(a)	Refer to table 15A.4 for information on the comparability of expenditure data.					
(b)	Numbers may not calculate exactly due to rounding errors.					
(c)	Queensland expenditure from 2004-05 onwards reflects full absorption costing on an accrual accounting basis.					
(d)	The increase in expenditure in 2007-08 is due partly to a shift in field staff time towards this service and away from out-of-scope services. This increase is also due to the filling of new case worker positions provided in the previous budget process. Increase in expenditure in 2006-07 is due to WA's revised definitions of child protection notifications which includes previously out of scope expenditure, and additional funding for new caseworkers and support staff. The increase in expenditure in 2008-09 is due to the expenditure of additional funding received for the implementation of mandatory reporting of child sexual abuse including the allocation of additional child protection staff and the establishment of a mandatory reporting unit. The increase is also a result of the provision of additional child protection staff to address increases in demand for child protection work.					
(e)	Figures from 2004-05 adjusted for correction.					
(f)	Expenditure has increased in 2006-07 due to the inclusion of case management salary costs that were previously reported in out-of-home care. In 2007-08, salary expenditure relates to people working across CAFS, rather than 100 per cent CP and OOHC, and are treated as overhead and a reduction in Support Worker and Rostered Carer costs. Assessment and OOHC expenditure now more accurately recorded due to changed financial management data capture. In 2007-08 expenditure by umbrella or other department increased due to the following: New Area Management Structure overhead (\$2.0m), Corporate Overhead due to Agency corporate area expanding (\$1.1m), Directorate overhead (\$1200), a review of all services, predominantly CP & OOHC (\$0.6m), and an additional \$0.7m expenditure on staff, increased IT and other positions. Salary costs increased in 2008-09 due to the impact of a significant payrise. Non salary expenses increased due to the inclusion in of "relatives allowance" payments.					
(g)	The change in split of caes between OoHC and CP from 2004-05 to 2005-06 may be attributed to cases previously counted as OoHC even if CP activity is still occurring, growth in OoHC cases and expansion of care options for more difficult/complex children where costs are higher.					
(h)	The Australian figure for total real expenditure represents the sum of figures for those jurisdictions able to provide data. The Australian figure for real expenditure per child represents the sum of expenditure for those jurisdictions divided by the sum of the residential population for the target groups (0–16 or 0–17 years).					
(i)	Victorian expenditure for 2004-05 includes additional funding for Aboriginal Family Decision Making, Adolescent Medication and Diversion and Foster Care Initiatives and data revisions.					
(j)	The 2007-08 expenditure has increased as a result of a 13 per cent increase in the number of children and young people in care compared with 2006-07. The foster care subsidy also increased by \$50 per fortnight in 2007-08. A higher level of expenditure in 2006-07 is due to a 20 per cent increase in the number of children in the CEO's care compared to 2005-06, and additional funding for new caseworkers and support staff. The higher expenditure in 2008-09 is due to increased expenditure on providing placements for high-need children and young people in care as well as expenditure of additional funding to reform and expand residential care services. In addition, increased funding was provided for additional caseworkers to support the continuing increases in the number of children and young people in care.					

**Table 15A.1 State and Territory Government real recurrent expenditure on child protection and out-of-home care services, (2008-09 dollars) (a), (b)**

	<i>Unit</i>	<i>2004-05</i>	<i>2005-06</i>	<i>2006-07</i>	<i>2007-08</i>	<i>2008-09</i>
(k)	In 2005-06, there was an increase in operational employee costs due to a large increase in staff numbers and an increase in the number of out-of-home care placements during the year. Expenditure in 2006-07 includes 18 months of back pay that was paid to Rostered Carers relating to previous financial years (\$1.3m). There has been an overall reduction in expenses for 2008-09 due to: (1) a reduction in salary expenses due to vacancies and streamlining of services; and (2) a reduction in umbrella costs due to a change in the allocation process. However there was an increase in non-salary expenses due to: (1) an increase in the number of children in care; (2) an increase in service delivery costs for rostered care; and (3) the inclusion in 2008-09 of OOHC grant payments made to NGOs for cottage care, the peak body and an empowerment course for OOHC clients.					
(l)	The decreased expenditure on out-of-home care costs compared to 2004-05 relates primarily to the exclusion of certain services costs not associated with the provision of out-of-home care. These costs have been included in previous years.					
(m)	In 2008-09, NSW IFSS expenditure included expenditure relating to the NSW targeted early intervention program, Brighter Futures. This revised methodology for calculating the expenditure for IFSS better reflects funding for programs relating to preventing family dysfunction, improving family					
(n)	Over the past four years significant additional funding has been provided to Victorian 'Family Services'. Client data relating to the clients that received intensive support from these services has previously not been able to be provided but is included in 2007-08 for the first time. The increase in client numbers reflects the accumulated increase over recent years.					
(o)	The decrease in Tasmania's real recurrent expenditure on child protection and out-of-home care services from 2006-07 to 2007-08 has occurred because of a one-off back-payment in salary expenses of \$1.3 million for 2006-07 that had accrued from previous financial years.					
(p)	In 2005-06 there was a dedicated team for IFSS, this team was disbanded in 2006-07 as a general family support program was funded with the expectation that this area would be reduced. In 2008-09, salary costs increased as Early Support Program (ESP) coordinators were identified as providing Intensive Family Support Services. During 2008-09 the ESP was extended to the entire state of Tasmania and a centrally managed information system was established. Non-salary costs also increased significantly due to inclusion of the ESP grants paid to NGOs for service delivery.					
(q)	For child protection services, expenditure per child relates to children aged 16 years and under in the residential population. For out-of-home care and total child protection and out-of-home care services, expenditure per child relates to children aged 17 years and under in the residential population.

- (a) These data need to be interpreted with care. These data are based on total expenditure on child protection activities, they do not represent and cannot be interpreted as unit costs for notifications, investigations or substantiations. These data cannot be added together to determine overall cost of child protection services.
- (b) Refer to the notes to table 15A.1 and to table 15A.4 for information on the comparability of expenditure data.
- (c) 2006-07 data for some jurisdictions for 'annual real expenditure per investigation' and 'annual real expenditure per notification' may not be strictly comparable with previous years, due to the introduction of a new investigation category 'Investigation closed - no outcome possible' in 2006-07. Cases where an investigation was closed and where no outcome was possible may previously have been recorded as 'dealt with by other means' or 'investigations in process'.

	2004-05	2005-06	2006-07	2007-08	2008-09
(d)	During 2006-07, Victoria introduced a major new data system, which will be rolled out across the State by mid 2008. In parallel, <i>the Children, Youth and Family's Act 2005</i> which commenced in April 2007, introduced new service pathways and processes in Victorian Child Protection and Family Services to support earlier intervention and prevention for vulnerable children and their families. Due to these new service and data reporting arrangements, the Victorian child protection data may not be fully comparable with previous years data.				
(e)	The number of notifications increased between 2005-06 and 2006-07 as all Concern for Child Wellbeing reports are now classified as a notification. Previously, only those that were followed by an investigation were counted as a notification. 'Expenditure per notification' in 2006-07 is therefore not comparable with previous years.				
(f)	The apparent increase in expenditure per investigation in 2007-08 is due to the decline in the number of investigations since the introduction of differential response in the ACT and does not represent any real increase in expenditure.

