- (a) Refer to table 15A.4 for information on the comparability of expenditure data.
- (b) Numbers may not calculate exactly due to rounding errors.
- (c) For child protection services, expenditure per child relates to children aged 16 years and under in the residential population. For out-of-home care and total child protection and out-of-home care services, expenditure per child relates to children aged 17 years and under in the residential population.
- (d) One region incorrectly charged about \$7 million in salaries in 1999-2000 to out-of-home care services instead of child protection services.
- (e) Prior to 2001-02, shared direct service delivery costs and corporate umbrella costs were not included in published data, hence the significant increase in 2001-02 figures.
- (f) The Australia figure for total real expenditure represents the sum of figures for those jurisdictions able to provide data. The Australia figure for real expenditure per child represents the sum of expenditure for those jurisdictions able to provide data divided by the sum of the residential population for the target groups (0–16 or 0–17 years) for those jurisdictions able to provide expenditure data.
- (g) Out-of-home care equates to the department's 'Care for Children' output. The significant increase in 2000-2001 is due the department reclassifying one of its services (Adolescent Child Support Service) as being directly related to the 'Care for Children' output. Previously the costs of this service were allocated to all departmental outputs.

- (a) During 1998-99, a new method of recording Indigenous status was implemented in NSW, which has improved the accuracy of this information. The apparent increase in the rate of Indigenous clients from 1998-99 is likely to be a reflection of the improved recording of Indigenous status rather than a true increase in the number of Indigenous clients.
- (b) If a child was the subject of more than one notification, investigation or substantiations, then each one of these was counted.
- (c) From 1998-99, the definition of an investigation was changed to include the interviewing or sighting of a child where practicable.
- (d) Investigations relate to notifications received during the financial year. If the investigation was completed by 31 August it is classified as finalised. If the investigation was not completed by 31 August it is classified as not finalised.
- (e) Notifications 'dealt with by other means' includes the provision of advice, referral to support services or referral to the police.
- (f) Data on the number of investigations finalised and not finalised by Indigenous status were not collected between 1998-99 and 1999-2000.
- (g) From 2000-01, the category 'child at risk' included children where no actual harm is determined but carer/family issues were involved
- (h) The data for 2002-03 and previous years should not be compared. NSW implemented a modification to the data system to support legislation and associated practice changes during 2002-03 which would make any comparison inaccurate.

Table 15A.27 Children in notifications, investigations and substantiations and children on care and protection orders: number and rate per 1000 children in the target populations, by Indigenous status, New South Wales (a), (b), (c), (d), (e)

- (a) Rates of children in notifications, investigations and substantiations were calculated as the number of children aged 0-16 years in each category (including those whose age was not stated) divided by the estimated population of children aged 0-16 years at 31 December, multiplied by 1 000. Prior to 2001-02 rates for Indigenous children in notifications, investigations and substantiations were calculated using ABS population projections based on the 1996 Census data. The June projections for two years were averaged to obtain a population figure for December of the relevant year.
- (b) Rates of children on care and protection orders were calculated as the number of children aged 0-17 years (including those whose age was not stated) who were on a care and protection order at 30 June, divided by the estimated population aged 0-17 at 30 March, multiplied by 1 000. Prior to 2001-02 rates for Indigenous children on care and protection orders were calculated using ABS population projections for June based on the 1996 Census data.
- (c) The Indigenous rates for 2001-02 and 2002-03 were calculated using the estimated Indigenous population at 30 June 2001 from the 2001 Census data. These rates should not be compared with the Indigenous rates for previous years. All Indigenous rates will be updated when Indigenous population projections from the 2001 Census are released in 2004.
- (d) During 1998-99 a new method of recording Indigenous status was implemented in NSW, which has improved the accuracy of this information. The apparent increase in the rate of Indigenous clients from 1998-99 is likely to be a reflection of the improved recording of Indigenous status rather than a true increase in the number of Indigenous clients.
- (e) The data for 2002-03 and previous years should not be compared. NSW implemented a modification to the data system to support legislation and associated practice changes during 2002-03 which would make any comparison inaccurate.

