveys (the ABS Survey of Disability, Ageing and Carers and the Labour Force Survey) in the sample size, the scope of the rules applied and the complexity of the questions used to determine labour force status.
- (c) Estimates for people with disabilities for smaller jurisdictions should be interpreted with caution because the sample sizes are small.
- (d) Totals are taken from ABS publications and may not calculate to an exact average due to ABS calculation methods.
- (e) Participation and employment rates for the total population are available for 2002, however, June 1998 figures are used as a better comparison to the 1998 disability data than current year data reported previously.

Source: ABS June 1998, *Labour Force Australia*, Cat. no. 6203.0, Canberra; ABS 1999, *Disability, Ageing and Carers Australia: Summary of Findings 1998*, Cat. no. 4430.0, Canberra.

Table 13A.8

Table 13A.8 Consumers of accommodation support services as a proportion of the total potential population for accommodation support services (a), (b), (c), (d), (e), (f)

Average annual growth rate between 2000 and 2002										
Growth rate	%	0.5	6.0	1.1	-3.9	8.7	0.6	0.9	5.2	2.6

- (a) Consumer data are estimates after use of a statistical linkage key to account for individuals who have received more than one service on the snapshot day. Totals may not be the sum of the components because individuals may access services from more than one jurisdiction on the snapshot day.
- (b) Data are estimates. Population estimates of 9000 or less have a relative standard error of 25 per cent or more.
- (c) The potential population for accommodation services is the number of people aged less than 65 years, with profound and/or severe core activity restriction, adjusted for the Indigenous factor for that jurisdiction.
- (d) Data for consumers of CSDA funded accommodation support services exclude psychiatric services specifically identified by the jurisdiction.
- (e) Data for 1998 are based on services received (recipients, not consumers) whilst the 1999–2002 data are consumer data. Data for 2000 are revised and therefore differ from those in previous reports.
- (f) See previous reports for notes relating to pre-2001 data.
- (g) WA consumer data for 1998 to 2001 are inflated by between 123 and 466 consumers due to incorrect coding by two providers over this time period. This error has been corrected for 2002 data.

Source: AIHW 1999, *Disability Support Services Provided under the Commonwealth–State Disability Agreement: National Data, 1999*, Cat. no. - (a) Consumer data are estimates after use of a statistical linkage key to account for individuals who have received more than one service on the snapshot day.
- (b) Data are estimates. Population estimates of 9000 or less have a relative standard error of 25 per cent or more.
- (c) The potential population for employment services is the number of people aged 15–64 years with a severe or profound core activity restriction, multiplied by both the Indigenous factor and the labour force participation rate for that jurisdiction. Due to this adjustment the sum of the potential populations of the jurisdictions is not necessarily equal to the national total.
- (d) Data for consumers of CSDA funded employment support services exclude psychiatric services specifically identified by the jurisdiction.
- (e) Data for 1998 are based on services received (recipients, not consumers) whilst the 1999–2001 data are consumer data. Data for 2000 are revised and therefore differ from those in previous reports.
- (f) See previous reports for notes relating to pre-2001 data.

Average annual growth rate between 2000 and 2002										
Growth rate	%	9.5	7.2	-3.0	0.4	38.6	1.7	30.0	-7.7	7.0

- (a) Consumer data are estimates after use of a statistical linkage key to account for individuals who have received more than one service on the snapshot day. Totals may not be the sum of the components because individuals may access services from more than one jurisdiction on the snapshot day.
- (b) Data are estimates. Population estimates of 9000 or less have a relative standard error of 25 per cent or more.
- (c) The potential population for day activity services is the number of people aged 15–64 years, with a severe or profound core activity restriction, multiplied by the Indigenous factor for that jurisdiction.
- (d) Day activity services in 2001 include consumers using the community access service types 'continuing education/independent living training/adult training centre', 'post-school options/social and community support/community access' and 'other community access and day programs'. Day activity services in 2002 include consumers using the community access service types 'learning and life skills development' and 'other community access', but not 'recreation/holiday programs'.
- (e) Data for consumers of CSDA funded day activity services exclude psychiatric services specifically identified by the jurisdiction.
- (f) Data may have different inclusions for different jurisdictions which may explain the variability across jurisdictions. Data are therefore not strictly comparable.
- (g) See previous reports for notes relating to pre-2001 data.

(a) Consumer data are estimates after use of a statistical linkage key to account for individuals who received more than one service on the snapshot day. Where the level of support need was inconsistently recorded for the same consumer, the person was allocated a level of support according to a standard method. Row totals may not be the sum of the components because individuals may access services from more than one jurisdiction on the snapshot day.