- (a) Refer to the notes to table 15A.1 and to table 15A.4 for information on the comparability of expenditure data.
- (b) Numbers may not calculate exactly due to rounding errors.
- (c) SA has provided revised 2006-07 data for residential OOHC and non-residential OOHC, which corrects data previously provided for 2006-07.
- (d) Tasmania is not able to adhere to the definition of OOHC introduced in 2007-08 to include children in care where a financial payment has been offered but has been declined by the carer. However, the number of carers declining a financial payment is likely to be low.
- (e) Residential out-of-home care services include family group homes.
- (f) These data need to be interpreted with care because they do not represent and cannot be interpreted as unit cost measures. Expenditure per child in care at 30 June overstates the cost per child because significantly more children are in care during a year than at a point in time. In addition, these data do not reflect the length of time that a child spends in care.

- (a) See notes to source tables for a description of how the data were defined and collected.
- (b) A number of changes have been made since the 2008 Report. See footnotes (c) - (e).
- (c) Prior to 2006-07, the category 'Investigations in process' was called 'Investigations not finalised'.
- (d) 'Investigation closed - no outcome possible' is a new category introduced in 2006-07. It includes cases where an outcome of substantiated or not substantiated could not be reached, but where the file may be closed for administrative reasons. Prior to 2006-07, these cases may previously have been recorded as 'Dealt with by other means'.
- (e) 'Dealt with by other means' includes notifications that were responded to by means other than an investigation, such as referral to family services or provision of advice. Prior to 2006-07, some of the cases recorded as 'dealt with by other means' may have been cases where the investigation was closed with no outcome possible. Dealt with by other means also includes cases that were previously reported as 'no investigation possible/no action'.

(b) Data on the number of notifications by Indigenous status should be interpreted with care. These data are collected very early in the child protection process and often before the agency has full knowledge of the child's family circumstances. As a result of this lack of full knowledge and the other inherent difficulties in identifying Indigenous status, these data are not considered to have a high level of reliability.

- (a) Benchmark calculations for children on guardianship/custody orders include only government school students, whereas all students calculations include government school and non-government school students.
- (b) Benchmark calculations for children on guardianship/custody orders exclude students who were exempt from the tests, whereas all student calculations include exempted students and these students are reported as falling below the benchmark.
- (c) The methods used to calculate percentages and confidence intervals of children who are on guardianship/custody orders who have achieved national benchmark achievement levels is not the same as the method used by MCEETYA to report all student results. Confidence intervals have been calculated for children on guardianship/custody orders using the exact 95 per cent confidence limits, which have been approximated to an F distribution. For the all students estimates, the methods used by MCEETYA for calculating confidence intervals involve specifically developed software, accounting for some sources of error in the measurement and estimation process, and are reliant on having data for large cohorts of students.
- (d) Data are only available for five jurisdictions (Victoria, Queensland, SA, Tasmania and the ACT).
- (e) Care should be taken when interpreting the results for Tasmania and the ACT, as the number of children on guardianship/custody orders in these jurisdictions is very small.

(b) Family group homes are included as part of residential care. However in this table they have been disaggregated.

(c) Tasmania is not able to adhere to the definition of OOHC introduced in 2007-08 to include children in care where a financial payment has been offered but has been declined by the carer. However, the number of carers declining a financial payment is likely to be low.

(a) See notes to source tables for a description of how these data were defined and collected.

(b) Queensland's data comprise matter of concern substantiations, which refer to children in the custody or guardianship of the Chief Executive only. Queensland's consideration of the 'person believed responsible' relates to the overall safety and risk experienced by a child in care. It includes not only allegations of actual harm inflicted by members of a household but also whether their action or inaction contributed to the risk or harm even if the person believed responsible did not reside in the household. Therefore, Queensland's data are broader than the scope of the national counting rule and should not be compared to other jurisdictions' data.

(c) Data includes children who have been harmed by foster carers and workers in placement services. Children harmed by relatives of foster carers or other children in care are not included.

- (a) The service must average at least 4 hours of service provision per week for a specified short-term period (usually less than six months).
- (b) In 2008-09, NSW IFSS expenditure included expenditure relating to the NSW targeted early intervention program, Brighter Futures. This revised methodology for calculating the expenditure for IFSS better reflects funding for programs relating to preventing family dysfunction, improving family functioning, and supporting re-unification.
- (c) Over the past four years significant additional funding has been provided to Victorian 'Family Services'. Client data relating to the clients that received intensive support from these services has previously not been able to be provided but is included.
- (d) The count of 'children commencing Intensive Family Support Services' represents the count of all children who were provided with a service during the year. In 2008-09, a new IFSS program was extended to the entire state of Tasmania and a centrally managed information system was established.
- (e) The Australian figure for total real expenditure represents the sum of figures for those jurisdictions able to provide data. The Australian figure for real expenditure per child represents the sum of expenditure for those jurisdictions able to provide data divided by the number of children aged 0-17 years commencing intensive family support services. In previous Reports, data were divided by the sum of the residential population for the target group.

(a) Indigenous and non-Indigenous data were supplied by AIHW derived from ABS data sources.

(b) Indigenous rates for 2008-09 were calculated using June data from 'Series B', Experimental estimates and projections, Aboriginal and Torres Strait Islander Australians, 1991 to 2021 (cat. no. 3238.0).

Out-of-home care program expenditure per placement night (\$)	104.7	115.5	123.6	161.7	140.1	95.6	118.9	214.9

(a) These data should not be interpreted as unit costs for Activity Group 8 (Provision of out-of-home care services) as they are derived using reported program expenditure and not activity group expenditure.

(b) Caution should be used when interpreting results due to the variety of activities that are included in out-of-home care services.

(c) Children in facility based care placements contribute to a significant proportion of out-of-home care services expenditure, and may inflate the average unit cost.

(d) In 2008-09 in the ACT, there were 29 instances of a child entering and exiting an out-of-home care placement on the same day (these 29 instances involved 23 children). Departmental resources used to facilitate these placements are not captured in the figure provided for number of placement nights.

- (a) If a child was the subject of more than one notification, investigation or substantiation, then each one of these was counted. The definition of an investigation includes interviewing or sighting the child where practicable.
- (b) Investigations relate to notifications received during the financial year. If the investigation was completed by 31 August it is classified as finalised. If the investigation was not completed by 31 August it is classified as not finalised.
- (c) Notifications 'dealt with by other means' includes the provision of advice, referral to support services or referral to the police.
- (d) 'Carer/family issues' includes children where no actual harm is determined but carer/family issues were involved.
- (e) Prior to 2006-07, the category 'Investigations in process' was called 'Investigations not finalised'.
- (f) The category 'Investigation closed - no outcome possible' was introduced in 2006-07. It includes cases where an outcome of substantiated or not substantiated could not be reached, but where the file may be closed for administrative reasons.
- (g) The category 'Dealt with by other means' includes notifications that were responded to by means other than an investigation, such as referral to family services or provision of advice. Prior to 2006-07, some of the cases recorded as 'dealt with by other means' may have been cases where the investigation was closed with no outcome possible. 'Dealt with by other means' also includes cases that were previously reported as 'No investigation possible/no action'.
- (h) Non-Indigenous status includes children whose Indigenous status is unknown or not stated.

