

# 11A Primary and community health — attachment

Definitions for the indicators and descriptors in this attachment are in section 11.5. Data in this Report are examined by the Health Working Group, but have not been formally audited by the Secretariat. Unsourced information was obtained from the Australian, State and Territory governments.

This file is available in Adobe PDF format on the Review web page ([www.pc.gov.au/gsp](http://www.pc.gov.au/gsp)). Users without internet access can contact the Secretariat to obtain these tables (see details on the inside front cover of the Report).

Table 11A.2

**Table 11A.2 Australian Government real expenditure per person on GPs  
(2009-10 dollars) (a), (b), (c)**

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
2005-06	295.6	275.2	279.9	236.0	297.3	273.8	203.9	148.8	278.2
2006-07	295.5	271.3	270.7	230.0	288.7	267.2	209.3	147.5	273.9
2007-08	302.1	280.8	277.5	233.7	296.8	276.3	215.2	157.7	281.1
2008-09	293.3	272.4	271.3	221.3	291.8	265.6	207.1	154.1	272.7
2009-10	293.7	275.6	274.8	221.4	295.1	272.7	206.4	163.8	274.8

- (a) The data include expenditure on Medicare Australia, the Practice Incentives Program (PIP), Department of Veterans' Affairs (DVA), Divisions of General Practice (DGP) and the General Practice Immunisation Incentive Scheme (GPPII).
- (b) DVA data include consultations by local medical officers (LMO), whether vocationally registered GPs or not. From available files, it is not possible to extract the amounts paid to LMOs (as opposed to specialists) for procedural items. It is expected, however, that the amounts for LMO procedural services are small compared with payments for LMO consultations.
- (c) Some primary care services are provided by salaried GPs in community health services, particularly in rural and remote areas, through accident and emergency departments and Aboriginal community controlled health services (ACCHSs). Consequently, expenditure reported through Medicare fee-for-service statistics will be understated in jurisdictions with larger proportions of rural and remote populations.

*Source:* DoHA (Department of Health and Ageing) unpublished, MBS, PIP, GPPII, DGP and DVA data collections.

2009-10	6 893	4 901	3 993	1 615	1 546	417	238	127	19 729
FWE GPs per 100 000 people									
2005-06	92.4	84.3	86.3	72.0	90.5	79.1	63.3	46.8	85.8
2006-07	94.1	84.7	85.4	71.4	89.5	79.2	66.8	48.3	86.1
2007-08	94.8	86.7	86.1	71.5	90.9	80.7	67.5	52.6	87.2
2008-09	95.9	87.5	87.7	70.4	93.2	80.4	67.0	51.7	88.1
2009-10	95.1	88.1	88.0	70.0	94.0	82.1	66.5	54.8	88.1

(a) FWEs are calculated for each practitioner by dividing the practitioner's Medicare billing by the mean billing of full time practitioners for that reference period. For example, a FWE value of 2 indicates that the practitioner's total billing is twice that of the mean billing of a full time practitioner.

(b) GP and FWE data include vocationally recognised GPs and other medical practitioners (OMPs).

(c) GP numbers are based on doctors' major practice postcodes as at the last quarter of the reference period. The major practice postcode is the location at which a doctor rendered the most services. FWE numbers are based on doctors' practice location postcodes at which services were rendered within the reference period.

(d) Data may differ from that published elsewhere due to use of different methods to allocate GP numbers and FWE.

Source: DoHA unpublished, MBS data collection.

(a) Includes non-referred attendances by vocationally recognised GPs and OMPs, and practice nurses.

(b) Rates are age standardised to the Australian population as at 30 June 2001.

Table 11A.4

**Table 11A.4 GP-type service use per 1000 population (a), (b), (c), (d)**

	NSW	Vic	Qld	WA	SA	Tas	ACT	NT	Aust
--	-----	-----	-----	----	----	-----	-----	----	------

- (c) Denominator is the estimated resident population at 30 June.
- (d) Disaggregation by State/Territory and remoteness area is based on the patient's postcode at the date their last service was processed in the reference period. This is not necessarily the location where the service was received.
- (e) Medicare data presented by Indigenous status have been adjusted for under-identification in the Medicare Australia Voluntary Indigenous Identifier (VII) database. Indigenous rates are therefore modelled and should be interpreted with caution. These statistics are not derived from the total Australian Indigenous population, but from those Aboriginal and Torres Strait Islander people who have voluntarily identified as Indigenous to Medicare Australia. The statistics have been adjusted to reflect demographic characteristics of the overall Indigenous population, but this adjustment may not address all the differences in the service use patterns of the enrolled population relative to the total Indigenous population. The level of VII enrolment (50% nationally as at August 2010) varies across age-sex-remoteness-state/territory sub-groups and over time which means that the extent of adjustment required varies across jurisdictions and over time. Indigenous rates should also be interpreted with caution due to small population numbers in some jurisdictions.
- (f) Total includes persons whose place of residence was not stated or who could not be assigned to a remoteness category.

.. Not applicable.

**ASR** = Age standardised rate. **RSE** = relative standard error.

(a) Data are for number of people who used a public dental service at least once in the previous 12 months, not for number of services provided.

(b) Type of service at the most recent visit. Emergency visit is a visit for relief of pain. Classification of service type as per Australian Dental Association Schedule of Dental Services.

(c) Rates are age standardised to the Australian population as at 30 June 2001.

(d) Limited to dentate persons aged 5 years or over

Source: AIHW (unpublished) National Dental Telephone Interview Survey; ABS (unpublished) Estimated Residential Population, 30 June.

**Table 11A.8 Indigenous primary healthcare services for which OATSIH Services Reporting (OSR) data are reported, 2008-09 (number)**  
**(a), (b), (c)**

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
2008-09	39	24	31	28	14	10	2	57	205

- (a) The OSR only includes Aboriginal and Torres Strait Islander health organisations that receive at least some of their funding from the Australian government to facilitate access to primary health care (including health promotion, dental and counselling services).
- (b) The number of services that provide OSR data changes each year. Changes are due to new Australian government funded primary health care services opening and existing services gaining Australian government funding. In addition, previously excluded Australian government funded services may be required to commence OSR data reporting if there are changes in the types of services provided and/or reporting arrangements.
- (c) The OSR data collection replaces the previous Service Activity Reporting (SAR) data collection from 2008-09. OSR data are not comparable with SAR data for previous years due to changes in collection methodology.

*Source:* AIHW unpublished, OSR data collection.

**Table 11A.9 Services and episodes of healthcare by Indigenous primary healthcare services for which OATSIH Services Reporting (OSR) data are reported, by remoteness category, 2008-09 (number) (a), (b), (c)**

	<i>Major cities</i>	<i>Inner regional</i>	<i>Outer regional</i>	<i>Remote</i>	<i>Very remote</i>	<i>Total</i>
Services						
2008-09	26	40	50	29	60	205
Episodes of healthcare						
2008-09	290 000	313 000	539 000	503 000	444 000	2 089 000

- (a) An episode of care involves contact between an individual client and service staff for the provision of health care. Group work is not included. Transport is included only if it involves provision of health care/information by staff. Outreach provision, for example episodes at outstation visits, park clinics, satellite clinics, is included. Episodes of health care delivered over the phone are included.
- (b) Remoteness categories are defined using the Australian Standard Geographical Classification (AGSC), based on the ABS *2006 Census of population and housing*.
- (c) The OSR data collection replaces the previous Service Activity Reporting (SAR) data collection from 2008-09. OSR data are not comparable with SAR data for previous years due to changes in collection methodology.

*Source:* AIHW unpublished, OSR data collection.

**Table 11A.10 Proportion of Indigenous primary healthcare services for which OATSIH Services Reporting (OSR) data are reported that undertook selected health related activities, 2008-09 (per cent) (a), (b), (c)**

Diagnosis and treatment of illness/disease	85
Management of chronic illness	89
Transportation to medical appointments	86
Outreach clinic services	55
24 hour emergency care	31
Monitoring child growth	64
School-based activities	68
Hearing screening	72
Pneumococcal immunisation	76
Influenza immunisation	82
Child immunisation	81
Women's health group	77
Support for public housing issues	58
Community development work	60
Legal/police/prison/advocacy services	42
Dental services	52
Involvement in steering groups on health	77
Participation in regional planning forums	57
Dialysis services	4

(a) The OSR only includes Aboriginal and Torres Strait Islander health organisations that receive at least some of their funding from the Australian government to facilitate access to primary health care (including health promotion, dental and counselling services).

(b) The denominator is the number of services that provided valid data for this question (201). Some services in the OSR are funded for and provide a full range of comprehensive primary health care activities, while others focus on specific elements of primary health care such as health promotion.

(c) The OSR data collection replaces the previous Service Activity Reporting (SAR) data collection from 2008-09. OSR data are not comparable with SAR data for previous years due to changes in collection methodology.

Source: AIHW unpublished, OSR data collection.

Table 11A.11

**Table 11A.11 Full time equivalent (FTE) health staff employed by Indigenous primary healthcare services for which OATSIH Services Reporting (OSR) data are reported, as at 30 June 2009 (number) (a), (b), (c)**

	<i>Indigenous staff</i>	<i>Non-Indigenous staff</i>	<i>Total staff (d), (e)</i>
Aboriginal health workers	724	21	745
Doctors	16	317	333
Nurses	51	499	550
Specialists	–	5	5
Emergency workers	11	2	13
Counsellors/social workers	46	32	78
Other social and emotional wellbeing staff (f)	252	81	344
Allied health professionals (g)	77	90	181
Dentists	7	31	38
Dental assistants	40	18	58
Traditional healers	7	1	8
Sexual health workers	43	13	56
Substance misuse workers	59	40	99
Environmental health workers	22	5	27
Driver/field officers	196	33	229
<b>Total health staff (d), (e)</b>	<b>1 551</b>	<b>1 188</b>	<b>2 764</b>

- (a) The number of services that provide OSR data changes each year. Changes are due to new Australian government funded primary health care services opening and existing services gaining Australian government funding. In addition, previously excluded Australian government funded services may be required to commence OSR data reporting if there are changes in the types of services provided and/or reporting arrangements.
- (b) FTE positions are rounded to the nearest whole number.
- (c) The OSR data collection replaces the previous Service Activity Reporting (SAR) data collection from 2008-09. OSR data are not comparable with SAR data for previous years due to changes in collection methodology.
- (d) Totals may not add due to rounding and cell suppression.
- (e) Total includes 36 FTE health staff for whom Indigenous status was not provided.
- (f) Other social and emotional wellbeing staff includes: Bringing Them Home and Link Up counsellors, psychologists, mental health workers and other social and emotional wellbeing staff. Total includes 11 FTE staff for whom Indigenous status was not provided.
- (g) Total allied health professionals includes 14 FTE staff for whom Indigenous status was not provided.  
– Nil or rounded to zero.

Table 11A.14 **Availability of GPs by region (a), (b), (c), (d), (e)**

	<i>NSW (f)</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT (f)</i>	<i>NT</i>	<i>Aust</i>
(a)	Geographical locations are based on the Rural, Remote and Metropolitan Areas (RRMA) classification. Urban areas consist of capital city and other metro areas. Rural areas consist of large rural centres, small rural centres, other rural areas, remote centres, other remote areas and other areas.								
(b)	GP and FWE data include vocationally recognised GPs and other medical practitioners (OMPs).								
(c)	FWEs are calculated for each practitioner by dividing the practitioner's Medicare billing by the mean billing of full time practitioners for that reference period. For example, a FWE value of 2 indicates that the practitioner's total billing is twice that of the mean billing of a full time practitioner.								
(d)	GP numbers are based on doctors' major practice postcodes as at the last quarter of the reference period. The major practice postcode is the location at which a doctor rendered the most services. FWE numbers are based on doctors' practice location postcodes at which services were rendered within the reference period.								
(e)	Data may differ from that published elsewhere due to use of different methods to allocate GP numbers and FWE.								
(f)	From 2007-08, data are reported separately for NSW and the ACT. Historical data for NSW and the ACT are combined for confidentiality reasons. The ACT has no rural areas.

	Target population (j)	no.	483 341	354 239	254 052	119 267	36 385	15 916	8 193	1 403 864
	Proportion of target population assessed	per 1000 people	244.4	220.4	263.8	213.1	252.1	173.6	178.4	235.2

(a) Older people are defined as Indigenous people aged 55 years or over and non-Indigenous people aged 75 years or over, excluding people living in residential aged care facilities.

(b) Indigenous status is determined by self-identification. Indigenous people aged 75 years or over may have received a health assessment under the 'all older people' MBS items. This is considered unlikely to affect overall proportions significantly, due to the relatively low average life expectancy of Indigenous people.

Table 11A.18

**Table 11A.18 Annual health assessments for older people by Indigenous status (a), (b), (c), (d), (e)**

	Unit	NSW	Vic	Qld	WA	SA	Tas	ACT	NT	Aust (f)
--	------	-----	-----	-----	----	----	-----	-----	----	----------

- (c) Excludes services that qualify under the DVA National Treatment Account and services provided in public hospitals.
- (d) Historical data may differ slightly from data in previous reports due to a change in the methodology used to derive population estimates.
- (e) Allocation of patients to state or territory is based on the final claim processed for each patient in the reference period. Data are for number of patients receiving a health assessment rather than number of health assessments provided.
- (f) Includes Other Territories.
- (g) Includes claims for MBS items 704, 706 and 715 for Indigenous people aged 55 years or over.
- (h) Projected population of Indigenous people aged 55 years or over at 30 June (B series). Projections are based on estimated resident population (ERP) at 30 June 2006.
- (i) Includes claims for MBS items 700, 702, 701, 703, 705 and 707 for people aged 75 years or over.
- (j) Estimated resident population aged 75 years or over at 30 June.

Proportion assessed	111.1	98.5	164.6	165.0	60.9	30.9	208.1	219.9	137.9

(a) Excludes services that qualify under the DVA National Treatment Account and services provided in public hospitals.

(b) Allocation of patients to state/territory based on the final claim processed for each patient in the reference period. Data are for number of patients receiving a health assessment/check rather than number of health assessments/checks provided. Indigenous status is determined by self-identification.

(c) Includes Other Territories.

(d) Child health checks for children 0–14 years and older people's health assessments for people 55 years or over are available on an annual basis. Data are for the 2009–10 financial year. Projected target population at 30 June 2009 (B series), based on the estimated resident population (ERP) at 30 June 2006.

(e) Health checks available for adults 15–54 years on a biennial basis until 30 April 2010. From 1 May 2010 available annually. Data are for the 24 month period 1 July 2008 to 30 June 2010. Projected target population (B series) at 30 June 2009, based on the ERP at 30 June 2006.

Source: DoHA unpublished, MBS data collection; ABS 2009, *Experimental estimates and projections, Aboriginal and Torres Strait Islander Australians 1991 to 2021*, Cat. no. 3238.0, Canberra.

**Table 11A.21 Early detection activities provided by Indigenous primary healthcare services for which OATSIH Services Reporting (OSR) data are reported, 2008-09 (per cent) (a)**

Early detection activities provided	
Well person's checks	80
PAP smears/cervical screening	80
STI screening	73
Hearing screening	72
Eye disease screening	69
Renal disease screening	54
Diabetic screening	78
Cardiovascular screening	66
Any early detection activity	90

(a) The denominator is the number of services that provided valid data for this question (201). Some services in the OSR are funded for and provide a full range of comprehensive primary health care activities, while others focus on specific elements of primary health care such as health promotion.

Source: AIHW unpublished, OSR data collection.

Table 11A.22

Table 11A.22 Proportion of children receiving a fourth year developmental health check, 2009-10 (per cent) (a)

Aboriginal and Torres Strait Islander Child Health Check (b)	27.8	21.7	35.2	35.5	17.3	np	np	45.5	31.0
Healthy Kids Check (c), (d)	20.3	6.7	28.1	15.1	10.2	20.5	12.4	17.6	17.2
Remoteness of residence									
Major cities (e)	17.7	6.3	26.7	16.4	9.6	..	12.3	..	15.5
Inner regional	29.8	9.4	30.6	14.9	13.9	19.4	..	..	22.3
Outer regional	24.9	6.8	33.3	17.1	11.1	19.6	..	13.8	22.7
Remote/Very remote	45.6	np	25.1	17.1	13.0	10.0	..	46.2	27.0
<b>Total (f)</b>	<b>20.6</b>	<b>6.9</b>	<b>28.5</b>	<b>16.3</b>	<b>10.5</b>	<b>19.2</b>	<b>12.3</b>	<b>29.2</b>	<b>17.8</b>

(a) Patient allocation based on patient postcode at the date their last service was processed in the reference period. This is not necessarily the location where the service was received. Data are for number of patients receiving a health assessment/check rather than number of health assessments/ checks provided.