Non-Indigenous	4.1	4.9	5.5	5.6	5.9
All children	5.1	6.1	7.1	7.1	7.6

- (a) Rates were calculated as the number of children aged 0-17 years (including those whose age was not stated) in out of home care at 30 June, divided by the estimated population aged 0-17 at 30 March, multiplied by 1,000. Prior to 2001-02 rates for Indigenous children in out of home care were calculated using ABS population projections for June based on the 1996 Census data.
- (b) Rates were calculated as the number of children aged 0-17 years (including those whose age was not stated) in at least one out of home care placement during the year, divided by the estimated population aged 0-17 at 31 December, multiplied by 1,000. Prior to 2001-02 rates for Indigenous children in at least one placement were calculated using ABS population projections based on the 1996 Census data. The June projections for two years were averaged to obtain a population figure for December of the relevant year.
- (c) The Indigenous rates for 2001-02 and 2002-03 were calculated using the estimated Indigenous population at 30 June 2001 from the 2001 Census data. These rates should not be compared with the Indigenous rates for previous years. All Indigenous rates will be updated when Indigenous population projections from the 2001 Census are released in 2004.
- (d) The data on children in out-of-home care include the following categories of children even if they do not meet the definition of 'out-of-home care': wards, children under a guardianship order, protected persons (including overseas adoptees) and pre-adoption placements.
- (e) During 1998-99 a new method of recording Indigenous status was implemented in NSW, which has improved the accuracy of this information. The apparent increase in the rate of Indigenous clients from 1998-99 onwards is likely to be a reflection of the improved recording of Indigenous status rather than a true increase in the number of Indigenous clients.

(a) Victoria was not able to provide data on Indigenous children in 1998-99.

(b) If a child was the subject of more than one notification, investigation or substantiations, then each one of these were counted. From 1998-99 the definition of an investigation was changed to include the interviewing or sighting of a child where practicable.

(c) Investigations relate to notifications received during the financial year. If the investigation was completed by 31 August it is classified as finalised. If the investigation was not completed by 31 August it is classified as not finalised. Notifications 'dealt with by other means' includes the provision of advice, referral to support services or referral to the police.

(d) In Victoria if a case is open following the first notification, no further notifications concerning the child are counted.

(e) Data on the number of investigations finalised and not finalised by Indigenous status were not collected between 1998-99 and 1999-00.

Table 15A.44 Children in notifications, investigations and substantiations and children on care and protection orders: number and rate per 1000 children in the target populations, by Indigenous status, Victoria (a), (b), (c), (d)

- (a) Rates of children in notifications, investigations and substantiations were calculated as the number of children aged 0-16 years in each category (including those whose age was not stated) divided by the estimated population of children aged 0-16 years at 31 December, multiplied by 1,000. Prior to 2001-02 rates for Indigenous children in notifications, investigations and substantiations were calculated using ABS population projections based on the 1996 Census data. The June projections for two years were averaged to obtain a population figure for December of the relevant year.
- (b) Rates of children on care and protection orders were calculated as the number of children aged 0-17 years (including those whose age was not stated) who were on a care and protection order at 30 June, divided by the estimated population aged 0-17 at 30 March, multiplied by 1,000. Prior to 2001-02 rates for Indigenous children on care and protection orders were calculated using ABS population projections for June based on the 1996 Census data.
- (c) The Indigenous rates for 2001-02 and 2002-03 were calculated using the estimated Indigenous population at 30 June 2001 from the 2001 Census data. These rates should not be compared with the Indigenous rates for previous years. All Indigenous rates will be updated when Indigenous population projections from the 2001 Census are released in 2004.

(a) Rates were calculated as the number of children aged 0-17 years (including those whose age was not stated) in out of home care at 30 June, divided by the estimated population aged 0-17 at 30 March, multiplied by 1,000. Prior to 2001-02 rates for Indigenous children in out of home care were calculated using ABS population projections for June based on the 1996 Census data.

(b) Rates were calculated as the number of children aged 0-17 years (including those whose age was not stated) in at least one out of home care placement during the year, divided by the estimated population aged 0-17 at 31December, multiplied by 1,000. Prior to 2001-02 rates for Indigenous children in at least one placement were calculated using ABS population projections based on the 1996 Census data. The June projections for two years were averaged to obtain a population figure for December of the relevant year.

