

# 13A Services for people with a disability — attachment

Definitions for the indicators and descriptors in this attachment are in section 13.7 of the chapter. Data in this chapter are examined by the Disability Services Working Group, but have not been formally audited by the Secretariat. A peer review process is also undertaken by the Disability Services Working Group in the development of the data definitions. Unsourced information was obtained from the Australian, State and Territory governments.

This file is available in Adobe PDF format on the Review web page ([www.pc.gov.au/gsp](http://www.pc.gov.au/gsp)). Users without Internet access can contact the Secretariat to obtain these tables (see details on the inside front cover of the Report).

Proportion	%	3.9	3.8	4.9	3.9	4.4	5.4	4.1	6.9	4.1
Moderate core activity restriction										
Proportion	%	2.7	2.4	3.0	3.4	3.4	3.1	2.1	np	2.8
Mild core activity restriction										
Proportion	%	4.5	4.1	3.6	4.2	5.1	4.2	3.2	np	4.2
Schooling or employment restriction										
Proportion	%	10.5	9.6	12.2	11.3	13.7	13.1	9.7	7.2	10.9

(a) More up-to-date data on estimated population for people with a disability are reported in table 13A.8–10.

(b) Data do not distinguish between types of activity restriction, and all types of activity restriction are included in profound activity restriction.

**np** Not published.

- (a) Consumer data are estimates after use of a statistical linkage key to account for individuals who have received more than one service on the snapshot day. Totals may not be the sum of the components since individuals might have accessed both a government and a non-government service on the snapshot day or services from more than one State or Territory for accommodation support, community support and community access services.
- (b) Totals include 6 consumers of two accommodation support services in SA that were not identified as government or non-government.
- (c) Data for consumers of Commonwealth State Disability Agreement (CSDA) services funded by the States and Territories exclude psychiatric services specifically identified by the jurisdiction.
- (d) Data for the following service types were not collected in 2001: advocacy, information/referral, combined advocacy/information, print disability/alternative formats of communication, service evaluation/training, peak bodies, research/development and others. Data for consumers of the following CSDA funded service types were not collected in 2002: advocacy, information/referral, combined information/advocacy, mutual support/self-help groups, print disability/alternate formats of communication, research and evaluation, training and development, peak bodies and other support services.
- (e) See previous reports for notes relating to data before 2001.
- (f) Reclassification of disability service types in 2002 resulted in some elements of community support transferring to community access, affecting consumer counts for these service types.
- (g) Data for 1999 are revised, so differ from those in the previous reports.  
– Nil or rounded to zero.

- (a) Consumer data are estimates after use of a statistical linkage key to account for individuals who have received more than one service on the snapshot day. Where the primary disability group have been inconsistently recorded for the same consumer, the person is allocated a primary disability group according to a standard method (see AIHW 2002a). Row totals may not be the sum of the components since individuals may access services from more than one jurisdiction on the snapshot day.
- (b) Data for consumers of CSDA services funded by the States and Territories exclude psychiatric services specifically identified by the jurisdiction.
- (c) Data provided by the Commonwealth are preliminary and cover 99 per cent of Commonwealth funded services.
- (d) See previous reports for notes relating to data before 2001.
- (e) Data for 1999 are revised and therefore differ from those in previous reports.  
– Nil or rounded to zero.

Table 13A.6

**Table 13A.6 Consumers of community-based or in-home accommodation support services as a proportion of all accommodation consumers, (per cent) (a), (b), (c), (d), (e), (f)**

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
1998	56.8	75.7	83.8	66.9	45.2	66.3	100.0	100.0	67.1
1999	58.1	77.0	85.0	72.9	45.8	63.2	100.0	100.0	69.2
2000	62.0	79.2	85.6	75.2	51.6	61.3	100.0	100.0	71.5
2001	64.1	79.4	87.6	74.6	51.6	74.0	100.0	100.0	73.0
2002	65.6	81.0	76.3	74.0	59.5	75.7	100.0	100.0	72.9