(b) Includes claims for Medicare Benefits Schedule (MBS) Item 708 (Aboriginal and Torres Strait Islander Child Health Check) and Item 715 (Aboriginal and Torres Strait Islander Peoples Health Assessment) for children aged three to five years.

(c) Includes claims for MBS items 709 and 711 (Healthy Kids Check) and items 701, 703, 705, 707 and 10986 (Health Assessment) for children aged three to five years. The MBS items included in this indicator measure do not cover all developmental health check activity such as that conducted through State and Territory early childhood health assessments in preschools and community health centres.

(d) Note this includes Indigenous children who have received a Healthy Kids Check.

(e) ACT Major cities includes a small number of children living in Inner regional ACT.

(f) Total includes persons whose place of residence was not stated or who could not be assigned to a remoteness category.

**RSE** = relative standard error.

- (a) Time waited between making an appointment and seeing the GP for urgent medical care. 'Urgent' as defined by respondent.
- (b) Persons aged 15 years or over who saw a GP for urgent medical care for their own health in the last 12 months.
- (c) Rates are age-standardised to the 2001 estimated resident population.
- (d) Estimates with RSEs between 25 per cent and 50 per cent should be used with caution. Estimates with RSEs greater than 50 per cent are considered too unreliable for general use.

Source: ABS unpublished, Patient Experience Survey 2009.

Very remote	126	..	1 974	838	824	72	..	4 436	8 270
<b>Total (f)</b>	<b>677 722</b>	<b>550 909</b>	<b>371 362</b>	<b>207 451</b>	<b>116 998</b>	<b>47 837</b>	<b>46 182</b>	<b>35 876</b>	<b>2 054 337</b>

(a) GP-type emergency department presentations were defined as presentations for which the type of visit was reported as emergency presentation, which did not arrive by ambulance or by police or other correctional vehicle, with a triage category of 4 (semi-urgent) or 5 (non-urgent), and where the episode end status was not admitted to the hospital, or referred to another hospital, or died.

(b) Data are presented by the state/territory of usual residence of the patient, not by the state/territory of the hospital.

(c) Limited to peer group A and B public hospitals.

(d) The quality of the data reported for Indigenous status in emergency departments has not been formally assessed for completeness; therefore, caution should be exercised when interpreting these data.

(e) Remoteness areas are defined using the Australian Standard Geographical Classification (ASGC), based on the ABS 2006 Census of population and housing. Not all remoteness areas are represented in each state or territory. There were: no major cities in Tasmania; no outer regional, remote or very remote areas in the ACT; no major cities or inner regional areas in the NT. Disaggregation by remoteness area is by usual residence of the patient.

(f) Total includes separations for which a remoteness area could not be assigned as the place of residence was unknown or not stated.

.. Not applicable.

**Table 11A.31 Proportion of full time workload equivalent (FWE) GPs with vocational registration, by region (per cent) (a), (b), (c), (d)**

	<i>Capital city</i>	<i>Other metro centre</i>	<i>Large rural centre</i>	<i>Small rural centre</i>	<i>Other rural area</i>	<i>Remote centre</i>	<i>Other remote area</i>	<i>Aust</i>
2005-06	93.1	90.3	90.7	84.2	83.1	68.2	72.9	90.6
2006-07	92.9	90.0	90.3	83.5	83.3	71.3	68.8	90.4
2007-08	92.7	89.9	87.6	82.2	83.1	71.0	65.5	90.0
2008-09	92.6	89.6	87.5	81.8	83.4	70.4	67.3	89.9
2009-10	92.6	89.6	87.1	80.2	83.3	68.9	69.6	89.7

- (a) Capital city = State and Territory capital city statistical divisions; other metropolitan centre = one or more statistical subdivisions that have an urban centre with a population of 100 000 or more; large rural centre = SLAs where most of the population resides in urban centres with a population of 25 000 or more; small rural centre = SLAs in rural zones containing urban centres with populations between 10 000 and 24 999; other rural area = all remaining SLAs in the rural zone; remote centre = SLAs in the remote zone containing populations of 5000 or more; other remote area = all remaining SLAs in the remote zone.
- (b) FWEs are calculated for each practitioner by dividing the practitioner's Medicare billing by the mean billing of full time practitioners for that reference period. For example, a FWE value of 2 indicates that the practitioner's total billing is twice that of the mean billing of a full time practitioner.
- (c) GP numbers are based on doctors' major practice postcodes as at the last quarter of the reference period. The major practice postcode is the location at which a doctor rendered the most services. FWE numbers are based on doctors' practice location postcodes at which services were rendered within the reference period. In the small proportion of cases where data values were not reported, doctors were reallocated based on available information.
- (d) Data may differ from that published elsewhere due to use of different methods to allocate GP numbers and FWE.

Source: DoHA unpublished, MBS data collection.

(a) Includes practices accredited by either of Australia's two accrediting bodies. Data from General Practice Australia Accreditation *plus* (GPA Accreditation *plus*) were reported for the first time in the 2008 Report.

(b) Includes practices registered for accreditation but not yet accredited, in addition to accredited practices.

(c) Preliminary data for the total number of practices, collected by the Primary Health Care Research and Information Service (PHC RIS) for the Annual Survey of Divisions (ASD), in response to the question "How many general practices were in your Division's catchment area at 30 June 2010". Data were provided by all Divisions of General Practice as required under contractual agreements with DoHA. Where Division amalgamations or liquidations have occurred, the practices in these catchments areas have been accounted for in the data to provide the most accurate estimate possible. Practices counted by location. Numbers of practices may vary between collection agencies depending on how a general practice is defined.

(a) A SWPE is an indicator of practice workload based on the number of patients seen. The SWPE value for a jurisdiction is the sum of the fractions of care provided by doctors in that jurisdiction to their patients, weighted for the age and sex of each patient in accordance with national ratios.

(b) Services may vary in type and quality.

**Table 11A.35 Prescriptions for oral antibiotics used most commonly in the treatment of upper respiratory tract infections ordered by GPs (a), (b), (c)**

<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Q/d</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
-------------	------------	------------	------------	-----------	-----------	------------	------------	-----------	-------------

- (a) The oral antibiotics used most commonly in treating upper respiratory tract infection are: phenoxymethylpenicillin (penicillin V); amoxicillin V; erythromycin; roxithromycin; cefaclor; amoxicillin+clavulanic acid; doxycycline; clarithromycin; and cefuroxime. All active PBS item codes associated with each of these generic names were extracted for each year.
- (b) Data include prescriptions ordered by vocationally recognised GPs and other medical practitioners (OMPs) and dispensed to patients.
- (c) Estimated residential population at 31 December.
- (d) Data are presented for all people for the first time. Data for concession card holders may differ from previous Reports, which included prescriptions ordered by other medical practitioners.
- (e) Numbers of concession card holders were obtained from the Department of Families, Housing, Community Services and Indigenous Affairs.

Very remote	11.4	..	3.8	8.9	8.4	17.2	..	13.9	8.7
<b>Total (g)</b>	<b>17.4</b>	<b>19.2</b>	<b>17.4</b>	<b>17.1</b>	<b>21.1</b>	<b>21.3</b>	<b>14.0</b>	<b>12.4</b>	<b>18.1</b>

(a) Data do not account for GPs who provide the annual cycle of care but do not claim the MBS item.

(b) While clinical guidelines are for Type 2 diabetes, the MBS items do not specify Type 2 diabetes. Clinical guidelines represent the minimum level of care required. While the minimum frequency of glycosolated heamoglobin (HbA1c) testing according to clinical guidelines is at least 6 monthly for adults and 3 monthly for children and adolescents, the MBS annual cycle of care requires only annual testing, irrespective of age.

(c) Denominator data (estimated number of people with diabetes) are from the National Diabetes Services Scheme (NDSS). NDSS registration is voluntary; the NDSS is estimated to cover 80 per cent to 90 per cent of people with diagnosed diabetes. Historical data may vary from previous reports for which denominator data were estimated using NHS prevalence data.

(d) Regions are defined using the Australian Standard Geographical Classification (AGSC), based on the *ABS 2006 Census of population and housing*. The accuracy of the classifications decreases over time due to changes in demographics within postcode boundaries in the intercensal periods. Not all remoteness areas are represented in each state or territory. There were: no major cities in Tasmania; no outer regional, remote or very remote areas in the ACT; no major cities or inner regional areas in the NT.

(e) Excludes records where postcode was invalid or did not map to a remoteness area, except for totals.

(f) Historical data may differ from previous Reports due to changed methodology associated with a change in data provider. Data reported here are not comparable with data in previous Reports.

(g) Total includes persons whose place of residence was not stated or who could not be assigned to a remoteness category.

.. Not applicable. np Not published.

**ASR** = age standardised rate. **RSE** = relative standard error. **CI** = confidence interval.

- (a) Separate estimates for the NT are not available for the 2001 or 2004-05 surveys, and are available only for 'all ages' for the 2007-08 survey. However, NT data are included in national estimates.
- (b) Estimates with RSEs between 25 per cent and 50 per cent should be used with caution. Estimates with RSEs greater than 50 per cent are considered too unreliable for general use and are not published. However, these data contribute to national estimates.
- (c) For 'all ages', 2007-08 data are age standardised to the Australian population at 30 June 2001. These data differ from previous reports which reported crude rates.

**RSE** = relative standard error. **CI** = confidence interval

(a) Persons who have been told by a doctor they have asthma, and the asthma is current and long-term.

(b) Estimates with RSEs between 25 per cent and 50 per cent should be used with caution. Estimates with RSEs greater than 50 per cent are considered too unreliable for general use and are not published.

(c) Rates are age standardised to the Australian estimated resident population at 30 June 2001.

(d) Regions are defined using the Australian Standard Geographical Classification (AGSC), based on the ABS 2006 Census of population and housing. The accuracy of the classifications decreases over time due to changes in demographics within postcode boundaries in the intercensal periods. Not all remoteness areas are represented in each state or territory. There were: no major cities in Tasmania; no outer regional, remote or very remote areas in the ACT; no major cities or inner regional areas in the NT.

(e) Very remote data were not collected in the 2007-08 National Health Survey.

na not available. .. Not applicable. – Nil or rounded to zero. np Not published.

**Table 11A.40 Pathology tests ordered by vocationally recognised GPs and other medical practitioners (OMPs), and claimed through Medicare, real benefits paid (2009-10 dollars) and number of tests (a), (b), (c), (d)**

	<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
(a)	DVA data are included for number of pathology tests and benefits paid on tests.									
(b)	Standard DVA reports do not distinguish between the various providers who request pathology services and do not record numbers of tests but rather paid for items.									
(c)	In general, Medicare benefits are payable for a maximum of three tests performed on a specimen.									
(d)	Includes Patient Episode Initiated (PEI) Items.									
(e)	From 1 November 2009 benefits for PEI Items were reduced and bulk billing incentives for PEI Items commenced . This contributed to a change in the mix and amount of benefits for tests ordered by GPs and OMPs.									

*Source:* DoHA unpublished, MBS and DVA data collections.

PIP eHealth Incentive — uptake (c)	no.	1 280	971	793	333	274	102	57	20	3 830
Share of PIP practices	%	75.3	80.3	80.8	81.4	77.4	82.9	85.1	52.6	78.5

(a) Not all practices are involved in PIP, and the proportion may vary across jurisdictions.

(b) A SWPE is an indicator of practice workload based on the number of patients seen. The SWPE value for a jurisdiction is the sum of the fractions of care provided by doctors in that jurisdiction to their patients, weighted for the age and sex of each patient in accordance with national ratios.

(c) In August 2009 the two-part PIP information management/information technology (IM/IT) incentive was replaced with the PIP eHealth incentive, intended to encourage general practices to keep up-to-date with the latest developments in eHealth. To be eligible for the PIP eHealth Incentive, practices must: have a secure messaging capability provided by an eligible supplier; have (or have applied for) a location/site Public Key Infrastructure (PKI) certificate for the practice and each practice branch, and make sure that each medical practitioner from the practice has (or has applied for) an individual PKI certificate; and, provide practitioners from the practice with access to a range of key electronic clinical resources.

Data for 2007 to 2009 are presented for both parts of the PIP IM/IT incentive. Data for 2010 are presented for the eHealth incentive.

Data for the first PIP IM/IT incentive, which ended in November 2006, are available in previous Reports.

Source: DoHA unpublished, MBS and PIP data collections.

Table 11A.45

**Table 11A.45** Proportion of people who had a pathology or imaging test in the previous 12 months where the referring health professional explained the reasons for the most recent test, 2009 (a), (b)

	Unit	NSW	Vic	Qld	WA	SA	Tas	ACT	NT	Aust
Proportion	%	98.5	98.5	98.5	98.5	97.8	97.9	98.8	96.2	98.4
Relative standard error	%	0.6	0.6	0.4	0.5	0.7	0.8	1.3	2.0	0.3
95 per cent confidence interval	%	± 1.2	± 1.2	± 0.8	± 1.0	± 1.3	± 1.6	± 2.5	± 3.7	± 0.6

(a) People aged 15 years and over who had a pathology test for which they had been referred in the previous 12 months, (excluding tests had in hospital); and persons who had been referred to their most recent imaging test by a health professional (excluding tests had in hospital and dental tests).

(b) Rates are age standardised to the 2001 estimated resident population (5 year ranges).

- (a) The chronic disease management items include GP only care plans, multidisciplinary care plans (A15 subgroup 1) and case conferences (A15 subgroup 2, excluding items relating to consultant physician and psychiatrists). Services that qualify under the DVA National Treatment Account or services provided in public hospitals are not included.
- (b) The increase in the number of GPs using chronic disease management MBS items for care planning or case conferencing between 2004-05 and 2005-06 may reflect increasing awareness of the Strengthening Medicare initiative, introduced on 1 July 2004. This initiative provided access to a range of allied health and dental care treatments for patients with chronic conditions and complex needs, on referral from a GP. The continued increase in subsequent years may be linked to the introduction of additional chronic disease management MBS items on a number of occasions.
- (c) GPs are defined as those General Practitioners and Other Medical Practitioners who have claimed at least 1500 non-referred attendances in the relevant financial year. GPs are counted only in the state/territory where they claimed the most services - this prevents double counting.

Table 11A.49

**Table 11A.49 Children aged 12 months to less than 15 months who were fully immunised (per cent) (a), (b), (c), (d)**

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
Fully immunised (e)									
30 June 2006	90.1	91.8	90.8	89.1	91.0	93.8	90.7	90.6	90.7
30 June 2007	91.5	91.8	90.9	88.9	90.5	91.4	94.3	91.1	91.2
30 June 2008	91.3	91.8	90.8	90.1	91.0	91.0	93.5	91.6	91.2
30 June 2009	91.9	91.9	91.0	88.9	91.5	90.3	93.6	90.3	91.3
30 June 2010	91.2	92.1	91.9	90.1	91.3	91.7	92.2	90.3	91.5
Immunised against (at 30 June 2010)									
Diphtheria, tetanus and pertussis	91.7	92.7	92.3	90.5	91.9	92.2	93.2	91.6	92.0
Polio	91.7	92.7	92.3	90.5	91.9	92.1	93.2	91.6	92.0
<i>Haemophilus influenzae</i> type b	91.5	92.5	92.1	90.3	91.7	91.9	93.0	93.5	91.8

- (a) Coverage measured at 30 June for children turning 12 months of age by 31 March, by the State or Territory in which the child was located.
- (b) The Australian Childhood Immunisation Register (ACIR) includes all children under 7 years of age who are registered with Medicare. By the age of 12 months, over 98 per cent of Australian children have been registered with Medicare (NCIRS 2000).
- (c) There may be some under-reporting by providers. Therefore, vaccine coverage estimates calculated using ACIR data are considered minimum estimates.
- (d) NT immunisation records differ from ACIR records. This may stem from delays in notifications reaching and being processed by the Health Insurance Commission (HIC), or because the cohort method of reporting immunisation coverage does not allow for assessment of 'catch up' immunisation occurring after the assessment age of 12 months. Average delay times were greatest in the NT (Hull and McIntyre 2000).
- (e) Children assessed as fully immunised at 12 months are immunised against diphtheria, tetanus, pertussis (whooping cough), polio, hepatitis b and *Haemophilus influenzae* type b.

