

13A Aged care services — attachment

Definitions for the indicators and descriptors in this attachment are in section 13.6 of the chapter. Data in this Report are examined by the Aged Care Services Working Group, but have not been formally audited by the Secretariat. Unsourced information was obtained from the Australian, State and Territory governments.

This file is available in Adobe PDF format on the Review web page (www.pc.gov.au/gsp). Users without Internet access can contact the Secretariat to obtain these tables (see details on the inside front cover of the Report).

Attachment contents

Table 13A.1	Males and females aged 70 years or over, June 2009
Table 13A.2	Target population data, by location ('000)
Table 13A.3	Proportion of people aged 70 years and over by locality, June 2009
Table 13A.4	Ownership of operational aged care residential places, June 2009
Table 13A.5	Average annual Australian Government basic subsidy amount, including Conditional adjustment payment, per occupied place and the dependency level of aged care residents, June 2009
Table 13A.6	Size and distribution of all residential aged care services, June 2009
Table 13A.7	Size and distribution of residential aged care services with over 80 per cent high care residents, June 2009
Table 13A.8	Size and distribution of residential aged care services with over 80 per cent low care residents, June 2009
Table 13A.9	Size and distribution of mixed residential aged care services, June 2009
Table 13A.10	Proportion of residential aged care places, by location in high care, low care and mixed care services
Table 13A.11	Operational number of aged care places per 1000 people aged 70 years or over, 30 June
Table 13A.12	Operational number of aged care places per 1000 people aged 70 years or over plus Indigenous people aged 50–69 years, 30 June
Table 13A.13	Aged care recipients per 1000 people aged 70 years or over plus Indigenous people aged 50–69 years, 30 June
Table 13A.14	Aged care recipients per 1000 people aged 70 years or over plus Indigenous people aged 50–69 years by locality, 30 June
Table 13A.15	Aged care recipients from a non-English speaking country, 30 June
Table 13A.16	Aged care recipients from a non-English speaking country per 1000 people from a non-English speaking country aged 70 years and over by locality, 30 June
Table 13A.17	Indigenous aged care recipients per 1000 Indigenous people aged 50 years or over and as a proportion of all recipients, 30 June
Table 13A.18	Indigenous aged care recipients per 1000 Indigenous people aged 50 years or over by locality, 30 June
Table 13A.19	Aged care recipients from special needs groups, June 2009 (per cent)
Table 13A.20	Proportion of new permanent residents classified as supported residents, 2008-09 (per cent)
Table 13A.21	HACC services received per 1000 people aged 70 years or over plus Indigenous people aged 50–69 years, 2008-09
Table 13A.22	HACC services received within major cities per 1000 people aged 70 years or over plus Indigenous people aged 50–69 years, 2008-09
Table 13A.23	HACC services received within inner regional areas per 1000 people aged 70 years or over plus Indigenous people aged 50–69 years, 2008-09
Table 13A.24	HACC services received within outer regional areas per 1000 people aged 70 years or over plus Indigenous people aged 50–69 years, 2008-09
Table 13A.25	HACC services received within remote areas per 1000 people aged 70 years or over plus Indigenous people aged 50–69 years, 2008-09

Attachment contents

Table 13A.26	HACC services received within very remote areas per 1000 people aged 70 years or over plus Indigenous people aged 50–69 years, 2008-09
Table 13A.27	HACC services received per 1000 HACC target population, 2008-09
Table 13A.28	HACC services received by clients within major cities per 1000 of the HACC target population for major cities, 2008-09
Table 13A.29	HACC services received by clients within inner regional areas per 1000 HACC target population for inner regional areas, 2008-09
Table 13A.30	HACC services received by clients within outer regional areas per 1000 HACC target population for outer regional areas, 2008-09
Table 13A.31	HACC services received by clients within remote areas per 1000 HACC target population for remote areas, 2008-09
Table 13A.32	HACC services received by clients within very remote areas per 1000 HACC target population, 2008-09
Table 13A.33	HACC client characteristics, 2008-09
Table 13A.34	Distribution of HACC clients, by age and Indigenous status, 2008-09 (per cent)
Table 13A.35	Comparative characteristics of Indigenous HACC clients, 2008-09
Table 13A.36	Australian Government Activity Measures on selected Aged Care Programs, 2008-09
Table 13A.37	Elapsed time between ACAT approval and entry into residential, EACH, EACH-D or CACP service, 2008-09
Table 13A.38	Recommended location of longer term living arrangements of Aged Care Assessment Teams (ACAT) clients, 2003–2004 to 2007–2008
Table 13A.39	Aged care assessments
Table 13A.40	Aged care assessments per 1000 people – age specific approvals
Table 13A.41	Re-accreditation decisions on residential aged care services at 30 June 2009
Table 13A.42	Aged Care Complaints Investigation Scheme
Table 13A.43	Government expenditure on aged care services (2008-09 \$ million)
Table 13A.44	Australian Government (DoHA) real expenditure on residential aged care (2008-09 \$ million)
Table 13A.45	Australian Government (Department of Veterans' Affairs) residential care real expenditure (2008-09 dollars) and clients
Table 13A.46	State and Territory government recurrent expenditure on aged care services, 2008-09 (\$ million)
Table 13A.47	Australian Government (DoHA) real expenditure on community care services (2008-09 \$ million)
Table 13A.48	DVA's Veterans' Home Care (VHC) and Community Nursing programs, 2008-09
Table 13A.49	Real expenditure on HACC services, (2008-09 \$ million)
Table 13A.50	Australian Government expenditure on services provided in mixed delivery settings, 2008-09 (\$ million)
Table 13A.51	Transition Care Program
Table 13A.52	Australian Government expenditure on Aged Care Programs per person aged 70 years or over plus Indigenous people aged 50–69, 2008-09

