

13A Aged care services — attachment

Definitions for the indicators and descriptors in this attachment are in section 13.6 of the chapter. Data in this Report are examined by the Aged Care Services Working Group, but have not been formally audited by the Secretariat. Unsourced information was obtained from the Australian, State and Territory governments.

This file is available in Adobe PDF format on the Review web page (www.pc.gov.au/gsp). Users without Internet access can contact the Secretariat to obtain these tables (see details on the inside front cover of the Report).

Table 13A.1	Males and females aged 70 years or over, June 2010
Table 13A.2	Target population data, by location ('000)
Table 13A.3	Proportion of people aged 70 years or over by locality, June 2010
Table 13A.4	People receiving aged care services, 2009-10
Table 13A.5	Government expenditure on aged care services, 2009-10 (\$ million)
Table 13A.6	Government real expenditure on aged care services, by program type (2009-10 \$)
Table 13A.7	Australian Government (DOHA) real expenditure on assessment and information services (2009-10 \$)
Table 13A.8	Government real expenditure on residential aged care services (2009-10 \$)
Table 13A.9	Government real expenditure on community care services (2009-10 \$)
Table 13A.10	Government real expenditure on aged care services provided in mixed delivery settings (2009-10 \$)
Table 13A.11	State and Territory governments' experimental recurrent non-HACC expenditure on Post Acute Packages of Care, 2009-10 (\$ million)
Table 13A.12	Real capital expenditure on aged care services (\$ million)
Table 13A.13	Australian Government (DVA) Veterans' Home Care (VHC) and Community Nursing programs, 2009-10
Table 13A.14	Australian Government (Department of Veterans' Affairs) residential aged care clients
Table 13A.15	Australian Government Activity Measures on selected Aged Care Programs
Table 13A.16	Ownership of operational aged care residential places
Table 13A.17	Average annual Australian Government basic subsidy amount, including Conditional adjustment payment, per occupied place and the dependency level of aged care residents, June 2010
Table 13A.18	Size and distribution of all residential aged care services
Table 13A.19	Size and distribution of residential aged care services with over 80 per cent high care residents
Table 13A.20	Size and distribution of residential aged care services with over 80 per cent low care residents
Table 13A.21	Size and distribution of mixed residential aged care services with less than 80 per cent high care residents and more than 20 per cent low care residents
Table 13A.22	Proportion of residential aged care places, by location in high care, low care and mixed care services
Table 13A.23	Operational number of aged care places, 30 June ('000)
Table 13A.24	Operational number of aged care places per 1000 people aged 70 years or over, 30 June
Table 13A.25	Operational number of aged care places per 1000 people aged 70 years or over plus Indigenous people aged 50–69 years, 30 June
Table 13A.26	Operational number of residential and community aged care services per 1000 people aged 70 years or over plus Indigenous people aged 50–69 years, by planning region

Attachment contents

Table 13A.27	Operational number of residential and community aged care services per 1000 people aged 70 years or over plus Indigenous people aged 50–69 years, by remoteness
Table 13A.28	Aged care recipients per 1000 people aged 70 years or over plus Indigenous people aged 50–69 years, 30 June
Table 13A.29	Aged care recipients per 1000 people aged 70 years or over plus Indigenous people aged 50–69 years by locality, 30 June
Table 13A.30	Aged care recipients from special needs groups, June 2010 (per cent)
Table 13A.31	Aged care recipients from a non-English speaking country, 30 June
Table 13A.32	Aged care recipients from a non-English speaking country per 1000 people from a non-English speaking country aged 70 years or over by locality, 30 June
Table 13A.33	Indigenous aged care recipients per 1000 Indigenous people aged 50 years or over and as a proportion of all recipients, 30 June
Table 13A.34	Indigenous aged care recipients per 1000 Indigenous people aged 50 years or over by locality, 30 June
Table 13A.35	Permanent aged care residents at June 2010: age-sex specific usage rates per 1000 people by jurisdiction
Table 13A.36	Proportion of new permanent residents classified as concessional, assisted or supported residents (per cent)
Table 13A.37	Ageing in place: residents changing from low care to high care in the same facility
Table 13A.38	Utilisation of residential aged care places, by remoteness category, June 2010
Table 13A.39	CACP EACH and EACH-D recipients at June 2010: age-sex specific usage rates per 1000 people by jurisdiction
Table 13A.40	Permanent aged care residents, CACP, EACH and EACH-D recipients at June 2010: age-sex specific usage rates per 1000 people by jurisdiction
Table 13A.41	Number of younger people with a disability using residential, CACP, EACH and EACH-D aged care services
Table 13A.42	Permanent aged care residents at June 2010: age-sex specific usage rates per 1000 people by remoteness
Table 13A.43	CACP, EACH and EACH-D recipients at June 2010: age-sex specific usage rates per 1000 people by remoteness
Table 13A.44	Permanent aged care residents, CACP, EACH and EACH-D recipients at June 2010: age-sex specific usage rates per 1000 people by remoteness
Table 13A.45	Indigenous permanent residents classified as high or low care and Indigenous CACP, EACH and EACH-D at June 2010: age-sex specific usage rates per 1000 people by remoteness
Table 13A.46	HACC services received per 1000 people aged 70 years or over plus Indigenous people aged 50–69 years
Table 13A.47	HACC services received within major cities per 1000 people aged 70 years or over plus Indigenous people aged 50–69 years
Table 13A.48	HACC services received within inner regional areas per 1000 people aged 70 years or over plus Indigenous people aged 50–69 years