Source: DoHA unpublished, ACIR data collection.

Table 11A.52

Table 11A.52 Proportion of children aged five years who were fully vaccinated, by Indigenous status and remoteness, 30 June 2010 (per cent) (a), (b)

	NSW	Vic	Qld	WA	SA	Tas	ACT	NT	Aust
Indigenous status									
Indigenous	85.4	88.4	87.0	80.6	76.3	89.0	90.9	90.0	85.7
Other Australians (c)	89.6	91.2	90.4	87.1	87.5	90.7	88.9	85.0	89.7
Remoteness of residence (d), (e)									
Major cities	89.3	91.1	89.9	86.3	86.4	..	89.0	..	89.3
Inner regional	90.4	91.8	90.3	87.4	86.6	90.0	91.1	..	90.3
Outer regional	89.4	90.0	91.3	87.0	91.2	91.9	..	83.0	89.8
Remote	87.0	79.6	89.6	88.9	94.2	81.6	..	89.4	89.4
Very remote	83.0	..	89.8	87.1	77.8	np	..	93.7	89.5

(a) Includes children born 1 January 2005 to 31 March 2005.

(b) Fully vaccinated is defined as having received all age appropriate immunisations for Diphtheria, Tetanus, Pertussis, Hepatitis B, Poliomyelitis, *Haemophilus influenzae* type b, Measles, Mumps and Rubella.

(c) Includes records for people whose Indigenous status is not known or not stated.

(d) Disaggregation by remoteness area is by usual residence of child. Remoteness area are defined using the Australian Standard Geographical Classification (AGSC), based on the ABS 2006 Census of population and housing. Not all remoteness areas are represented in each state or territory. There were: no major cities in Tasmania; no outer regional, remote or very remote areas in the ACT; no major cities or inner regional areas in the NT.

(e) Excludes 43 records where postcode was invalid or did not map to a remoteness category.

.. Not applicable. np Not published

ASR	59.2	63.5	58.9	60.1	62.5	59.4	62.0	58.0	60.6

**ASR** = age standardised rate.

- (a) Rates are the number of women screened as a proportion of the eligible female population calculated as the average of the Australian Bureau of Statistics estimated resident population in each of the calendar years in the reference period.  
Age-standardised rates are age-standardised to the Australian population at 30 June 2001.
- (b) The eligible female population has been adjusted for the estimated proportion of women who have had a hysterectomy, using national hysterectomy fractions calculated using national data derived from the Australian Bureau of Statistics 2001 National Health Survey.
- (c) Excludes women who have opted off the cervical cytology register.
- (d) Except where noted, number of women screened includes all women screened in each jurisdiction, not just those women resident in each jurisdiction. Data may differ from data published elsewhere in which allocation of women to jurisdictions is by residential postcode.
- (e) Data for Victoria include only residents of Victoria except for the period 2008 and 2009. Data for 2008 and 2009 may differ from data published elsewhere in which allocation of women to jurisdictions is by residential postcode.
- (f) Data for the ACT includes only residents of the ACT. Data may differ from data published elsewhere in which allocation of women to jurisdictions is by residential postcode.

Table 11A.59

**Table 11A.59 Proportion of adults 65 years or over fully vaccinated against influenza and pneumococcal disease, by remoteness, 2009 (a), (b), (c), (d)**

Unit	NSW	Vic	Qld	WA	SA	Tas	ACT	NT	Aust
------	-----	-----	-----	----	----	-----	-----	----	------

**RSE** = Relative standard error.

- (a) Estimates are for people aged 65 years or over who are fully vaccinated against both influenza and pneumococcal disease. To be 'fully vaccinated' against pneumococcal disease requires a follow-up vaccination up to 5 years after the initial vaccination. This contributes to potential error in the estimates. Influenza vaccinations have been available free to older adults since 1999 while vaccinations against pneumococcal disease became available free in 2005.
- (b) Remoteness areas are defined using the Australian Standard Geographical Classification (AGSC), based on the ABS 2006 Census of population and housing. Not all remoteness areas are represented in each state or territory. There were: no major cities in Tasmania; no outer regional, remote or very remote areas in the ACT; no major cities or inner regional areas in the NT.
- (c) Rates are age-standardised to the Australian population at 30 June 2001.
- (d) Estimates with relative standard errors (RSEs) between 25 per cent and 50 per cent should be used with caution. Estimates with RSEs greater than 50 per cent are considered too unreliable for general use and are not published.
- (e) Remote and very remote categories have been aggregated due to small numbers.
- (f) Total includes people for whom a remoteness category could not be assigned as the place of residence was unknown or not stated.
- .. Not applicable. **np** Not published.

Source: AIHW unpublished, 2009 Adult Vaccination Survey.

Table 11A.60

**Table 11A.60 Proportion of Indigenous Australians aged 50 years or over who were fully vaccinated against influenza and pneumococcal disease, 2004-05 (a)**

	Unit	NSW	Vic	Qld	WA	SA	Tas	ACT	NT	Aust
Proportion	%	18.8	23.0	36.6	29.6	35.9	32.7	8.6	54.7	31.1
Relative standard error	%	19.7	23.8	11.1	13.1	19.8	14.9	54.0	8.9	6.2

(a) Vaccinations against influenza and pneumococcal disease have been available free to Indigenous people aged 50 years or over since 1999.

(b) Estimates with RSEs between 25 per cent and 50 per cent should be used with caution. Estimates with RSEs greater than 50 per cent are considered too unreliable for general use.

Table 11A.61

**Table 11A.61 Separations for selected potentially preventable hospitalisations, 2008-09 (per 1000 people) (a), (b), (c)**

	NSW	Vic	Q/d	WA	SA	Tas (d)	ACT	NT	Aust
Vaccine-preventable conditions	0.7	0.8	0.8	0.6	0.7	0.6	0.5	2.4	0.7
Acute conditions	12.4	14.3	14.2	13.4	14.4	10.1	11.5	21.0	13.5
Chronic conditions	13.9	15.3	18.5	26.0	15.5	12.6	11.7	26.0	16.5
<b>Total (e)</b>	<b>27.0</b>	<b>30.3</b>	<b>33.3</b>	<b>39.8</b>	<b>30.4</b>	<b>23.3</b>	<b>23.6</b>	<b>48.7</b>	<b>30.6</b>

(a) Conditions defined by ICD-10-AM codes as in AIHW 2010 *Australian hospital statistics 2008-09*. Changes to the Australian Coding Standards between ICD-10-AM 5th edition (used in 2007-08) and ICD-10-AM 6th edition (used in 2008-09) resulted in decreased reporting of additional diagnoses for diabetes, and changes in the reporting of gastroenteritis. Therefore caution should be used in comparisons of these data with earlier periods.

(b) Separations are based on the state or territory of usual residence of the patient. Excludes separations for patients usually resident overseas.

(c) Rates are age standardised to the Australian population at 30 June 2001.

(d) Data for Tasmania do not include two private hospitals that account for approximately one eighth of Tasmania's total hospital separations.

(e) Totals may not sum to the individual categories as conditions in more than one category can be reported for a separation.

<b>Total (k)</b>	<b>13.9</b>	<b>15.3</b>	<b>18.5</b>	<b>26.0</b>	<b>15.5</b>	<b>12.6</b>	<b>11.7</b>	<b>26.0</b>	<b>16.5</b>	<b>16.5</b>
Total (excluding diabetes complications)										

(a) Conditions defined by ICD-10-AM codes as in AIHW 2010 *Australian hospital statistics 2008-09*. Changes to the Australian Coding Standards between ICD-10-AM 5th edition (used in 2007-08) and ICD-10-AM 6th edition (used in 2008-09) resulted in decreased reporting of additional diagnoses for diabetes. Therefore caution should be used in comparisons of these data with earlier periods.

(b) Excludes separations with a care type of Newborn without qualified days, and records for Hospital boarders and Posthumous organ procurement.

(c) Separation rates are directly age standardised to the Australian population at 30 June 2001.

(d) Separation rates are based on state or territory of usual residence.

(e) Data for Tasmania do not include two private hospitals that account for approximately one eighth of Tasmania's total hospital separations.

(f) NT data for Indigenous people are for public hospitals only.

(g) Total for Indigenous people and for non-Indigenous people comprises data for NSW, Vic, QLD, WA, SA and the NT only (NT data are for public hospitals only).

Table 11A.65 Separations for selected chronic conditions by Indigenous status, 2008-09 (per 1000 people) (a), (b), (c), (d)

	NSW	Vic	Qld	WA	SA	Tas (e)	ACT	NT (f)	Total (g)	Aust
--	-----	-----	-----	----	----	---------	-----	--------	-----------	------

(h) Data for Indigenous people and for non-Indigenous people are for NSW, Vic, QLD, WA, SA and the NT only (NT data are for public hospitals only). Caution should be used in the interpretation of these data because of jurisdictional differences in data quality. It should be noted that data for the six states and territory are not necessarily representative of the other jurisdictions.

(i) Data for Indigenous people and for non-Indigenous people exclude separations with a principal diagnosis of renal dialysis and an additional diagnosis of diabetes.

(j) Rheumatic heart disease includes acute rheumatic fever as well as the chronic disease.

(k) Total may not sum to the individual categories as more than one chronic condition can be reported for a separation.

(l) The rates presented for Indigenous people and non-Indigenous people are based on a slightly different methodology than those for all people. Direct comparisons of rates for all people to either the Indigenous or non-Indigenous rates should therefore be made with caution.

– Nil or rounded to zero. **np** Not published.

95% CI	3.55 to 3.78	2.91 to 3.36	5.75 to 6.02	23.99 to 24.72	6.06 to 6.76	np	np	6.26 to 6.66	8.72 to 8.91

SHSR = Standardised Hospital Separation Ratio; CI = confidence interval.

(a) Excludes separations with a care type of Newborn without qualified days, and records for Hospital boarders and Posthumous organ procurement.

(b) Data are for NSW, Vic, QLD, WA, SA and the NT only (NT data are for public hospitals only). Caution should be used in the interpretation of these data because of jurisdictional differences in data quality. It should be noted that data for the five states and territory are not necessarily representative of the other jurisdictions.

(c) Data have been suppressed if the number of separations was less than five. The rate ratio and confidence interval have been suppressed if the number of separations was less than 20.

(d) The ratios are directly age standardised to the Australian estimated resident population at 30 June 2001.

(e) Patients aged 75 years or over are excluded.

(f) Indigenous separation rates are based on state of hospitalisation while all person rates are based on state of usual residence.

(g) All diabetes refers to separations with either a principal or additional diagnosis of diabetes. Changes to the Australian Coding Standards between ICD-10-AM 5th edition (used in 2007-08) and ICD-10-AM 6th edition (used in 2008-09) resulted in decreased reporting of additional diagnoses for diabetes. Therefore caution should be used in comparisons of these data with earlier periods.

# Community health services programs

Table 11A.71

## Table 11A.71 Australian Government, community health services programs

Programs funded by the Australian Government during 2009-10

Program	Description	Budgetary context	Reporting
<b>Objective: Improving access to services</b>			
Rural Primary Health Services program	The Rural Primary Health Services (RPHS) program funds a range of organisations to provide additional primary and allied health care services and preventative health projects in rural and remote communities. The actual services delivered depend on the identified needs of the communities covered. The RPHS Program commenced from 1 January 2010 and consolidates four rural primary and allied health care programs - Regional Health Services (RHS), More Allied Health Services (MAHS), Multi-purpose Centres (MPC) and Building Healthy Communities in Remote Australia (BHC). See separate briefs for MPC and Preventative Health Initiative (PHI). There are 173 RPHS (plus 32 MPCs that will transition) delivering services in approximately 1700 small rural and remote communities.	Funding is provided under Outcome 6 — Rural Health	Financial and activity reports are required from each project at 6 and 12 months. Divisions of General Practice also complete the annual survey for PHC RIS reporting.
Closing the Gap- Indigenous services in rural and regional areas	This pilot program, announced in the 2009 Budget, will provide \$11.0 million over 4 years for the provision of mobile dental infrastructure and dental services to rural and regional Indigenous communities.  Three initial projects identified by a consultant have been implemented from mid-2010. These projects will be completed by December 2012, with evaluation to be completed by June 2013.	Funding is provided under Outcome 13 — Acute Care  Funding for individual projects may be provided in partnership with the states and territories or with not-for-profit organisations.	Six monthly progress reports are required from each project.

Table 11A.71

### Table 11A.71 Australian Government, community health services programs

*Programs funded by the Australian Government during 2009-10*

<i>Program</i>	<i>Description</i>	<i>Budgetary context</i>	<i>Reporting</i>
Royal Flying Doctor Service (RFDS)	Commonwealth funding to the RFDS aims to support the sustainable delivery of primary health care services to people in rural and remote communities. The RFDS delivers traditional services in rural and remote areas of Australia. This includes the provision of primary aeromedical evacuations, primary and community health care clinics, medical chests and remote consultations.	There is a separate budget line item for RFDS funding. Funding is provided under Outcome 6 — Rural Health	Financial and service activity reports are submitted regularly, in the context of a National Reporting Framework.
Rural Women's GP Service (RWGPS)	The RWGPS provides access to primary health care services for women in rural and remote Australia who currently have little or no access to a female GP, by facilitating the travel of female GPs to these communities.	Funding is provided under Outcome 6 — Rural Health	Financial and service activity reports are submitted regularly, in the context of an agreed reporting framework.
Visiting Optometrist Scheme	The program aims to improve the access of people living and working in rural and remote communities to optometric services. Additional funding under the Improving Eye and Ear Health Services for Indigenous Australians for Better Education and Employment Outcomes measure became available in 2009-10 for an expansion of the Scheme. This will provide for new and increased numbers of optometrist visits to Indigenous communities.	Funding is provided under Outcome 3 — Medicare Benefits	Staged income and expenditure statements and progress reports are required from each optometrist.

Table 11A.71

**Table 11A.71 Australian Government, community health services programs**

*Programs funded by the Australian Government during 2009-10*

<i>Program</i>	<i>Description</i>	<i>Budgetary context</i>	<i>Reporting</i>
Medical Specialist Outreach Assistance Program (MSOAP)	<p>MSOAP was established to improve access to medical specialist services for people living in rural and remote locations. The MSOAP complements medical specialist services provided by the State Government and private providers by encouraging specialists to deliver outreach services to targeted areas of need in rural and remote Australia. This is achieved by meeting costs associated with delivering outreach services such as travel, accommodation, and venue hire. An expansion of the MSOAP, focusing on chronic disease in Aboriginal and Torres Strait Islander communities, also supports allied health professionals and general practitioners as part of a multidisciplinary team approach to care.</p>	<p>Funding is provided under Outcome 6 — Rural Health</p>	<p>Financial and service activity reports are submitted regularly in the context of an agreed reporting framework.</p>

## Table 11A.71 Australian Government, community health services programs

Programs funded by the Australian Government during 2009–10

Program	Description	Budgetary context	Reporting
Children's health and wellbeing	<p>Under the Better Arthritis &amp; Osteoporosis Care initiative Arthritis Australia administered a four year program of juvenile arthritis camps targeting children from culturally and linguistically diverse communities, and providing young adult education workshops.</p> <p>Under the Asthma Management Program (AMP), Asthma Australia is funded to deliver the Asthma Child and Adolescent Program (ACAP) which targets children and adolescents, emphasising asthma information and emergency training for staff in preschools and schools, and including a focus on parents and on self-management for adolescents. The program includes messages about chronic respiratory conditions linked to asthma, such as allergy and rhinitis.</p>	<p>Funding is provided under Outcome 10 — Health system capacity and quality</p> <p>Funding is provided under Outcome 10 — Health system capacity and quality</p>	<p>Financial and service activity reports are submitted every six months in the context of an agreed reporting framework</p> <p>Financial and service activity reports are submitted every four months in the context of an agreed reporting framework.</p>
<b>Objective: Promoting health and preventing illness, early detection</b>			
Risk Factor and lifestyle programs	<p>Under the Better Arthritis &amp; Osteoporosis Care initiative Arthritis Australia's awareness-raising program aimed to provide a national arthritis multicultural initiative focusing on the Greek and Chinese communities. The program resulted in increased awareness through national media promotion. It attracted significant consumer response; an increased number of calls to Arthritis Australia's call centre, an increased number of downloads of arthritis factsheets from its website and the production of a number of self-management consumer resources.</p>	<p>Funding is provided under Outcome 10 — Health system capacity and quality</p>	<p>Financial and service activity reports are submitted every six months in the context of an agreed reporting framework</p>