(c) The Indigenous rates for 2001-02 and 2002-03 were calculated using the estimated Indigenous population at 30 June 2001 from the 2001 Census data. Table 15A.61 Children in notifications, investigations and substantiations and children on care and protection orders: number and rate per 1000 children in the target populations, by Indigenous status, Queensland (a), (b), (c), (d)

- (a) Rates of children in notifications, investigations and substantiations were calculated as the number of children aged 0-16 years in each category (including those whose age was not stated) divided by the estimated population of children aged 0-16 years at 31 December, multiplied by 1000. Prior to 2001-02 rates for Indigenous children in notifications, investigations and substantiations were calculated using ABS population projections based on the 1996 Census data. The June projections for two years were averaged to obtain a population figure for December of the relevant year.
- (b) Rates of children on care and protection orders were calculated as the number of children aged 0-17 years (including those whose age was not stated) who were on a care and protection order at 30 June, divided by the estimated population aged 0-17 at 30 March, multiplied by 1000. Prior to 2001-02 rates for Indigenous children on care and protection orders were calculated using ABS population projections for June based on the 1996 Census data.
- (c) The Indigenous rates for 2001-02 and 2002-03 were calculated using the estimated Indigenous population at 30 June 2001 from the 2001 Census data. These rates should not be compared with the Indigenous rates for previous years. All Indigenous rates will be updated when Indigenous population projections from the 2001 Census are released in 2004.
- (d) Data for children who were the subject of investigations and children who were subjects of substantiations in 2000-01 are not directly comparable with data from previous years due to system amendments, which allows for more accurate reporting of children who were the subject of more than one notification.

Since Queensland is unable to provide a count based on the exact specification of this indicator, care should be taken when comparing these figure across jurisdictions.

- (a) If a child was the subject of more than one notification, investigation or substantiation, then each one of these was counted. From 1998-99 the definition of an investigation was changed to include the interviewing or sighting of a child where practicable. For WA, however, investigations may include some situations where the child was not sighted.
- (b) Investigations relate to notifications received during the financial year. If the investigation was completed by 31 August it is classified as finalised. If the investigation was not completed by 31 August it is classified as not finalised. For 1997-98, however, the cut-off date used was 16 July so that the number of 'investigations not finalised' was higher in these years.
- (c) Notifications 'dealt with by other means' includes the provision of advice, referral to support services or referral to the police.
- (d) Notifications investigated' and 'investigations not finalised' includes 18 cases for 1998-99 and 24 cases for 1999-2000 where it was not known whether there would be an investigation at the time the data were extracted.
- (e) Data on the number of investigations finalised and not finalised by Indigenous status were not collected between 1998-99 and 1999-2000.
- (f) During 2001-02 new practices were introduced to improve the identification of Indigenous clients. Much of the increase in the number of Indigenous clients from 2001-02 is likely to be due to the improvements in the recording of Indigenous status rather than an increase in the number of Indigenous clients.

Table 15A.78 Children in notifications, investigations and substantiations and children on care and protection orders: number and rate per 1000 children in the target populations, by Indigenous status, Western Australia (a), (b), (c), (d), (e)

- (a) Rates of children in notifications, investigations and substantiations were calculated as the number of children aged 0-16 years in each category (including those whose age was not stated) divided by the estimated population of children aged 0-16 years at 31 December, multiplied by 1,000. Prior to 2001-02 rates for Indigenous children in notifications, investigations and substantiations were calculated using ABS population projections based on the 1996 Census data. The June projections for two years were averaged to obtain a population figure for December of the relevant year.
- (b) Rates of children on care and protection orders were calculated as the number of children aged 0-17 years (including those whose age was not stated) who were on a care and protection order at 30 June, divided by the estimated population aged 0-17 at 30 March, multiplied by 1,000. Prior to 2001-02 rates for Indigenous children on care and protection orders were calculated using ABS population projections for June based on the 1996 Census data.
- (c) The Indigenous rates for 2001-02 and 2002-03 were calculated using the estimated Indigenous population at 30 June 2001 from the 2001 Census data. These rates should not be compared with the Indigenous rates for previous years. All Indigenous rates will be updated when Indigenous population projections from the 2001 Census are released in 2004.