Table 13A.11

- (b) Data exclude 243 consumers in 2000-01 and 239 consumers in 2001-02 who did not report a need for support with self care, mobility or communication. Consumer totals do not, therefore, necessarily match those in other tables.
- (c) Severity of core activity restriction is derived using data on level of support needed in one or more of the support areas: self care, mobility and communication. Consumers with profound core activity restriction reported always needing support in one or more of these areas. Consumers with severe core activity restriction reported sometimes needing support in one or more of these areas. Consumers with moderate or no core activity restriction reported needing no support in all of these areas.
- (d) Data for consumers of CSDA funded accommodation support services exclude psychiatric services specifically identified by the jurisdiction.
- (e) See previous reports for notes relating to pre-2001 data.

(a) Consumer data are estimates after use of a statistical linkage key to account for individuals who received more than one service on the snapshot day. Where the level of support need was inconsistently recorded for the same consumer, the person was allocated a level of support according to a standard method. Row totals may not be the sum of the components because individuals may access services from more than one jurisdiction on the snapshot day.

Table 13A.12

- (b) Data exclude 342 consumers in 2001 and 283 consumers in 2002 who did not report a need for support with one or more of these areas: self care, mobility or communication. Consumer totals do not, therefore, necessarily match those in other tables.
- (c) Severity of core activity restriction was derived using data on the level of support needed in one or more of the following support areas: self care, mobility and communication. Consumers with a profound core activity restriction reported a continual need for support in one or more of these areas. Consumers with a severe core activity restriction reported occasional or frequent need for support in one or more of these areas. Consumers with moderate or no core activity restriction reported needing no support in one or more of these areas.
- (d) Where the level of support need was inconsistently recorded for the same consumer, the person was allocated a level of support according to a standard method.
- (e) See previous reports for notes relating to pre-2001 data.
- (f) Employment services data for 2002 will be available after publication of the 2003 Report.

Table 13A.13

Table 13A.13 Consumers of accommodation support services, per 1000 people, by Indigenous status (number) (a), (b), (c), (d), (e)

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
Indigenous people using accommodation services per 1000 Indigenous population aged under 65 years									
1999	1.18	1.50	0.98	2.96	1.48	1.23	0.31	1.22	1.42
2000	1.20	1.24	0.73	1.00	1.68	1.80	0.87	1.07	1.07
2001	1.22	2.26	0.92	1.22	1.77	0.68	1.13	1.13	1.19
2002	1.15	1.47	0.92	1.06	1.95	0.84	0.52	1.24	1.13
All people using accommodation services per 1000 total population aged under 65 years									
1999	0.99	1.35	0.71	1.31	1.50	1.44	0.96	0.67	1.10
2000	1.03	1.35	0.66	1.20	1.49	1.84	0.98	0.58	1.10
2001	1.04	1.37	0.95	1.18	1.50	1.72	0.95	0.61	1.17
2002	1.02	1.34	0.93	1.11	1.81	1.93	1.01	0.64	1.17

- (a) Consumer data are estimates after use of a statistical linkage key to account for individuals who received more than one service on the snapshot day. Where Indigenous status was inconsistently recorded for the same consumer, the consumer was counted as an Indigenous Australian. Totals may not be the sum of the components because individuals may access services from more than one jurisdiction on the snapshot day.
- (b) Data for Indigenous consumers (per 1000) are per 1000 Indigenous people. That is, the Indigenous consumer data are divided by the Indigenous Australians data, multiplied by 1000.
- (c) ABS Indigenous population projections were used for 2001. Indigenous population projections for 2002 were obtained by multiplying percentages of Indigenous people in each State or Territory based on the most recently available 2001 ABS Census data on the Indigenous population, and applying these percentages to June 2002 ABS projected population data.
- (d) Data for all consumers exclude 943 consumers in 2001 and 854 consumers in 2002 whose Indigenous origin was 'not known' or 'not stated', thus totals may differ from other tables.
- (e) Data for consumers of CSDA funded accommodation support services exclude psychiatric services specifically identified by the jurisdiction.