Table 11A.71

### Table 11A.71 Australian Government, community health services programs

Programs funded by the Australian Government during 2009-10

Program	Description	Budgetary context	Reporting
	<p>Under the Better Arthritis &amp; Osteoporosis Care initiative Osteoporosis Australia developed and administered, the 'Prevent the next fracture' awareness program, an osteoporosis self-management training module, a national osteoporosis multicultural initiative, a vitamin D and Calcium awareness program, a national dissemination project for the healthy bones schools kit, a national osteoporosis risk factors awareness program, and a National Patient Support program. The program resulted in increased awareness-raising through the production of a number of self-management consumer resources, and also resulted in a peak number of multilingual factsheet downloads.</p>	<p>Funding is provided under Outcome 10 — Health system capacity and quality</p>	<p>Financial and service activity reports are submitted every six months in the context of an agreed reporting framework</p>
	<p>The Preventative Health Initiative (PHI) component of the Rural Primary Health Services program provides funding for preventative health activities that assist communities to find local solutions to local problems. Funding is targeted to remote and very remote communities or communities in rural areas which demonstrate high health needs and limited access to health services.</p> <p>Funding allocated for PHI is \$18.054 million (GST excl) in the 3.5 years from 1 January 2010. This is part of \$311.6 million (GST excl) funding for the RPHS program.</p>	<p>Funding is provided under Outcome 6 — Rural Health</p>	<p>Financial and activity reports are required from each project at 6 and 12 months.</p>

Table 11A.71

### Table 11A.71 Australian Government, community health services programs

*Programs funded by the Australian Government during 2009-10*

<i>Program</i>	<i>Description</i>	<i>Budgetary context</i>	<i>Reporting</i>
Chronic Disease Management	<p>Under the Asthma Management Program (AMP), Asthma Australia is being funded to deliver the Community Support Program (CSP) which aims to target people with asthma, their family and community carers to increase awareness of best practice asthma management and empower them to take a more proactive role in the self-management of their asthma. The program includes messages about other linked respiratory conditions, such as allergy, rhinitis and chronic obstructive pulmonary disease (COPD).</p> <p>In addition, the program has a strong focus on prevention, especially in lower socio-economic areas and develops innovative ways to best practice messages to priority groups, in particular older Australians, Indigenous Australians, culturally and linguistically diverse peoples and people in rural and remote communities.</p>	<p>Funding is provided under Outcome 10 — Health system capacity and quality</p>	<p>Financial and service activity reports are submitted every four months in the context of an agreed reporting framework.</p>

Table 11A.71

### Table 11A.71 Australian Government, community health services programs

*Programs funded by the Australian Government during 2009–10*

<i>Program</i>	<i>Description</i>	<i>Budgetary context</i>	<i>Reporting</i>
Primary Care Education	Under the Asthma Management Program (AMP), the National Asthma Council (NAC) Australia is being funded to deliver the GP and Allied Health Professional Asthma and Respiratory Education Program. The program provides best-practice asthma management education nationally to primary health care practitioners — general practitioners and allied health professionals including practice nurses, Indigenous health workers, pharmacists and asthma educators.	Funding is provided under Outcome 10 — Health system capacity and quality	Financial and service activity reports are submitted every four months in the context of an agreed reporting framework
Prevention of type 2 diabetes	Opportunities for training and support are provided through the Divisions of General Practice nationally. Training is conducted in major cities and in regional and rural areas through workshops incorporating a range of interactive learning activities. The lifestyle modification program component of the Prevention of Type 2 Diabetes Program targets people aged 40–49 years and Aboriginal and Torres Strait Islander people aged 15–54 years, who are assessed as being at 'high risk' of developing type 2 diabetes with the aim to reduce or delay their progression to type 2 diabetes.	Funding is provided under Outcome 1 — Population Health	Financial and service activity reports are submitted regularly, in the context of an agreed reporting framework.

Table 11A.71

**Table 11A.71 Australian Government, community health services programs**

*Programs funded by the Australian Government during 2009-10*

<i>Program</i>	<i>Description</i>	<i>Budgetary context</i>	<i>Reporting</i>
Oral health	<p>The Medicare Teen Dental Plan (MTDP) provides up to \$157 per eligible teenager towards an annual preventative dental check. The preventative dental check includes a suite of services that promotes good oral health, including an oral examination and, if required, x-rays, a scale and clean, fluoride treatment, oral hygiene instruction, dietary advice and/or fissure sealing.</p> <p>Approximately 1.3 million teenagers 12–17 years of age are eligible for dental services each year under the program. Eligible teenagers include 12 to 17 year olds in families receiving Family Tax Benefit Part A; or teenagers receiving Youth Allowance, Abstud, Disability Support Pension, Parenting Payment, Special Benefit, Carer Payment, Double Orphan Pension or support under certain Veterans' education and training assistance schemes.</p> <p>The Medicare Chronic Disease Dental Scheme (CDDS) provides up to \$4250 over two consecutive calendar years in Medicare benefits for dental services for people with a chronic medical condition and complex care needs and whose oral health is impacting on their general health.</p> <p>Those dental services covered by the CDDS are listed in the Medicare Benefits Schedule for Dental Services.</p>	<p>Funding for the MTDP and the CDDS is provided by the Australian Government through the Department of Health and Ageing under Outcome 3 — Access to Medical Services.</p> <p>Benefits for services under the programs are administered by Medicare Australia.</p>	<p>The Department provides information on these programs through its Annual Report.</p> <p>Data on the number of services and benefits paid under each program is published monthly on the Medicare Australia website.</p>

Table 11A.72

**Table 11A.72 New South Wales, community health services programs**

*Programs funded by the NSW Government during 2009-10*

<i>Program</i>	<i>Description</i>	<i>Budgetary context</i>	<i>Reporting</i>
<b>Objective: Improving access to services</b>			
Child Adolescent and Family Services	Covers services such as youth health, paediatric allied health (physiotherapy, occupation therapy, social work and counseling, speech pathology, psychology, audiology), specialist medical services, early childhood nursing, immunisation, post natal programs, early intervention and school surveillance services.	AHS receive block funding from the Department of Health to provide health services to their population. Each AHS determines how much money is allocated to this program.	These services are measured as Non Admitted Patient Occasions of Service. The number of occasions on which one or more health care professional provides services to a Non-admitted Patient and reported by the AHSs to the Department of Health on a quarterly basis.
Multicultural health services	Provides interpreter services, cultural competency training, direct services provision for refugees, planning of services to address or cater to the needs of culturally diverse communities.	AHS receive block funding from the Department of Health to provide health services to their population. Each AHS determines how much money is allocated to this program.	These services are measured as Non Admitted Patient Occasions of Service. The number of occasions on which one or more health care professional provides services to a Non-admitted Patient and reported by the AHSs to the Department of Health on a quarterly basis.
Aboriginal Health Services	Covering services such as health information and education, counseling, pre and post natal programs, early childhood nursing, health promotion programs, specialised child sexual assault counseling services (primarily in rural and remote locations).	A mix of AHS, NSW Health (via grants to non-government organisations) and Australian Government Funding.	These services are measured as Non Admitted Patient Occasions of Service. The number of occasions on which one or more health care professional provides services to a Non-admitted Patient and reported by the AHSs to the Department of Health on a quarterly basis.

Programs funded by the NSW Government during 2009-10

Program	Description	Budgetary context	Reporting
Transport for Health	Provides financial assistance and transport arrangements of non-emergency transport health related issues. Includes the specific program: Isolated Patients Transport and Accommodation Service.	AHSs receive block funding for this program.	Quarterly reporting on key indicators, annual reporting on the implementation of the program
Child Abuse and Sexual Assault Forensic and Medical services	This program area provides forensic and medical services for victims of sexual assault and child abuse and ensuring these services are culturally competent. Particular focus on improving access in rural and remote communities.	Combination of Department of Health allocation, AHS block funding and Commonwealth funding (Indigenous Health-National Partnership Agreement)	AHS report on service provision via a payment determinations for a fee to be payable to non-salaried medical practitioners in rural Area Health Services conducting medical examinations for sexual assault victims.
Sexual Assault Services	Providing crisis counselling and support for victims of assault, court preparation and community education programs.	AHS receive block funding from the Department of Health to provide health services to their population. Each AHS determines how much money is allocated to this program.	These services are measured as Non Admitted Patient Occasions of Service. The number of occasions on which one or more health care professional provides a services to a Non-admitted Patient and reported by the AHSs to the Department of Health on a quarterly basis.
Child Protection Counselling Services (also known as Physical Abuse and Neglect of Children Services)	Providing long-term and intensive counselling for families and a range of interventions where physical abuse or neglect of a child is occurring.	AHS receive block funding from the Department of Health to provide health services to their population. Each AHS determines how much money is allocated to this program.	These services are measured as Non Admitted Patient Occasions of Service. The number of occasions on which one or more health care professional provides a services to a Non-admitted Patient and reported by the AHSs to the Department of Health on a quarterly basis.

## Table 11A.72 New South Wales, community health services programs

Programs funded by the NSW Government during 2009-10

Program	Description	Budgetary context	Reporting
Palliative Care Services	Providing holistic care for people who are terminally ill or dying, including clinical care in the home, counselling and support services.	A mix of AHS and Australian Government funding.	These services are measured as Non Admitted Patient Occasions of Service. The number of occasions on which one or more health care professional provides a services to a Non-admitted Patient and reported by the AHSs to the Department of Health on a quarterly basis.
<b>Objective: Promoting health and preventing illness, early detection</b>			
Maternal health	<p>Maternity services include programs and initiatives directed toward:</p> <ul style="list-style-type: none"> <li>• Workforce expansion and education to enhance access to locally provided clinical maternity education to improve the strength and capacity of the workforce. The increase in birth rate across NSW is up to 30 per cent in some AHSs.</li> <li>• maternity service model of care reform, risk assessment, tiered networks and collaborative working arrangements that will allow women to easily transition from one level to another as required</li> <li>• strategies to promote normal birth in NSW , reduce unnecessary caesarean sections</li> <li>• enhanced services to improve early pregnancy care, including early pregnancy resources.</li> </ul>	AHS block funding and some Department of Health funds allocated.	Varies by program. Some services measured as Non Admitted Patient Occasions of Service. Other programs require regular reports on recruitment and expenditure.

## Table 11A.72 New South Wales, community health services programs

Programs funded by the NSW Government during 2009-10

Program	Description	Budgetary context	Reporting
Child health and wellbeing	<p>Services and programs cover:</p> <ul style="list-style-type: none"> <li>• Postnatal maternal, child and family services such as Aboriginal Maternal and Infant Health Service, and Universal Health Home Visiting</li> <li>• Child and Family nurses and Aboriginal Health workers working together to create linkages for Aboriginal babies and mothers from targeted maternity services into child health services under the Building Strong Foundations program for children 0–5 years.</li> <li>• Indigenous Early Childhood Development Strategy Lead implementation of Indigenous child and family centres (element 1) and sexual health and antenatal care (element 2).</li> </ul>	A mix of AHS and Australian Government funding.	Varies by program. Some services measured as Non Admitted Patient Occasions of Service. Other programs require regular reports on recruitment and expenditure.
Women's health and wellbeing	Covers services and health promotion programs for women, including violence prevention and pregnancy services.	<p>In 2009-10 funding for these initiatives changed from a Commonwealth/State program under the Public Health Outcomes Funding Agreement to block funding under the Australian Health Care Agreement. AHS receive block funding from the Department of Health to provide health services to their population. AHSs are expected to maintain the levels of funding that were previously allocated under the PHOFA program.</p>	<p>These services are measured as Non Admitted Patient Occasions of Service. The number of occasions on which one or more health care professional provides services to a Non-admitted Patient and reported by the AHSs to the Department of Health on a quarterly basis.</p>

Table 11A.72

Programs funded by the NSW Government during 2009-10

Program	Description	Budgetary context	Reporting
Men's health and wellbeing	Covers education and health promotion programs for men, including information and referral services.	AHS receive block funding from the Department of Health to provide health services to their population. Each AHS determines how much money is allocated to this program.	These services are measured as Non Admitted Patient Occasions of Service. The number of occasions on which one or more health care professional provides services to a Non-admitted Patient and reported by the AHSs to the Department of Health on a quarterly basis.
Youth health and wellbeing	Provides education and health promotion programs, clinical services and planning of youth friendly services. Also provides specific health services for homeless and at risk young people.	A mix of AHS and Australian Government funding is allocated for Innovative Health Services for Homeless Youth (IHSY).	These services are measured as Non Admitted Patient Occasions of Service. The number of occasions on which one or more health care professional provides a services to a Non-admitted Patient and reported by the AHSs to the Department of Health on a quarterly basis.
Screening	Covers screening and assessment programs particularly directed towards children to identify problems early so treatment options are optimized. Program included the Statewide Eyesight Preschooler Screening (StEPS) program, Statewide Infant Screening Hearing (SWISH) program, universal health home visiting for mothers and babies.	A mix of AHS and Australian Government funding.	Varies by program. Some services measured as Non Admitted Patient Occasions of Service. Other programs require quarterly reports on tests offered and conducted.

Program	Description	Budgetary context	Reporting
Carers services	<p>Covers carers programs and support, in partnership with non-government organisations, and workforce development to enhance the lives of carers and the people they care for. The Carers (Recognition) Act 2010 was introduced into the Legislative Assembly on 21 April 2010 by the Minister for Health. It was assented to on 19 May 2010.</p> <p>As required under the Act, NSW Department of Health will continue to take action that reflects the principles of the NSW Carers Charter including developing strategies to ensure that the views and needs of carers and the views, needs and best interests of persons for whom they care are taken into account across the continuum of health care services.</p> <p>Note that as from July 2010 carer's policy, planning and funding have transferred from NSW Department of Health to Ageing, Disability and Home Care, Department of Human Services NSW. The transfer includes responsibility for the NSW Carers Action Plan 2007–2012 and for the NSW Carers (Recognition) Act 2010.</p> <p>NSW Department of Health will continue to lead the Family and Carers Mental Health Program, monitor Area Health Service Carers Support Services and provide policy input from a health perspective.</p>	NSW Carers Action Plan 2007–2012.	Annual Reports on activities by AHSs to the Department of Health.