Table 15A.85 **Number of children in out-of-home care at 30 June, by Indigenous status and length of time in continuous out-of-home care, Western Australia (a), (b), (c)**

- (b) WA is unable to reliably distinguish between respite and non-respite care. As a result, both types of placement were included if they satisfy the definition of out-of-home care.
- (c) During 2001-02 new practices were introduced to improve the identification of Indigenous clients. Much of the increase in the number of Indigenous clients from 2001-02 is likely to be due to the improvements in the recording of Indigenous status rather than an increase in the number of Indigenous clients.

(a) This indicates the length of time a child had been in out-of-home placement on a continuous basis for those children who exited care during the year. A return home of less than 7 days is not counted as a break in the continuity of placement.

(b) Data for the category '5 years or more' were not collected prior to 1998-99. Children who had been in care for more than 5 years were therefore included in the category '2 to less than 5 years'.

(c) WA is unable to reliably distinguish between respite and non-respite care. As a result both types of placement were included if they satisfy the definition of out-of-home care.

- (a) If a child was the subject of more than one notification, investigation or substantiation, then each one of these were counted.
- (b) From 2000-01 'notifier concern reports' are excluded from the count of total notifications.
- (c) Notifications 'dealt with by other means' includes the provision of advice, referral to support services or referral to the police.
- (d) Investigations relate to notifications received during the financial year. If the investigation was completed by 31 August it is classified as finalised. If the investigation was not completed by 31 August it is classified as not finalised. From 1998-99 the definition of an investigation was changed to include the interviewing or sighting of a child where practicable. In 1996-97 the category 'notifications investigated' included cases where the investigation was conducted by others. These cases were included in 'notifications not investigated' in 1997-98 and in 'notifications dealt with by other means' in 1998-99.
- (e) Data on the number of investigations finalised and not finalised by Indigenous status were not collected between 1998-99 and 1999-2000.

Table 15A.95 **Children in notifications, investigations and substantiations and children on care and protection orders: number and rate per 1000 children in the target populations, by Indigenous status, South Australia (a), (b), (c), (d)**

-
- (a) Rates of children in notifications, investigations and substantiations were calculated as the number of children aged 0-16 years in each category (including those whose age was not stated) divided by the estimated population of children aged 0-16 years at 31 December, multiplied by 1,000. Prior to 2001-02 rates for Indigenous children in notifications, investigations and substantiations were calculated using ABS population projections based on the 1996 Census data. The June projections for two years were averaged to obtain a population figure for December of the relevant year.
- (b) Rates of children on care and protection orders were calculated as the number of children aged 0-17 years (including those whose age was not stated) who were on a care and protection order at 30 June, divided by the estimated population aged 0-17 at 30 March, multiplied by 1,000. Prior to 2001-02 rates for Indigenous children on care and protection orders were calculated using ABS population projections for June based on the 1996 Census data.
- (c) The Indigenous rates for 2001-02 and 2002-03 were calculated using the estimated Indigenous population at 30 June 2001 from the 2001 Census data. These rates should not be compared with the Indigenous rates for previous years. All Indigenous rates will be updated when Indigenous population projections from the 2001 Census are released in 2004.
- (d) From 2000-01 onwards, SA included in 'notifications' only those reports which have met the criteria for a reasonable suspicion of child abuse or neglect.

(a) Prior to 2002 the percentage of Indigenous children placed in accordance with the Aboriginal Child Placement Principle was calculated using the total number of Indigenous children in out-of-home care as the denominator. From 2002 the denominator excluded Indigenous children living independently and those whose living arrangements were unknown.

(b) Prior to 2001 Indigenous children in Indigenous residential care were included in the category 'other Indigenous caregiver'.

- (a) Tasmania introduced new intake and assessment guidelines, based on the WA model, in July 1997. These new guidelines were likely to be the main reason for the decline in the number of notifications and substantiations between 1997-98 and 2000-01. There is also a growing trend in Tasmania to classify the less serious allegations as either consultations or child and family concerns, rather than child protection notifications.
- (b) If a child was the subject of more than one notification, investigation or substantiation, then each one of these were counted.
- (c) Investigations relate to notifications received during the financial year. If the investigation was completed by 31 August it is classified as finalised. If the investigation was not completed by 31 August it is classified as not finalised. From 1998-99 the definition of an investigation was changed to include the interviewing or sighting of a child where practicable.
- (d) Notifications 'dealt with by other means' includes the provision of advice, referral to support services or referral to the police.
- (e) Data on the number of investigations finalised and not finalised by Indigenous status were not collected between 1997-98 and 1999-00.