Indigenous people using day activity services per 1000 Indigenous population aged 15–64									
2001	1.42	3.94	1.05	0.47	0.49	0.90	1.33	0.52	1.13
2002	1.30	2.41	1.00	0.40	1.39	0.79	0.42	0.53	1.03
All people using day activity services per 1000 total population aged 15–64									
2001	0.80	2.06	0.85	0.52	0.48	1.57	0.63	0.25	1.08
2002	0.81	2.03	0.81	0.50	0.81	1.69	0.84	0.27	1.10

- (a) Consumer data are estimates after use of a statistical linkage key to account for individuals who received more than one service on the snapshot day. Where Indigenous status was inconsistently recorded for the same consumer, the consumer was counted as an Indigenous Australian. Totals may not be the sum of the components because individuals may access services from more than one jurisdiction on the snapshot day.
- (b) Data for Indigenous consumers (per 1000) are per 1000 Indigenous people. That is, the Indigenous consumer data divided by the Indigenous Australians data multiplied by 1000.
- (c) Indigenous population projections were obtained by multiplying percentages of Indigenous people in each State or Territory based on the most recently available 2001 ABS Census data on the Indigenous population, and applying these percentages to June 2002 ABS projected population data.
- (d) Day activity services in 2001 include consumers using the community access service types 'continuing education/independent living training/adult training centre', 'post-school options/social and community support/community access' and 'other community access and day programs'. Day activity services in 2002 include consumers using the community access service types 'learning and life skills development' and 'other community access', but not 'recreation/holiday programs'.
- (e) Data for all consumers exclude 372 consumers in 2001 and 728 consumers in 2002 whose Indigenous origin was 'not known' or 'not stated', therefore totals may differ from other tables.
- (f) Data for consumers of CSDA funded day activity services exclude psychiatric services specifically identified by the jurisdiction.
- (g) Data may have different inclusions for different jurisdictions, which may explain the variability across jurisdictions. Data are therefore not strictly comparable.

1999	1.00	1.35	0.89	1.37	1.53	1.56	0.96	0.66	1.15
2000	1.10	1.42	0.78	0.98	1.45	1.64	0.98	0.57	1.13
2001	1.12	1.45	0.84	1.11	1.45	1.50	0.93	0.58	1.17
2002	1.10	1.52	0.89	1.12	1.69	1.64	0.98	0.61	1.21

- (a) Consumer data are estimates after use of a statistical linkage key to account for individuals who received more than one service on the snapshot day. Where country of birth was inconsistently recorded for the same consumer, the consumer was counted as having a non-English-speaking origin.
- (b) Data for consumers of non-English speaking origin were based on consumer responses for country of birth other than Australia, New Zealand, Canada, United Kingdom, South Africa, Ireland or the United States.
- (c) Data for consumers of non-English-speaking origin (per 1000) are per 1000 people of non-English speaking origin. That is, the non-English speaking origin consumer data divided by the non-English speaking origin Australians data, multiplied by 1000.
- (d) The State and Territory data on the non-English speaking origin population are derived from the corresponding 1996 Australian Census proportional distribution of population of States and Territories applied to the ABS national estimate of 2000 country of birth data. For 2001, estimates are adjusted for expected increases in total and non-English speaking background populations. Estimates exclude people whose non-English speaking origin was not stated or who were visitors to Australia from overseas.
- (e) Data for all Australians exclude people whose birthplace was not stated or who were visitors to Australia from overseas.
- (f) Data for all consumers exclude 754 consumers for 2001 and 337 consumers for 2002 whose non-English speaking origin was 'not known' or 'not stated', therefore, totals may differ from other tables.
- (g) Data for consumers of CSDA funded accommodation support services exclude psychiatric services specifically identified by the jurisdiction.

- (a) The State and Territory data on the rural and remote population are derived by the AIHW from ABS statistical local area population estimates for June 2000 and 2001.
- (b) Data for rural and remote consumers were based on the residential postcode of the consumer except for SA, the ACT and the NT in 2001, which were based on the postcode of the service outlet. A postcode is classified as rural or remote if more than 50 per cent of the population in the postcode area are so classified.
- (c) Data for rural and remote consumers (per 1000) are per rural and remote people. That is, the rural and remote consumer data divided by the rural and remote Australians data multiplied by 1000.
- (d) Consumer data are estimates after use of a statistical linkage key to account for individuals who received more than one service on the snapshot day. Totals may not be the sum of the components since individuals may access services from more than one jurisdiction on the snapshot day.
- (e) Data for all consumers exclude 626 consumers in 2001 and 210 consumers in 2002 whose postcode was not known, therefore, totals may differ from other tables.
- (f) Data for consumers of CSDA accommodation support services exclude psychiatric services specifically identified by the jurisdiction.
- Nil or rounded to zero.