**Table 11A.73 Victoria, community health services programs**

*Programs funded by the Victorian Government during 2009-10*

<i>Program</i>	<i>Description</i>	<i>Budgetary context</i>	<i>Reporting</i>
<b>Objective: Improving access to services</b>			
Primary Care Partnerships (PCPs) strategy	<p>Cross government funded voluntary alliances of health and human services provider organisations known as Primary Care Partnerships (PCPs). There are 30 PCPs in Victoria which engage a total of 1200 organisations.</p> <p>The PCPs deliver local service system reforms to:</p> <ul style="list-style-type: none"> <li>• improve the coordination of services</li> <li>• improve the way health promotion is planned, delivered and evaluated</li> <li>• improve the management of chronic disease.</li> </ul> <p>The strategy to improve the coordination of services is supported by a statewide policy and operational framework and includes:</p> <ul style="list-style-type: none"> <li>• statewide practice standards and a continuous improvement manual</li> <li>• tools for screening, referral and coordinated care planning</li> <li>• data standards for sharing client health and care information embedded in agency client management software applications</li> <li>• e-referral systems to securely share client information with client consent.</li> </ul>	<p>Core funding provided by the Victorian Department of Health. Additional funding provided by other government departments includes the Victorian Department of Justice and the Victorian Department of Planning and Community Development.</p>	<p>Suite of reports as part of the 2009–2012 PCP planning and reporting requirements. This includes a three year strategic plan and impact oriented reports against each area of the PCP program logic.</p>

Table 11A.73

### Table 11A.73 **Victoria, community health services programs**

*Programs funded by the Victorian Government during 2009-10*

<i>Program</i>	<i>Description</i>	<i>Budgetary context</i>	<i>Reporting</i>
<i>Overcoming cultural / language barriers</i>			
Primary Care Partnerships (PCPs) strategy	<p>The PCP strategy to improve the coordination of services to overcome cultural/language barriers includes consumer privacy information brochure and consent form for the disclosure of health and care information is available in over 40 community languages.</p> <p>The local work of PCPs may target specific population groups. For example farmers, people with a refugee background and ethnic communities. The interventions targeted to address the health and wellbeing needs of these groups may include strategies to overcome cultural/language barriers.</p>	<p>Core funding provided by the Victorian Department of Health. Additional funding provided by other government departments includes the Victorian Department of Justice and the Victorian Department of Planning and Community Development.</p>	<p>Suite of reports as part of the 2009–2012 PCP planning and reporting requirements. This includes a three year strategic plan and impact oriented reports against each area of the PCP program logic.</p>
Refugee Health Nurse Program	<p>The Refugee Health Nurse Program (RHNP) supports the provision of a coordinated model for refugee health care with complementary and multiple entry points.</p> <p>The RHNP has three aims:</p> <ul style="list-style-type: none"> <li>• to increase refugee access to primary health services</li> <li>• to improve the response of health services to refugees' needs</li> <li>• to enable refugee individuals, families and communities to improve their health and wellbeing.</li> </ul> <p>Funding is provided to community health services in areas that have high numbers of newly arrived refugees, to employ community health nurses specialising in refugee and migrant health issues. These nurses work directly with refugee communities to improve their health and wellbeing, as well as local service providers to develop a responsive and effective service response for refugee clients.</p> <p>The RHNP also funds a workforce support training program and a Refugee Health Nurse Facilitator who works with the funded agencies to build capacity and provide secondary consultations.</p>	<p>The Victorian Government funds the RHNP through the Department of Health. The Integrated Care Branch of the Department of Health is responsible for program development and resource allocation. The department's regional offices monitor program delivery and performance. Community health services are funded to deliver the RHNP.</p>	<p>Agencies funded under the RHNP report hours of service on a quarterly basis. This information is provided to the Integrated Care Branch of the Department of Health.</p>

Program	Description	Budgetary context	Reporting
Services for Koori Communities - alcohol and drug treatment services	<p>Koori-specific alcohol and drug treatment services are provided to Aboriginal people who are affected (either directly or indirectly), or who are at risk of being affected, by alcohol and/or other drugs.</p> <p>Alcohol and Drug treatment services are provided through both mainstream services and Aboriginal specific services located in ACCHOs. Mainstream alcohol and drug treatment services provide community based assessment, community and residential treatment and community rehabilitation programs. Agency based services include counselling, consultancy and continuing care service (outreach, day programs, post withdrawal linkages, supported accommodation, ante and post natal support, peer support, mobile overdose response, specialist pharmacology and education).</p> <p>Aboriginal-specific services include Koori Community Alcohol and Drug Resource Centres, Koori Community Alcohol and Drug Workers, the Koori Alcohol and Drug workforce development initiative and the Koori Youth Alcohol and Drug Healing Service.</p>	<p>Funding is provided through Community Health Services, Aboriginal community controlled health organisations and non-government organisations. Mental Health, Drugs and Regions Division of the Victorian Department of Health is responsible for overseeing program delivery and budgets. Also see: Aboriginal Health.</p>	<p>In 2006, Department of Human Services (DHS) Executive endorsed the <i>Improving the Way DHS works with Aboriginal community controlled organisations</i> initiative. This work identified the need for DHS to simplify funding and reporting requirements for Aboriginal organisations. With the creation of the new Department of Health the Executive is committed to continuing with this project and there has been progression towards simplifying and streamlining funding. Also see: Aboriginal Health.</p>

*Programs funded by the Victorian Government during 2009-10*

<i>Program</i>	<i>Description</i>	<i>Budgetary context</i>	<i>Reporting</i>
Oral Health Program	<p>Koori Community Alcohol and Drug Workers undertake a number of activities to reduce the use of, and harm caused by, drug and alcohol in their communities. These activities include health promotion, information provision, education activities, development and maintenance of community linkages, referrals and counselling. These workers liaise with services in an advocacy role on behalf of the service user.</p> <p>Seven Koori community alcohol and drug resource centres are funded through Aboriginal Community Controlled Health Organisations. The centres were developed as an alternative to incarceration in police cell for people found drunk in public. In the 2010-11 State Budget an additional \$4.5 million was provided for services in Shepparton, Bairnsdale and Mildura to strengthen medical and health support with increased nursing capacity.</p> <p>A whole-of-government Koori alcohol action plan is currently under development to prevent and reduce the harm of alcohol misuse and family violence in Koori communities and will encompass prevention, early intervention and treatment.</p> <p>Public Oral health services are targeted towards Health Care and Pensioner concession cardholders. Priority access is given to preschool and primary school aged children and dependants of cardholders in year 7 and 8 or who have left formal schooling. There are several Aboriginal-specific initiatives, including dental clinics at the Victorian Aboriginal Health Service and Rumbalara Aboriginal Cooperative.</p>	<p>Dental services are output funded using a funding formula.</p> <p>Also see: Aboriginal Health.</p>	<p>Performance targets are set by the Department of Health and monitored through various reporting mechanisms to demonstrate program delivery. Examples of targets are people treated, waiting times and quality measures.</p> <p>Also see: Aboriginal Health.</p>

Table 11A.73

**Table 11A.73 Victoria, community health services programs**

*Programs funded by the Victorian Government during 2009-10*

<i>Program</i>	<i>Description</i>	<i>Budgetary context</i>	<i>Reporting</i>
<i>Overcoming geographical barriers</i>			
Primary Care Partnerships (PCPs) strategy	The strategic planning work of PCPs requires the identification of local health and well being priorities and ways to address these priorities. This may include placed-based initiatives. PCPs with <i>Neighbourhood Renewal</i> areas are encouraged to focus on these sites as a priority setting for their catchment planning, while being mindful of the need to include other communities and population groups that experience disadvantage. Other PCPs are encouraged to use similar 'place based' partnership approaches as a means of assessing and engaging with communities that experience significant disadvantage.	Core funding provided by the Victorian Department of Health. Additional funding provided by other government departments includes the Victorian Department of Justice and the Victorian Department of Planning and Community Development.	Suite of reports as part of the 2009–2012 PCP planning and reporting requirements. This includes a three year strategic plan and impact oriented reports against each area of the PCP program logic.
NURSE-ON-CALL	NURSE-ON-CALL (NOC) is a statewide telephone-based health line that provides residents of Victoria with timely access to health information, assistance and advice for the cost of a local phone call. The service operates 24 hours, 7 days a week and takes about 1,000 calls per day. NURSE-ON-CALL nurses provide callers with one or a combination of: <ul style="list-style-type: none"> <li>• triage</li> <li>• health information</li> <li>• information or advice about local health providers.</li> </ul>	NOC is contracted to Medibank Health Solutions or MHS (formerly McKesson Asia-Pacific Pty Ltd). The costs paid for the contract are based on call volume.	MHS provide the Victorian Department of Health with a number of monthly reports. These provide data about call volumes, call arrival patterns, call outcome and caller demographics.

Table 11A.73

**Table 11A.73 Victoria, community health services programs**

*Programs funded by the Victorian Government during 2009-10*

<i>Program</i>	<i>Description</i>	<i>Budgetary context</i>	<i>Reporting</i>
<i>Overcoming socio-economic barriers</i>			
Dental health program	Public dental health care is available to children and disadvantaged adults. Children up the age of 12 have priority access to public dental care. Priority access is also provided to children aged 13–17 who are dependants or holders of health care or pensioner concession cards. The service is free for dependants or holders of a health care or pensioner concession card. Health care and pensioner concession cardholders and their dependants over the age of 18 are also eligible for public dental care.	Dental services are output funded using a funding formula.	Performance targets are set by the Victorian Department of Health and monitored through various reporting mechanisms to demonstrate program delivery. Examples of targets are people treated, waiting times and quality measures.
<i>Overcoming social isolation barriers</i>			
Primary Care Partnerships (PCPs)	The strategic planning work of PCPs requires the identification of local health and well being priorities, and ways to address these. This may include overcoming social isolation barriers. PCPs with 'Neighbourhood Renewal' areas are encouraged to focus on these sites as a priority setting for their catchment planning, while being mindful of the need to include other communities and population groups that experience disadvantage. Other PCPs are encouraged to use similar 'place based' partnership approaches as a means of assessing and engaging with communities that experience significant disadvantage.	Core funding provided by the Victorian Department of Health. Additional funding provided by other government departments includes the Victorian Department of Justice and the Victorian Department of Planning and Community Development.	Suite of reports as part of the 2009–2012 PCP planning and reporting requirements. This includes a three year strategic plan and impact oriented reports against each area of the PCP program logic.

Table 11A.73

### Table 11A.73 Victoria, community health services programs

Programs funded by the Victorian Government during 2009-10

Program	Description	Budgetary context	Reporting
IHSHY program	The Innovative Health Services for Homeless Youth (IHSHY) program is a Commonwealth/State program that promotes health care for homeless and at risk young people. Funds are provided for innovative health and related services for homeless and otherwise at-risk young people that respond to their complex health needs and improve their access to mainstream health services. IHSHY provides a means of engaging young people who are homeless or marginalised and who may not otherwise access health services.	IHSHY is provided under the National Healthcare Agreement with state and territory governments matching the Commonwealth's contribution.	Quantitative performance targets are set by the Victorian Department of Health and monitored quarterly.
<b>Objective: Promoting health and preventing illness, early detection</b>			
Maternal and Child health	The Healthy Mothers, Healthy Babies program aims to reduce the burden of chronic disease and reduce health inequity by addressing maternal risk behaviours and providing support during pregnancy. Services are provided in areas of highest need that have high numbers of births, higher rates of relative socioeconomic disadvantage and lower service availability. The objectives of the program are to: <ul style="list-style-type: none"> <li>• improve women's access and attendance at antenatal and post natal services</li> <li>• improve women's access to a range of support services which may include health, welfare, housing and education services</li> <li>• deliver health promotion messages that aim to reduce risk behaviours, and promote healthy behaviours.</li> </ul> Women eligible for the program are those women who are not able to access antenatal care services or require additional support because of their: <ul style="list-style-type: none"> <li>• socioeconomic status</li> <li>• culturally and linguistically diverse backgrounds</li> <li>• Aboriginal and Torres Strait Islander descent</li> <li>• age, or</li> <li>• residential distance to services.</li> </ul>	The Victorian Government funds the program through the Department of Health. The Integrated Care Branch of the Department of Health is responsible for program development and resource allocation. Department of Health regional offices monitor the performance of the program. Funding of this program continues until June 2012.	Quantitative performance targets are set by the Department of Health and monitored quarterly. The performance of the program is also being monitored through a formal evaluation due for completion in mid 2011.

Table 11A.73

**Table 11A.73 Victoria, community health services programs**

*Programs funded by the Victorian Government during 2009-10*

<i>Program</i>	<i>Description</i>	<i>Budgetary context</i>	<i>Reporting</i>
Women's health and wellbeing	<p>The Victorian Women's Health Program aims to improve the health and wellbeing of all Victorian women (with an emphasis on those most at risk), through the development and implementation of targeted health promotion interventions.</p> <p>The dual strategy of delivering gender-specific health promotion interventions while working to improve mainstream services' responses to women is a key aspect of the women's health program.</p>	<p>Prior to 2009-10, funding was provided through the Public Health Funding Outcomes Agreement.</p> <p>From 2009-10, funding is provided under the National Healthcare Agreement.</p> <p>The Prevention and Population Health Branch of the Victorian Department of Health administers the funding for the program.</p> <p>Department of Health regional offices monitor program delivery.</p> <p>There are 12 women's health services funded through the Women's Health Program in Victoria.</p> <p>They include nine regional services, and three statewide services.</p>	<p>Women's health services are required to develop 3 year health promotion plans and report on those plans on an annual basis.</p>
Youth health and wellbeing	<p>The Innovative Health Services for Homeless Youth (IHSY) program is a Commonwealth/State program that promotes health care for homeless and at risk young people. Funds are provided for innovative health and related services for homeless and otherwise at-risk young people that respond to their complex health needs and improve their access to mainstream health services. IHSY provides a means of engaging young people who are homeless or marginalised and who may not otherwise access health services.</p>	<p>IHSY is provided under the National Healthcare Agreement with state and territory governments matching the Commonwealth's contribution.</p>	<p>Quantitative performance targets are set by the Department of Health and monitored quarterly.</p>

### Table 11A.73 Victoria, community health services programs

Programs funded by the Victorian Government during 2009-10

Program	Description	Budgetary context	Reporting
Children's health and wellbeing	<p>Multidisciplinary child health teams based in community health services which respond to developmental delays and other child health conditions.</p> <p>The Kids Lifer! program aims to improve the health behaviours of families with an overweight primary school aged child/children and to reduce the degree of excess weight of participating children.</p>	<p>The Victorian Government funds the program under the <i>Primary Health Funding Approach</i> which includes two components: (1) direct care and (2) health promotion.</p>	<p>Performance targets are set by the Department of Health and monitored quarterly. Targets are either quantitative or qualitative or both. Reporting intervals range from regular to periodic.</p>
Immunisation	<p>Immunisation policy is a shared responsibility between the Commonwealth and State and Territory Governments. The Commonwealth sets the national immunisation agenda by developing, recommending and directing policy, research and evaluation activities on the advice of expert committees and research centres. States are responsible for program implementation which includes vaccine purchase and distribution, and ensuring adequate service provision, monitoring and evaluation.</p> <p>Under the new National Partnerships Agreement on Essential Vaccines (NPA) the Commonwealth continues to provide funding to State and Territory governments for the purchase of vaccines listed on the National Immunisation Program (NIP). States currently conduct their own procurement process to purchase vaccines and provide them free of charge to eligible persons.</p>	<p>The Commonwealth provides funding for the purchase of vaccines as well as some funding for service delivery.</p> <p>As per the NPA the Commonwealth has begun tendering for vaccines. Victoria complements this by providing subsidies and incentive programs to local government. Health Protection Branch in the Victorian Department of Health has responsibility for the Immunisation Program.</p>	<p>Under the NPA, Victoria reports against a range of performance measures such as coverage in a range of cohorts, and wastage and leakage.</p> <p>Victoria is leading the country in immunisation by consistently achieving the highest coverage at each of the three key milestones (12 months, 2 years and 5 years). For example 93 per cent of two year olds are considered fully vaccinated.</p>

In Victoria, immunisation is carried out by general practitioners and local government. As at 30 June 2010, 55 per cent was undertaken by GPs and 45 per cent by local government.