Table 15A.112 Children in notifications, investigations and substantiations and children on care and protection orders: number and rate per 1000 children in the target populations, by Indigenous status, Tasmania (a), (b), (c), (d), (e)

- (a) Rates of children in notifications, investigations and substantiations were calculated as the number of children aged 0-16 years in each category (including those whose age was not stated) divided by the estimated population of children aged 0-16 years at 31 December, multiplied by 1,000. Prior to 2001-02 rates for Indigenous children in notifications, investigations and substantiations were calculated using ABS population projections based on the 1996 Census data. The June projections for two years were averaged to obtain a population figure for December of the relevant year.
- (b) Rates of children on care and protection orders were calculated as the number of children aged 0-17 years (including those whose age was not stated) who were on a care and protection order at 30 June, divided by the estimated population aged 0-17 at 30 March, multiplied by 1,000. Prior to 2001-02 rates for Indigenous children on care and protection orders were calculated using ABS population projections for June based on the 1996 Census data.
- (c) The Indigenous rates for 2001-02 and 2002-03 were calculated using the estimated Indigenous population at 30 June 2001 from the 2001 Census data. These rates should not be compared with the Indigenous rates for previous years. All Indigenous rates will be updated when Indigenous population projections from the 2001 Census are released in 2004.
- (d) Tasmania introduced new intake and assessment guidelines, based on the WA model, in July 1997. These new guidelines were likely to be the main reason for the decline in the number of notifications and substantiations between 1997-98 and 2000-01. There is also a growing trend in Tasmania to classify the less serious allegations as either consultations or child and family concerns, rather than child protection notifications.
- (e) Care should be taken in interpreting the rates for Indigenous children due to the relatively small size of the Indigenous population.

Table 15A.130 Children in notifications, investigations and substantiations and children on care and protection orders: number and rate per 1000 children in the target populations, by Indigenous status, Australian Capital Territory (a), (b), (c), (d)

-
- (a) Rates of children in notifications, investigations and substantiations were calculated as the number of children aged 0-16 years in each category (including those whose age was not stated) divided by the estimated population of children aged 0-16 years at 31 December, multiplied by 1,000. Prior to 2001-02 rates for Indigenous children in notifications, investigations and substantiations were calculated using ABS population projections based on the 1996 Census data. The June projections for two years were averaged to obtain a population figure for December of the relevant year.
- (b) Rates of children on care and protection orders were calculated as the number of children aged 0-17 years (including those whose age was not stated) who were on a care and protection order at 30 June, divided by the estimated population aged 0-17 at 30 March, multiplied by 1,000. Prior to 2001-02 rates for Indigenous children on care and protection orders were calculated using ABS population projections for June based on the 1996 Census data.
- (c) In 1999-2000 child protection policies were changed to focus on the level of harm to a child rather than an incident. This change is likely to be the main reason for the decrease in the number of
- (d) The Indigenous rates for 2001-02 and 2002-03 were calculated using the estimated Indigenous population at 30 June 2001 from the 2001 Census data. These rates should not be compared with the Indigenous rates for previous years. All Indigenous rates will be updated when Indigenous population projections from the 2001 Census are released in 2004.

- (a) The NT includes child concern reports in child protection notifications.
- (b) NT could not provide data for the full year for 1998-99 as a result of changes to their information system. The apparent increase in numbers of children in the child protection system from 1998-99 onwards is due to the design of the new information system which enables improved reporting of all reports received.
- (c) If a child was the subject of more than one notification, investigation or substantiations, then each one of these were counted.
- (d) From 1998-99 the definition of an investigation was changed to include the interviewing or sighting of a child where practicable.
- (e) Investigations relate to notifications received during the financial year. If the investigation was completed by 31 August it is classified as finalised. If the investigation was not completed by 31 August it is classified as not finalised. Notifications 'dealt with by other means' includes the provision of advice, referral to support services or referral to the police.
- (f) Data on the number of investigations finalised and not finalised by Indigenous status were not collected between 1997-98 and 1999-00.
- (g) The NT cannot reliably count notifications dealt with by other means and such matters are included under 'notifications not investigated/dealt with by other means'.