- (a) Consumer data are estimates after use of a statistical linkage key to account for individuals who have received more than one service on the snapshot day. Where the accommodation service type has been inconsistently recorded for the same consumer, the consumer is counted as receiving an institutional/residential or hostel accommodation support service. Totals may not be the sum of the components because individuals might have accessed services from more than one jurisdiction on the snapshot day.
- (b) Data on community-based or in-home accommodation support services prior to 2002 include group homes, attendant care, outreach/other in-home/drop-in support, alternative family placement and other accommodation support. Data on community-based or in-home accommodation support services for 2002 include group homes, attendant care/personal care, in-home accommodation support, alternative family placement and other accommodation support.
- (c) Data for consumers of CSDA funded accommodation support services exclude psychiatric services specifically identified by the jurisdiction.
- (d) Data for 1995–98 were based on services received (recipients, not consumers). The 1999–2002 data are consumer data.
- (e) See previous reports for notes relating to data before 2001.
- (f) Data for 1999 are revised, so differ from those in previous reports.

Table 13A.7

**Table 13A.7 Labour force participation, 1998 (per cent) (a), (b), (c), (d), (e)**

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT (e)</i>	<i>Aust</i>
Labour force participation rate									
People with a profound/severe core activity restriction (d)	32.0	32.0	42.0	37.0	33.0	22.0	52.0	45.0	34.7
General population	75.1	75.8	76.5	76.3	73.7	71.3	81.4	80.9	75.6
Employment rate									
People with a profound/severe core activity restriction (d)	93.0	90.0	87.0	87.0	80.0	85.0	92.0	85.0	89.0
General population	92.0	91.6	90.6	92.9	91.2	92.0	93.0	94.3	91.7

(a) For people aged 15–64 years, living in households.

(b) Totals are taken from ABS publications and may not calculate to an exact average due to ABS calculation methods.

(c) Estimates for people with disabilities for smaller jurisdictions should be interpreted with caution because the sample sizes are small.

(d) Profound/severe refers to always or sometimes needing assistance with one or more of the core activities. Core activities comprise communication, mobility and self-care.

(e) The estimates for the NT do not include people in remote and sparsely settled areas, who account for over 20 per cent of the population in the NT.

- (a) Consumer data are estimates after use of a statistical linkage key to account for individuals who have received more than one service on the snapshot day. Totals may not be the sum of the components because individuals might have accessed services from more than one jurisdiction on the snapshot day.
- (b) Data are estimates. Population estimates of 9000 or less have a relative standard error of 25 per cent or more.
- (c) The potential population for accommodation services is the number of people aged less than 65 years, with profound and/or severe core activity restriction, adjusted for the Indigenous factor for that jurisdiction.
- (d) Data for consumers of CSDA funded accommodation support services exclude psychiatric services specifically identified by the jurisdiction.
- (e) Data for 1998 are based on services received (recipients, not consumers) whilst the 1999–2002 data are consumer data. Data for 1998–99 are revised, so differ from those in previous reports.
- (f) See previous reports for notes relating to data before 2001.
- (g) WA consumer data for 1998–2001 are inflated by 123–466 consumers due to incorrect coding by two providers over this time period. This error has been corrected for 2002 data.

- (a) Consumer data are estimates after use of a statistical linkage key to account for individuals who have received more than one service on the snapshot day.
- (b) Data are estimates. Population estimates of 9000 or less have a relative standard error of 25 per cent or more.
- (c) The potential population for employment services is the number of people aged 15–64 years with a severe or profound core activity restriction, multiplied by both the Indigenous factor and the labour force participation rate for that jurisdiction. Due to this adjustment the sum of the potential populations of the jurisdictions is not necessarily equal to the national total.
- (d) Data for consumers of CSDA funded employment support services exclude psychiatric services specifically identified by the jurisdiction.
- (e) Data for 1998 are based on services received (recipients, not consumers) whilst the 1999–2002 data are consumer data. Data for 1998–2000 are revised, so differ from those in previous reports.
- (f) See previous reports for notes relating to data before 2001.  
– Nil or rounded to zero.

- (a) Consumer data are estimates after use of a statistical linkage key to account for individuals who have received more than one service on the snapshot day. Totals may not be the sum of the components because individuals might have accessed services from more than one jurisdiction on the snapshot day.
- (b) Data are estimates. Population estimates of 9000 or less have a relative standard error of 25 per cent or more.
- (c) The potential population for day activity services is the number of people aged 15–64 years, with a severe or profound core activity restriction, multiplied by the Indigenous factor for that jurisdiction.
- (d) Data day activity services reported for 2001 include the following community access service types: continuing education/independent living training/adult training centre, post-school options/social and community support/community access, and other community access and day programs. Data for 2002 include the following community access service types: learning and life skills development, and other community access (but not recreation/holiday programs).
- (e) Data for consumers of CSDA funded day activity services exclude psychiatric services specifically identified by the jurisdiction.
- (f) Data may have different inclusions for different jurisdictions, which may explain the variability across jurisdictions. Data are, therefore, not strictly comparable.
- (g) Data for 2000 are revised, so differ from those in previous reports.