Attachment contents

Table 13A.53	Australian Government (DoHA only) real expenditure on residential aged care, CACPs, EACH and EACH Dementia per person aged 70 years or over plus Indigenous people aged 50–69 years (2008-09 dollars)
Table 13A.54	Australian Government (DoHA) real expenditure on residential services, per person aged 70 years or over plus Indigenous people aged 50–69 years and DVA real expenditure on residential services per person aged 70 years and over (2008-09 dollars)
Table 13A.55	Australian, State and Territory government real expenditure on HACC services per person in the HACC target population (2008-09 dollars)
Table 13A.56	Australian, State and Territory government total real expenditure on HACC services, per person aged 70 years or over plus Indigenous people aged 50–69 years (2008-09 dollars)
Table 13A.57	Australian Government real expenditure on CACPs, per person aged 70 years or over plus Indigenous people aged 50–69 years (2008-09 dollars)
Table 13A.58	Ageing in place: residents changing from low care to high care in the same facility
Table 13A.59	Aged care assessment program — activity and costs
Table 13A.60	Access to Commonwealth Carelink Centres, 2008-09
Table 13A.61	Utilisation of residential aged care places, by remoteness category, 30 June 2009
Table 13A.62	Permanent aged care residents at 30 June 2009: age-sex specific usage rates per 1000 people by jurisdiction
Table 13A.63	CACP EACH and EACH Dementia recipients at 30 June 2009: age-sex specific usage rates per 1000 people by jurisdiction
Table 13A.64	Permanent aged care residents, CACP, EACH and EACH Dementia recipients at 30 June 2009: age-sex specific usage rates per 1000 people by jurisdiction
Table 13A.65	Permanent aged care residents at 30 June 2009: age-sex specific usage rates per 1000 people by remoteness
Table 13A.66	CACP, EACH and EACH Dementia recipients at 30 June 2009: age-sex specific usage rates per 1000 people by remoteness
Table 13A.67	Permanent aged care residents, CACP, EACH and EACH Dementia recipients at 30 June 2009: age-sex specific usage rates per 1000 people by remoteness
Table 13A.68	Indigenous permanent residents classified as high or low care and Indigenous CACP, EACH and EACH Dementia at 30 June 2009: age-sex specific usage rates per 1000 people by remoteness
Table 13A.69	HACC National Service Standards appraisals — results of appraisals
Table 13A.70	Older people needing assistance with at least one everyday activity: extent to which need was met, 2003
Table 13A.71	Public hospital separations for care type "maintenance" for people aged 70 years and over plus Indigenous people aged 50-69
Table 13A.72	Numbers of clients utilising Aged care services
Table 13A.73	Capital expenditure on aged care services, 2008-09

Table 13A.2

Table 13A.2 Target population data, by location ('000) (a), (b), (c)

	NSW	Vic	Qld	WA	SA	Tas	ACT	NT	Aust
(a)	Geographical data are based on the ABS Australian Standard Geographic Classification of Remoteness Areas. Data are classified according to an index of remoteness which rates each ABS census district based on the number and size of towns, the distance to major towns and urban centres. For more information refer to the Australian Standard Geographic Classification (ABS Publication 1216.0). The proportions of population in each Statistical Local Area (SLA) were attributed to Remoteness Areas (RA) by DoHA, using ABS SLA to RA concordance.								
(b)	Data for years prior to 2008 are population projections by SLA for 2002-2022 based on 2001 Census prepared for DoHA by ABS according to assumptions agreed to by the DoHA. Data for June 2008 are preliminary population projections by SLA for 2006-2026 based on 2006 Census prepared by ABS for DoHA according to assumptions agreed to by DoHA. Data for June 2009 are population projections by SLA for 2007-2027 prepared by ABS for DoHA according to assumptions agreed to by DoHA.								
(c)	Data in this table are utilised to determine the target populations for the chapter.								
(d)	Data for people born in a non-English speaking country prior to 2008 are estimates based on ratios from ABS, CDATA 2001 Release 2 applied to ABS population projections by SLA 2002-2022 (unpublished), based on 2001 Census. Data for June 2008 are census count of persons 70 plus born overseas in countries other than main English-speaking countries increased by ratio (70 plus projected population 2009) / (70 plus census count 2006) and then distributed amongst states and remoteness areas in same proportions as corresponding data published in the 2009 Report. Data for June 2009 are based on ratios from ABS 2006 Census data applied to population projections by SLA 2007-2027 (unpublished, produced for DoHA by ABS). People born in a non-English speaking country refers to those born overseas in countries other than UK, Ireland, NZ, Canada, South Africa, and USA.								
(e)	Indigenous data prior to 2008 are Indigenous estimates are based on ratios from ABS Census 2001 data applied to population projections by SLA 2002-2022. Data for June 2009 are determined as follows: Observed average annual growth at state-level in ABS Experimental Indigenous Estimated Residential Populations (ERPs) between 2001 and 2006 for total Indigenous persons of all ages was applied to project 2006 ERPs forward to 2009. The increase from 2001 to 2006 contains unexplained population increase in addition to demographic population increase. Indigenous population estimates for June 2009 are based on ratios from ABS 2006 Experimental Indigenous ERP data applied to population projections by SLA 2007-2027 (unpublished, produced for DoHA by ABS).								
	.. Not applicable. – Nil or rounded to zero.								

