**Table 15A.1 State and Territory Government real recurrent expenditure on child protection and out-of-home care services (2004-05 dollars) (a), (b)**

<i>Unit</i>	<i>2000-01</i>	<i>2001-02</i>	<i>2002-03</i>	<i>2003-04</i>	<i>2004-05</i>
(a)	Refer to table 15A.4 for information on the comparability of expenditure data.				
(b)	Numbers may not calculate exactly due to rounding errors.				
(c)	Increased expenditure between 2002-03 and 2003-04 relates to: a redirection of caseworker time away from general family support services towards child protection (\$2.6 million), as demonstrated by the recent staff Labour Time Allocation Survey; new funding for services (\$3 million) mainly as a result of the Gordon Inquiry; first time inclusion of Non-Government funded child protection services (\$2.2 million) in non-salary expenditure.				
(d)	Increased expenditure from 2003-04 to 2004-05 relates to a shift in the latest time allocation survey to child protection from out-of-home care and additional funding for 50 new case workers received in 2004-05, and an increase in non-salary costs due to revised allocation percentages.				
(e)	Increased expenditure between 2002-03 and 2003-04 relates to the commencement of a Centralised Child Protection Advice and Referral Service and an increase in demand.				
(f)	Increase in staff resources provided in 2004-05 to respond to increasing numbers of reports.				
(g)	The Australia figure for total real expenditure represents the sum of figures for those jurisdictions able to provide data. The Australia figure for real expenditure per child represents the sum of expenditure for those jurisdictions able to provide data divided by the sum of the residential population for the target groups (0–16 or 0–17 years) for those jurisdictions able to provide expenditure data.				
(h)	Victorian expenditure for 2004-05 includes additional funding for Aboriginal Family Decision Making, Adolescent Mediation and Diversion and Foster Care Initiatives and data revisions.				
(i)	Increased expenditure between 2002-03 and 2003-04 relates to new funding for; carer subsidies (\$1.3 million), the costs of looking after children in care (\$6 million), homelessness taskforce - non-government leaving care services (\$1.3 million) and new staff as a result of the Gordon Inquiry (\$2 million).				
(j)	The latest time allocation survey for 2004-05 showed a shift away from out-of-home care services to child protection.				
(k)	Increased expenditure between 2002-03 and 2003-04 relates to increase in demand.				
(l)	Expenditure increased from 2003-04 to 2004-05 due to increase in demand and utilisation of Individual Support Packages and foster/kinship care costs and placements. Some reduction of costs due to re-organisation and staffing levels.				
(m)	Increased expenditure from 2003-04 to 2004-05 predominately relates to additional funding received for 50 new case workers and carers' subsidies.				
(n)	Increases in staff resources provided in 2004-05 to respond to increasing numbers of reports and increase in demand and utilisation of Individual Support Packages.				
(o)	Increases in expenditure from 2003-04 to 2004-05 are due to initiatives within the Caring for Our Children Reform Agenda, the Volatile Substance Abuse Legislation and associated programs, and increasing substitute care costs as a result of increasing numbers of children in care and costs of caring for children with high needs. Budget formula changes have led to decreased Departmental overhead costs.				
(p)	Queensland expenditure data have been revised for 2000-01 to 2002-03. The revised figures include resources identified by the creation of the Department of Child Safety in Queensland that were previously not classified as intensive family support services.				
(q)	2003-04 was the first year that overhead salary costs have been applied to family preservation services.				
(r)	Increased expenditure from 2003-04 to 2004-05 relates mainly to a new family preservation service beginning in 2004-05.

- (s) Increase from 2003-04 to 2004-05 represents current cost of service provided by an NGO.
- (t) For child protection services, expenditure per child relates to children aged 16 years and under in the residential population. For out-of-home care and total child protection and out-of-home care services, expenditure per child relates to children aged 17 years and under in the residential population.

(a) Refer to the notes to table 15A.1 and to table 15A.4 for information on the comparability of expenditure data.

(b) Data on notifications, investigations and substantiations for 2003-04 should not be compared to previous years. This is because of a change in recording practices due to the centralisation of the intake service, known as the Child Protection Advice and Referral Service. Now every call about a child is recorded as a notification, whereas previously, workers made the decision locally about whether the call was in fact a notification based on the risk to the child.