**Table 15A.36 Children in notifications, investigations and substantiations and children on care and protection orders: Number and rate per 1000 children in the target populations by Indigenous status, New South Wales (a), (b), (c)**

	2004-05	2005-06	2006-07	2007-08	2008-09
(a) Rates of children in notifications, investigations and substantiations were calculated as the number of children aged 0–16 years in each category (including those whose age was not stated) divided by the estimated population of children aged 0–16 years at 31 December, multiplied by 1000. For Indigenous children, the June projections for two years were averaged to obtain a population figure for December of the relevant year.					
(b) Rates of non-Indigenous children on care and protection orders were calculated as the number of children aged 0–17 years (including those whose age was not stated) who were on a care and protection order at 30 June, divided by the estimated population aged 0–17 at 31 March, multiplied by 1000. Rates of Indigenous children on care and protection orders were calculated as the number of children aged 0-17 years (including those whose age was not stated) who were on a care and protection order at 30 June, divided by the estimated population aged 0-17 at 30 June using 'Series B', Experimental estimates and projections, Aboriginal and Torres Strait Islander Australians, 1991 to 2021 (cat. no. 3238.0).					
(c) Non-Indigenous status includes children whose Indigenous status is unknown or not stated. <b>na</b> Not available.

- (a) If a child was the subject of more than one notification, investigation or substantiation, then each one of these was counted. The definition of an investigation includes interviewing or sighting the child where practicable.
- (b) Investigations relate to notifications received during the financial year. If the investigation was completed by 31 August it is classified as finalised. If the investigation was not completed by 31 August it is classified as not finalised.
- (c) In Victoria if a case is open following the first notification, no further notifications concerning the child are counted.
- (d) 'No investigation possible/no action' includes notifications where there were no grounds for an investigation or insufficient information was available to undertake an investigation. It also includes those cases that could not be undertaken, such as the family has relocated. It may also include some cases that were referred on or where advice was given which could not be disaggregated from cases with insufficient reason to investigate.
- (e) During 2006-07, Victoria introduced a major new data system, which was progressively rolled out across the State. In parallel, *the Children, Youth and Family's Act 2005* which commenced in April 2007, introduced new service pathways and processes in Victorian Child Protection and Family Services to support earlier intervention and prevention for vulnerable children and their families. Due to these new service and data reporting arrangements, the Victorian child protection data may not be fully comparable with previous years data.
- (f) Prior to 2006-07, the category 'Investigations in process' was called 'Investigations not finalised'.
- (g) 'Investigation closed - no outcome possible' is a new category introduced in 2006-07. It includes cases where an outcome of substantiated or not substantiated could not be reached, but where the file may be closed for administrative reasons.
- (h) The category 'Dealt with by other means' includes notifications that were responded to by means other than an investigation, such as referral to family services or provision of advice. Prior to 2006-07, some of the cases recorded as 'dealt with by other means' may have been cases where the investigation was closed with no outcome possible. 'Dealt with by other means' also includes cases that were previously reported as 'No investigation possible/no action'.
- (i) Non-Indigenous status includes children whose Indigenous status is unknown or not stated.

- (a) Admissions to orders in other jurisdictions could not be counted.
- (b) During 2006-07, Victoria introduced a major new data system, which will be rolled out across the State by mid 2008. In parallel, *the Children, Youth and Family's Act 2005* which commenced in April 2007, introduced new service pathways and processes in Victorian Child Protection and Family Services to support earlier intervention and prevention for vulnerable children and their families. Due to these new service and data reporting arrangements, the Victorian child protection data may not be fully comparable with previous years data.
- (c) Data for 2006-07 are based on an extract from the new child protection system which only contains information relating to open cases and/or cases commenced after 1 July 2000. As the earliest history that can be traced back for a client is to 1 July 2000, if a child had been admitted to an order prior to 1 July 2000 they may be counted as admitted for the first time in 2006-07.
- (d) Non-Indigenous status includes children whose Indigenous status is unknown or not stated.

(a) Permanent care orders are included in the category 'guardianship or custody orders'.

(b) During 2006-07, Victoria introduced a major new data system, which will be rolled out across the State by mid 2008. In parallel, *the Children, Youth and Families Act 2005* which commenced in April 2007, introduced new service pathways and processes in Victorian Child Protection and Family Services to support earlier intervention and prevention for vulnerable children and their families. Due to these new service and data reporting arrangements, the Victorian child protection data may not be fully comparable with previous years data.

(c) This category was included for the first time in the 2009 Report.

(d) Non-Indigenous status includes children whose Indigenous status is unknown or not stated.

**Table 15A.53 Children in notifications, investigations and substantiations and children on care and protection orders: Number and rate per 1000 children in the target populations by Indigenous status, Victoria (a), (b), (c), (d)**

	2004-05	2005-06	2006-07	2007-08	2008-09
(a)	Rates of children in notifications, investigations and substantiations were calculated as the number of children aged 0–16 years in each category (including those whose age was not stated) divided by the estimated population of children aged 0–16 years at 31 December, multiplied by 1000. For Indigenous children, the June projections for two years were averaged to obtain a population figure for December of the relevant year.				
(b)	Rates of non-Indigenous children on care and protection orders were calculated as the number of children aged 0–17 years (including those whose age was not stated) who were on a care and protection order at 30 June, divided by the estimated population aged 0–17 at 31 March, multiplied by 1000. Rates of Indigenous children on care and protection orders were calculated as the number of children aged 0-17 years (including those whose age was not stated) who were on a care and protection order at 30 June, divided by the estimated population aged 0-17 at 30 June using 'Series B', Experimental estimates and projections, Aboriginal and Torres Strait Islander Australians, 1991 to 2021 (cat. no. 3238.0).				
(c)	During 2006-07, Victoria introduced a major new data system, which will be rolled out across the State by mid 2008. (a) Indicates the length of time a child has been in out-of-home placement on a continuous basis at 30 June. A return home of less than 7 days is not counted as a break in the continuity of placement.

(b) During 2006-07, Victoria introduced a major new data system, which will be rolled out across the State by mid 2008. In parallel, *the Children, Youth and Family's Act 2005* which commenced in April 2007, introduced new service pathways and processes in Victorian Child Protection and Family Services to support earlier intervention and prevention for vulnerable children and their families. Due to these new service and data reporting arrangements, the Victorian child protection data may not be fully comparable with previous years data.

(c) Non-Indigenous status includes children whose Indigenous status is unknown or not stated.

- (a) If a child was the subject of more than one notification, investigation or substantiation, then each one of these was counted. The definition of an investigation includes interviewing or sighting the child where practicable.
- (b) Investigations relate to notifications received during the financial year. If the investigation was completed by 31 August it is classified as finalised. If the investigation was not completed by 31 August it is classified as not finalised.
- (c) From 2006-07 notification figures for Queensland are affected by a change in recording practice. With the introduction of the Integrated Client Management System in March 2007, any new child protection concerns received by the department that relate to an open notification or investigation and assessment are recorded as an additional concern and linked to the open notification/investigation and assessment. Previously, any new child protection concerns received by the department were recorded as an additional notification.
- (d) This figure excludes those finalised investigations with an assessment outcome of 'No investigation and Assessment Outcome'. This is instead reported in the category 'Investigation closed – no outcome possible' introduced in 2006-07. It includes notifications where there was insufficient information to enable an assessment outcome of substantiated or not substantiated to be determined. This may occur in circumstances where a family was unable to be identified, located or has moved overseas and the investigation is therefore finalised and closed.
- (e) Prior to 2006-07, the category 'Investigations in process' was called 'Investigations not finalised'.
- (f) The category 'Dealt with by other means' includes notifications that were responded to by means other than an investigation, such as referral to family services or provision of advice.
- (g) Non-Indigenous status includes children whose Indigenous status is unknown or not stated.
- .. Not applicable. – Nil or rounded to zero.