Source: DoHA (unpublished); Population projections by SLA for 2007-2027 prepared for DoHA by ABS according to assumptions agreed to by DoHA (unpublished); Projections based on ABS experimental Indigenous ERPs by remoteness areas as at June 2006 (ABS Cat. no. 3238.0.55.001) (DoHA unpublished); *ABS experimental estimates and projections, Aboriginal and Torres Strait Islander Australians*, 1991 to 2009 (ABS Cat. no. 3238.0); *Experimental estimates of Aboriginal and Torres Strait Islander Australians*, Jun 2006 (ABS Cat. no. 3238.0.55.001); Census 2006 data; ABS unpublished data sourced by DoHA.

(a) Excludes multi-purpose services and flexibly funded services.

(b) Includes basic subsidy plus Conditional Adjustment Payment (CAP); the pensioner supplement and other supplements will add around \$3000 a year for residents.

(c) Subsidy plus CAP for 2008-09, divided by the number of bed days, multiplied by 365. Differences in average annual subsidies reflect differences in the dependency of residents. Equivalent data prior to 2008 does not include the CAP.

(d) Totals may not add as a result of rounding.

– Nil or rounded to zero.

Table 13A.11

Table 13A.11 Operational number of aged care places per 1000 people aged 70 years or over, 30 June (a), (b), (c), (d), (e), (f)

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
Total places (h)									
2005	101.2	101.8	100.8	101.7	108.7	106.4	93.7	232.0	102.4
2006	103.8	106.1	104.5	104.7	112.2	108.5	95.8	238.9	105.7
2007	106.1	108.1	106.6	105.1	114.2	108.6	98.8	243.0	107.6
2008	111.0	112.0	108.5	107.7	119.1	110.7	106.9	225.0	111.5
2009	111.0	111.6	107.3	108.4	117.3	111.5	102.1	222.9	111.0

- (a) Places do not include those that have been approved but are not yet operational.
- (b) This table differs from table 13A.13, which refers to residents.
- (c) Includes all flexible residential places under the National Aboriginal and Torres Strait Islander Flexible Aged Care Program, multi-purpose services and innovative pool programs.
- (d) Government planning targets are based on providing 113 places per 1000 people aged 70 years and over by June 2011. However, in recognition of poorer health among Indigenous communities, planning in some cases also takes account of the Indigenous population aged 50–69 years. This means that the provision ratio based on the population aged 70 years and over will appear high in areas with a high Indigenous population (such as the NT). Transition Care Program (TCP) places are not included in the target of 113.
- (e) In this Report, 2009 provision ratios for aged care places were calculated using population projections (at the Statistical Local Area level) prepared by ABS (see table 13A.2). The projections were based on the 2006 Census and prepared for DoHA by ABS according to assumptions agreed to by DoHA. Ratios prior to 2008 were calculated using projections based on the 2001 Census.
- (f) Population data for 2008 and 2009 are calculated on a different basis to years prior to 2008. See table 13A.2 for notes and sources of population data.
- (g) In this table, CACPs include community care places under the National Aboriginal and Torres Strait Islander Flexible Aged Care Program, multi-purpose services and innovative care.
- (h) Totals may not add due to rounding.
– Nil or rounded to zero.

(a) Data include high care residential, low care residential, EACH packages, EACH-D packages and CACPs. Data for EACH-D packages prior to 2009 are included in EACH packages.

(b) Unknown responses have been attributed *pro rata*.

(c) Reports only people who are recorded as Indigenous.

(d) Includes National Aboriginal and Torres Strait Islander Flexible Aged Care Program places attributed as residents. Excludes multi-purpose services.

(e) See table 13A.2 for notes and sources of population data for Indigenous population estimates.

(f) Totals may not add due to rounding.

(g) The ACT has a very small Indigenous population aged over 50 years and a small number of CACP packages will result in a very high provision ratio.

– Nil or rounded to zero.

Table 13A.20 Proportion of new permanent residents classified as supported residents, 2008-09 (per cent) (a), (b)

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
High care residents	41.2	39.9	45.4	46.5	45.8	45.5	45.7	64.6	39.9
Low care residents	32.1	30.5	37.7	36.6	40.6	37.3	26.1	54.5	26.1
All residents	37.3	35.2	42.1	41.5	43.8	42.5	35.6	60.5	35.2

(a) Supported residents are those who have entered permanent residential care on or after 20 March 2008 (or who re-enter care on or after 20 March 2008 after a break in care of more than 28 days) and have assets of up to a set value (\$90,910.40 as at 30 June 2009).

(b) These data refer to permanent residents only, at their first admission.

(a) Reports provisional data that have not been validated and may be subject to revision.