Attachment contents

Table 13A.49	HACC services received within outer regional areas per 1000 people aged 70 years or over plus Indigenous people aged 50–69 years
Table 13A.50	HACC services received within remote areas per 1000 people aged 70 years or over plus Indigenous people aged 50–69 years
Table 13A.51	HACC services received within very remote areas per 1000 people aged 70 years or over plus Indigenous people aged 50–69 years
Table 13A.52	HACC target population (number)
Table 13A.53	HACC services received per 1000 HACC target population
Table 13A.54	HACC services received within major cities per 1000 HACC target population
Table 13A.55	HACC services received within inner regional areas per 1000 HACC target population
Table 13A.56	HACC services received within outer regional areas per 1000 HACC target population
Table 13A.57	HACC services received within remote areas per 1000 HACC target population
Table 13A.58	HACC services received within very remote areas per 1000 HACC target population
Table 13A.59	HACC client characteristics
Table 13A.60	Distribution of HACC clients, by age and Indigenous status (per cent)
Table 13A.61	Comparative characteristics of Indigenous HACC clients
Table 13A.62	Access to Commonwealth Respite and Carelink Centres, 2009-10
Table 13A.63	Aged care assessments
Table 13A.64	Aged care assessments per 1000 people – age specific approvals
Table 13A.65	Aged care assessments completed under the ACAP for people of all ages
Table 13A.66	Elapsed time between ACAT approval and entry into residential, EACH, EACH-D or CACP service
Table 13A.67	Recommended location of longer term living arrangements of Aged Care Assessment Teams (ACAT) clients
Table 13A.68	Older people needing assistance with at least one everyday activity: extent to which need was met, 2003
Table 13A.69	Public hospital separations for care type "maintenance" for people aged 70 years or over plus Indigenous people aged 50-69
Table 13A.70	Hospital patient days used by those eligible and waiting for residential aged care
Table 13A.71	Falls resulting in patient harm in residential aged care and treated in hospital
Table 13A.72	Re-accreditation decisions on residential aged care services at 30 June 2010
Table 13A.73	Aged Care Complaints Investigation Scheme
Table 13A.74	Compliance with service standards for community aged care services — CACP, EACH, EACH-D and National Respite for Carers Program, 2009-10
Table 13A.75	Outcomes for community aged care services — CACP, EACH, EACH-D and National Respite for Carers Program — reviewed against standards, 2009-10
Table 13A.76	HACC National Service Standards appraisals — results of appraisals
Table 13A.77	Aged care assessment program — activity and costs

Attachment contents

Table 13A.78	Australian Government (DoHA and DVA) real expenditure on residential services, per person aged 70 years or over plus Indigenous people aged 50–69 years (2009-10 dollars)
Table 13A.79	Australian, State and Territory governments' real expenditure on HACC services per person in the HACC target population (2009-10 dollars)
Table 13A.80	Australian, State and Territory government total real expenditure on HACC services, per person aged 70 years or over plus Indigenous people aged 50–69 years (2009-10 dollars)
Table 13A.81	Australian Government real expenditure on CACPs, per person aged 70 years or over plus Indigenous people aged 50–69 years (2009-10 dollars)
Table 13A.82	Transition Care Program

(a) Geographical data are based on the ABS Australian Standard Geographic Classification of Remoteness Areas. Data are classified according to an index of remoteness which rates each ABS census district based on the number and size of towns, the distance to major towns and urban centres. For more information refer to the Australian Standard Geographic Classification (ABS Publication 1216.0). The proportions of population in each Statistical Local Area (SLA) were attributed to Remoteness Areas (RA) by DoHA, using ABS SLA to RA concordance.

(b) Data for years prior to 2008 are population projections by SLA for 2002–2022 based on 2001 Census prepared for DoHA by ABS according to assumptions agreed to by DoHA. Data for June 2008 are preliminary population projections by SLA for 2006–2026 based on 2006 Census prepared by ABS for DoHA according to assumptions agreed to by DoHA. Data for years from June 2009 are population projections by SLA for 2007–2027 based on 2006 Census prepared by ABS for DoHA according to assumptions agreed to by DoHA.