(a) Data on the number of notifications by Indigenous status should be interpreted with care. These data are collected very early in the child protection process and often before the agency has full knowledge of the child's family circumstances. As a result of this lack of full knowledge and the other inherent difficulties in identifying Indigenous status, these data are not considered to have a high level of reliability.

(b) See notes to source tables for a description of how the data were defined and collected.

(a) See notes to source tables for a description of how the data were defined and collected.

(b) The counting rule for this indicator has been changed since previous reports, which may have resulted in a lowering of the rate for some jurisdictions in 2003-04. Therefore care should be taken when comparing 2003-04 with previous years.

(c) As a proportion of all children who were the subject of a substantiation.

(b)	Investigations relate to notifications received during the financial year. If the investigation was completed by 31 August it is classified as finalised. If the investigation was not completed by 31 August it is classified as not finalised.					
(c)	Notifications 'dealt with by other means' includes the provision of advice, referral to support services or referral to the police.					
(d)	This category includes children where no actual harm is determined but carer/family issues were involved.					
(e)	Data from 2002-03 should not be compared previous years. NSW implemented a modification to the data system to support legislation and associated practice changes during 2002-03 which would make any comparison inaccurate.

	2000-01	2001-02	2002-03	2003-04	2004-05
(a) Rates of children in notifications, investigations and substantiations were calculated as the number of children aged 0–16 years in each category (including those whose age was not stated) divided by the estimated population of children aged 0–16 years at 31 December, multiplied by 1000. For Indigenous children, the June projections for two years were averaged to obtain a population figure for December of the relevant year.					
(b) Rates of children on care and protection orders were calculated as the number of children aged 0–17 years (including those whose age was not stated) who were on a care and protection order at 30 June, divided by the estimated population aged 0–17 at 31 March, multiplied by 1000.					
(c) Data from 2002-03 should not be compared previous years. NSW implemented a modification to the data system to support legislation and associated practice changes during 2002-03 which would make any comparison inaccurate.

(a) In 2002-03, the category 'Family group homes' was separated from the category 'Residential care'.

(b) Data from 2002-03 should not be compared previous years. NSW implemented a modification to the data system to support legislation and associated practice changes during 2002-03 which would make any comparison inaccurate.

For Indigenous children, the June projections for two years were averaged to obtain a population figure for December of the relevant year.

(b) Rates of children on care and protection orders were calculated as the number of children aged 0–17 years (including those whose age was not stated) who were on a care and protection order at 30 June, divided by the estimated population aged 0–17 at 31 March, multiplied by 1000.

(a)	If a child was the subject of more than one notification, investigation or substantiation, then each one of these were counted. The definition of an investigation includes interviewing or sighting of the child where practicable.					
(b)	Investigations relate to notifications received during the financial year. If the investigation was completed by 31 August it is classified as finalised. If the investigation was not completed by 31 August it is classified as not finalised. Notifications 'dealt with by other means' includes the provision of advice, referral to support services or referral to the police.

(a) Previous admissions to care and protection orders in other jurisdictions could not be counted.

(b) The significant increase in the number of children who had prior admissions orders in 2001-02 is due to the use of short term (less than two years duration) orders. This practice resulted from the much wider range of orders and conditions made available in the *Child Protection Act 1999*.

(a) Rates of children in notifications, investigations and substantiations were calculated as the number of children aged 0–16 years in each category (including those whose age was not stated) divided by the estimated population of children aged 0–16 years at 31 December, multiplied by 1000. For Indigenous children, the June projections for two years were averaged to obtain a population figure for December of the relevant year.

(b) Rates of children on care and protection orders were calculated as the number of children aged 0–17 years (including those whose age was not stated) who were on a care and protection order at 30 June, divided by the estimated population aged 0–17 at 31 March, multiplied by 1000.

(a) If a child was the subject of more than one notification, investigation or substantiation, then each one of these was counted. The definition of an investigation includes interviewing or sighting of the child where practicable. For WA, however, investigations may include some situations where the child was not sighted.

(c)	Notifications 'dealt with by other means' includes the provision of advice, referral to support services or referral to the police.					
(d)	During 2001-02 new practices were introduced to improve the identification of Indigenous clients. Much of the increase in the number of Indigenous clients from 2001-02 is likely to be due to the improvements in the recording of Indigenous status rather than an increase in the number of Indigenous clients.

(a) Includes children admitted to and discharged from care applications.