Table 13A.21 HACC services received per 1000 people aged 70 years or over plus Indigenous people aged 50–69 years, 2008-09 (a), (b), (c), (d), (e), (f)

	<i>NSW</i>	<i>Vic (g)</i>	<i>Qld</i>	<i>WA</i>	<i>SA (h)</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
(b)	Data in this table represent HACC services received by people aged 70 years or over, plus Indigenous people aged 50-69 years, divided by people aged 70 years or over, plus Indigenous people aged 50-69 years. In previous years data represented total HACC services received, divided by people aged 70 years or over, plus Indigenous people aged 50-69 years. Consequently, services reported in 2008-09 are not comparable to previous years.								
(c)	The proportion of HACC funded agencies that submitted HACC MDS data 2008-09 differed across jurisdictions and ranged from 89 per cent and 100 per cent. Actual service levels will be higher than those reported here.								
(d)	Population projections by SLA for 2007-2027 prepared for DoHA by ABS according to assumptions agreed to by DoHA. Indigenous population estimates for June 2009 are based on ratios from ABS 2006 experimental Indigenous ERP data applied to population projections by SLA 2007–2027.								
(e)	The proportion of HACC clients with 'Nil' and 'Not stated' Indigenous status differed across jurisdictions and ranged from 6.3 per cent to 14.8 per cent. Nationally, the proportion of HACC clients with 'Nil' and 'Not stated' Indigenous status was 9.7 per cent.								
(f)	The proportion of HACC clients with 'Nil' and 'Not stated' date of birth differed across jurisdictions and ranged from zero to 1.4 per cent. Nationally, the proportion of HACC clients with 'Nil' and 'Not stated' date of birth was 0.5 per cent.								
(g)	Validation processes for the Victorian Data Repository and the HACC MDS differ and actual service levels may be up to 5 per cent higher or lower than stated. In the case of respite care, the Victorian Data Repository recorded service levels 50 per cent higher than stated.								
(h)	Validation processes for South Australian data differ from HACC MDS and actual service levels may be up to 5 per cent higher or lower than stated.								
(i)	Allied Health Care includes at home and at centre. Allied Health hours in the ACT are under reported in 2008-09.								
(j)	Nursing Care includes at home and at centre. Nursing hours in the ACT are under reported in 2008-09.								
	– Nil or rounded to zero.

(a) Reports provisional data that have not been validated and may be subject to revision.

Table 13A.25 HACC services received within remote areas per 1000 people aged 70 years or over plus Indigenous people aged 50–69 years, 2008-09 (a), (b), (c), (d), (e), (f)

	<i>NSW</i>	<i>Vic (g)</i>	<i>Qld</i>	<i>WA</i>	<i>SA (h)</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
(b)	Data in this table represent HACC services received by people aged 70 years or over, plus Indigenous people aged 50-69 years, divided by people aged 70 years or over, plus Indigenous people aged 50-69 years. In previous years data represented total HACC services received, divided by people aged 70 years or over, plus Indigenous people aged 50-69 years. Consequently, services reported in 2008-09 are not comparable to previous years.								
(c)	The proportion of HACC funded agencies that submitted HACC MDS data 2008-09 differed across jurisdictions and ranged from 89 per cent and 100 per cent. Actual service levels will be higher than those reported here.								
(d)	Population projections by SLA for 2007-2027 prepared for DoHA by ABS according to assumptions agreed to by DoHA. Indigenous population estimates for June 2009 are based on ratios from ABS 2006 experimental Indigenous ERP data applied to population projections by SLA 2007–2027.								
(e)	The proportion of HACC clients with 'Nil' and 'Not stated' Indigenous status differed across jurisdictions and ranged from 6.3 per cent to 14.8 per cent. Nationally, the proportion of HACC clients with 'Nil' and 'Not stated' Indigenous status was 9.7 per cent.								
(f)	The proportion of HACC clients with 'Nil' and 'Not stated' date of birth differed across jurisdictions and ranged from zero to 1.4 per cent. Nationally, the proportion of HACC clients with 'Nil' and 'Not stated' date of birth was 0.5 per cent.								
(g)	Validation processes for the Victorian Data Repository and the HACC MDS differ and actual service levels may be up to 5 per cent higher or lower than stated. In the case of respite care, the Victorian Data Repository recorded service levels 50 per cent higher than stated.								
(h)	Validation processes for South Australian data differ from HACC MDS and actual service levels may be up to 5 per cent higher or lower than stated.								
(i)	Allied Health Care includes at home and at centre.								
(j)	Nursing Care includes at home and at centre.								
	.. Not applicable. – Nil or rounded to zero.

Table 13A.30 HACC services received by clients within outer regional areas per 1000 HACC target population for outer regional areas, 2008-09 (a), (b), (c)

	<i>NSW</i>	<i>Vic (d)</i>	<i>Qld</i>	<i>WA</i>	<i>SA (e)</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
(a)	Reports provisional data that have not been validated and may be subject to revision.								
(b)	The proportion of HACC funded agencies that submitted HACC MDS data 2008-09 differed across jurisdictions and ranged from 89 per cent and 100 per cent. Actual service levels will be higher than those reported here.								
(c)	The HACC target population is people in the Australian community who, without basic maintenance and support services provided under the scope of the HACC Program, would be at risk of premature or inappropriate long term residential care, including older and frail people with moderate, severe or profound disabilities. The HACC target population is estimated by applying the proportion of people in households with moderate, severe or profound disability as reported in the ABS 2003 Survey of Disability, Ageing and Carers to the ABS Preliminary population projections 2007-2027 (unpublished).								
(d)	Validation processes for the Victorian Data Repository and the HACC MDS differ and actual service levels may be up to 5 per cent higher or lower than stated. In the case of respite care, the Victorian Data Repository recorded service levels 50 per cent higher than stated.								
(e)	Validation processes for South Australian data differ from HACC MDS and actual service levels may be up to 5 per cent higher or lower than stated.								
(f)	Allied Health Care includes at home and at centre. Allied Health hours in the ACT are under reported in 2008-09.								
(g)	Nursing Care includes at home and at centre. Nursing hours in the ACT are under reported in 2008-09. .. Not applicable. – Nil or rounded to zero.