Table 15A.146 Children in notifications, investigations and substantiations and children on care and protection orders: number and rate per 1000 children in the target populations, by Indigenous status, Northern Territory (a), (b), (c), (d), (e)

- (a) Rates of children in notifications, investigations and substantiations were calculated as the number of children aged 0-16 years in each category (including those whose age was not stated) divided by the estimated population of children aged 0-16 years at 31 December, multiplied by 1000. Prior to 2001-02 rates for Indigenous children in notifications, investigations and substantiations were calculated using ABS population projections based on the 1996 Census data. The June projections for two years were averaged to obtain a population figure for December of the relevant year.
- (b) Rates of children on care and protection orders were calculated as the number of children aged 0-17 years (including those whose age was not stated) who were on a care and protection order at 30 June, divided by the estimated population aged 0-17 at 30 March, multiplied by 1000. Prior to 2001-02 rates for Indigenous children on care and protection orders were calculated using ABS population projections for June based on the 1996 Census data.
- (c) The Indigenous rates for 2001-02 and 2002-03 were calculated using the estimated Indigenous population at 30 June 2001 from the 2001 Census data. These rates should not be compared with the Indigenous rates for previous years. All Indigenous rates will be updated when Indigenous population projections from the 2001 Census are released in 2004.

(a) This indicates the length of time a child had been in out of home placement on a continuous basis for those children who exited care during the year. A return home of less than 7 days is not counted as a break in the continuity of placement.

(b) NT could not provide data for 1998-99.

(c) Data for the category '5 years or more' were not collected prior to 1998-99. Children who had been in care for more than 5 years were therefore included in the category '2 to less than 5 years'.

(d) The NT is unable to reliably distinguish between respite and non-respite care. As a result both types of placement were included if they satisfy the definition of out-of-home care.

- (a) Prior to 2002 the percentage of Indigenous children placed in accordance with the Aboriginal Child Placement Principle was calculated using the total number of Indigenous children in out of home care as the denominator. From 2002 the denominator excluded Indigenous children living independently and those whose living arrangements were unknown.
- (b) Prior to 2001 Indigenous children in Indigenous residential care were included in the category 'other Indigenous caregiver'.
- (c) NT could not provide these data prior to 1999-2000.
- (d) The definition of 'relative/kin' used in this table is broader than the definition used in other tables because it includes fictive kin relationships based on customary law.
- (e) Data on the relationship of the caregiver to children placed with non-Indigenous carers could not be provided and these children were included in the category 'other non-Indigenous carer'.
- (f) For 2001-02 the number of Indigenous children placed with Indigenous relative/kin may be under-enumerated due to data entry error.

(a) All participating SAAP agencies are included in the analysis.

(b) Ongoing clients are included in the analysis.

(c) Only agency level recurrent allocations are included in the analysis.

(d) There is a small number of participating SAAP agencies that did not receive recurrent funding. These agencies are included in the analysis.

(e) There is a small number of SAAP agencies that received recurrent funding but did not send in any client forms. These agencies are included in the analysis.

(f) Figures have been weighted to adjust for agency non participation and client non consent.

(g) Preliminary data.

(h) Excludes high volume records as not all items are included on high volume forms.

Table 15A.175

- (l) 1998-99 data refers to clients whose support period ends on or after 1 January 1998 and before 1 January 1999. 1999-2000 data refers to clients whose support period ends on or after 1 January 1999 and before 1 January 2000. 2000-01 data refers to clients whose support period ends on or after 1 January 2000 and before 1 January 2001.
- (j) Caution should be applied when interpreting these figures. Consent and valid alpha codes are required for each support period for the clients; after support information is not commonly completed; and particular client groups (for example, women escaping domestic violence) may be under represented in this calculation because of a higher incidence of non-consent.
- (k) A client may receive two or more periods of support in the year. To minimise double counting of individual clients, only one record per client which has exit information has been included in the analysis.
- (l) Care needs to be taken when interpreting these figures. The number of clients that can be identified as leaving to independent housing and not returning within six months is unreliable for a number of reasons:
- consent and valid alpha codes are required for each support period for the clients
 - a client may give consent in one support period and not give consent or an alpha code in the next and therefore is not identified as returning to a SAAP agency within six months
 - type of housing/accommodation after support is not collected on high volume forms (excluding 36 169 support periods)
 - after support information is not commonly completed and
 - particular client groups (for example, women escaping domestic violence) may be under represented in this calculation through a higher incidence of non consent.
- (m) The 'not returning within six months' requirement excludes all clients whose support period ends on or after 1 January 1999. Reference has been made to 1998-99 client data to enable a calculation of these figures representing a full year. Clients whose support period begins on or after 1 January 1999 have been included in the analysis with no exclusions for support periods prior to this date.
- (n) For 1998-99 and 1999-2000, 'exiting to independent housing' includes 'not returning to SAAP within six months'.
- (o) SAAP agencies that had no completed support periods leaving to independent housing are included in the analysis.