**Table 15A.70 Children in notifications, investigations and substantiations and children on care and protection orders: Number and rate per 1000 children in the target populations by Indigenous status, Queensland (a), (b), (c)**

	2004-05	2005-06	2006-07	2007-08	2008-09
(a) Rates of children in notifications, investigations and substantiations were calculated as the number of children aged 0–16 years in each category (including those whose age was not stated) divided by the estimated population of children aged 0–16 years at 31 December, multiplied by 1000. For Indigenous children, the June projections for two years were averaged to obtain a population figure for December of the relevant year.					
(b) Rates of non-Indigenous children on care and protection orders were calculated as the number of children aged 0–17 years (including those whose age was not stated) who were on a care and protection order at 30 June, divided by the estimated population aged 0–17 at 31 March, multiplied by 1000. Rates of Indigenous children on care and protection orders were calculated as the number of children aged 0-17 years (including those whose age was not stated) who were on a care and protection order at 30 June, divided by the estimated population aged 0-17 at 30 June using 'Series B', Experimental estimates and projections, Aboriginal and Torres Strait Islander Australians, 1991 to 2021 (cat. no. 3238.0).					
(c) Non-Indigenous status includes children whose Indigenous status is unknown or not stated.					
(d) This figure excludes those children with a finalised investigation and assessment outcome of 'No investigation and assessment outcome'. In these cases there was insufficient information to enable an assessment outcome of substantiated or not substantiated to be determined. This may occur in circumstances where a family was unable to be identified, located or has moved overseas and the investigation is therefore finalised and closed. These finalised investigations have been included in the category 'Investigation closed – no outcome possible' introduced in 2007.

(a) Prior to 2008, QLD was not able to report on the length of time in continuous out-of-home care placement, instead reporting on the length of time in the current out-of-home care placement. From 2008 data refer to the length of time in continuous out-of-home care and is therefore not comparable with previous years.

Children in care who were the subject of a substantiation as a proportion of all children aged 0-17 in at least one care placement during the year	%	7.6	3.9	na	2.0	2.4

(a) Data for 2006-07 were not available due to the transition to a new information management system.

(b) From 2007-08, Queensland is reporting on Matters of Concern substantiations. Matters of Concern substantiations refer to those children in the custody or guardianship of the chief executive and placed in accordance with Section 82(1) of the Child Protection Act 1999. Therefore, data from 2007-08 onwards are not comparable with previous years.

(c) Queensland's data comprise matter of concern substantiations, which refer to children in the custody or guardianship of the Chief Executive only. Queensland's consideration of the 'person believed responsible' relates to the overall safety and risk experienced by a child in care. It includes not only allegations of actual harm inflicted by members of a household but also whether their action or inaction contributed to the risk or harm even if the person believed responsible did not reside in the household. Therefore, Queensland's data are broader than the scope of the national counting rule and should not be compared to other jurisdictions' data.

- (a) If a child was the subject of more than one notification, investigation or substantiation, then each one of these was counted. The definition of an investigation includes interviewing or sighting the child where practicable. For WA however, investigations may include some situations where the child was not sighted.
- (b) Investigations relate to notifications received during the financial year. If the investigation was completed by 31 August it is classified as finalised. If the investigation was not completed by 31 August it is classified as not finalised.
- (c) 'No investigation possible/no action' includes notifications where there were no grounds for an investigation or insufficient information was available to undertake an investigation. It also includes those cases that could not be undertaken, such as the family has relocated. It may also include some cases that were referred on or where advice was given which could not be disaggregated from cases with insufficient reason to investigate.
- (d) The number of notifications increased between 2005-06 and 2006-07 as all Concern for Child Wellbeing reports are now classified as a notification. Previously, only those that were followed by an investigation were counted as a notification.
- (e) Prior to 2006-07, the category 'Investigations in process' was called 'Investigations not finalised'.
- (f) 'Investigation closed - no outcome possible' is a new category introduced in 2006-07. It includes cases where an outcome of substantiated or not substantiated could not be reached, but where the file may be closed for administrative reasons.
- (g) 'Dealt with by other means' includes notifications that were responded to by means other than an investigation, such as referral to family services or provision of advice. 'Dealt with by other means' also includes cases that were previously reported as 'No investigation possible/no action' and from 2008-09 cases where there was no suitable caregiver. Cases where there was no suitable caregiver are not counted as investigations.
- (h) Non-Indigenous status includes children whose Indigenous status is unknown or not stated.
- .. Not applicable. – Nil or rounded to zero.

(b) Data include for the first time children in care applications adjourned at 30 June where no subsequent court appearance had occurred by the end of August. Data from 2001-02 and 2002-03 do not include these children.

(c) Implementation of the *Children and Community Services Act 2004* in March 2006 required the legal status of children in care to be reviewed and Protection Orders were sought for a number of children already in care but not under care and protection orders, for 2006 onwards.

(d) In 2006-07, the number of children on orders included 24 children who were placed on Enduring Parental Responsibility orders.

(e) This category is included for the first time in this Report.

**Table 15A.87 Children in notifications, investigations and substantiations and children on care and protection orders: Number and rate per 1000 children in the target populations by Indigenous status, Western Australia (a), (b), (c)**

	2004-05	2005-06	2006-07	2007-08	2008-09
(a)	Rates of children in notifications, investigations and substantiations were calculated as the number of children aged 0–16 years in each category (including those whose age was not stated) divided by the estimated population of children aged 0–16 years at 31 December, multiplied by 1000. For Indigenous children, the June projections for two years were averaged to obtain a population figure for December of the relevant year.				
(b)	Rates of non-Indigenous children on care and protection orders were calculated as the number of children aged 0–17 years (including those whose age was not stated) who were on a care and protection order at 30 June, divided by the estimated population aged 0–17 at 31 March, multiplied by 1000. Rates of Indigenous children on care and protection orders were calculated as the number of children aged 0-17 years (including those whose age was not stated) who were on a care and protection order at 30 June, divided by the estimated population aged 0-17 at 30 June using 'Series B', Experimental estimates and projections, Aboriginal and Torres Strait Islander Australians, 1991 to 2021 (cat. no. 3238.0).				
(c)	Non-Indigenous status includes children whose Indigenous status is unknown or not stated.

- (a) If a child was the subject of more than one notification, investigation or substantiation, then each one of these was counted.
- (b) 'Notifier concern reports' are excluded from the count of total notifications because concern reports are not reported.
- (c) Investigations relate to notifications received during the financial year. If the investigation was completed by 31 August it is classified as finalised. If the investigation was not completed by 31 August it is classified as not finalised. The definition of an investigation includes interviewing or sighting the child where practicable.
- (d) Prior to 2006-07, the category 'Investigations in process' was called 'Investigations not finalised'.
- (e) 'Investigation closed - no outcome possible' is a new category introduced in 2006-07. It includes cases where an outcome of substantiated or not substantiated could not be reached, but where the file may be closed for administrative reasons.
- (f) The category 'Dealt with by other means' includes notifications that were responded to by means other than an investigation, such as referral to family services or provision of advice. Prior to 2006-07, some of the cases recorded as 'dealt with by other means' may have been cases where the investigation was closed with no outcome possible. 'Dealt with by other means' also includes cases that were previously reported as 'No investigation possible/no action'.
- (g) Non-Indigenous status includes children whose Indigenous status is unknown or not stated.
- .. Not applicable. – Nil or rounded to zero.