- (c) The proportion of HACC clients with 'Nil' and 'Not stated' date of birth differed across jurisdictions and ranged from zero to 1.4 per cent. Nationally, the proportion of HACC clients with 'Nil' and 'Not stated' date of birth was 0.5 per cent.
- (d) ABS Preliminary population projections by SLA 2007-2027 based on 2006 Census prepared for DoHA by ABS according to assumptions agreed to by DoHA; Indigenous estimates based on ratios from unpublished ABS data from the 2006 Census applied to ABS preliminary population projections by SLA 2007-2027 based on 2006 Census prepared for DoHA by ABS according to assumptions agreed to by DoHA.
- (e) The proportion of HACC clients with 'Nil' and 'Not stated' sex differed across jurisdictions and ranged from 0.1 per cent to 1.9 per cent. Nationally, the proportion of HACC clients with 'Nil' and 'Not stated' sex was 1.0 per cent.
- (f) The proportion of HACC clients with 'Nil' and 'Not stated' main language spoken at home differed across jurisdictions and ranged from 5.5 per cent to 12.0 per cent. Nationally, the proportion of HACC clients with 'Nil' and 'Not stated' main language spoken at home was 7.1 per cent.
- (g) The proportion of HACC clients with 'Nil' and 'Not stated' pension benefit status differed across jurisdictions and ranged from 7.5 per cent to 31.6 per cent. Nationally, the proportion of HACC clients with 'Nil' and 'Not stated' pension benefit status was 17.5 per cent.
- (h) The proportion of HACC clients with 'Nil' and 'Not stated' living arrangements differed across jurisdictions and ranged from 6.2 per cent to 26.0 per cent. Nationally, the proportion of HACC clients with 'Nil' and 'Not stated' living arrangements was 15.2 per cent.
- (i) The proportion of HACC clients with 'Nil' and 'Not stated' carer availability differed across jurisdictions and ranged from 6.2 per cent to 18.0 per cent. Nationally, the proportion of HACC clients with 'Nil' and 'Not stated' carer availability was 13.2 per cent.

– Nil or rounded to zero.

(a) Data in this table includes complete assessments only for years after 2006-07. For previous years the following information applies: In May 2003 a new Minimum Data Set (MDSv2) was introduced for the Aged Care Assessment Program. With the exception of Queensland and about half of NSW, it had been adopted by states and territories when data shown in this table was collected. The data in this table has been selected to match MDSv1 and MDSv2 coding and to be comparable as closely as possible with previous reports containing MDSv1 data. The data in this table refers to ACAT recommendations of longer term care arrangement, not appeals against decisions by delegates for Australian Government subsidised aged care services. More than one recommendation is possible for each completed assessment.

(b) Includes independent living in retirement villages, supported community accommodation and boarding houses.

(c) Includes hospital, other institutional care and other.

(d) Assessment not completed because the person was medically or functionally unstable.

na Not available. – Nil or rounded to zero.

- (a) Data in this table includes complete assessments only for years after 2006-07. For previous years the following information applies: In May 2003 a new Minimum Data Set (MDSv2) was introduced for the Aged Care Assessment Program. With the exception of Queensland and about half of NSW, it had been adopted by states and territories when data shown in this table was collected. The data in this table has been selected to match MDSv1 and MDSv2 coding and to be comparable as closely as possible with previous reports containing MDSv1 data. Includes only assessments (completed and not completed) for the stated client group. (Some assessments are not completed because, for example, the client's circumstances may change or the client may withdraw mid-way through the assessment process. Separate counting of completed and not completed assessments has been introduced over time with the adoption of the MDSv2).
- (b) The number of Indigenous assessments is based on self-identification of Indigenous status. Therefore these figures may not accurately represent the assessment of Indigenous persons.
- (c) The total number of assessments for Queensland in 2005-06 is underestimated by approximately 2000 due to technical failure.

Table 13A.43

Table 13A.43 Government expenditure on aged care services (2008-09 \$ million)

	NSW	Vic	Qld	WA	SA	Tas	ACT	NT	Other(a)	Aust
--	-----	-----	-----	----	----	-----	-----	----	----------	------