(a) Consumer data are estimates after use of a statistical linkage key to account for individuals who received more than one service on the snapshot day. Where the level of support need has been inconsistently recorded for the same consumer, the person is allocated a level of support according to a standard method. Row totals may not be the sum of the components because individuals might have accessed services from more than one jurisdiction on the snapshot day.

Table 13A.11

- (b) Data exclude 243 consumers in 2000-01 and 239 consumers in 2001-02 who did not report a need for support with self-care, mobility or communication. Consumer totals do not, therefore, necessarily match those in other tables.
- (c) Severity of core activity restriction is derived using data on the level of support needed in one or more of the support areas: self-care, mobility and communication. Consumers with a profound core activity restriction reported always needing support in one or more of these areas. Consumers with a severe core activity restriction reported sometimes needing support in one or more of these areas. Consumers with a moderate or no core activity restriction reported needing no support in all of these areas.
- (d) Data for consumers of CSDA funded accommodation support services exclude psychiatric services specifically identified by the jurisdiction.
- (e) Data for 1999, 2000 and 2002 are revised, so differ from those in previous reports.

(a) Consumer data are estimates after use of a statistical linkage key to account for individuals who received more than one service on the snapshot day. Where the level of support need has been inconsistently recorded for the same consumer, the person is allocated a level of support according to a standard method. Row totals may not be the sum of the components because individuals might have accessed services from more than one jurisdiction on the snapshot day.

Table 13A.12

- (b) Data exclude 342 consumers in 2001 and 283 consumers in 2002 who did not report a need for support with one or more of these areas: self-care, mobility or communication. Consumer totals do not, therefore, necessarily match those in other tables.
- (c) Severity of core activity restriction was derived using data on the level of support needed in one or more of the following support areas: self-care, mobility and communication. Consumers with a profound core activity restriction reported a continual need for support in one or more of these areas. Consumers with a severe core activity restriction reported occasional or frequent need for support in one or more of these areas. Consumers with moderate or no core activity restriction reported needing no support in one or more of these areas.
- (d) Data for consumers of CSDA funded accommodation support services exclude psychiatric services specifically identified by the jurisdiction.
- (e) Data for 1999 and 2000 are revised, so differ from those in previous reports.

Table 13A.13

**Table 13A.13 Consumers of accommodation support services, per 1000 people, by Indigenous status (number) (a), (b), (c), (d), (e), (f)**

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
Indigenous people using accommodation services per 1000 Indigenous population aged under 65 years									
1999	1.31	1.54	1.01	2.96	1.52	1.35	0.62	1.22	1.48
2000	1.22	1.24	0.73	1.02	1.68	1.75	0.87	1.09	1.08
2001	1.22	2.26	0.92	1.22	1.77	0.68	1.13	1.13	1.19
2002	1.15	1.47	0.92	1.06	1.95	0.84	0.52	1.24	1.13
All people using accommodation services per 1000 total population aged under 65 years									
1999	0.99	1.35	0.72	1.28	1.53	1.51	0.96	0.67	1.11
2000	1.03	1.35	0.66	1.20	1.49	1.84	0.98	0.58	1.10
2001	1.04	1.36	0.94	1.17	1.50	1.73	0.94	0.60	1.16
2002	1.02	1.34	0.93	1.11	1.81	1.93	1.01	0.64	1.17