**Table 15A.104 Children in notifications, investigations and substantiations and children on care and protection orders: Number and rate per 1000 children in the target populations by Indigenous status, South Australia (a), (b), (c), (d), (e)**

	2004-05	2005-06	2006-07	2007-08	2008-09
(a)	Rates of children in notifications, investigations and substantiations were calculated as the number of children aged 0–16 years in each category (including those whose age was not stated) divided by the estimated population of children aged 0–16 years at 31 December, multiplied by 1000. For Indigenous children, the June projections for two years were averaged to obtain a population figure for December of the relevant year.				
(b)	Rates of non-Indigenous children on care and protection orders were calculated as the number of children aged 0–17 years (including those whose age was not stated) who were on a care and protection order at 30 June, divided by the estimated population aged 0–17 at 31 March, multiplied by 1000. Rates of Indigenous children on care and protection orders were calculated as the number of children aged 0-17 years (including those whose age was not stated) who were on a care and protection order at 30 June, divided by the estimated population aged 0-17 at 30 June using 'Series B', Experimental estimates and projections, Aboriginal and Torres Strait Islander Australians, 1991 to 2021 (cat. no. 3238.0).				
(c)	SA includes in 'notifications' only those reports which have met the criteria for a reasonable suspicion of child abuse or neglect.				
(d)	2006-07 figures for all children subject to substantiations only relates to children who were the subject of a substantiation for notifications made during 2006-07.				
(e)	Non-Indigenous status includes children whose Indigenous status is unknown or not stated.

- (b) The scope for out-of-home care was expanded in 2007-08 to include children in care where a financial payment was offered but was declined by the carer.
- (c) Rates for non-Indigenous children were calculated as the number of children aged 0–17 years (including those whose age was not stated) in out-of-home care at 30 June, divided by the estimated population aged 0–17 at 31 March, multiplied by 1000. Rates for Indigenous children were calculated as the number of children aged 0–17 years (including those whose age was not stated) in out-of-home care at 30 June, divided by the estimated population aged 0–17 at 30 June using 'Series B', Experimental estimates and projections, Aboriginal and Torres Strait Islander Australians, 1991 to 2021 (cat. no. 3238.0).
- (d) Rates were calculated as the number of children aged 0–17 years (including those whose age was not stated) in at least one out-of-home care placement during the year, divided by the estimated population aged 0–17 at 31 December, multiplied by 1000. For Indigenous children, the June projections for two years were averaged to obtain a population figure for December of the relevant year.

- (a) If a child was the subject of more than one notification, investigation or substantiation, then each one of these were counted.
- (b) Investigations relate to notifications received during the financial year. If the investigation was completed by 31 August it is classified as finalised. If the investigation was not completed by 31 August it is classified as not finalised. The definition of an investigation includes interviewing or sighting of the child where practicable.
- (c) Notifications 'dealt with by other means' includes the provision of advice, referral to support services or referral to the police.
- (d) 'No investigation possible/no action' includes notifications where there were no grounds for an investigation or insufficient information was available to undertake an investigation. It also includes those cases that could not be undertaken, such as the family has relocated. It may also include some cases that were referred on or where advice was given which could not be disaggregated from cases with insufficient reason to investigate.
- (e) The high proportion of children with an unknown Indigenous status significantly impacts the reliability of this data.
- (f) Prior to 2006-07, the category 'Investigations in process' was called 'Investigations not finalised'.
- (g) 'Investigation closed - no outcome possible' is a new category introduced in 2006-07. It includes cases where an outcome of substantiated or not substantiated could not be reached, but where the file may be closed for administrative reasons.
- (h) The high proportion of children with an unknown Indigenous status at notification and investigation, and the inclusion of these cases in the non-Indigenous category, significantly impacts the reliability of these data.
- (i) The category 'Dealt with by other means' includes notifications that were responded to by means other than an investigation, such as referral to family services or provision of advice. 'Dealt with by other means' also includes cases that were previously reported as 'No investigation possible/no action'.
- (j) In Tasmania, a change was made to the business processes for recording notifications in February 2008. New contacts made about similar concerns during an open notification/investigation period, within 6 weeks of the first contact, were added to the notification as a 'case note'. Case notes are not included in the count of notifications and hence comparison between values from 2007-08 to 2008-09 should be made with caution.

**Table 15A.121 Children in notifications, investigations and substantiations and children on care and protection orders: Number and rate per 1000 children in the target populations by Indigenous status, Tasmania (a), (b), (c), (d)**

	2004-05	2005-06	2006-07	2007-08	2008-09
(a) Rates of children in notifications, investigations and substantiations were calculated as the number of children aged 0–16 years in each category (including those whose age was not stated) divided by the estimated population of children aged 0–16 years at 31 December, multiplied by 1000. For Indigenous children, the June projections for two years were averaged to obtain a population figure for December of the relevant year.					
(b) Rates of non-Indigenous children on care and protection orders were calculated as the number of children aged 0–17 years (including those whose age was not stated) who were on a care and protection order at 30 June, divided by the estimated population aged 0–17 at 31 March, multiplied by 1000. Rates of Indigenous children on care and protection orders were calculated as the number of children aged 0-17 years (including those whose age was not stated) who were on a care and protection order at 30 June, divided by the estimated population aged 0-17 at 30 June using 'Series B', Experimental estimates and projections, Aboriginal and Torres Strait Islander Australians, 1991 to 2021 (cat. no. 3238.0).					
(c) Care should be taken in interpreting the rates for Indigenous children due to the relatively small size of the Indigenous population.					
(d) Non-Indigenous status includes children whose Indigenous status is unknown or not stated.

Therefore care should be taken when comparing 2003-04 and 2004-05 with other years.
- (b) The 2006-07 figure for Tasmania of 68.2 per cent was artificially inflated as a result of a number of cases that were reviewed and subsequently closed (with no outcome possible) as part of a dedicated project that commenced during 2006-07 to address a number of cases awaiting allocation. Tasmania has commenced a significant reform process addressing structural deficiencies in its child protection system and as a result some historical defecits have been addressed.

- (a) The number of children in out-of-home care as at 30 June 2007 is not comparable to that reported for previous years for Tasmania because of exclusion of a cohort of children who did not meet the definition of out-of-home care.
- (b) Non-Indigenous status includes children whose Indigenous status is unknown or not stated.
- (c) Tasmania is not able to adhere to the new AIHW definition of OOH for 2007-08 to include children in care where a financial payment has been offered but has been declined by the carer. However, the number of carers declining a financial payment is likely to be low.
- (d) The scope for out-of-home care was expanded in 2007-08 to include children in care where a financial payment has been offered but has been declined by the carer.
- (e) Rates for non-Indigenous children were calculated as the number of children aged 0–17 years (including those whose age was not stated) in out-of-home care at 30 June, divided by the estimated population aged 0–17 at 31 March, multiplied by 1000. Rates for Indigenous children were calculated as the number of children aged 0-17 years (including those whose age was not stated) in out-of-home care at 30 June, divided by the estimated population aged 0-17 at 30 June using 'Series B', Experimental estimates and projections, Aboriginal and Torres Strait Islander Australians, 1991 to 2021 (cat. no. 3238.0).
- (f) Rates were calculated as the number of children aged 0–17 years (including those whose age was not stated) in at least one out-of-home care placement during the year, divided by the estimated population aged 0–17 at 31 December, multiplied by 1000. For Indigenous children, the June projections for two years were averaged to obtain a population figure for December of the relevant year.