Table 11A.73

### Table 11A.73 Victoria, community health services programs

Programs funded by the Victorian Government during 2009-10

Program	Description	Budgetary context	Reporting
Screening	<p>The Screening and Cancer Prevention Unit oversees and delivers population based screening programs and cancer prevention initiatives in Victoria.</p> <p>The screening programs include the national cervical, breast and bowel cancer screening programs, newborn screening and prenatal screening.</p> <p>The Unit has a strong focus on improving participation and addressing health inequities in under screened and non-screened communities. The Unit delivers: leadership and expert advice on screening issues to the Department of Health Victoria and relevant stakeholders; strategic policy development and planning; performance monitoring and trend analysis of programs; improvements in the evidence-based approach to screening policy and programs; capacity building initiatives in health services and screening providers; and supports recruitment and social marketing initiatives.</p>	<p>Funding for cancer screening programs is provided by the Victorian and Commonwealth Governments.</p> <p>Funding for newborn and prenatal screening is provided by the Victorian Government.</p> <p>Initiatives to improve participation by under-screened communities are funded through <i>Victoria's Cancer Action Plan 2008-2011</i>.</p>	<p>Annual cancer screening data is reported to the Australian Institute of Health and Welfare and the Productivity Commission, reports against targets agreed in Victorian-Commonwealth funding agreements are provided to Department of Health and Ageing as required, and screening data is reported to a range of Victorian Government and Department of Health Victoria publications.</p>

Table 11A.73

**Table 11A.73 Victoria, community health services programs**

*Programs funded by the Victorian Government during 2009-10*

Program	Description	Budgetary context	Reporting
<b>Objectives:</b>			
	<p><b>- Providing timely and high quality healthcare that meets individual needs throughout the lifespan — directly, and/or by facilitating access to appropriate service(s)</b></p>		
	<p><b>- Coordinating service provision to ensure continuity of care where more than one service type and/or ongoing service provision is required to meet individuals' healthcare needs.</b></p>		
Community Health Program	<p>The Community Health Program provides funding to approximately 100 Community Health Services (CHSs) operating from approximately 400 sites across Victoria. This strong connection to communities enables community health services to develop models of care that are responsive to their consumers and reflect the diverse underlying determinants of health. In this way, community health services combine the social model of health with clinical care to maximise outcomes for their consumers.</p>	<p>These services are funded under the Primary Health Funding Approach. Currently, the Approach includes two components (1) direct care and (2) health promotion.</p>	<p>Performance targets are set by the Victorian Department of Health and monitored through various reporting mechanisms to demonstrate program delivery. Targets are either quantitative or qualitative or both. Reporting intervals range from regular to periodic.</p>
	<p>CHSs play an important role in preventive, rehabilitative, maintenance and support services for people at risk of, or with complex conditions and chronic illnesses. CHSs are also major providers of Home and Community Care Services, Dental, General Practice, Drugs Program, Disability and other State and Commonwealth programs.</p>

<i>Program</i>	<i>Description</i>	<i>Budgetary context</i>	<i>Reporting</i>
Aboriginal Health	<p>Aboriginal community health services are provided through a range of Aboriginal Community Controlled Health Organisations (ACCHOs) and mainstream services funded by the Victorian Department of Health (department), including community health centres, hospitals and non-government organisations. The Victorian Aboriginal Health Service and other Aboriginal Cooperatives provide a range of medical services.</p> <p>The department is implementing the Closing the Health Gap initiative around two key targets: Close the gap in life expectancy within a generation and halve the gap in mortality rates for Aboriginal children under five by 2018. The department is focusing in five key areas of:</p> <ul style="list-style-type: none"> <li>• Tackling smoking</li> <li>• Delivering primary health care services</li> <li>• Fixing the gaps and improving the patient journey</li> <li>• Healthy transition to adulthood</li> <li>• Making Indigenous health everyone's business.</li> </ul> <p>The department has developed a statewide implementation plan, outlining how it will respond to the five priority reform areas addressing 17 key health priority areas.</p> <p>The Aboriginal Health Promotion and Chronic Care (AHPACC) Partnership supports community health services and ACCHOs to work collaboratively to improve health outcomes for Aboriginal people in Victoria with, or at risk of developing chronic disease through health promotion, prevention, early intervention, and ongoing care.</p>	<p>The department has reviewed its funding processes and has reduced activities to five, with the intention to reduce the administrative burden on Aboriginal organisations.</p> <p>The department funds ACCHOs to provide direct service delivery and budgets are managed using three year service agreements. Funding can be provided either at the program level or via the eight regions.</p> <p>Specific funding for Aboriginal programs has been allocated through the COAG Closing the Health Gap strategy.</p>	<p>Performance targets are negotiated between the department and ACCHOs and are monitored through various reporting mechanisms which are being reviewed to support the reduced administrative functions for ACCHOs.</p>

<i>Program</i>	<i>Description</i>	<i>Budgetary context</i>	<i>Reporting</i>
Early Intervention in Chronic Disease	<p>EliCD focuses upon community based early intervention services for people with chronic diseases. The initiative invests in both Community Health Services and Primary Care Partnerships.</p> <p>The aim of the initiative is to enhance existing capacity of community health services in supporting people with chronic disease in managing the impact of their condition including the physical, emotional and psychological impact of having a chronic disease.</p>	These services are funded under the Primary Health Funding Approach	<p>Performance targets are set by the Department and monitored through various reporting mechanisms to demonstrate program delivery.</p> <p>Targets are both quantitative and qualitative.</p>
Family and Reproductive Rights Education program (FARREP)	<p>Family and Reproductive Rights Education Program works with communities that traditionally practice female genital mutilation to eradicate the practice through behavioural and cultural change.</p> <p>The program also works with health service providers and other relevant stakeholders to raise awareness about the practice.</p>	<p>Prior to 2009-10, funding was provided through the Public Health Funding Outcomes Agreement.</p> <p>From 2009-10, funding is provided under the National Healthcare Agreement.</p> <p>The Prevention and Population Health Branch of the Victorian Department of Health administers the funding for the program.</p>	<p>Agencies funded for FARREP are required to contribute to a three year statewide FARREP health promotion plan and report against that plan on an annual basis.</p>

<b>Objective: Improving access to services</b>			
<i>Overcoming cultural/language barriers</i>			
Multicultural Services	<p>Multicultural Services are responsible for the leadership, planning, management and coordination of the <i>Strategic Plan for Multicultural Health 2007-12</i>. Key state-wide services developed, managed, implemented and monitored by Multicultural Services are:</p> <ul style="list-style-type: none"> <li>- The Queensland Health Interpreter Service (QHIS) is a statewide interpreter service to provide interpreters for all patients of low-English proficiency. QHIS is supported by Interpreter Services Information System (ISIS), an online interpreter coordination system, Interpreter Quality Officers and District coordinators.</li> <li>- Refugee Health Queensland is a statewide service with refugee health clinics established in South and North Brisbane, Logan, Toowoomba, Cairns and Townsville. The service provides standard initial assessments for all refugees and humanitarian entrants arriving in Queensland, including public health screening and catch-up vaccinations, GP referrals and coordination of ongoing care. Multicultural Services manages the contract and provides ongoing monitoring and support.</li> </ul>	<p>The Queensland Health Interpreter Service is a wholly state-funded service.</p> <p>The development and implementation of a multicultural action plan is a whole-of-government requirement. Multicultural Services reports annually to the Queensland Government. Internal reporting is conducted bi-annually.</p>	
		<p>Mater Health Services has been contracted until 2011 for a statewide refugee health service.</p>	<p>Refugee Health Queensland submits quarterly and annual reports to Queensland Health (Multicultural Services).</p>

<i>Overcoming geographical barriers</i>			
Patient Transport	The Patient Transport Reform Unit (PTRU) and Contract and Aeromedical Services Unit (CASU) provide leadership for the patient transport reform agenda which aims to improve access to and the quality of available transport resources for patient transport ranging from acute, urgent, high dependency care to non-urgent, low dependency care. The Units works collaboratively with Retrieval Services Queensland (RSQ), transport service providers and local health services to integrate all elements of the patient transport system including: the Patient Travel Subsidy Scheme; patient accommodation grants; road ambulance patient transport services; aeromedical transport and retrieval services under contract to Royal Flying Doctor Service (RFDS) and Careflight Medical Services and in partnership with Emergency Management Queensland, Department of Community Safety.	These services are funded by the State. In three rural bases Commonwealth funds support the delivery of primary health care services provided by the RFDS.	No reports are provided externally. Internally, activity reports are provided to the Health Service Districts to assist in the monitoring of utilisation of road ambulance and fixed-wing aeromedical transport at a district and facility level.
BreastScreen Queensland Program	The free BreastScreen Queensland Program has a state wide network of 11 Screening and Assessment Services which includes six mobiles, two relocatable and 19 satellite services. The sixth mobile, which is 4 wheel drive was specifically designed for rural and remote areas to provide access to women in these areas. The 4 wheel drive truck services Cape York, the Torres Strait and other remote areas of the State. The mobile service covers the whole State including out to the boarders with NSW, SA and NT. These areas include a significant number of Indigenous communities. The BSQ Service covers over 200 locations on a 2 yearly schedule. Each screening episode is linked to an assessment centre for timely follow up.	Funding for BreastScreen Queensland is provided through the Australian Healthcare Agreement (ACHA) and Queensland State funding.	Data on the BSQ Program including participation, cancer detection and other National Accreditation Standards are collected and reported Nationally and Statewide via Australian Institute of Health and Welfare (AIHW) monitoring reports, Report of Government Services (ROGS report), Service Delivery Statements (SDS), Chief Health Officer reports. Statistical reports are produced biennially for BSQ Services Statewide.

<b>Objective: Promoting health and preventing illness, early detection</b>			
Women's health and wellbeing	<p>The Mobile Women's Health Service (MWHS) provides an important outreach health service to women in rural and remote communities, including Aboriginal and Torres Strait Islander women and women from culturally and linguistically diverse backgrounds, who may be geographically or socially isolated. The service is based in 15 locations across Queensland and consists of a specially trained clinical nurse consultant who works as a sole practitioner to provide services that assist in the prevention, early detection and management of women's health issues. In some locations an Indigenous Women's Health Worker works with the nurse to assist in meeting the needs of local Indigenous women.</p> <p>The Healthy Women's Initiative (HWI) aims to improve health outcomes for Aboriginal and Torres Strait Islander women by implementing an integrated healthy women's initiative focusing on cervical screening and women's health.</p>	<p>Funding for the MWHS is provided through state funding and the Australian Government via the Australian Healthcare Agreement (ACHA).</p> <p>Funding for the HWI is provided through state funding and the Australian Government via the Australian Healthcare Agreement (ACHA) and Indigenous Early Childhood Development National Partnership Agreement (IECDNPA).</p>	<p>Mobile Women's Health Nurses provide activity data each six months which is reviewed at a program level.</p> <p>Healthy Women's Initiative health workers provide activity data each six months which is reviewed at a program level. Reporting also occurs for the IECDNPA through Maternal and Child Health Branch.</p>

Program	Description	Budgetary context	Reporting
Men's health and wellbeing	<p>The Pit Stop Men's Health Program was developed by Western Australia's Gayscone Population Health Unit and uses a masculine concept, being the car, attached to a series of men's health screening tests. The purpose of the Program is to improve access to relevant health information, address chronic disease risk factors and promote local preventative health services. The Queensland Bowel Cancer Screening Program is currently piloting the delivery of Pit Stop in workplaces targeting outdoor workers, partnering with Queensland Transport and Main Roads and a small number of regional councils. The project is due for completion at the end of 2010 and will be evaluated prior to further rollout. Some ad-hoc community based Pit Stops have also been undertaken (eg. at Bunnings Warehouse sites in South East Queensland for Men's Health Week).</p> <p>In addition to the Queensland Bowel Cancer Screening Program, Pit Stop is also being implemented by other community health and health promotion units within Queensland Health particularly in regional and rural areas.</p>	<p>The Queensland Bowel Cancer Screening Program Pit Stops were provided with state funding in 2009-2010 to assist with infrastructure and establishment costs of the program.</p> <p>Other non-QBCSP Pit Stops are funded through Health Service District budgets</p>	<p>Evaluation data is generated from each QBCSP Pit Stop and will be collated as part of a broader evaluation of these specific Pit Stops at the end of 2010.</p>

### Table 11A.74 Queensland, community health services programs

Programs funded by the Queensland Government during 2009-10

Program	Description	Budgetary context	Reporting
Youth health and wellbeing	The School Based Youth Health Nurse (SBYHN) Program enables the health and education sectors to work collaboratively with state secondary school communities to promote health and support schools to implement health promotion initiatives that meet the school's specific requirements. It also provides an opportunity for students, parents and members of the school community to access a health professional for matters relating to youth health within the school setting. The SBYHN role encompasses: whole of school health promotion across a number of population health priority areas (including healthy eating, physical activity, mental health, sun safety, drug education and sexual health education); individual consultations with young people, assessment and referral to appropriate services; and advocacy.	The Program is funded from Queensland Health Corporate and Health Service District funds.	School Based Youth Health Nurses provide activity data each school term which is reviewed at a program level.
Immunisation	The Queensland Health Immunisation Program is responsible for implementing the National Immunisation Program Schedule in Queensland to reduce the incidence of vaccine preventable disease in the community. This includes: strategy and policy development; coordination and planning; procurement and distribution of funded vaccines; funding and coordination of the School Based Vaccination Program; provision of information and advice to service providers; quality assurance; monitoring of adverse events following immunisation; communication and education; resource development and dissemination; enhancement of the state immunisation database and monitoring, evaluation and research.	Funding for immunisation services is provided through state funds, and through Australian Government funding via the National Partnership Agreement on Essential Vaccines.	Performance targets and overall financial reporting are published in Queensland Health's Annual Report and Service Delivery Statement. Annual performance targets are also reported directly to the Australian Government according to set benchmarks in the National Partnership Agreement.

<i>Program</i>	<i>Description</i>	<i>Budgetary context</i>	<i>Reporting</i>
Screening	Cancer Screening Services Branch (CSSB) is responsible for the leadership, strategic planning, management and coordination of the state-wide population screening programs: BreastScreen Queensland Program (BSQ), Queensland Cervical Screening Program (QCSP) and Queensland Bowel Cancer Screening Program (QBCSP). Key functions of the Branch include state-wide strategic policy and protocols, coordination and planning, service development and support, quality assurance, performance monitoring, communication and education, workforce development and training, monitoring, evaluation and research and linkages with follow up management and treatment.	Funding for cancer screening services is provided through State funds and the Australian Healthcare Agreement.	Performance targets and overall financial reporting are published in Queensland Health's Annual Report and Service Delivery Statement. Annual data is reported to the Australian Institute of Health and Welfare. Performance reports to BSQ Services are undertaken three, six and twelve monthly. Statistical reports are produced biennially for BSQ, QCSP and QBCSP.
Aboriginal and Torres Strait Islander Health	Queensland Health provides a range of primary and community health care services and activities, spanning the prevention, management and maintenance continuum that address particular needs of Indigenous communities. These include prevention, education and health promotion services for programs such as: men's and women's health programs including the Healthy Women's Initiative which focuses on increasing participation in cervical screening; child and adolescent health services; alcohol, tobacco and other drug services; sexual health services; allied health services; and patient transport provided to increase access to health care.	Funding for these services is provided through State funds.	Performance targets and overall financial reporting are published in Queensland Health's Annual Report and Service Delivery Statement.

<b>Other:</b>			
Oral Health Services	Services are provided via Community and School Oral Health Services mobile and fixed clinics.	These services are funded from Queensland Health Corporate and Health Service District funds.	Performance targets and overall financial reporting are published in Queensland Health's annual report and Service Delivery Statement.
Alcohol and Other Drug Services	These services include a range of prevention, health promotion, assessment, counselling, early identification and intervention, treatment and educational services to minimise alcohol, tobacco and other drug related harm.	These services are funded through a range of programs or health services within the Queensland Health budget and Commonwealth funds.	Performance targets and overall financial reporting are published in Queensland Health's Annual Report and Service Delivery Statement.
HIV/AIDS, Hepatitis C and Sexual Health (HAHCSH)	The program implements the whole of government <i>Queensland HIV, Hepatitis C and Sexually Transmissible Infections Strategy 2005-2011 (the Strategy)</i> in the strategic priority areas of <ul style="list-style-type: none"> <li>- enabling environment</li> <li>- education and prevention</li> <li>- early detection, care management and treatment</li> <li>- training and professional development</li> <li>- research and surveillance.</li> </ul>	Funded through the National Healthcare Agreement (NHA) and a combination of other Commonwealth and State funding programs	Annual Progress Report on the Strategy endorsed by the Premier, reporting on progress against the Key Indicators and priority area performance indicators. Six monthly reports on activities are provided by the HAHCSH Coordinators and funded NGOs delivering services and programs under contract . Other government departments involved in the Strategy provide annual activity reports to QH. There are two program specific NHA indicators against which Qld reports annually. Reports produced for other Commonwealth funding programs (e.g. Closing the Gap, NPA) as required.
	Programs are delivered through public, non-government and private organisations, including 16 Queensland Health Sexual Health Clinics providing sexual health and blood-borne virus services. A range of prevention/education initiatives within Queensland Health are coordinated across Queensland by six regional HAHCSH coordinators.