- (a) Consumer data are estimates after use of a statistical linkage key to account for individuals who received more than one service on the snapshot day. Where Indigenous status has been inconsistently recorded for the same consumer, the consumer is counted as an Indigenous Australian. Totals may not be the sum of the components because individuals might have accessed services from more than one jurisdiction on the snapshot day.
- (b) Data for Indigenous consumers per 1000 Indigenous people are derived from the Indigenous consumer data divided by the Indigenous Australians data, multiplied by 1000.
- (c) ABS population projections are used for 2001 and 2002 population data. Indigenous population data in each State or Territory for 2002 is obtained by multiplying the percentage of Indigenous people to ABS 2001 Census data on the projected population for 2002. The percentage of Indigenous people in each State or Territory is based on ABS Estimated Resident Population data for June 2002.
- (d) Data for all consumers exclude 943 consumers in 2001 and 854 consumers in 2002 whose Indigenous origin was 'not known' or 'not stated', thus totals may differ from other tables.
- (e) Data for consumers of CSDA funded accommodation support services exclude psychiatric services specifically identified by the jurisdiction.
- (f) Data for 1999, 2000 and 2001 are revised, so differ from those in previous reports.

Table 13A.15

**Table 13A.15 Consumers of day activity services, per 1000 people, by Indigenous status (a), (b), (c), (d), (e), (f), (g)**

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
Indigenous people using day activity services per 1000 Indigenous population aged 15–64									
2001	1.42	3.94	1.05	0.47	0.49	0.90	1.33	0.52	1.13
2002	1.30	2.41	1.00	0.40	1.39	0.79	0.42	0.53	1.03
All people using day activity services per 1000 total population aged 15–64									
2001	0.80	2.06	0.85	0.52	0.48	1.57	0.63	0.25	1.08
2002	0.81	2.03	0.81	0.50	0.81	1.69	0.84	0.27	1.10

- (a) Consumer data are estimates after use of a statistical linkage key to account for individuals who received more than one service on the snapshot day. Where Indigenous status has been inconsistently recorded for the same consumer, the consumer is counted as an Indigenous Australian. Totals may not be the sum of the components because individuals might have accessed services from more than one jurisdiction on the snapshot day.
- (b) Data for Indigenous consumers per 1000 Indigenous people are derived from the Indigenous consumer data divided by the Indigenous Australians data, multiplied by 1000.
- (c) ABS population projections are used for 2001 and 2002 population data. Indigenous population data in each State or Territory for 2002 is obtained by multiplying the percentage of Indigenous people to ABS 2001 Census data on the projected population for 2002. The percentage of Indigenous people in each State or Territory is based on ABS Estimated Resident Population data for June 2002.
- (d) Data day activity services reported for 2001 include the following community access service types: continuing education/independent living training/adult training centre, post-school options/social and community support/community access, and other community access and day programs. Data for 2002 include the following community access service types: learning and life skills development, and other community access (but not recreation/holiday programs).
- (e) Data for all consumers exclude 372 consumers in 2001 and 728 consumers in 2002 whose Indigenous origin was 'not known' or 'not stated', therefore totals may differ from other tables.
- (f) Data for consumers of CSDA funded day activity services exclude psychiatric services specifically identified by the jurisdiction.
- (g) Data may have different inclusions for different jurisdictions, which may explain the variability across jurisdictions. Data are, therefore, not strictly comparable.

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
People of non-English speaking origin using accommodation services per 1000 non-English speaking origin people aged under 65 years									
1999	0.17	0.22	0.23	0.45	0.39	0.44	0.20	0.19	0.23
2000	0.16	0.20	0.27	0.21	0.39	0.56	0.25	0.37	0.21
2001	0.15	0.20	0.27	0.30	0.39	0.61	0.22	0.43	0.21
2002	0.15	0.26	0.20	0.35	0.61	0.54	0.31	0.18	0.24
All people using accommodation services per 1000 total people aged under 65 years									
1999	1.00	1.35	0.89	1.34	1.54	1.61	0.96	0.66	1.15
2000	1.10	1.42	0.83	1.02	1.46	1.64	0.99	0.57	1.15
2001	1.12	1.45	0.84	1.11	1.45	1.50	0.93	0.58	1.17
2002	1.10	1.52	0.89	1.12	1.69	1.64	0.98	0.61	1.21