(a) This indicates the length of time a child has been in out of home placement on a continuous basis at 30 June. A return home of less than 7 days is not counted as a break in the continuity of placement.

(b) Tasmania was unable to distinguish between respite and non-respite care. Both types of placement are included if they satisfy the general definition of out of home care.

(c) The number of children in out-of-home care as at 30 June 2007 is not comparable to that reported for previous years for Tasmania because of exclusion of a cohort of children who did not meet the definition of out-of-home care.

(a) For number of different placements only new placements in which the child had previously not been placed were counted as a separate placement.

(b) This table includes all children exiting care who had been in care for 1 month or more and who had been on a care and protection order at some point in the six months prior to exiting care.

(c) The number of children in out-of-home care as at 30 June 2007 is not comparable to that reported for previous years for Tasmania because of exclusion of a cohort of children who did not meet the definition of out-of-home care.

- (a) If a child was the subject of more than one notification, investigation or substantiations, then each one of these were counted. The definition of an investigation includes interviewing or sighting of the child where practicable.
- (b) Investigations relate to notifications received during the financial year. If the investigation was completed by 31 August it is classified as finalised. If the investigation was not completed by 31 August it is classified as not finalised. Notifications 'dealt with by other means' includes 'non-abuse' notifications relating to serious incompatibility or self damaging behaviour where advice and/or referrals were followed up.
- 'No investigation possible/no action' includes notifications where there were no grounds for an investigation or insufficient information was available to undertake an investigation. It also includes those cases that could not be undertaken, such as the family has relocated. It may also include some cases that were referred on or where advice was given which could not be disaggregated from cases with insufficient reason to investigate.
- (c) The decrease in the number of substantiated investigations reflects a requirement of staff to substantiate emotional abuse or neglect only if there was, or is likely to be, significant harm and there was no-one with parental responsibility willing and able to protect the child/young person.
- (d) Prior to 2006-07, the category 'Investigations in process' was called 'Investigations not finalised'.
- (e) 'Investigation closed - no outcome possible' is a new category introduced in 2006-07. It includes cases where an outcome of substantiated or not substantiated could not be reached, but where the file may be closed for administrative reasons. Previously these cases were recorded in 'Investigations not finalised'.
- (f) The decrease in investigations reflects the introduction of an assessment phase between the receipt of the notification and the decision to investigate where families may be assisted without investigation.
- (g) The category 'Dealt with by other means' includes notifications that were responded to by means other than an investigation, such as referral to family services or provision of advice. 'Dealt with by other means' also includes cases that were previously reported as 'No investigation possible/no action'. In 2006-07, this figure reflects the inclusion of an assessment phase.
- (h) Fluctuations in numbers and proportions from 2004-05 to 2005-06 are due to changes in coding to distinguish between notifications not investigated and notifications dealt with by other means.
- (i) Non-Indigenous status includes children whose Indigenous status is unknown or not stated.

**Table 15A.138 Children in notifications, investigations and substantiations and children on care and protection orders: Number and rate per 1000 children in the target populations by Indigenous status, Australian Capital Territory (a), (b), (c)**

	2004-05	2005-06	2006-07	2007-08	2008-09
(a) Rates of children in notifications, investigations and substantiations were calculated as the number of children aged 0–16 years in each category (including those whose age was not stated) divided by the estimated population of children aged 0–16 years at 31 December, multiplied by 1000. For Indigenous children, the June projections for two years were averaged to obtain a population figure for December of the relevant year.					
(b) Rates of non-Indigenous children on care and protection orders were calculated as the number of children aged 0–17 years (including those whose age was not stated) who were on a care and protection order at 30 June, divided by the estimated population aged 0–17 at 31 March, multiplied by 1000. Rates of Indigenous children on care and protection orders were calculated as the number of children aged 0-17 years (including those whose age was not stated) who were on a care and protection order at 30 June, divided by the estimated population aged 0-17 at 30 June using 'Series B', Experimental estimates and projections, Aboriginal and Torres Strait Islander Australians, 1991 to 2021 (cat. no. 3238.0).					
(c) Non-Indigenous status includes children whose Indigenous status is unknown or not stated.

(a) The counting rule for this indicator was changed for 2003-04 onwards, which may have resulted in a lowering of the rate for some jurisdictions in 2003-04 and 2004-05. Therefore care should be taken when comparing 2003-04 and 2004-05 with other years.

- (a) A child is only counted once, regardless of the number of placements during the year.
- (b) SAAP placements were counted as out-of-home care placements where Family Services made a financial payment.
- (c) Non-Indigenous status includes children whose Indigenous status is unknown or not stated.
- (d) The scope for out-of-home care was expanded in 2007-08 to include children in care where a financial payment was offered but was declined by the carer.
- (e) Rates for non-Indigenous children were calculated as the number of children aged 0–17 years (including those whose age was not stated) in out-of-home care at 30 June, divided by the estimated population aged 0–17 at 31 March, multiplied by 1000. Rates for Indigenous children were calculated as the number of children aged 0-17 years (including those whose age was not stated) in out-of-home care at 30 June, divided by the estimated population aged 0-17 at 30 June using 'Series B', Experimental estimates and projections, Aboriginal and Torres Strait Islander Australians, 1991 to 2021 (cat. no. 3238.0).
- (f) Rates were calculated as the number of children aged 0–17 years (including those whose age was not stated) in at least one out-of-home care placement during the year, divided by the estimated population aged 0–17 at 31 December, multiplied by 1000. For Indigenous children, the June projections for two years were averaged to obtain a population figure for December of the relevant year.

- (a) The NT includes child concern reports in child protection notifications.
- (b) If a child was the subject of more than one notification, investigation or substantiations, then each one of these were counted. The definition of an investigation includes interviewing or sighting of the child where practicable.
- (c) Investigations relate to notifications received during the financial year. If the investigation was completed by 31 August it is classified as finalised. If the investigation was not completed by 31 August it is classified as not finalised. Notifications 'dealt with by other means' includes the provision of advice, referral to support services or referral to the police.
- (d) The NT cannot reliably count notifications dealt with by other means and such matters are included under 'notifications not investigated/dealt with by other means'.
- (e) 'No investigation possible/no action' includes notifications where there were no grounds for an investigation or insufficient information was available to undertake an investigation. It also includes those cases that could not be undertaken, such as the family has relocated. It may also include some cases that were referred on or where advice was given which could not be disaggregated from cases with insufficient reason to investigate.
- (f) Prior to 2006-07, the category 'Investigations in process' was called 'Investigations not finalised'.
- (g) 'Investigation closed - no outcome possible' is a new category introduced in 2006-07. It includes cases where an outcome of substantiated or not substantiated could not be reached, but where the file may be closed for administrative reasons.
- (h) The category 'Dealt with by other means' includes notifications that were responded to by means other than an investigation, such as referral to family services or provision of advice. 'Dealt with by other means' also includes cases that were previously reported as 'No investigation possible/no action'.
- (i) Non-Indigenous status includes children whose Indigenous status is unknown or not stated.
- .. Not applicable. – Nil or rounded to zero.