- (a) Australian Government expenditure that cannot be attributed to individual states or territories.
- (b) The objective of Aged Care Assessment is to provide comprehensive multidisciplinary assessment of needs of frail older people, including delegated authority to approve people for Australian Government subsidised care through residential aged care, Community Aged Care Packages and flexible care. Funded through Australian Government grants to State and Territory governments that operate Aged Care Assessment Teams (ACATs) and evaluation units.
- (c) Totals may not add due to rounding.
- (d) These figures are sourced from the Department of Health and Ageing (DoHA). The figures are subject to lag and may therefore be subject to revision.
- (e) Number of DVA Gold and White card holders residents as at June 2009. In previous years DVA client status was defined by DoHA using pension status. DoHA has now revised this definition so that only DVA Gold/White card holders are included. Consequently, client figures for 30 June 2005 through to 30 June 2008 have been revised.
- (f) EBA expenditure includes all additional funding including depreciation provided for operations of State owned and operated Residential Aged Care Facilities in Queensland. Rural Small Nursing Home Supplement expenditure is included with EBA supplement.
- (g) NT Rural small nursing home supplement expenditure incurred due to non-funding of two services.
- (h) The objective of Community Aged Care Packages are to assist people with complex care needs who otherwise are eligible for low level residential care to remain in the community. Australian Government only funded.
- (i) The objective of Extended Aged Care at Home is to provide high level care at home as an alternative to high level residential care. Australian Government only funded.
- (j) Reports provisional HACC data that have not been validated and may be subject to revision.
- (k) Data relate to expenditure administered under the National Aboriginal and Torres Strait Islander Flexible Aged Care Program which is aimed at providing quality, flexible, culturally appropriate aged care to older Aboriginal and Torres Strait Islander people close to their home and community.
- na Not available. ... Not applicable. – Nil or rounded to zero.

30 June 2009	no.	131.0	136.1	129.1	126.3	149.9	124.4	101.0	na	132.1

(a) Constant price expenditure for all years expressed in 2008-09 prices, using Gross Domestic Product price deflator. Details provided in the Statistical appendix (table AA.26).

(b) See table 13A.2 for notes and sources of population data.

(c) These figures are sourced from DoHA. The figures are subject to lag and may therefore be subject to revision.

(d) The total of the state and territory expenditure figures may not exactly match the Australian total figure due to rounding.

(e) Number of DVA Gold and White card holders residents as at June 2009. In previous years DVA client status was defined by DoHA using pension status. DoHA has now revised this definition so that only DVA Gold/White card holders are included. Consequently, client figures for 30 June 2005 through to 30 June 2008 have been revised.

(f) The NT client number figures have been included with SA given the very small number of clients.

(g) The category 'Veterans 70 years and over' includes those whose age is unknown.
na Not available.

Non-HACC expenditure on Post Acute Packages of Care	19.3	na	na	2.7	na	na	0.2	–	22.2

EBA = enterprise bargaining agreement.

- (a) State and territory capital expenditure on residential aged care services is included in table 13A.73.
- (b) In NSW, not all recipients of Post Acute Packages of Care are aged 70 years and over.
- (c) In 2008-09 Victoria committed \$59.2 million to the HACC program in addition to the matching requirement of the Commonwealth/State HACC Agreement (known as State Unmatched HACC). Further, local government claims a \$100 million own-source contribution to the delivery of HACC services. Funding for further aged support programs was \$101.4 million (Victorian Government, State Budget Paper No. 3, 2008-09).
- (d) NT Rural small nursing home supplement expenditure incurred due to non-funding of two services.
- (e) EBA expenditure includes all additional funding including depreciation provided for operations of State owned and operated Residential Aged Care Facilities in Queensland. Rural Small Nursing Home Supplement expenditure is included with EBA supplement.
- (f) Experimental data, not included in calculations of recurrent expenditure in the Report.

Average expense per client (p)	\$	532.0	555.3	470.6	634.5	424.0	482.0	645.0	549.3	516.1

(a) Due to the very small number of clients, some NT client number data have been included with SA.

(b) "Veterans approved for VHC Services" and the "Average number of hours approved per year for non-transitional veterans" relate to services that were approved to occur but not necessarily provided in 2008-09.

(c) The actual number of recipients and average hours provided will be lower than those approved.

(d) Individual service totals may not add to the all services total because veterans can be approved for more than one service. State and territory totals may slightly exceed total Australia figure as some veterans move between jurisdictions during the year and are counted in each jurisdiction of residence.

(e) Excludes a small number of veterans who transferred to the VHC program from the Home and Community Care (HACC) program, often with grandfathered service and/or fee levels, who may have been approved for higher hours of service than other VHC clients.

(f) These figures are approximations only; the data has been derived from percentage age distributions sourced from a separate data set.

(g) VHC Expense figures are as at 30 June 2009. Approval activity data is at 19 August 2009. The expense figures may differ slightly from the figures published in the DVA annual report due to lags in service provision claims.

(h) The Service Provision expense figures do not include fees for respite care services, as these are paid under separate appropriations. The 2008-09 appropriation for in-home and emergency respite was \$22.3 million. Residential respite is funded under the aged care appropriation and separate figures are not available.

Table 13A.48

Table 13A.48 Australian Government (DVA) Veterans' Home Care (VHC) and Community Nursing programs, 2008-09

	Unit	NSW	Vic	Qld	WA	SA	Tas	ACT	NT	Aust
(i)	DVA formerly had Deed of Agreement arrangements with each State and Territory to ensure that veterans are able to continue to access the full range of Home and Community Care services. These payments were reclassified as Specific Purpose Payments in 2008-09. While the total amount paid to the States and Territories is consistent with previous years, the two sets of figures in this table reflect the fact that the changes occurred part way through 2008-09.									
(j)	Average expense per client figures are for core VHC services only, that is they exclude Respite Services (in-home, emergency and residential) as these are paid under separate appropriations.									
(k)	Individual service totals may not add to the all services total because veterans can receive more than one nursing service or can move between service types.									
(l)	DVA Community Nursing services are provided under a casemix model using a 28-day claiming cycle, with clients classified into care categories based on care interventions. As a substantial proportion of clients receive services for well under 12 months, the average hours per 28-day claim period more accurately reflects average service levels received by clients.									
(m)	Estimated, as some data on hours provided are not available.									
(n)	Total program expense figures are as at 15 September 2009. Figures are subject to significant lag and may therefore be subject to revision. These figures may also differ slightly from the figures published in the DVA annual report for this reason.									
(o)	Total program expenses reported does not include an additional \$0.9 million which was spent on wound consumables.									
(p)	Average expenses do not include wound consumables.