- (a) Consumer data are estimates after use of a statistical linkage key to account for individuals who received more than one service on the snapshot day. Where country of birth has been inconsistently recorded for the same consumer, the consumer is counted as having a non-English speaking origin.
- (b) Data for consumers of non-English speaking origin are based on consumer responses for country of birth other than Australia, New Zealand, Canada, the United Kingdom, South Africa, Ireland or the United States.
- (c) Data for consumers of non-English-speaking origin per 1000 people are derived from the non-English speaking origin consumer data divided by the non-English speaking origin Australians data, multiplied by 1000.
- (d) The State and Territory data on the non-English speaking origin population are derived from the ABS 200 national estimate of country of birth data, multiplied by the ABS 1996 Census proportional distribution of population of States and Territories. For 2001, estimates are adjusted for expected increases in total and non-English speaking background populations. Estimates exclude people whose non-English speaking origin was not stated or who were visitors to Australia from overseas.
- (e) Data for all Australians exclude people whose birthplace is not stated or who are visitors to Australia from overseas.
- (f) Data for all consumers exclude 754 consumers for 2001 and 337 consumers for 2002 whose non-English speaking origin was 'not known' or 'not stated', therefore, totals may differ from other tables.
- (g) Data for consumers of CSDA funded accommodation support services exclude psychiatric services specifically identified by the jurisdiction.
- (h) Data for 1999-2000 are revised, so differ from those in previous reports.

Consumers	%	21.9	30.4	34.9	11.9	9.8	52.3	0.3	47.6	25.1

(a) The State and Territory data on the rural and remote population are derived by the AIHW from ABS statistical local area population estimates for June 2000 and 2001.

(b) Data for rural and remote consumers are based on the residential postcode of the consumer except for SA, the ACT and the NT in 2001, which were based on the postcode of the service outlet. A postcode is classified as rural or remote if more than 50 per cent of the population in the postcode area are so classified.

(c) Data for rural and remote consumers per 1000 rural and remote people are derived from the rural and remote consumer data divided by the rural and remote Australians data multiplied by 1000.

(d) Consumer data are estimates after use of a statistical linkage key to account for individuals who received more than one service on the snapshot day. Totals may not be the sum of the components since individuals might have accessed services from more than one jurisdiction on the snapshot day.

(e) Data for all consumers exclude 626 consumers in 2001 and 210 consumers in 2002 whose postcode was not known, therefore, totals may differ from other tables.

(f) Data for consumers of CSDA accommodation support services exclude psychiatric services specifically identified by the jurisdiction.

(g) Data for 2001 and 2002 are revised, so differ from those in previous reports.

.. Not applicable. – Nil or rounded to zero.

Proportion in rural and remote locations										
All people	%	22.9	23.0	39.2	25.9	25.9	57.7	0.1	52.3	27.3
Consumers	%	30.3	32.3	39.8	17.1	20.2	49.1	0.7	51.5	29.6

(a) The State and Territory data on the rural and remote population are derived by the AIHW from ABS statistical local area population estimates for June 2000 and 2001.

(b) Data for rural and remote consumers are based on the residential postcode of the consumer. A postcode is classified as rural or remote if more than 50 per cent of the population in the postcode area are so classified.

(c) Data for rural and remote consumers per 1000 rural and remote people are derived from the rural and remote consumer data divided by the rural and remote Australians data multiplied by 1000.

(d) Consumer data are estimates after use of a statistical linkage key to account for individuals who received more than one service on the snapshot day. Totals may not be the sum of the components because individuals might have accessed services from more than one jurisdiction on the snapshot day.

(e) Data for all consumers exclude 292 consumers in 2001 whose postcode was not known, therefore, totals may differ from other tables.

(f) Data for 2001 and 2002 are revised, so differ from those in previous reports.

.. Not applicable. – Nil or rounded to zero.

- (a) In Victoria, 2000 data do not include funds previously directed to Independent Living Training. In relation to 2002 data: recreation, and intake and response services (previously allocated under community support) are allocated under community access; community support services include early intervention and specialist children's services programs; information and advocacy (included under community support in 2001) is included under a new category advocacy, information and print disability; other support includes the Inclusive Communities, and Aids and Equipment programs in 2002 and 2003.
- (b) Method of apportioning government administration expenditure in Queensland changed in 1999-2000 and again in 2000-01 as a result of improved financial reporting systems and with the establishment of Disability Services Queensland.
- (c) WA's 2000-01 expenditure for accommodation support, community support, community access and respite reflects increased State business plan funding, including Commonwealth unmet need funding. An improved cost allocation and payments database has been used for WA data since 200-02. This has resulted in a refinement and in some cases a major realignment of costs previously reported. Within accommodation support, other accommodation costs have been realigned to community support, however, this shift in costs has been more than offset by additional funding provided for growth, indexation and wage parity increases within government provided places. Community support now includes local area coordination (LAC) funding previously reported against respite services. Direct expenditure and administrative expenditure on some LAC programs in 2002-03 have been further allocated to day activity services and advocacy, information and print disability.