<i>Program</i>	<i>Description</i>	<i>Budgetary context</i>	<i>Reporting</i>
<b>Objective: Improving access to services</b>			
Community Health 'at risk' Services (statewide)	<p>"At-risk" services specifically focus on children, adolescents, young people and their families who are socially and economically disadvantaged and who are more likely to experience poor health outcomes because of their circumstances.</p> <p>Community health services and the joint Commonwealth – State Innovative Health Services for Homeless Youth (IHSY) program are the major service delivery vehicles for at-risk children and young people. Services for "at risk" populations have a strong focus on collaboration and coordination between other parts of the health system, other government and non government agencies to improve access to services and address the social determinants of health.</p>	<p>Community health services are funded by the Department of Health and funding is provided directly to individual area health services or regions.</p> <p>IHSY program funds are allocated through service agreements with individual service providers.</p>	<p>The program measure for all non-admitted patient services in Occasions of Service.</p> <p>Annual reporting on IHSY service delivery and annual financial acquittals to Commonwealth Department of Health and Ageing.</p>
Subsidised Dental Care Program	<p>Dental care is provided to eligible financially disadvantaged people (pensioners and other recipients of benefit / allowance from Centrelink or Department of Veteran Affairs) via:</p> <ul style="list-style-type: none"> <li>- Public Dental Clinics Metropolitan and Country</li> <li>- Private practitioners participating in the Metropolitan and Country Patients' Dental Subsidy Scheme</li> <li>- In addition, a Domiciliary Unit provides dental care for housebound patients. Dental care is also provided for special groups and institutionalised people</li> <li>- Aged Care Dental Program. This program provides dental care to residents of Registered Aged Care Facilities. Residents are eligible to receive free annual screening dental examinations and a care plan. Further treatment needs are advised and the patient is referred to an appropriate provider. Ongoing treatment is through one of the Government programs for eligible residents.</li> </ul>	<p>The Department of Health WA negotiates with Dental Health Services branch to provide funding directly to maintain the program.</p>	<p>Program measures include:</p> <ul style="list-style-type: none"> <li>• Access to dental treatment for eligible people;</li> <li>• Average waiting times; and</li> <li>• Average cost of completed courses of adult dental care.</li> </ul>

Programs funded by the WA Government during 2009-10

Program	Description	Budgetary context	Reporting
<b>Objective: Promoting health and preventing illness, early detection</b>			
WA Community Child Health Service (statewide)	<p>Child health services aim to promote improved health outcomes for babies, young children and their families across Western Australia through the provision of a range of universal and targeted programs. Services are delivered in child health centres, community based centres and in the home environment. Information and support is offered regarding parenting, child health and development, child behaviour, maternal health and wellbeing, child safety, immunisation, breast feeding and nutrition.</p> <p>The universal child health service begins with a child health nurse visiting all mothers of new babies and a series of scheduled contacts for critical points in the child's development throughout the first four years. Groups at risk of poorer health outcomes such as Aboriginal and Torres Strait Islanders people and newly arrived refugees, are a particular focus. Other service strategies include group work, intensive home visiting services in partnership with other agencies to at-risk families and enhanced services to certain groups with higher health needs such as Aboriginal and refugee families.</p>	<p>The Department of Health negotiates with area/regional health services utilising service specifications. Funding is provided directly to individual area health services or regions.</p>	<p>The program measure for all non-admitted patient services is Occasions of Service.</p>

<i>Program</i>	<i>Description</i>	<i>Budgetary context</i>	<i>Reporting</i>
WA Community School Health Services (statewide)	<p>School Health Services aim to promote healthy development and wellbeing so students may reach their full potential. Services are delivered by community health nurses, and have a strong prevention focus, with roles that can be categorised into three integrated areas; health promotion, early detection and specialist health expertise.</p> <p>School Health Services use surveillance activities and assessments to identify and monitor the health status of school-aged children throughout their school life. This system of early detection aims to ensure that children who may be at risk of developing health problems are detected as early as possible. Surveillance activities and screening programs are delivered at a population (universal), group or individual level (targeted).</p> <p>School health services have a strong presence in public secondary schools to provide primary health care for adolescents; health care planning for students with special issues; support for health -related curriculum; and, other school health promotion.</p> <p>Lifestyle Triple P is an example of an innovative program being piloted in WA School Health Services. The program provides lifestyle-specific parent training to families with overweight or obese children aged 5 to 10 years.</p>	<p>Agreement between the Department of Education and Department of Health which underpins the delivery of School Health Services. The Department of Education and Training part funds School Health Services in WA, as agreed in the MOU between the Departments.</p> <p>The Department of Health negotiates with area/regional health services utilising service specifications.</p> <p>Funding is provided directly to individual area health services or regions.</p>	<p>The program measure for all non-admitted patient services is Occasions of Service.</p>

Program	Description	Budgetary context	Reporting
School Dental Service	<p>The School Dental Service provides free dental care to school children throughout the state ranging from pre-primary through to Year 11 and to Year 12 in remote localities. Care is provided by dental therapists under the supervision of dental officers from fixed and mobile dental clinics located at schools throughout WA.</p> <p>The program incorporates preventive strategies, which include oral health education for school children. Non-general and specialist services are referred. Costs may apply for this treatment.</p>	<p>The Department of Health WA negotiates with Dental Health Services branch to provide funding directly to maintain the program.</p>	<p>Program measures include:</p> <ul style="list-style-type: none"> <li>• Number of children enrolled and under care;</li> <li>• Dental Health status i.e. number of decayed / missing / filled teeth; and</li> <li>• Average cost of service per child.</li> </ul>
WA Community Health Child Development Services	<p>Child development services provide a range of assessment, early intervention and therapy services to children with, or at risk of developmental disorders and delay. Child development services also play a key role in health prevention and promotion. Services are provided by a range of disciplines including speech pathologists, physiotherapists, occupational therapists, clinical psychologists, social workers, nurses, podiatrists, child care assistants, therapy assistants, audiologists, paediatricians and medical officers. Services are delivered in community based settings such child development centres, day-care, school and the home environment.</p>	<p>The Department of Health negotiates with area/regional health services utilising service specifications. Funding is provided directly to individual area health services or regions. In the 2010 the WA Government committed an additional \$50 Million over 4 years to strengthen these services.</p>	<p>Child Development Information System (CDIS) enables routine management and performance reporting.</p>

Programs funded by the SA Government during 2009-10

Program	Description	Budgetary context	Reporting
<b>Objective: Improving access to services</b>			
<i>General</i>			
GP Plus Health Care Centres (Centres) and GP Plus Super Clinics (Clinics)	The Centres and Clinics provide a focal point within the community where a range of primary health care service providers work together to enable improved coordination and delivery of care. They operate in collaboration with local general practitioners and make it easier for the local community to access a broader range of allied health, mental health, drug and alcohol, nurse practitioner, counselling and other support services closer to home. While the GP Plus Centres are financed solely by the State (including capital and operating funding), the Super Clinics are jointly funded by the Australian and South Australian Governments.	Recurrent and Capital State Government funding (Centres)  Joint Australian and South Australian Government Capital funding (Clinics)  In house programs State Recurrent	Monthly activity and financial data reporting
GP Plus Services	In the Metropolitan and Country Health Regions, there are a range of programs aimed at reducing growth in demand on acute services by preventing admissions to hospital and providing appropriate discharge to services closer to where people live in the home or the community.	Ongoing State Government Project Funding (GP Plus Services Fund)	Quarterly activity and financial data reporting
Allied health services	A range of allied health services are provided by the Metropolitan and Country Health Regions (including speech pathology, occupational therapy, physiotherapy, social work, dietetic/nutrition, psychology and podiatry) through primary healthcare centres including individual therapy, health information, education, group work and advocacy.	Recurrent State Government funding. In the country, funding for allied health services comes from a range of sources	Quarterly and annual client activity reports

Table 11A.76

### Table 11A.76 South Australia, community health services programs

Program	Description	Budgetary context	Reporting
Drug and Alcohol Services	Four metropolitan clinics which provide free, confidential services, including counselling, assessment and referral for people from any age group with alcohol and other drug related problems; counselling and support for family members and friends; specific services for Aboriginal and young people; and consultation, education and training for other professionals on alcohol and other drug issues. Services also provided across a number of locations in country South Australia. Includes a 24-hour telephone information, counselling, and referral service for the general public, concerned family and friends, students and health professionals.	Recurrent State Government funding	Monthly activity and financial data reporting
Ambulance Services	Both Country Health SA and the Metropolitan Health Region provide the Police Drug Diversion Initiative. This program provides for people apprehended by police for minor drug offences to be diverted from the criminal justice system into education, assessment and treatment.  South Australia has a total of 107 stations state wide which are staffed by both full-time paramedics and a network of volunteers. The services provided include: 000 emergency ambulances and paramedics; patient transport services to attend to non-emergency cases; education and training for salaried and voluntary staff; and community education.	Annual Australian Government funding  Recurrent State Government funding	Quarterly client activity and annual financial reports to the Australian Government  Monthly activity and financial data reporting

Table 11A.76

### Table 11A.76 South Australia, community health services programs

Programs funded by the SA Government during 2009-10

Program	Description	Budgetary context	Reporting
Home nursing	A large non-government organisation receives Government funding towards providing a 24 hour, seven day nursing services to people in their homes or residential care facilities. The services provided include: post acute care; palliative care and bereavement support; wound care; medication management; continence management; cystic fibrosis care; and stomal therapy. A 24 hour telephone based advice, information and support service is also provided to clients.	Recurrent State Government funding	Monthly activity and financial data reporting
Hospital Avoidance and Early Discharge packages	This service, a GP Plus Services Program, provides flexible packages of care to clients in metropolitan area in their place of residence (this includes residential care facilities). There are two types of care packages: home supported discharge; and hospital avoidance. Examples of services provided include: showering and personal care; transportation; medication management/supervision; client observation in their own home; and linkages to ongoing longer term services, allied health; acute wound care, general practitioner home visits, physiotherapy, intravenous therapy, tracheostomy care and PEG care.	Recurrent State Government funding	Monthly activity and financial data reporting

Sexual Health	A large non-government organisation receives government funding to provide a broad range of sexual and reproductive health services within a primary / public health framework. The organisation provides comprehensive and confidential sexual health care including: contraceptive advice, supply and prescription; gynaecological issues; sexual health assessment; safer sex information; sexually transmitted infection checks and treatment; sexual relationship problems; women's health, including Pap smears, breast checks and menstrual issues; pregnancy testing, ECP supply; unplanned pregnancy options and counselling; fertility issues; and abuse and violence issues.	Recurrent State Government funding	Quarterly activity and financial reporting data
Children's Centres	Children's Centres for Early Childhood Development and Parenting bring together care, education, health, community development activities and family services for families and their children from birth to eight years of age.  Children's Centres help parents and children to get the support they need within their own community. Each children's centre is tailored to meet the needs of the local community.	Funding for staffing and facilities of Children's Centres is managed by Department of Education and Children's Services. SA Health & Department of Families and Communities as primary partner agencies direct community services to be provided from these Centres (from existing budgets).	Biannual reports to the Interministerial Committee for Early Childhood.

Program	Description	Budgetary context	Reporting
GP Plus Practice Nurse Initiative	<p>OPAL (Obesity Prevention and Lifestyle) is a significant new childhood obesity prevention initiative. Local councils support communities by coordinating activities and making changes to local services to make sure healthy choices are easy for community members. OPAL has commenced in six South Australian communities and this will grow to 20 communities by 2012. Every six months new information about healthy eating and physical activity will be provided to communities around South Australia.</p>	Non-recurrent State Government funding	Annually to the Australian Government; Regular financial and activity reports to the State Government.

#### Objectives:

***Providing timely and high quality healthcare that meets individual needs throughout the lifespan***

***Ensuring continuity of care where more than one service type and/or ongoing services are required***

GP Plus Practice Nurse Initiative

Practice nurses are placed in general practice to support general practitioners in the improved management of chronic conditions from early detection to complex co-morbidities. This initiative aims to reduce workforce pressure on general practice in areas of high demand or areas with significantly high rates of chronic disease; to support general practitioners in the improved management of chronic conditions from early detection to complex co-morbidities; and to complement the role of the general practitioner by providing a variety of services, ranging from clinical care and service coordination, to maintaining good health through screening, health promotion and education for individuals and the community. This program is delivered in both Metropolitan and Country Health Regions.

Recurrent State Government funding (pending review)

Monthly financial and activity data reporting

<i>Overcoming geographical barriers</i>			
	<p>Tasmania's Health Plan is based on explicit principles for sustainable service design. If services can be provided safely, effectively and efficiently then they should be delivered locally. Where centralization of services is necessary because of quality, cost and sustainability considerations access will be facilitated through patient and care support and service accountability arrangements.</p> <p>A range of services are provided on an outreach bases to rural communities from an urban hub such as Allied Health services, Aged Care Assessment Teams, Continence Services, MAHS, MSOAP.</p>	<p>As per comments under general section</p>	<p>As per comments under general section</p>
Rural Health Facility Emergency Response	<p>Accident and Emergency services provided at some rural sites and three sites also operate an ambulance service.</p>		
Telehealth services	<p>Telehealth available at 140 facilities in Tasmania to facilitate clinical, administrative and professional education, supervision and development for State, Federal, NGOs and external organizations.</p>		
Transport Services	<p>A range of transport services to access health care is available to people who are transport disadvantaged either because of socio-economic circumstances or because health and disability preclude use or their own or public transport.</p>

Program area	Description	Budgetary context	Reporting
Chronic Disease Demonstration Service (Diabetes type 2)	Chronic Disease Demonstration Service (Type 2 Diabetes) provides multi disciplinary care for individuals referred by GPs in Northern Tasmania.		
Health Promotion Framework	Working in Health Promoting Ways: A Strategic Framework for DHHS establishes DHHS commitment to promoting safe, healthy individuals, workplaces and communities.		
<b>Objectives:</b>			
<b>Providing timely and high quality healthcare that meets individual needs throughout the lifespan</b>			
<b>Ensuring continuity of care where more than one service type and/or ongoing services are required</b>			
Palliative Care	Provides comprehensive assessment of the person seeking palliative care including pain and symptom management, emotional, social, spiritual, psychological and practical support.	As per comments under general section	As per comments under general section
Continence Services	Specialist assessment and prescribing of continence aids and appliances for clients over the age of 6 years.		
Orthotics & Prosthetics Service (OPST)	OPST provides inpatient and outpatient prosthetic and orthotic services for clients across hospital and community settings.		
Community Equipment Scheme, Spinal Account and Continence Aids	The CES and Spinal Account provides standard and non-standard equipment and continence aids for clients to assist mobility and activities of daily living, surgical footwear, communication devices and minor home modifications for clients assessed and referred by an authorised clinician as part of their clinical management.		

Table 11A.77

### Table 11A.77 Tasmania, community health services programs

Programs funded by the Tasmanian Government during 2009-10

Program area	Description	Budgetary context	Reporting
General Practice (GPs)	Provides funding to General Practice Workforce Tasmania to assist recruitment and retention of rural general practitioners. Provide support and contracts rural medical practitioners to provide services to rural health facilities around Tasmania.		
Aged Care Assessment Program	Aged Care Assessment Teams comprehensively assess the needs of frail older people and facilitate access to available care services appropriate to their care needs.	Jointly funded by Australian and State Governments	As per funding agreement requirements
<b>Other programs</b>			
Alcohol and Drug Services	Alcohol and Drug Services provide a range of specialist alcohol and other drug interventions and treatments at both individual and population levels	The service is provided in accordance with the Tasmanian Government's Output Budgeting framework. Services are funded through identified outputs within the DHHS budget.	Performance Information is collected and reported at the state level through Budget Papers, Annual Report and Key Activity and Performance Information reports. As required performance reporting is provided nationally through National Minimum Data Sets, Report On Government Services, Tasmania Together, Australian Institute of Health and Welfare, National Healthcare Agreement and Australian Council of Healthcare Standards.

<i>Program area</i>	<i>Description</i>	<i>Budgetary context</i>	<i>Reporting</i>
Disability, Child, Youth and Family Services	Disability, Child, Youth and Family Services provides a range of services including Disability, Child Protection, Out-of-Home Care, Adoptions, Child Health and Parenting, Youth Justice, Targeted Youth Support, Gambling Support, and Family, Violence and Counselling Services. The newly implemented Gateway and Integrated Family Support Services and other reform initiatives have directed a greater focus on intervening earlier, and better integration of the delivery of child protection and family support services. Recent engagement of Gateway Services for people with a disability, their families and carers will provide a single point of access and thereby aid system navigation and coordination for this client group.	The service is provided in accordance with the Tasmanian Government's Output Budgeting framework. Services are funded through identified outputs within the DHHS budget.	Performance information is collected and reported at the State level through Tasmania Together, Budget Papers, Departmental Annual Reports and Activity and Performance Information reports. Performance information is also reported at the national level through National Minimum Data Sets, the Report on Government Services, the Australian Institute of Health and Welfare, and the National Disability Agreement.
Oral health	Oral Health Services Tasmania provides emergency, general dental care, and dentures to eligible adults (holders of a Health Care or Pensioner Concession Card). Services are also provided to all children up to, but not including the age of 18. Oral Health Services Tasmania also engages in health promotion and prevention activities to promote oral health on a population basis.	The service is provided in accordance with the Tasmanian Government's Output Budgeting framework. Services are funded through identified outputs within the DHHS budget.	Performance Information is collected and reported at the state level through Budget Papers, the Annual Report, and Tasmania Together. Performance reporting is also provided nationally through the Report On Government Services, the Australian Institute of Health and Welfare (via the Australian Research Centre for Population Oral Health), and to the Australian Health Ministers' Conference via the National Oral Health Plan Monitoring Group.