(a) The Long Stay Older Patient Initiative is a four year program established by COAG. More details on the program are at box 13.5 of the Aged care services chapter.

(b) The objective of Day Therapy Centres is to assist older people to maintain or recover functional independence, through the provision of therapy services to allow them to remain in the community or in low level residential care. Funding is Commonwealth only.

(c) The objective of the National Continence Management Strategy is to improve continence awareness, management and treatment so that more Australians can live and participate in their community with confidence and dignity.

(d) Data relate to expenditure administered under the National Aboriginal and Torres Strait Islander Flexible Aged Care Program which is aimed at providing quality, flexible, culturally appropriate aged care to older Aboriginal and Torres Strait Islander people close to their home and community.

- (a) The HACC Target population is people in the Australian community who, without basic maintenance and support services provided under the scope of the HACC Program, would be at risk of premature or inappropriate long term residential care, including (i) older and frail people with moderate, severe or profound disabilities; (ii) younger people with moderate, severe or profound disabilities; and their unpaid carers. The HACC Target Population is estimated by applying the proportion of people in households with a moderate, severe, or profound disability as reported in the ABS 2003 Survey of Disability, Ageing and Carers to the ABS Population Projections
- (b) This table only represents expenditure under HACC agreements.
- (c) Reports provisional data that have not been validated and may be subject to revision.
- (d) There are significant differences in the per capita level of HACC Program funding for the target population in each state and territory. An equalisation strategy is in place to ensure that per capita funding for the Program is the same across all jurisdictions by 2010-11.
- (e) Constant price expenditure for all years expressed in 2008-09 prices, using Gross Domestic Product price deflator. Details provided in the Statistical appendix (table AA.26).

Source: DoHA (unpublished); table AA.26.

Table 13A.56 Australian, State and Territory government total real expenditure on HACC services, per person aged 70 years or over plus Indigenous people aged 50–69 years (2008-09 dollars) (a), (b), (c), (d), (e)

(a) Geographical data are based on the ABS Australian Standard Geographic Classification of Remoteness Areas. Data are classified according to an index of remoteness which rates each ABS census district based on the number and size of towns, the distance to major towns and urban centres. For more information refer to the Australian Standard Geographic Classification (ABS Publication 1216.0). See notes to table 13A.2.

(b) Numbers fewer than three are not published and the relevant totals do not include these figures. Proportions which may identify numbers fewer than three are not published. The proportions published for Australia and all areas, take into account all residents, including those numbers not published.

.. Not applicable. – Nil or rounded to zero. np Not published.

Table 13A.59

Table 13A.59 Aged care assessment program — activity and costs

	Unit	NSW	Vic	Qld	WA	SA	Tas	ACT	NT (a)	Aust
Aged care assessment, activity (2007-08)										
Aged care assessment expenditure (b)	\$m	22.5	15.7	11.1	6.5	6.0	1.7	0.7	0.9	65.0
Aged care assessments										
All people	no.	70 876	53 027	31 716	19 175	16 216	5 625	2 069	1 081	199 785
Aged care assessment teams (c)	no.	45	18	15	15	16	3	1	3	116
Aged care assessment, unit costs (2007-08 dollars)										
Cost per assessment (all people) (b), (d), (e)										
2003-04	\$	282	265	310	304	356	323	258	1 263	294
2004-05	\$	303	273	350	341	394	333	188	1 095	315
2005-06	\$	315	288	364	329	346	323	204	1 025	321
2006-07	\$	334	309	362	361	380	320	274	836	340
2007-08	\$	317	296	350	339	370	302	338	833	325

(a) The high cost for each assessment in the NT may be influenced by the remoteness of people requiring assessments, clients having English as a second or third language and a lack of supporting health and community services infrastructure to assist with assessments.

(b) Aged care assessment expenditure is Australian Government spending only.

(c) Includes one non-government funded ACAT team in NSW.

(d) Cost per assessment will include clients aged less than 70 years.

(e) For 2006-07, includes completed assessments only. Earlier years may include complete and incomplete assessments. See footnote (a) of table 13A.39 for more detailed explanation.

Source: DoHA (unpublished).

Table 13A.60

Table 13A.60 Access to Commonwealth Carelink Centres, 2008-09 (a)

Unit	NSW	Vic	Qld	WA	SA	Tas	ACT	NT	Aust
Indigenous contacts (b)	501	52	1 094	86	139	19	7	246	2 144
Indigenous target population (c)	20 336	4 652	17 201	8 926	3 441	2 464	413	7 836	65 268
Indigenous contacts per 1000 Indigenous people in the target population	24.6	11.2	63.6	9.6	40.4	7.7	16.9	31.4	32.8
All contacts (d)	62 338	24 101	66 652	25 754	16 132	7 088	3 694	714	206 473

(a) Geographical data are based on the ABS Australian Standard Geographic Classification of Remoteness Areas. Data are classified according to an index of remoteness which rates each ABS census district based on the number and size of towns, the distance to major towns and urban centres. For more information refer to the Australian Standard Geographic Classification (ABS Publication 1216.0). See notes to table 13A.2.