Table 13A.2 Target population data, by location ('000) (a), (b), (c)

	NSW	Vic	Qld	WA	SA	Tas	ACT	NT	Aust
--	-----	-----	-----	----	----	-----	-----	----	------

(c) Data in this table are utilised to determine the target populations for the chapter.

(d) Data for people born in a non-English speaking country prior to 2008 are estimates based on ratios from ABS, CDATEA 2001 Release 2 applied to ABS population projections by SLA 2002–2022 (unpublished), based on 2001 Census. Data for June 2008 are census count of persons 70 plus born overseas in countries other than main English-speaking countries increased by ratio (70 plus projected population 2009) / (70 plus census count 2006) and then distributed amongst states and remoteness areas in the same proportions as corresponding data published in the 2009 Report. Data from June 2009 are based on ratios from ABS 2006 Census data applied to population projections by SLA 2007–2027 (unpublished, produced for DoHA by ABS). People born in a non-English speaking country refers to those born overseas in countries other than UK, Ireland, NZ, Canada, South Africa, and USA.

(e) Indigenous data prior to 2008 are Indigenous estimates based on ratios from ABS Census 2001 data applied to population projections by SLA 2002–2022. Data for June 2008 are determined as follows: observed average annual growth at state-level in ABS Experimental Indigenous Estimated Residential Populations (ERPs) between 2001 and 2006 for total Indigenous persons of all ages was applied to project 2006 ERPs forward to 2008. The increase from 2001 to 2006 contains unexplained population increase in addition to demographic population increase. Indigenous population estimates for June 2009 onwards are based on ratios from ABS 2006 Experimental Indigenous ERP data applied to population projections by SLA 2007–2027 (unpublished, produced for DoHA by ABS).

.. Not applicable. – Nil or rounded to zero.

Source: DoHA unpublished; Population projections by SLA for 2007–2027 prepared for DoHA by ABS according to assumptions agreed to by DoHA unpublished; Projections based on ABS experimental Indigenous ERPs by remoteness areas as at June 2006 (ABS Cat. no. 3238.0.55.001) DoHA unpublished; *ABS experimental estimates and projections, Aboriginal and Torres Strait Islander Australians*, 1991 to 2009 (ABS Cat. no. 3238.0); *Experimental estimates of Aboriginal and Torres Strait Islander Australians*, Jun 2006 (ABS Cat. no. 3238.0.55.001); Census 2006 data; ABS unpublished data sourced by DoHA.

(a) Recipient numbers in care is a distinct count of clients at any time in the 12 month period to 30 June 2010. Clients may have care under multiple types or states, so a client may be counted twice.

(b) Data is presented at the program level only. Since an individual may receive services under more than one aged care program throughout the year, the number of unique individuals accessing aged care cannot be determined.

(c) State or territory is based on the location of the service provider outlet. For all programs excluding Home and Community Care, where a person moved from one state to another they are counted uniquely in each state. Thus, a person who moved between states within the year will be double counted, making the total number of people greater than the number of unique individuals receiving services under the program.

Table 13A.4 People receiving aged care services, 2009-10 (a), (b), (c), (d)

	Unit	NSW	Vic	Qld	WA	SA	Tas	ACT	NT	Aust
(d)	Remoteness category is based on location of service provider, except for the HACC program where State or Territory is based on the location of the HACC Agency and the Remoteness Category is based on the postcode of the care recipient. Where a person moved from one state to another they are counted uniquely in each state against remoteness indicators. A person who has moved between states within the year will be double counted, making the total number of people in the 'remoteness' count greater than the number of unique individuals receiving services under the program.									
(e)	In Tasmania, includes very remote as numbers are too small to appear separately.									
(f)	In Tasmania and the ACT, includes Indigenous Australians as numbers are too small to appear separately.									
(g)	In Victoria and Tasmania, includes remote as numbers are too small to appear separately. In Queensland, includes remote and very remote as numbers are too small to appear separately.									
(h)	In NSW, WA, SA and the ACT, includes Indigenous Australians as numbers are too small to appear separately.									
(i)	In the NT, includes people aged 90+ as numbers are too small to appear separately.									
(j)	In Tasmania, includes Indigenous Australians as numbers are too small to appear separately.									
(k)	In Tasmania, includes outer regional as numbers are too small to appear separately.									
(l)	Client age is calculated as at 30 June 2010. For the category aged 50–69 years, data only includes HACC clients aged 50–69 years who reported as Indigenous. That is, it excludes HACC clients aged 50–69 years with an unknown Indigenous status or who reported as non-Indigenous.									
(m)	For ACT, major cities includes ACT inner regional.									
(n)	Population is people aged 70 years or over plus, for HACC only, Indigenous people aged 50–69 years at 30 June 2010.									
(o)	Population figure for 90 plus is not available, so rate per 1000 is based on sum of age groups 85 to 89 and 90 plus.									
	na Not available. .. Not applicable. - Nil or rounded to zero. np Not published									
	Source: From the Australian Government Department of Health and Ageing's (DoHA) Ageing and Aged Care data warehouse and HACC Minimum Data Set (MDS); Population projections by SLA for 2007–2027 based on 2006 Census prepared for DoHA by ABS according to the assumptions agreed to by DoHA and Indigenous population based on the ABS unpublished, Indigenous experimental estimates and projections (series B).