### Table 11A.78 Australian Capital Territory, community health services programs

Programs funded by the ACT Government during 2009-10

Program	Description	Budgetary context	Reporting
<b>General</b>			
Corrections Health	Provides Primary Health Care services and coordinates clinical services at secondary and tertiary level to adult and youth detention services through the Alexander Maconochie Centre and Bimberi Youth Justice Centre respectively.	Through a designated budget	Monthly/Annual reports against output targets and budget
Continuing Care Program	Provides multidisciplinary continuum of care services (nursing, podiatry, physiotherapy, occupational therapy, nutrition, social work and community-based cancer psychosocial services) - acute, post acute and rapid response services; specialist nursing assessments and self management of chronic conditions program.		Monthly/Annual reports against output targets and budget
Child, Youth & Women's Health Program	Provides Maternal and Child Health nursing services including universal first home visit, child health checks, parenting education and support and vulnerable families program. Child Health Medical Officers; early childhood immunisation and school based immunisation programs; kindergarten health checks, audiometrists and orthoptic screening; school youth health nurses; specialised services for children dependent on respiratory technology, physiotherapy; social work and nutrition services. Women's Health service includes women's health assessment, cervical screening and counselling for women affected by violence; Child at Risk Health Unit and health care interpreting through the Migrant Health Unit.	Through a designated budget	Monthly/Annual reports against output targets and budget

Table 11A.78 **Australian Capital Territory, community health services programs**

## Table 11A.79 Northern Territory, community health services programs

Programs funded by the NT Government during 2009-10

Program	Description	Budgetary context	Reporting
<b>Objective: Promoting health and preventing illness, early detection</b>			
Maternal and child health/ Children's health and wellbeing/ Youth health and wellbeing	<p>The role of Maternal Child Youth Health services is to promote and support delivery of current, evidence-based programs in remote Aboriginal communities. Remote Outreach Midwives provide clinical expertise, share knowledge and information through education and orientation to staff and provide clinical services in communities without on-site midwives. The Midwifery Group Practice is an urban-based midwifery model that provides continuity of care to Aboriginal women residing in seven remote Top End communities, when they travel to Darwin to give birth. Care and education is provided in the later part of pregnancy, through labour and birth and the early postnatal period by midwives and Aboriginal Health Workers.</p> <p>The role of child health services is to promote well child health through evidenced-based programs that provide a platform for screening, monitoring for growth and development, vaccination and health promotion, including the opportunity to work in partnership with parents to share information and advice. Child Health Nurses and Child Health Aboriginal Health Workers provide clinical expertise, share knowledge and information by providing education and orientation to staff, and work collaboratively to support school based health and screening programs. Community-based Child Health Workers reside in some communities, providing support to remote Health Centre staff and visiting staff and engaging community members in child health activities and evidence-based child health programs. Community-based Strong Women Workers work in some communities, in collaboration with remote staff, to provide bi-cultural education and advice to pregnant women, new mothers and young girls to promote healthier lifestyles and improve outcomes for both women and babies.</p>	<p>These services are funded through an identified program within the NT Department of Health and Families budget and Northern Territory Closing The Gap funds. Some funding is also provided through the Council of Australian Government Indigenous Early Childhood Development National Partnership Agreement.</p>	<p>Performance targets against key functions of Community Health and Public Health Services. Financial reports are published in Department of Health and Families Annual Report. Performance milestones against the Indigenous Early Childhood Development National Partnership Agreement Implementation Plan.</p>

**Table 11A.79 Northern Territory, community health services programs**

*Programs funded by the NT Government during 2009-10*

<i>Program</i>	<i>Description</i>	<i>Budgetary context</i>	<i>Reporting</i>
Women's health and wellbeing	The Women's Health Strategy Unit (WHSU) engages in strategic planning and policy development for women's health at the national and Territory level in partnership with government and community stakeholders and coordinates the Department of Health and Families' responses to this work; project manages key strategic pieces of work to progress priority women's health issues such as those for Aboriginal and Torres Strait Islander Women, Migrant and Refugee Women and Domestic and Family Violence; manages the work of the Women's Information Service (WiSe) in Alice Springs and acts as a source of information and leadership across the Department in regards all aspects of women's health.	These services are funded through an identified program within the NT Department of Health and Community Services budget.	Performance targets against key functions of Community Health and Public Health Services. Financial reports are published in Department of Health and Community Services Annual Report.
Men's health and wellbeing	The newly established Men's Health Strategy Unit (MHSU) will employ the Men's Health Program Leader and the Aboriginal Male Health Advisor. The MHSU will provide expert advice, leadership and strategic directions in men's health with a particular focus on Aboriginal Male Health. The Unit will also lead the development of a men's health strategy and the strategic planning of programs and services to improve health outcomes of men living in the NT, especially vulnerable populations of men. The MHSU will work in collaboration to develop partnerships with key stakeholders from DHF, non-government organisations, peak men's health agencies and Aboriginal community-controlled organisations. The MHSU will work in partnership with the Women's Health Strategy Unit to improve policy development and territory-wide planning, evaluation and resource development specific to men's and women's health. The MHSU will support the co-ordination and integration of Aboriginal men's health programs across other Units, Branches and Division's within DHF by adopting a life course approach.	These services are funded through an identified program within the NT Department of Health and Community Services budget.	Performance targets against key functions of Community Health and Public Health Services. Financial reports are published in Department of Health and Community Services Annual Report.

Table 11A.79

### Table 11A.79 Northern Territory, community health services programs

Programs funded by the NT Government during 2009-10

Program	Description	Budgetary context	Reporting
Immunisation	CDC provides education and (privately purchased) rabies vaccine for pre-exposure prophylaxis against Australian Bat Lyssavirus (ABL) to persons at risk of occupational exposure. Post-exposure rabies immunoglobulin and vaccine is administered in Darwin and some regional centres to those potentially exposed to both rabies virus and ABL. Education programs are provided to the community and to occupational groups.	The post exposure program is funded through an identified budget within the Department of Health and Families. DoHA refunds 50% of the cost of rabies immunoglobulin administered to people who are bitten or scratched by bats only.	Performance targets against key functions of Community Health and Public Health Services. Financial reports are published in Department of Health and Community Services Annual Report.
Screening	The TB Control Unit covers screening of high risk groups (contacts, refugees, prisoners, health workers, fisherperso ns); monitoring and administration of directly observed treatment for active TB and leprosy; remote community visits to implement preventive and early diagnostic strategies (treatment of latent TB infection, community screening); and provision of information to the public, service providers and governments.  Well Women's Cancer Screening incorporates two national programs both of which aim to detect cancers at an early stage to prevent mortality and morbidity: 1. BreastScreen NT, which is a free breast x-ray screening program targeted at women with no breast symptoms aged 50 to 69. Clinics are provided in Alice Springs, Katherine, Tennant Creek, Darwin, Palmerston and Nhulunbuy. 2. The NT Cervical Screening Program encourages women between the ages of 20 and 69 who have been sexually active to have a pap smear every two years. The NT Pap Smear Register is a backup reminder system, sending women and their doctors a letter if they are overdue for their next pap smear. Unless they cho	These services are funded through an identified program within the Department of Health and Families budget. Some external funding is provided via Customs and DIAC for the Illegal Foreign Fisherman (IFF).  These services are funded through an identified program within the Australian Health Care Agreement.	Performance targets against key functions of Community Health and Public Health Services. Financial reports are published in Department of Health and Families Annual Report.  Performance targets against key functions of Community Health and Public Health Services. Financial reports are published in Department of Health and Families Annual Report.  Performance targets against key functions of Community Health and Public Health Services. Financial reports are published in Department of Health and Families Annual Report.

<i>Program</i>	<i>Description</i>	<i>Budgetary context</i>	<i>Reporting</i>
Urban Community Health Services	The Community Health Branch provides services in mainly urban centres throughout the NT including Darwin, Nhulunbuy, Katherine, Tennant Creek and Alice Springs. Services include Child Youth and Family Health Services, Community and Primary Care Services (including social work, palliative care, specialist nursing services and a community resource team), Hearing Services, School Health Services and Home Birth Services (Darwin and Alice Springs). The Branch participates in regional and national primary health care reforms and seeks to improve access and equity to services for urban communities. The Branch also funds a number of non-government organisations to provide services to achieve outcomes within the areas of Child and Family Health, and Community and Primary Care.	These services are funded through an identified program within the NT Department of Health and Families budget. Additionally, federal funding is provided for Home And Community Care services delivered through the Specialist Nursing program.	Performance targets against key functions of Community Health and Public Health Services. Financial reports are published in Department of Health and Families Annual Report.
School Health Services	The aim of the school health service is to ensure school aged youth engage in their health and wellbeing to make informed choices that promote optimal future health and life outcomes. Health Promoting School Nurses support delivery of health education in: <ul style="list-style-type: none"> <li>• smoking, alcohol and other drugs</li> <li>• nutrition</li> <li>• physical activity</li> <li>• health and well being</li> <li>• sexual health.</li> </ul> They also work with the school community to plan, develop, implement and evaluate school identified health promoting programs, policies and strategies.	These services are funded through an identified program within the NT Department of Health and Families budget.	Performance targets against key functions of Community Health and Public Health Services. Financial reports are published in Department of Health and Families Annual Report.

Table 11A.79

Programs funded by the NT Government during 2009-10

Program	Description	Budgetary context	Reporting
Remote Health	<p>The role of Remote Health is to ensure that evidence-based, best practice primary health care services are delivered to the remote population throughout the Northern Territory. Services are delivered through Departmental Health Centres (54), non-government organisations (some funded by the Department), and independent community-controlled organisations. Services include the provision of 24-hour emergency care, primary clinical care, population health programs, referral and access to retrieval, medical and allied health specialist services, provision of essential medications, and management of chronic illness. Services are delivered by multi-disciplinary health teams at remote Health Centres throughout the Northern Territory. Around 90% of all consultations and health contacts at remote Health Centres are with Aboriginal people. However, services are equally accessible to non-Aboriginal residents and non-residents e.g. tourists.</p>	<p>Remote Health services are funded through an identified program within the NT Dept of Health &amp; Families budget. External funding is provided by the Dept of Health &amp; Ageing through the Office of Aboriginal &amp; Torres Strait Islander Health (OATSIH) under the Enhanced Health Services Delivery Initiative (EHSDI).</p>	<p>Reporting - performance targets against 6 agreed Priority Action Areas: (1) Promote Good Health and Manage Chronic Disease, (2) Prevent Outbreaks of Disease (3) Promote Safety, Reduce Injuries and Reduce Suicide (4) Improve Men's Health and Wellbeing (5) Build a Healthier Workforce (6) Addressing Climate Change Impacts on Health and Wellbeing . A suite of core Primary Health Care indicators have been developed in conjunction with OATSIH, and reported against by DHF and non-Government remote primary health care providers across the Northern Territory. Financial reports are published in the DHF Annual Report.</p>

Table 11A.79

**Table 11A.79 Northern Territory, community health services programs**

*Programs funded by the NT Government during 2009-10*

<i>Program</i>	<i>Description</i>	<i>Budgetary context</i>	<i>Reporting</i>
Preventable Chronic Disease Services	The Chronic Conditions Strategy Unit provides policy and professional advice and support to policy makers and health professionals in both government and non-government services in the NT. The NT Chronic Conditions Prevention and Management Strategy 2010-2020 was developed as a joint process by both government and non government groups, and there is a shared commitment to using this strategy for service planning and delivery across the NT. The Strategy Unit works with policy makers and service providers to implement the strategy which has focus on social determinants and primary prevention, as well as system improvements for early detection and disease management. A governance structure for implementation of the strategy includes a cross government group with working groups to develop specific aspects and embed system change.	These services are funded through an identified program within the NT Department of Health and Community Services budget.	Performance targets against key functions of Community Health and Public Health Services. Financial reports are published in Department of Health and Community Services Annual Report. Chronic disease indicators included in the NT Aboriginal health KPI's. A monitoring and evaluation framework is currently being finalised and an annual report will be provided to the CCPMS governance group.
Health Promotion Strategy Unit	The Health Promotion Strategy Unit (HPSU) is tasked with strengthening the capacity for effective health promotion across the Department of Health & Families (DHF). This involves facilitating a uniform understanding of health promotion across the DHF; reducing divisions between program areas by providing strategic and policy support to key staff; and a commitment to the planning for sustainable health promotion through investment into research, program planning, evaluation, and developing education and training pathways. A key focus has been to build relationships with educational institutions and research bodies. The HPSU has a key role in providing leadership in relation to Priority Area Action 1 in the DHF Corporate Plan, which relates to promoting and protecting good health and preventing injury. HPSU also provides jurisdictional leadership in relation to the national preventative health agenda.	These services are funded through an identified unit within the NT Department of Health and Families budget.	Performance targets against key functions of Community Health and Public Health Services. Financial reports are published in Department of Health and Families Annual Report.

Table 11A.79

**Table 11A.79 Northern Territory, community health services programs**

*Programs funded by the NT Government during 2009-10*

<i>Program</i>	<i>Description</i>	<i>Budgetary context</i>	<i>Reporting</i>
Public Health Nutrition and Physical Activity services	Public health nutritionists provide training and support to primary health care teams to assist in the promotion of good nutrition and physical activity to the community, and in management of people with nutrition related conditions. In urban areas, they offer individual and group consultations through community care centres, and in remote communities they provide group education through health centres, women's centres etc. They also work with agencies outside the health sector to promote regular participation in physical activity and improved nutrition and better food supply, for example in remote community stores.	These services are funded through an identified program within the NT Department of Health and Community Services budget.	Performance targets against key functions of Community Health and Public Health Services. Financial reports are published in Department of Health and Community Services Annual Report.
Hearing Services	Hearing Services are provided in remote communities and urban centres and include identification of ear and hearing problems related to health and education failure as well as referral and follow-up for ENT services. Additional services include comprehensive diagnostic audiological evaluations of adults and children, and in conjunction with other agencies, the management of hearing loss and educational sequelae. A Neonatal Screening Program for permanent hearing loss is also operating in urban centres.	Services are funded as an identified program within the NT Department of Health and Families. Additional funding to support audiological and ENT services has been provided through the EHSDI funding. Additional funding for remote visits and training is provided through OATSIH.	Performance targets against key functions of Community Health and Public Health Services. Financial reports are published in Department of Health and Families Annual Report.

Table 11A.79

### Table 11A.79 Northern Territory, community health services programs

Programs funded by the NT Government during 2009-10

Program	Description	Budgetary context	Reporting
<b>Other programs</b>			
Oral Health	Oral Health Services provide free assessment and treatment to all children up to school-leaving age and to adults holding a current Healthcare Concession Card or Pensioner Concession Card. Services are provided from community and school based clinics in urban areas and in clinics in health centres and mobile trucks in remote communities. Community level and individual oral health promotion activities are also conducted.	These services are funded through an identified program within the NT Department of Health and Families budget.	Performance targets against key functions of Community Health and Public Health Services. Financial reports are published in Department of Health and Families Annual Report. Additional reporting associated with National Partnership Agreements provided to the Australian Government.
Alcohol and other drugs	The Alcohol and Other Drugs Program (AODP) develops policies, strategies and programs to prevent and respond to the misuse of alcohol, tobacco and other drugs. The AODP includes policy development and legislative compliance, community development, accredited training, services development and treatment and care services and programs.	These services are funded through an identified program within the NT Department of Health and Families budget. Some external funding is provided by the Department of Health and Ageing through the Office of Aboriginal and Torres Strait Islander Health.	Performance targets against key functions of Health Protection and Public Health Services. Financial reports are published in Department of Health and Families Annual Report.
Sexual Health and Blood Borne Viruses Program	NT wide program aimed at prevention, treatment, surveillance and control of sexually transmitted infections and blood borne viruses such as HIV/AIDS and Hepatitis C. The program operates five sexual health clinics, known as Clinic 34, in the major towns which cover urban, rural and remote areas. The program funds community based organisations supporting sexual health work. Other community based organisations are funded to operate needle and syringe programs and provide harm reduction initiatives, community and peer support and education.	The program is funded through an identified budget within the Department of Health and Families. Some external funding is provided via OATSIH.	Reporting is against the business plan of the NT Sexual Health Advisory Group and the more detailed Sexual Health and Blood Borne Virus Unit business plan.