(b) During 2001-02 new practices were introduced to improve the identification of Indigenous clients. Much of the increase in the number of Indigenous clients from 2001-02 is likely to be due to the improvements in the recording of Indigenous status rather than an increase in the number of Indigenous clients.

- (a) Rates of children in notifications, investigations and substantiations were calculated as the number of children aged 0–16 years in each category (including those whose age was not stated) divided by the estimated population of children aged 0–16 years at 31 December, multiplied by 1000. For Indigenous children, the June projections for two years were averaged to obtain a population figure for December of the relevant year.
- (b) Rates of children on care and protection orders were calculated as the number of children aged 0–17 years (including those whose age was not stated) who were on a care and protection order at 30 June, divided by the estimated population aged 0–17 at 31 March, multiplied by 1000.
- (c) During 2001-02 new practices were introduced to improve the identification of Indigenous clients. (a) This indicates the length of time a child had been in out-of-home placement on a continuous basis for those children who exited care during the year. A return home of less than 7 days is not counted as a break in the continuity of placement.

(b) WA is unable to reliably distinguish between respite and non-respite care. As a result both types of placement were included if they satisfy the definition of out-of-home care.

(c) During 2001-02 new practices were introduced to improve the identification of Indigenous clients. Much of the increase in the number of Indigenous clients from 2001-02 is likely to be due to the improvements in the recording of Indigenous status rather than an increase in the number of Indigenous clients.

- (a) Prior to 2002 the percentage of Indigenous children placed in accordance with the Aboriginal Child Placement Principle was calculated using the total number of Indigenous children in out of home care as the denominator. From 2002 the denominator excluded Indigenous children living independently and those whose living arrangements were unknown.
- (b) Prior to 2001 Indigenous children in Indigenous residential care were included in the category 'other Indigenous caregiver'.
- (c) Children in residential care with Indigenous caregivers were included in the category 'other Indigenous caregiver'.

Much of the increase in the number of Indigenous clients from 2001-02 is likely to be due to the improvements in the recording of Indigenous status rather than an increase in the number of Indigenous clients.

	2000-01	2001-02	2002-03	2003-04	2004-05
(a) Rates of children in notifications, investigations and substantiations were calculated as the number of children aged 0–16 years in each category (including those whose age was not stated) divided by the estimated population of children aged 0–16 years at 31 December, multiplied by 1000. For Indigenous children, the June projections for two years were averaged to obtain a population figure for December of the relevant year.					
(b) Rates of children on care and protection orders were calculated as the number of children aged 0–17 years (including those whose age was not stated) who were on a care and protection order at 30 June, divided by the estimated population aged 0–17 at 31 March, multiplied by 1000.					
(c) From 2000-01 onwards, SA included in 'notifications' only those reports which have met the criteria for a reasonable suspicion of child abuse or neglect.

(a) Prior to 2002 the percentage of Indigenous children placed in accordance with the Aboriginal Child Placement Principle was calculated using the total number of Indigenous children in out of home care as the denominator. From 2002 the denominator excluded Indigenous children living independently and those whose living arrangements were unknown.

(b) Prior to 2001 Indigenous children in Indigenous residential care were included in the category 'other Indigenous caregiver'.

(a)	Data on notifications for 2003-04 should not be compared to previous years. This is because of a change in recording practices due to the centralisation of the intake service, known as the Child Protection Advice and Referral Service. Now every call about a child is recorded as a notification, whereas previously, workers made the decision locally about whether the call was in fact a notification based on the risk to the child.					
(b)	If a child was the subject of more than one notification, investigation or substantiation, then each one of these were counted.					
(c)	Investigations relate to notifications received during the financial year. If the investigation was completed by 31 August it is classified as finalised. If the investigation was not completed by 31 August it is classified as not finalised. The definition of an investigation includes interviewing or sighting of the child where practicable.					
(d)	Notifications 'dealt with by other means' includes the provision of advice, referral to support services or referral to the police.

(a)	Data on notifications for 2003-04 should not be compared to previous years. This is because of a change in recording practices due to the centralisation of the intake service, known as the Child Protection Advice and Referral Service. Now every call about a child is recorded as a notification, whereas previously, workers made the decision locally about whether the call was in fact a notification based on the risk to the child.				
(b)	Rates of children in notifications, investigations and substantiations were calculated as the number of children aged 0–16 years in each category (including those whose age was not stated) divided by the estimated population of children aged 0–16 years at 31 December, multiplied by 1000. For Indigenous children, the June projections for two years were averaged to obtain a population figure for December of the relevant year.				
(c)	Rates of children on care and protection orders were calculated as the number of children aged 0–17 years (including those whose age was not stated) who were on a care and protection order at 30 June, divided by the estimated population aged 0–17 at 31 March, multiplied by 1000.				
(d)	Care should be taken in interpreting the rates for Indigenous children due to the relatively small size of the Indigenous population.