Table 13A.20

- (a) Victoria's allocation for 2000 does not include funds previously directed to Independent Living Training. In relation to Victoria's 2002 data: recreation, and intake and response services previously allocated under community support are now allocated under community access; community support services include early intervention and specialist childrens' services programs; information and advocacy was included under community support in 2001 and is now included under a new category advocacy, information and print disability; other support includes the Inclusive Communities, and Aids and Equipment programs in 2002.
- (b) Method of apportioning government administration expenditure in Queensland changed in 1999-2000 and again in 2000-01 as a result of improved financial reporting systems and with the establishment of Disability Services Queensland.
- (c) WA's 2000-01 expenditure for accommodation support, community support, community access and respite reflects increased State business plan funding, including Commonwealth unmet need funding. An improved cost allocation and payments database has been used for WA data in 2001-02. This has resulted in a refinement and in some cases a major realignment of costs previously reported. Within accommodation support, other accommodation costs have been realigned to community support, however, this shift in costs has been more than offset by additional funding provided for growth, indexation and wage parity increases within government provided places. Community support now includes local area coordination funding previously reported against respite services.
- (d) Expenditure for SA decreased from 2000-01 to 2001-02 because some funding was transferred out of disability services (from accommodation support) and reporting changed (in community support, advocacy, information and print disability and other support) to be consistent with the CSTDA Schedule A State Funding. Administration and total expenditure excludes some government agencies receiving funding from Department of Human Services. Departmental overhead costs are not included in 2000-01 data and are included in 2001-02 data. Previous years only the Central Office and Intellectual Disability Services Council administrative costs were included.
- (e) In the ACT, only services under the Disability Services funding program were counted. Excludes services funded through the Home and Community Care program.
- (f) Expenditure variations in 2001-02 for the disability service types reflects changes in service provision under an individual funding model. Payments under the model are categorised as community support (as per CSTDA NMDS definitions) and are not included specifically in the service type purchased (for example, supported accommodation). In the NT, some non-government organisations received three quarterly payments in 2001-02. One quarterly payment was paid in advance in 2000-01. These factors affect the ability to make meaningful comparisons to previous financial years. There was improved financial reporting in the NT in 2001-02 due to operation within a funder/purchaser/provider framework.
- (g) Commonwealth administrative expenditure is an estimate only and is based on average staffing levels. In relation to Commonwealth 2001-02 data: postal concessions for the blind program were incorporated with the employment and other services appropriation for the first time and are included under community access; and information and advocacy was included under community support in 2001 and is now included under a new category advocacy, information and print disability.

Government funding per non-government provided community accommodation and care place (other)									
2001-02	42 713	29 621	39 456	40 405	4 307	26 778	14 179	8 118	36 288

- (a) Based on total expenditure divided by the number of places on a snapshot day (rather than average number of places during the year). Prior to 2001-02, data reflect cost per institutional/large residential place. Due to refinements made to the counting rules for accommodation data, the 2001-02 data are not strictly comparable with data for previous years.
- (b) The change from 1998-99 reflects the refinement of the process (based on accrual accounting) used to allocate expenditure between institutions and community accommodation.
- (c) Data for non-government provided places reflect cost to government and not full cost of providing accommodation places. Government makes a contribution towards non-government provided places.
- (d) Increased costs in NSW 2000-01 and 2001-02 data reflect devolution expenditure on transitional accommodation and crisis support to people residing in institutions and being relocated. This will reduce as the relocation program accelerates.
- (e) Data for Victoria prior to 2001-02 are not comparable with previous reports, which used data from departmental administrative collections. Data for 2001-02 on non-government provided community accommodation, other, include the In Home Accommodation Support program not previously reported.

Table 13A.22

- (f) The decrease in Queensland government expenditure per government provided institutional residential place is due to transitional changes in models of accommodation support provided.
- (g) In WA an improved cost allocation and payments database has been used for data in 2001-02. This has resulted in a refinement and in some cases a major re-alignment of costs previously reported. Accommodation support also reflects growth, indexation and parity funding provided for wage increases.
- (h) Expenditure data are net of related receipts. Data for SA in 2001-02 are net of fees and client contributions only and only reflect places funded by the Department of Human Services.
- (i) Tasmania, the ACT and the NT have no government provided large residential or institutional facilities. The ACT and the NT have no non-government provided residential or institutional facilities. The NT has no government provided community accommodation and care facilities.
- (j) Expenditure variations in 2001-02 for the disability service types reflect changes in service provision under an individual funding model. Payments under the model are categorised as community support (as per CSTDA NMDS definitions) and are not included specifically in the service type purchased (for example, supported accommodation. In the NT, some non-government organisations received three quarterly payments in 2001-02. One quarterly payment was paid in advance in 2000-01. These factors affect the ability to make meaningful comparisons to previous financial years.