Table 13A.20

	<i>NSW</i>	<i>Vic (a)</i>	<i>Qld (b)</i>	<i>WA (c)</i>	<i>SA (d)</i>	<i>Tas (e)</i>	<i>ACT (f)</i>	<i>NT (g)</i>	<i>S/T (h)</i>	<i>Aus Gov (i)</i>	<i>Aust</i>
(d)	Expenditure for SA have decreased from 2000-01 to 2001-02 because some funding have been transferred out of disability services (from accommodation support) and reporting changed (in community support, advocacy, information and print disability and other support) to be consistent with the CSTDA)– Schedule A State Funding. Administration and total expenditure excludes some government agencies receiving funding from the DHS. Departmental overhead costs are not included in 2000-01 data and are included in 2001-02 data. Prior to 2001-02, only the Central Office and Intellectual Disability Services Council administrative costs were included.										
(e)	For Tasmania, expenditure data on respite services in 2002-03 has been adjusted for incorrectly reporting on the therapy service data by one funded organisation prior to 2002-03; Divisional overheads are included in the 2002-03 administrative expenditure data for the first time.										
(f)	In the ACT, only services under the Disability Services funding program are counted; Services funded through the Home and Community Care program are excluded.										
(g)	In the NT, a realignment of costs attributed to services purchased under the individualised funding model occurred in 2002-03 – from the community support service type to the specific service type purchased. This is as a result of improved data collection and reporting systems. In 2002-03, the NT changed from cash to accrual accounting therefore limiting comparison of expenditure to previous years. 2000-01 expenditure data include advance payments for the first quarter of 2001-02 resulting in under reporting of expenditure in 2001-02. This should be taken into consideration when comparing 2002-03 data.										
(h)	Total of States and Territories.										
(i)	Australian Government administrative expenditure is an attribution of cost-based on average staffing levels. There have been a few changes in relation to the allocation of expenditure items of direct employment services since 2001-02. These changes included: postal concessions for the blind program (which was included under community access previously) has been incorporated with the employment and other services appropriation for the first time; information and advocacy (which was included under community support in 2000-01) has been included under a new category – advocacy, information and print disability; and some elements, including the quality assurance assessment and certification payments and employer incentives (such as supported wage system, wage subsidies and the workforce modification scheme), have been included in employment service expenditure.										

– Nil or rounded to zero. .. Not applicable.

- (a) In Victoria, 2000 data do not include funds previously directed to Independent Living Training. In relation to 2002 data: recreation, and intake and response services (previously allocated under community support) are allocated under community access; community support services include early intervention and specialist children's services programs; information and advocacy (included under community support in 2001) is included under a new category advocacy, information and print disability; other support includes the Inclusive Communities, and Aids and Equipment programs in 2002 and 2003.
- (b) Method of apportioning government administration expenditure in Queensland changed in 1999-2000 and again in 2000-01 as a result of improved financial reporting systems and with the establishment of Disability Services Queensland.
- (c) WA's 2000-01 expenditure for accommodation support, community support, community access and respite reflects increased State business plan funding, including Commonwealth unmet need funding. An improved cost allocation and payments database has been used for WA data since 200-02. This has resulted in a refinement and in some cases a major realignment of costs previously reported. Within accommodation support, other accommodation costs have been realigned to community support, however, this shift in costs has been more than offset by additional funding provided for growth, indexation and wage parity increases within government provided places. Community support now includes local area coordination (LAC) funding previously reported against respite services. Direct expenditure and administrative expenditure on some LAC programs in 2002-03 have been further allocated to day activity services and advocacy, information and print disability.