- (a) The number of children in out of home care in Tasmania from 2003 should not be compared with previous years, as a group of children who did not meet the definition of out of home care were excluded from this year's collection. These children are not the subject of a care and protection order and out of home care services did not arrange their placement with relatives.
- (b) Rates were calculated as the number of children aged 0–17 years (including those whose age was not stated) in out of home care at 30 June, divided by the estimated population aged 0–17 at 31 March, multiplied by 1000.
- (c) Rates were calculated as the number of children aged 0–17 years (including those whose age was not stated) in at least one out of home care placement during the year, divided by the estimated population aged 0–17 at 31 December, multiplied by 1000. For Indigenous children, the June projections for two years were averaged to obtain a population figure for December of the relevant year.

(a)	If a child was the subject of more than one notification, investigation or substantiation, then each one of these were counted. The definition of an investigation includes interviewing or sighting of the child where practicable.					
(b)	Investigations relate to notifications received during the financial year. If the investigation was completed by 31 August it is classified as finalised. If the investigation was not completed by 31 August it is classified as not finalised. Notifications 'dealt with by other means' includes 'non-abuse' notifications relating to serious incompatibility or self damaging behaviour where advise and/or referrals were followed up.					
(c)	In 2002-03, the ACT changed the arrangements for recording reports of concerns about children and young people. This and stricter mandatory reporting guidelines has led to an increase in the number of notifications.

(a) Rates of children in notifications, investigations and substantiations were calculated as the number of children aged 0–16 years in each category (including those whose age was not stated) divided by the estimated population of children aged 0–16 years at 31 December, multiplied by 1000. For Indigenous children, the June projections for two years were averaged to obtain a population figure for December of the relevant year.

(b) Rates of children on care and protection orders were calculated as the number of children aged 0–17 years (including those whose age was not stated) who were on a care and protection order at 30 June, divided by the estimated population aged 0–17 at 31 March, multiplied by 1000.

(b)	If a child was the subject of more than one notification, investigation or substantiation, then each one of these were counted. The definition of an investigation includes interviewing or sighting of the child where practicable.					
(c)	Investigations relate to notifications received during the financial year. If the investigation was completed by 31 August it is classified as finalised. If the investigation was not completed by 31 August it is classified as not finalised. Notifications 'dealt with by other means' includes the provision of advice, referral to support services or referral to the police.					
(d)	The NT cannot reliably count notifications dealt with by other means and such matters are included under 'notifications not investigated/dealt with by other means'.

(a) Rates of children in notifications, investigations and substantiations were calculated as the number of children aged 0–16 years in each category (including those whose age was not stated) divided by the estimated population of children aged 0–16 years at 31 December, multiplied by 1000. For Indigenous children, the June projections for two years were averaged to obtain a population figure for December of the relevant year.					
(b) Rates of children on care and protection orders were calculated as the number of children aged 0–17 years (including those whose age was not stated) who were on a care and protection order at 30 June, divided by the estimated population aged 0–17 at 31 March, multiplied by 1000.

- (a) Prior to 2002 the percentage of Indigenous children placed in accordance with the Aboriginal Child Placement Principle was calculated using the total number of Indigenous children in out of home care as the denominator. From 2002 the denominator excluded Indigenous children living independently and those whose living arrangements were unknown.
- (b) Prior to 2001 Indigenous children in Indigenous residential care were included in the category 'other Indigenous caregiver'.
- (c) The definition of 'relative/kin' used in this table is broader than the definition used in other tables because it includes kin relationships based on customary law.
- (d) Data on the relationship of the caregiver to children placed with non-Indigenous carers could not be provided and these children were included in the category 'other non-Indigenous carer'.
- (e) For 2001-02 the number of Indigenous children placed with Indigenous relative/kin may be under-enumerated due to data entry error.

(a) Only data from agencies that participated in both the Client Collection and the Demand for Accommodation Collection are included. Consequently, the figures understate the level of activity in SAAP agencies. Some cases were excluded due to missing data from the two collections. Adjustments have been made for the missing data.