(b) Data for very remote areas in Tasmania and NT are based on small numbers and should be interpreted with care.

(c) Numbers fewer than three are not published and the relevant totals do not include these figures. The proportions published take into account all residents, including those numbers not published.

- (a) Geographical data are based on the ABS Australian Standard Geographic Classification of Remoteness Areas. Data are classified according to an index of remoteness which rates each ABS census district based on the number and size of towns, the distance to major towns and urban centres. For more information refer to the Australian Standard Geographic Classification (ABS Publication 1216.0). See notes to table 13A.2.
- (b) See table 13A.2 for notes and sources of population data.
- (c) Low usage rates in remote and very remote regions may reflect that clients have moved to other regions to access services.
- (d) These figures exclude places funded by multi-purpose services and those provided by funding under the National Aboriginal and Torres Strait Islander Flexible Aged Care Program.

(a) Geographical data are based on the ABS Australian Standard Geographic Classification of Remoteness Areas. Data are classified according to an index of remoteness which rates each ABS census district based on the number and size of towns, the distance to major towns and urban centres. For more information refer to the Australian Standard Geographic Classification (ABS Publication 1216.0). See notes to table 13A.2.

(b) See table 13A.2 for notes and sources of population data.

(c) CACP figures exclude packages funded by multi-purpose services and those provided by flexible funding under the Aboriginal and Torres Strait Islander Flexible Aged Care Program.

(d) EACH packages include EACH dementia packages in previous Reports.

– Nil or rounded to zero.

(a) Not all HACC agencies were required to undergo external assessment, and some are exempt, so the number of HACC agencies may be higher than those listed.

(b) The results of the appraisals will, in addition, reflect different methodologies applied across each state and territory.

(c) In Queensland some agencies were reviewed twice in the four year period. This table includes outcomes of all appraisals during the cycle.

(d) One agency in Tasmania declined the appraisal process in 2006-07 and was therefore scored as zero.

Table 13A.69 HACC National Service Standards appraisals — results of appraisals (a), (b)

	<i>Unit</i>	<i>NSW</i>	<i>Vic Qld (c)</i>	<i>WA</i>	<i>SA Tas (d)</i>	<i>ACT (e)</i>	<i>NT</i>	<i>Aust</i>
(e)	Quality Assessments in the ACT occurred in 2008-09 however data have been included in the four year cycle ending 2007-08 for comparability.							
(f)	The average score for 2004-05 to 2007-08 is obtained by using a weighted average of the number of assessments in a year multiplied by the average score for that year. These multiplied scores are then added together for all three years and divided the total number of assessments over three years to obtain the average score.							

.. Not applicable – Nil or rounded to zero.

Table 13A.71

Table 13A.71 Public hospital separations for care type "maintenance" for people aged 70 years and over plus Indigenous people aged 50-69 (a), (b), (c), (d), (e), (f)

	Unit	NSW	Vic	Q/d	WA	SA	Tas	ACT	NT	Aust
--	------	-----	-----	-----	----	----	-----	-----	----	------

(a) Data includes completed hospital separations with a care type of maintenance care for persons age 70 years and over and Indigenous persons aged 50–69, with a principle or additional diagnosis of Z75.11 or Z74.2. Z75.11 is defined as "person awaiting admission to residential aged care". Z74.2 is defined as "need for assistance at home and no other household member able to render care".

(b) These data only account for completed unlinked separations — that is, if a change in the type of care occurs during a patient's hospital stay, these data do not combine these separations to reflect the full length of hospital stay for a patient.

(c) Diagnosis codes may not be applied consistently across jurisdictions, or over time.

(d) Although the diagnosis codes reflect a care type, they do not determine a persons appropriate requirement for residential aged care (this is determined by an ACAT assessment).

(e) The code 'need for assistance at home and no other household member able to render care' may also be used for respite care for aged care residents or those receiving community care and some jurisdictions may have a high proportion of this type of use. This is particularly relevant in some rural areas where there are few alternative options for these clients.

(f) Includes separations with a care type of maintenance only.
np Not published.

Table 13A.73

Table 13A.73 **Capital expenditure on aged care services, 2008-09 (a)**

	<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT (b)</i>	<i>Aust</i>
Australian Government										
Targeted capital assistance to residential aged care services plus rural and remote building fund (c)	\$m	15.0	7.6	7.4	5.5	2.1	1.9	–	1.0	40.6
State and territory governments										
Capital expenditure on aged care residential services	\$m	–	69.1	5.3	11.5	2.2	na	..	–	88.1

(a) These expenditure data are not included in calculations of recurrent expenditure.

(b) Capital expenditure by NT Government is gifted lands.

(c) Expenditure to assist aged care residential services that, as a result of their rural or remote location or because the homes target financially disadvantaged people, are unable to meet the cost of necessary capital works from the income they receive through resident accommodation payments (accommodation bonds and accommodation charges) and the capital component of Australian Government recurrent funding.

.. Not applicable. – Nil or rounded to zero.