Table 13A.21

	<i>NSW</i>	<i>Vic (a)</i>	<i>Qld (b)</i>	<i>WA (c)</i>	<i>SA (d)</i>	<i>Tas (e)</i>	<i>ACT (f)</i>	<i>NT (g)</i>	<i>S/T (h)</i>	<i>Aus Gov (i)</i>	<i>Aust</i>
(d)	Expenditure for SA have decreased from 2000-01 to 2001-02 because some funding have been transferred out of disability services (from accommodation support) and reporting changed (in community support, advocacy, information and print disability and other support) to be consistent with the CSTDA)– Schedule A State Funding. Administration and total expenditure excludes some government agencies receiving funding from the DHS. Departmental overhead costs are not included in 2000-01 data and are included in 2001-02 data. Prior to 2001-02, only the Central Office and Intellectual Disability Services Council administrative costs were included.										
(e)	For Tasmania, expenditure data on respite services in 2002-03 has been adjusted for incorrectly reporting on the therapy service data by one funded organisation prior to 2002-03; Divisional overheads are included in the 2002-03 administrative expenditure data for the first time.										
(f)	In the ACT, only services under the Disability Services funding program are counted; Services funded through the Home and Community Care program are excluded.										
(g)	In the NT, a realignment of costs attributed to services purchased under the individualised funding model occurred in 2002-03 – from the community support service type to the specific service type purchased. This is as a result of improved data collection and reporting systems. In 2002-03, the NT changed from cash to accrual accounting therefore limiting comparison of expenditure to previous years. 2000-01 expenditure data include advance payments for the first quarter of 2001-02 resulting in under reporting of expenditure in 2001-02. This should be taken into consideration when comparing 2002-03 data.										
(h)	Total of States and Territories.										
(i)	Australian Government administrative expenditure is an attribution of cost-based on average staffing levels. There have been a few changes in relation to the allocation of expenditure items of direct employment services since 2001-02. These changes included: postal concessions for the blind program (which was included under community access previously) has been incorporated with the employment and other services appropriation for the first time; information and advocacy (which was included under community support in 2000-01) has been included under a new category – advocacy, information and print disability; and some elements, including the quality assurance assessment and certification payments and employer incentives (such as supported wage system, wage subsidies and the workforce modification scheme), have been included in employment service expenditure.										

– Nil or rounded to zero. .. Not applicable.

Table 13A.23

	NSW (c)	Vic (d)	Qld (e)	WA (f)	SA (g)	Tas (h)	ACT (i)	NT (j)	Aust
Government funding per non-government provided community accommodation and care place (group homes)									
2001-02	70 272	60 583	37 374	57 551	34 059	64 452	59 665	63 762	60 068
Government funding per non-government provided community accommodation and care place (other)									
2001-02	42 713	29 621	39 456	40 405	4 307	26 778	14 179	8 118	36 288

- (a) Data are based on total expenditure divided by the number of places on a snapshot day (rather than average number of places during the year). Data for non-government provided places reflect cost to government and not full cost of providing accommodation places. Governments make a contribution towards non-government provided places.
- (b) Prior to 2001-02 data reflect cost per institutional/large residential place. Due to refinements made to the counting rules for accommodation data, the 2001-02 data are not strictly comparable with data for previous years. The change from 1998-99 reflects the refinement of the process (based on accrual accounting) used to allocate expenditure between institutions and community accommodation.
- (c) Increased costs in NSW 2000-01 and 2001-02 data reflect devolution expenditure on transitional accommodation and crisis support to people residing in institutions and being relocated. This will reduce as the relocation program accelerates.
- (d) Prior to 2001-02 data for Victoria are not comparable with previous reports, which used data from departmental administrative collections. Data for 2001-02 on non-government provided community accommodation (other) include the in-home accommodation support program not previously reported.
- (e) The decrease in Queensland government expenditure per government provided institutional residential place is due to transitional changes in models of accommodation support provided.
- (f) In WA an improved cost allocation and payments database has been used for data in 2001-02. This has resulted in a refinement and in some cases a major realignment of costs previously reported. Accommodation support also reflects growth, indexation and parity funding provided for wage increases.
- (g) In SA, expenditure data are net of related receipts. Data for 2001-02 are net of fees and client contributions only and only reflect places funded by the DHS. There were no government provided community accommodation and care places (other) in SA in 2001-02.
- (h) There were no government provided institutional residential places in Tasmania in 2000-01 and 2001-02.
- (i) There were no government provided institutional residential places in the ACT in 1999-2000, 2000-01 and 2001-02.
- (j) In the NT, there are no government provided accommodation services and there are no non-government provided institutional residential places. Expenditure variations in 2001-02 for the disability service types reflect changes in service provision under an individual funding model. Payments under the model are categorised as community support (as per CSTDA NMDS definitions) and are not included specifically in the service type purchased (for example, supported accommodation. Some non-government organisations received three quarterly payments in 2001-02. One quarterly payment was paid in advance in 2000-01. These factors affect the ability to make meaningful comparisons to previous financial years.
- .. Not applicable.