(b) For the Client Collection, the accommodation status of a client on a particular day is based on the reported periods of accommodation within a support period. Clients may start and end accommodation on the same date. If a client starts and ends accommodation on the same day, these periods are considered to be a single period. It can reasonably be assumed that a client will not start more than one period of accommodation on the same day. It can also be reasonably be assumed that an accompanying child has been accommodated when their parent/guardian has been accommodated, and that they will not start more than one period of accommodation on the same day.

(c) For the Demand for Accommodation Collection, data includes only people with valid unmet requests for immediate accommodation. 'Valid unmet requests' excludes those made at an agency of an inappropriate target group, where the person or group is determined to be inappropriate for the agency, where there is no fee-free accommodation available, or where proffered assistance is refused.

(d) Figures are unweighted. 363 records in the Client Collection are excluded due to errors and omissions.

(e) A two-week Demand for Accommodation Collection is conducted annually to gather information about homeless people who are not accepted as clients of SAAP agencies. The collection for 2002-03 data was held between 9-15 December 2002 and 7-13 May 2003.

- (a) Client figures have been weighted to adjust for agency non-participation and client non-consent; figures on number of requests have been rounded by 10 and based on valid requests only.
- (b) Unmet requests exclude those where the person refused an offer of assistance; those where a similar request was made at a SAAP funded agency within the collection period (to limit double counting); and those where the reason their request was not met was either that the referral was inappropriate (wrong target group) or that the service requested was not provided by the agency.
- (c) Data on unmet requests should be interpreted with caution for several reasons. First, a person can make request on more than one occasion and to more than one SAAP agency. While double counting has been limited through the exclusion of those requests where the person had made a similar request to a SAAP agency within the collection period, this information may not have been available to record. Therefore, the total numbers do not represent actual people. Second, a number of people may receive the ongoing support or accommodation from a SAAP agency at a later time, quite possibly soon after their initial request. As a result, this estimate may overstate the actual level of unmet demand. Third, a number of potential clients have their needs met by other means and do not return to a SAAP agency. Finally, there are shortfalls in pro-rating from a two week collection period to the full year. It was not possible to identify a two week period which is 'typical' for all SAAP agencies.
- (d) Data from 2000-01 onwards are not comparable to earlier years. Figures for SAAP clients exclude accompanying children, while figures for people with unmet requests include accompanying children. The client collection data is not comparable with the unmet demand data.
- (e) In previous Reports, this measure compared the proportion of people from these two groups who could not be accommodated with their representation among all SAAP clients (including accommodated and not accommodated). Data for 2004-05 provide a direct comparison focusing on accommodation, therefore are not comparable to those in the previous years.
- (f) 2004-05 client data exclude 1 583 records due to errors and omissions.

(a) Totals may not add up to 100 per cent as a result of rounding.

(b) A two-week Demand for Accommodation Collection is conducted annually to gather information about homeless people who are not accepted as clients of SAAP agencies. In 2003-04, the collection was held between 26 November-02 December 2003 and 5-11 May 2004. In 2004-05, the collection was held between 1-7 December 2004 and 11-17 May 2005.

(c) In this table, unmet requests exclude those where the persons refused an offer of assistance; those where a similar request was made at a SAAP funded agency at the same day within the collection period (to limit double counting); and those where the reason their request was not met was either inappropriate referral (wrong target group) or where the service requested was not provided by the agency.

**Table 15A.178 Potential clients unable to be supported, main reason for support not provided, Australia (a), (b), (c), (d)**

Main reason support not provided	Unit	Proportion of potential clients			
		Nov–Dec 2000 & May 2001	Aug 2001 & May 2002	Dec 2002 & May 2003	Dec 2003 & May 2004

(d) Caution should be applied when interpreting numbers of unmet requests, for several reasons. Firstly, person(s) can make requests on more than one occasion and to more than one SAAP agency. While double counting has been limited through the exclusion of those requests where the person(s) had made a similar request to a SAAP agency at the same day within the collection period, this information may not have been available to record. Thus, the total number does not represent actual number of forms with valid request. Secondly, a number of the people may receive the ongoing support or accommodation from a SAAP agency at a later time, quite possibly soon after their initial request. As a result, this estimate may overstate the actual level of unmet demand. Thirdly, a number of people have their needs met by other means and do not return to a SAAP agency. And finally, there are shortfalls in pro-rating from a two-week collection period to the full year. Many factors influence the capacity of individual SAAP agencies to meet day-to-day demand for their services — it is not possible to identify a two-week period, which is 'typical' for all SAAP agencies.