- (a) Rates of children in notifications, investigations and substantiations were calculated as the number of children aged 0–16 years in each category (including those whose age was not stated) divided by the estimated population of children aged 0–16 years at 31 December, multiplied by 1000. For Indigenous children, the June projections for two years were averaged to obtain a population figure for December of the relevant year.
- (b) Rates of non-Indigenous children on care and protection orders were calculated as the number of children aged 0–17 years (including those whose age was not stated) who were on a care and protection order at 30 June, divided by the estimated population aged 0–17 at 31 March, multiplied by 1000. Rates of Indigenous children on care and protection orders were calculated as the number of children aged 0-17 years (including those whose age was not stated) who were on a care and protection order at 30 June, divided by the estimated population aged 0-17 at 30 June using 'Series B', Experimental estimates and projections, Aboriginal and Torres Strait Islander Australians, 1991 to 2021 (cat. no. 3238.0).
- (c) Non-Indigenous status includes children whose Indigenous status is unknown or not stated.

- (a) The data does not include children placed with parents or relatives who were not reimbursed.
- (b) Non-Indigenous status includes children whose Indigenous status is unknown or not stated.
- (c) The scope for out-of-home care was expanded in 2007-08 to include children in care where a financial payment has been offered but has been declined by the carer.
- (d) Improvement in data quality in 2008-09 resulted in a more accurate count of children in out of home care. The number of children in out of home care reported in 2007-08 was likely to be undercounted.
- (e) Rates for non-Indigenous children were calculated as the number of children aged 0–17 years (including those whose age was not stated) in out-of-home care at 30 June, divided by the estimated population aged 0–17 at 31 March, multiplied by 1000. Rates for Indigenous children were calculated as the number of children aged 0-17 years (including those whose age was not stated) in out-of-home care at 30 June, divided by the estimated population aged 0-17 at 30 June using 'Series B', Experimental estimates and projections, Aboriginal and Torres Strait Islander Australians, 1991 to 2021 (cat. no. 3238.0).
- (f) Rates were calculated as the number of children aged 0–17 years (including those whose age was not stated) in at least one out-of-home care placement during the year, divided by the estimated population aged 0–17 at 31 December, multiplied by 1000. For Indigenous children, the June projections for two years were averaged to obtain a population figure for December of the relevant year.

(b) The NT is unable to reliably distinguish between respite and non-respite care. As a result both types of placement were included if they satisfy the definition of out-of-home care.					
(c) A change in the counting algorithm for 2008-09 resulted in a more accurate distribution in the length of time in Out of Home Care compared with 2007-08. In addition, improvement in data quality in 2008-09 resulted in a more accurate count of children in out of home care. - (a) The percentage of Indigenous children placed with Indigenous relative/kin or other Indigenous carer or Indigenous residential care was calculated excluding Indigenous children living independently and those whose living arrangements were unknown from the denominator.
- (b) The definition of 'relative/kin' used in this table is broader than the definition used in other tables because it includes kin relationships based on customary law.
- (c) Data on the relationship of the caregiver to children placed with non-Indigenous carers could not be provided and these children were included in the category 'other non-Indigenous carer'.
- (d) In the NT, children placed with family members have been included in the 'Indigenous relative/kin' category.

- (a) Includes only those young people who were under the supervision or case management of juvenile justice agencies on a pre- or post sentence legal arrangement or order (for example, supervised bail, remand, a community services order, parole and detention).
- (b) Juvenile justice agencies also have additional clients in detention and community supervision who are over 17 years of age.
- (c) Clients may be on multiple orders at any one time. The distribution is therefore not based on order type but on where the client was located at 30 June each year.
- (d) Karijong Juvenile Correctional Centre is excluded from NSW figures.
- (e) In Queensland, juvenile justice legislation applies to those young people who were aged 10–16 years at the time of the offence. These data, however, include 17 year olds who were still on supervision in the juvenile justice system as at 30 June each year.
- (f) Detention figures exclude individuals subject to Juvenile Justice Team Referrals. Community figures only include individuals on supervision orders.

- (a) Detention rates are based on the average population of juvenile detention centres on the last day of each quarter of the financial year (30 September, 31 December, 31 March and 30 June).
- (b) Indigenous rates for 2007-08 were calculated using 'Series B' from *Experimental estimates and projections, Aboriginal and Torres Strait Islander Australians, 1991 to 2021* (cat. no. 3238.0). Rates prior to 2007-08 were calculated using 'Low series' Indigenous population estimates from *Experimental Estimates and Projections, Aboriginal and Torres Strait Islander Australians, 1991 to 2009* (cat. no. 3238.0). Any variation in derived rates may be due to the assumptions and limitations of the base population data.
- (c) Jurisdictional comparisons need to be treated with caution, especially for states and territories with low Indigenous populations, where small number effects can introduce statistical variations that do not accurately represent trends over time or consistent differences from other jurisdictions.
- (d) NSW data from 31 March 2005 include Kariong Juvenile Correction Centre detainees, sourced from the NSW Department of Corrective Services. - (e) The rate for Indigenous young people should be treated with caution due to the small Indigenous population in the ACT. The rate ratio should also be taken into account.
- (f) The Indigenous rate ratio has been derived by the Steering Committee for the Review of Government Service Provision and is calculated by dividing the average Indigenous rate of detention with the average non-Indigenous rate of detention.

- (a) Only data from agencies that participated in both the Client Collection and the Demand for Accommodation Collection are included. Consequently, the figures understate the level of activity in SAAP agencies. Some cases were excluded due to missing data from the two collections. Adjustments have been made for the missing data in the Demand for Accommodation Collection only.
- (b) For the Client Collection, the accommodation status of a client on a particular day is based on the reported periods of accommodation within a support period. Clients may start and end accommodation on the same date. If a client starts and ends accommodation on the same day, these periods are considered to be a single period. It can reasonably be assumed that a client will not start more than one period of accommodation on the same day.
- (c) For the Demand for Accommodation Collection, data for 'not accommodated' includes only people with valid unmet requests for immediate accommodation. 'Valid unmet requests' excludes those made at an agency of an inappropriate target group, where the person or group is determined to be inappropriate for the agency, where there is no fee-free accommodation available, or where proffered assistance is refused.
- (d) This table excludes accompanied children.
- (e) A two-week Demand for Accommodation Collection is conducted annually to gather information about homeless people whose requests for accommodation were unable to be met by SAAP agencies. The collection for each financial year is held in December and May, except in 2006-07 when the collection was held in August and May.
- (f) Comparisons between years should be treated with caution, due to variation in participation rates, differing imputation methods and because the collections were held on different dates each year.
- (g) Figures are unweighted. 324 records in the Client Collection are excluded due to errors and omissions.
- (h) Figures are unweighted. 304 records in the Client Collection are excluded due to errors and omissions.
- (i) Figures are unweighted. 79 records (daily average) in the Client Collection are excluded due to errors and omissions.
- (j) Figures are unweighted. 31.8 records (daily average) in the Client Collection are excluded due to errors and omissions.
- (k) Figures are unweighted. 27.1 records (daily average) in the Client Collection are excluded due to errors and omissions.