.. Not applicable.

Table 13A.27 **Government administration expenditure as a proportion of total expenditure on services (per cent) (a)**

	NSW	Vic	Qld (b)	WA (c)	SA (d)	Tas	ACT (e)	NT (f)	Cwlth (g)	Aust
Administration expenditure as a proportion of total expenditure (including actual payroll tax for NSW, Qld, Tasmania and the NT for 2001-02)										
1997-98	6.9	9.6	14.4	6.3	3.1	13.6	7.3	5.3	7.6	8.4
1998-99	10.0	9.7	13.1	6.5	3.7	4.5	11.9	8.8	7.1	9.0
1999-2000	10.2	9.5	13.1	3.8	3.6	4.8	13.9	9.4	8.9	9.1
2000-01	8.2	8.5	8.9	3.1	6.9	6.6	13.6	8.1	8.1	7.9
2001-02	9.3	8.1	8.4	4.4	7.0	4.9	11.5	9.7	7.7	8.0
Administration expenditure as a proportion of total expenditure (excluding actual and imputed payroll tax for 2001-02)										
2001-02	9.5	8.1	8.5	4.4	7.0	5.0	11.5	9.8	7.7	8.1
Administration expenditure as a proportion of total expenditure (including actual and imputed payroll tax for 2001-02)										
2001-02	9.1	7.9	8.3	4.3	6.8	4.8	11.3	9.6	7.7	8.0

(a) See table 13.3 for an explanation of different methods of apportioning departmental costs.

(b) The method for apportioning government administration expenditure in Queensland changed in 2000-01 as a result of improved financial reporting systems and with the establishment of Disability Services Queensland. Payroll tax data for Queensland include payroll tax, accrued payroll tax and long service leave on-costs recovered payroll tax.

(c) The decrease in WA 2000-01 administration expenditure reflects a reduction in corporate services costs and the elimination of costs associated with the implementation of the GST in 1999-2000. The increase in WA 2001-02 administration expenditure mainly reflects the realignment of policy costs previously allocated across all outputs.

(d) Data for SA include administration expenses (indirect service delivery costs) relating to all Government agencies receiving funding from the department. Reports in previous years included only the Central Office and Intellectual Disability Services Council administrative costs. Improved allocation of corporate overheads occurred again in 2000-01 within the government sector.

(e) Improved allocation of corporate overheads occurred again in 2000-01 within the government sector. The ACT has incurred additional one-off overhead costs in 2000-01 due to the Inquiry into Disability Services in the ACT.

(f) The NT administrative expenditure prior to 2001-02 is estimated only and is based on average staffing levels. There was improved financial reporting in the NT in 2001-02 due to operation within a funder/purchaser/provider framework. Payroll tax relates to NT Government service provision and does not include expenditure for program management and administration.

(g) Commonwealth administrative expenditure is an estimate only and is based on average staffing levels.

June 2002	93.1	74.3	55.1	25.2	23.2	8.1	3.5	1.4	..	283.8

(a) Pensions, allowances and payments are not funded under the CSDA. Totals may not sum exactly as a result of rounding.

(b) NSW figures for the Carer Payment and Carer Allowance include 267 customers in 2001 and 205 customers in 2002, respectively, under the category of 'unknown'.

(c) June 2000 data include payments to approximately 10 000 overseas residents made by the International Operations Branch of DFACS which is located in Tasmania.

(d) The Disability Support Pension is a means tested income support payment for people aged over 16 years who have a physical, intellectual or psychiatric impairment (meeting set criteria) resulting in an inability to work or to be re-skilled for work for at least the next two years (as a result of impairment), or who are participating in the supported wage system. Special rules also apply to the vision impaired.

Table 13A.29

- (e) June 2002 data include 10 517 customers of international services and 309 unknown customers who cannot be attributed to a State or Territory.
- (f) The Mobility Allowance is a non-means tested income supplement to assist with transport costs for people aged over 16 years with disabilities who are in employment, vocational training, a combination of vocational training and employment, job search activities or voluntary work, and who are unable to use public transport without substantial assistance.
- (g) The Carer Payment provides income support to people who, as a result of the demands of their caring role, are unable to support themselves through substantial workforce participation.
- (h) The Carer Allowance is a supplementary payment available to people who provide daily care and attention at home for an adult or child with a disability or chronic mental condition. Data for 2002 include 11 708 Health Care Card only customers.