- (a) Totals may not add up to 100 per cent as a result of rounding.
- (b) A two-week 'unmet demand collection' is conducted annually to gather information about homeless people who were not accepted as clients of SAAP agencies. In 2001-02, the collection was held between 22–28 August 2001 and 8–14 May 2002, agencies recorded 6725 unmet requests. In this table, requests exclude those where the person refused an offer of assistance; those where a similar request was made at a SAAP funded agency at the same day within the collection period (to limit double counting); and those where the reason their request was not met was either inappropriate referral (wrong target group) or where the service requested was not provided by the agency.
- (c) Caution should be applied when interpreting numbers of unmet requests, for several reasons. Firstly, person(s) can make requests on more than one occasion and to more than one SAAP agency. While double counting has been limited through the exclusion of those requests where the person(s) had made a similar request to a SAAP agency at the same day within the collection period, this information may not have been available to record. Thus the figure 5040 does not represent the actual number of forms with valid requests. Secondly, a number of people may receive the ongoing support or accommodation from a SAAP agency at a later time, quite possibly soon after their initial request. As a result, this estimate may overstate the actual level of unmet demand. Thirdly, a number of people have their needs met by other means and do not return to a SAAP agency.
- Finally, there are shortfalls in pro-rating from a two week collection period to the full year. Many factors influence the capacity of individual SAAP agencies to meet day to day demand for their services – it is not possible to identify a two week period which is 'typical' for all SAAP agencies.

- (a) Figures have been weighted to adjust for agency non participation and client non consent.
- (b) Data should be interpreted with extreme caution.
- (c) Data for unmet demand are estimates only based on information collected in the two week period each year (22–28 August 2001 and 8–14 May 2002).
- (d) Unmet requests excludes those where the person refused an offer of assistance; those where a similar request was made at a SAAP funded agency within the collection period (to limit double counting); and those where the reason their request was not met was either inappropriate referral (wrong target group) or where the service requested was not provided by the agency.
- (e) Data on unmet demand should be interpreted with caution for several reasons. First, a person can make a request on more than one occasion and to more than one SAAP agency. While double counting has been limited through the exclusion of those requests where the person had made a similar request to a SAAP agency within the collection period, this information may not have been available to record.
- (f) Preliminary data.
- (g) Data from 2000-01 onwards are not comparable to earlier years. In collections prior to 2000-01, unmet requests related to individuals requesting either accommodation and/or support within the collection fortnight. However, for 2000-01 onwards unmet requests corresponded to family groups (including individuals) requesting accommodation on the day of request. The client collection data is not comparable with the unmet demand data.

(a) The accommodation load of agencies was calculated by dividing the number of accommodation days by the number of days the agency was operational during the reporting period, where the number of accommodation days equals the sum of accommodation days for all clients of an agency who were supported during the reporting period. The average accommodation load was the mean value of all agencies accommodation loads. Support periods without valid accommodation dates were assigned the inter-quartile modal duration of accommodation for agencies of the same service delivery model in the same jurisdiction.

(b) The caseload of agencies was calculated by dividing the number of support days by the number of days the agency was operational during the reporting period, where the number of support days equals the sum of support days for all clients of the agency who were supported during the reporting period. The average caseload was the mean value of all agencies caseloads. Support periods without valid support dates were assigned the inter-quartile modal duration of support for agencies of the same service delivery model in the same jurisdiction.