- (a) Client figures have been weighted to adjust for agency non-participation and client non-consent; figures on number of valid unmet requests have been rounded by 10 and based on valid unmet requests only. Since a client may have support periods in more than one state or territory, state and territory figures do not sum to the national figure.
- (b) Unmet requests exclude requests where the person or group refused an offer of accommodation; where the person or group was inappropriate for the agency; and where the request was not met because there was no fee-free accommodation available. People may make more than one request for accommodation in a day. Data are based on the first valid unmet request for accommodation made.
- (c) Caution should be applied when interpreting numbers of people with valid unmet requests, for several reasons. First, person(s) can make requests on more than one occasion and to more than one SAAP agency. While double counting has been limited by estimating the first valid unmet request, this information may not have been available to record. Second, a number of people may receive ongoing support or accommodation from a SAAP agency at a later time, quite possibly soon after their initial request. Third, a number of people have their needs met by other means and do not return to a SAAP agency. Finally, there are also shortfalls in pro-rating from a two-week collection period to the full year. Many factors influence the capacity of individual SAAP agencies to meet day-to-day demand for their services and it is not possible to identify a two-week period which is 'typical' for all SAAP agencies.
- (d) Figures for SAAP clients exclude accompanying children, while figures for people with unmet requests include accompanying children. The client collection data is not comparable with the unmet demand data.
- (e) Until 2004-05, this measure compared the proportion of people from these two groups who could not be accommodated with their representation among all SAAP clients (including accommodated and not accommodated). Data from 2005-06 onwards provide a direct comparison focusing on accommodation, and therefore are not comparable with earlier data.
- (f) Number of records excluded due to errors and omissions: 2184 from the Client collection, 159.2 (daily average) from the Demand for Accommodation collection.
- (g) Number of records excluded due to errors and omissions: 2033.

(a) Totals may not add up to 100 per cent as a result of rounding.

(b) A two-week Demand for Accommodation Collection is conducted annually to gather information about homeless people who are not accepted as clients of SAAP agencies. In 2006-07, the collection was held between 2-8 August 2006 and 16-22 May 2007.

(c) Valid unmet requests' excludes those made at an agency of an inappropriate target group, where the person or group is determined to be inappropriate for the agency, where there is no fee-free accommodation available, or where proffered assistance is refused.

(d) Caution should be applied when interpreting numbers of unmet requests, for several reasons. Firstly, person(s) can make requests on more than one occasion and to more than one SAAP agency. Secondly, a number of the people may receive the ongoing support or accommodation from a SAAP agency at a later time, quite possibly soon after their initial request. Thirdly, a number of people have their needs met by other means and do not return to a SAAP agency. And finally, there are shortfalls in pro-rating from a two-week collection period to the full year. Many factors influence the capacity of individual SAAP agencies to meet day-to-day demand for their services therefore it is not possible to identify a two-week period, which is 'typical' for all SAAP agencies.

(e) Comparisons between years should be treated with caution, due to variation in participation rates, differing imputation methods and because the collections were held on different dates each year.

- (a) Only agency level recurrent allocations are included in the funding analysis.
- (b) Does not include State and Territory only funding to SAAP services to assist with service viability and/or to SAAP like activities over and above the funding provided by the SAAP V agreement.
- (c) A small number of SAAP agencies received recurrent funding but did not submit any client forms to the NDCA.
- (d) Support period figures have been weighted to adjust for agency non-participation. Therefore, recurrent allocation values pertain to all SAAP (participating and non-participating) agencies.
- (e) Recurrent funding calculated using ABS GDP expenditure implicit price deflators (2007-08 = 100).
- (f) Data for 2006-07 includes Innovation and Investment funding.

(a) Ongoing clients (not ended by 30 June) were included in the data.

(b) Only agency level recurrent allocations are included in the funding analysis.

(c) Does not include State and Territory only funding to SAAP services to assist with service viability and/or to SAAP like activities over and above the funding provided by the SAAP V agreement.

(d) There was a small number of SAAP agencies that received recurrent funding but did not send in any client forms. These agencies were included in the data.

(e) Client figures have been weighted to adjust for agency non-participation and client non-consent. Therefore, the funding values pertain to all SAAP (participating and non-participating) agencies.

(f) State or Territory client numbers refer to the State or Territory in which they were first supported, as some clients were supported in more than one State or Territory during a year. Since a client may have support periods in more than one state or territory, state and territory figures do not sum to the national figure.

(g) Data for 2006-07 includes Innovation and Investment (I&I) funding.

(h) Recurrent funding calculated using ABS GDP expenditure implicit price deflators (2007-08 = 100).

(i) Data have been rounded.

- (a) The accommodation load of agencies was calculated by dividing the number of accommodation days by the number of days the agency was operational during the reporting period, where the number of accommodation days equals the sum of accommodation days for all clients of an agency who were supported during the reporting period. The average accommodation load was the mean value of all agencies' accommodation loads. Support periods without valid accommodation dates were assigned the inter-quartile modal duration of accommodation for agencies of the same service delivery model in the same jurisdiction.
- (b) The caseload of agencies was calculated by dividing the number of support days by the number of days the agency was operational during the reporting period, where the number of support days equals the sum of support days for all clients of the agency who were supported during the reporting period. The average caseload was the mean value of all agencies caseloads. Support periods without valid support dates were assigned the inter-quartile modal duration of support for agencies of the same service delivery model in the same jurisdiction.
- (c) Figures were unweighted and have not been adjusted for agency non-participation and client non-consent.

(a) Figures have been weighted to adjust for agency non-participation and client non-consent.

(b) The definition of 'exiting to independent housing' includes 'not returning to SAAP within six months'.

(c) Data exclude high volume records as not all items are included on high volume forms.

(d) Caution should be applied when interpreting these figures. Consent and valid alpha codes are required for each support period for the clients; after support information is not commonly completed; and particular client groups (for example, women escaping domestic violence) may be under represented in this calculation because of a higher incidence of non-consent.

(e) A client may receive two or more periods of support in the year. To minimise double counting of individual clients, only one record per client which has exit information has been included in the analysis.

**Table 15A.208 Indicative estimates of clients exiting to independent housing and not returning within six months (a), (b), (c), (d), (e), (f), (g)**

	<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
(f)	SAAP agencies that had no completed support periods leaving to independent housing were included in the analysis.									
(g)	For 2004-05 data, State client numbers refer to the State in which they were first supported, as some clients were supported in more than one State. Ongoing clients at 1 July 2004 are included in the client data.									
(h)	For 2004-05 data, the reference period is 18 months because the six months to 30 June 2005 is not relevant to clients whose first support period ends on or after 1 July 2005. Therefore, in order to analyse a full year's data, calendar year 2004 becomes the reference period in which the client's initial support period ends and 2004-05 becomes the reference period for clients returning to SAAP services.									
(i)	State client numbers refer to the State in which they were first supported, as some clients were supported in more than one state during 2005-06.									
(j)	In 2004-05, clients whose support period ends on or after 1 January 2004 and before 1 January 2005 were included in the analysis; 29 520 records were excluded due to errors and omissions.