(a) Based on the number of employment clients assisted during the whole year.

(b) Expenditure data in 2000-01 do not include other elements of the Commonwealth employment assistance program such as consumer training and support, supported wages system and wage subsidies. Expenditure data in 2001-02 include the quality assurance assessment and certification payments and, employer incentives such as the supported wage system, wage subsidies and the workclient modification scheme.

2001-02	3 923	3 219	3 656	5 526	4 347	3 944	4 686	5 331	3 878

(a) State and Territory cost per client data include expenditure for grant and case-based funding. The amounts shown represent payment made directly to services for the provision of disability employment assistance in 2000-01 and 2001-02. They do not include other elements of the Commonwealth Employment Assistance program, such as consumer training and support, supported wages system and wage subsidies. The average cost of employment assistance and ongoing support in 2000-01 was \$3948 (see DFACS 2001-02 annual report for further information).

(b) Total consumer numbers and average cost per client for the ACT in 2001-02 is an estimate.

2001-02	9.3	8.0	8.4	4.3	6.8	4.9	11.3	9.7	7.7	8.0
2002-03	9.7	8.1	8.1	5.2	6.4	7.2	9.9	4.4	7.6	8.2

(a) See table 13.3 for an explanation of different methods of apportioning departmental costs.

(b) The method for apportioning government administration expenditure in Queensland changed in 2000-01 as a result of improved financial reporting systems and with the establishment of Disability Services Queensland. Payroll tax data for Queensland include payroll tax, accrued payroll tax and long service leave on-costs recovered payroll tax.

(c) In WA, the decrease in 2000-01 administration expenditure reflects a reduction in corporate services costs and the elimination of costs associated with the implementation of the GST in 1999-2000; The increase in 2001-02 administration expenditure mainly reflects the realignment of policy costs previously allocated across all outputs.

(d) Data for SA include administration expenses (indirect service delivery costs) relating to all government agencies receiving funding from the department. Reports in previous years included only the Central Office and Intellectual Disability Services Council administrative costs. Improved allocation of corporate overheads occurred again in 2000-01 within the government sector.

(e) Improved allocation of corporate overheads occurred again in 2000-01 within the ACT government sector. The ACT incurred additional one-off overhead costs in 2000-01 due to the Inquiry into Disability Services in the ACT.

(f) The NT administrative expenditure prior to 2001-02 is estimated only and is based on average staffing levels. In 2002-03 the method of apportioning administrative expenditure changed from cash to accrual accounting, resulting from a realignment of some costs previously reported under this category to direct service delivery.

(g) Australian Government administrative expenditure is an attribution of cost based on average staffing levels.

- (a) Pensions, allowances and payments were not funded under the CSDA. Totals may not sum exactly as a result of rounding.
- (b) All invalid or unknown postcodes are included in NSW customer figures. International services are included in Tasmania.
- (c) The Disability Support Pension is a means tested income support payment for people aged 16 or over who have a physical, intellectual or psychiatric impairment (meeting set criteria) resulting in an inability to work or to be re-skilled for work for at least the next two years (as a result of impairment), or who are participating in the supported wage system. Special rules apply to the vision impaired.
- (d) The Mobility Allowance is a non means tested income supplement to assist with transport costs for people aged 16 or over with a disability who are in employment, vocational training, a combination of vocational training and employment, job search activities or voluntary work, and who are unable to use public transport without substantial assistance.
- (e) The Carer Payment provides income support to people who, as a result of the demands of their caring role, are unable to support themselves through substantial workforce participation.
- (f) The Carer Allowance is a supplementary payment available to people who provide daily care and attention at home for an adult or child with a disability or severe medical condition. Data includes Health Care Card only customers.
- (g) Sickness Allowance is a means tested income support payment for people aged 21 or over who are temporarily incapacitated from doing their normal work or study, due to illness or injury, and have a job or study to return to when they are fit.