- (a) The accommodation load of agencies was calculated by dividing the number of accommodation days by the number of days the agency was operational during the reporting period, where the number of accommodation days equals the sum of accommodation days for all clients of an agency who were supported during the reporting period. The average accommodation load was the mean value of all agencies accommodation loads. Support periods without valid accommodation dates were assigned the inter-quartile modal duration of accommodation for agencies of the same service delivery model in the same jurisdiction.
- (b) The caseload of agencies was calculated by dividing the number of support days by the number of days the agency was operational during the reporting period, where the number of support days equals the sum of support days for all clients of the agency who were supported during the reporting period. The average caseload was the mean value of all agencies caseloads. Support periods without valid support dates were assigned the inter-quartile modal duration of support for agencies of the same service delivery model in the same jurisdiction.
- (c) Figures were unweighted and have not been adjusted for agency non-participation and client non-consent.

(b) Data prior to 2004-05 exclude high volume agencies (those accommodating 50 or more clients per night, telephone referral agencies, day centres, and information and referral centres) because these data items were often not collected by these agencies.

(c) 'Other' independent housing may include living rent free in a house or flat.

(d) 'Other' non-independent housing may include SAAP funded accommodation at hostels, hotels or community placements; non-SAAP emergency accommodation; a car, a tent or squat, or an institutional setting. Refer to the SAAP NDCA annual reports for further explanation of the counting rules.

(e) Figures have been weighted to adjust for agency non-participation and client non-consent.

(f) Data exclude 41 515 clients (weighted) due to errors and omissions.

(g) Data exclude 44 932 clients (weighted) due to errors and omissions.

- (a) Totals may not add up to 100 per cent as a result of rounding.
- (b) Data are for support periods for people who were unemployed when entering SAAP services.
- (c) Data prior to 2004-05 exclude high volume agencies (those accommodating 50 or more clients per night, telephone referral agencies, day centres, and information and referral centres) because these data items were often not collected by these agencies.
- (d) Figures have been weighted to adjust for agency non-participation and client non-consent.
- (e) Data exclude 36 921 clients (weighted) due to errors and omissions.
- (f) Data exclude 28 977 clients (weighted) due to errors and omissions.

- (a) Totals may not add up to 100 per cent as a result of rounding. A client may have support periods in more than one state or territory, state and territory figures do not sum to the national figure.
- (b) Client figures have been weighted to adjust for agency non-participation and client non-consent.
- (c) Only support periods with consent have been included in the data.
- (d) Caution should be taken when comparing 2001-02 data with other years as 2001-02 figures are based on estimated support periods for each client rather than observed support periods for each client as reported on in previous years.

- (a) Figures have been weighted to adjust for agency non-participation and client non-consent.
- (b) The definition of 'exiting to independent housing' includes 'not returning to SAAP within six months'.
- (c) Data exclude high volume records as not all items are included on high volume forms.
- (d) Caution should be applied when interpreting these figures. Consent and valid alpha codes are required for each support period for the clients; after support information is not commonly completed; and particular client groups (for example, women escaping domestic violence) may be under represented in this calculation because of a higher incidence of non-consent.
- (e) A client may receive two or more periods of support in the year. To minimise double counting of individual clients, only one record per client which has exit information has been included in the analysis.

**Table 15A.190 Indicative estimates of clients exiting to independent housing and not returning within six months (a), (b), (c), (d), (e), (f), (g)**

	<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
(f)	SAAP agencies that had no completed support periods leaving to independent housing were included in the analysis.									
(g)	For 2004-05 data, State client numbers refer to the State in which they were first supported, as some clients were supported in more than one State. Ongoing clients at 1 July 2004 are included in the client data.									
(h)	For 2004-05 data, the reference period is 18 months because the six months to 30 June 2005 is not relevant to clients whose first support period ends on or after 1 July 2005. Therefore, in order to analyse a full year's data, calendar year 2004 becomes the reference period in which the client's initial support period ends and 2004-05 becomes the reference period for clients returning to SAAP services.									
(i)	In 2004-05, clients whose support period ends on or after 1 January 2004 and before 1 January 2005 were included in the analysis; 29 520 records were excluded due to errors and omissions.