Table 13A.5 Government expenditure on aged care services, 2009-10 (\$ million)

	NSW	Vic	Qld	WA	SA	Tas	ACT	NT	Other (a)	Aust
(a)	Australian Government expenditure that cannot be attributed to individual states or territories.									
(b)	The objective of Aged Care Assessment is to provide comprehensive multidisciplinary assessment of needs of frail older people, including delegated authority to approve people for Australian Government subsidised care through residential aged care, Community Aged Care Packages and flexible care. Australian government funding is provided to State and Territory governments to operate Aged Care Assessment Teams (ACATs) and evaluation units.									
(c)	Totals may not add due to rounding.									
(d)	The DVA expenditure figures, which are provided by DoHA, include a variation due to the accounting treatment of an accrual. The figures are subject to lag and may therefore be subject to revision.									
(e)	In Queensland, EBA expenditure includes all additional funding including depreciation provided for operations of State owned and operated Residential Aged Care Facilities. Rural Small Nursing Home Supplement expenditure is included with EBA supplement. In Tasmania, while it finances an EBA supplement to registered nursing staff it is not possible to quantify the amount of that supplement in relation to its aged care services as they are delivered in integrated settings and programs.									
(f)	NT Rural small nursing home supplement expenditure incurred due to non-funding of two services.									
(g)	The objective of Community Aged Care Packages are to assist people with complex care needs who otherwise are eligible for low level residential care to remain in the community. Australian Government only funded.									
(h)	The objective of Extended Aged Care at Home is to provide high level care at home as an alternative to high level residential care. Australian Government only funded.									
(i)	Reports provisional HACC data that have not been validated and may be subject to revision. Data are for expenditure under the HACC Review Agreement only.									
(j)	DVA community nursing expenditure data are as at 27 August 2010. Figures are subject to significant lag and may therefore be subject to revision. These figures may also differ slightly from the figures published in the DVA annual report for this reason. Expenditure does not include an additional \$1.9 million which was spent on wound management consumables. VHC expenditure data are as at 3 August 2010.									
(k)	Data relate to expenditure administered under the National Aboriginal and Torres Strait Islander Flexible Aged Care Program which is aimed at providing quality, flexible, culturally appropriate aged care to older Aboriginal and Torres Strait Islander people close to their home and community.									
	na Not available. .. Not applicable. – Nil or rounded to zero.

(a) Real dollars are previous years' expenditure in current year's dollars after basing expenditure on the ABS GDP price deflator 2009-10 = 100 (table AA.26).

(b) Australian Government expenditure that cannot be attributed to individual states or territories.

(c) The objective of Aged Care Assessment is to provide comprehensive multidisciplinary assessment of needs of frail older people, including delegated authority to approve people for Australian Government subsidised care through residential aged care, Community Aged Care Packages and flexible care. Australian government funding is provided to State and Territory governments to operate Aged Care Assessment Teams (ACATs) and evaluation units

(d) Additional COAG funding for ACATs began in 2006-07.

(a) Real dollars are previous years' expenditure in current year's dollars after basing expenditure on the ABS GDP price deflator 2009-10 = 100 (table AA.26).

Table 13A.8 Government real expenditure on residential aged care services (2009-10 \$) (a)

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Other</i>	<i>Aust</i>
(b)	Total expenditure for Australia for 2005-06 and 2006-07 is not the sum of the states and territories. Other expenditure is Australian Government expenditure that cannot be attributed to individual states or territories.									
(c)	These expenditure figures are sourced from the Department of Health and Ageing (DoHA). The figures are subject to lag and may therefore be subject to revision. The DVA expenditure figures for 2009-10, which are provided by DoHA, include a variation due to the accounting treatment of an accrual in 2009-10. For data on expenditure per person aged 70 years or over see table 13A.14.									
(d)	EBA expenditure includes all additional funding including depreciation provided for operations of State owned and operated Residential Aged Care Facilities in Queensland. Rural Small Nursing Home Supplement expenditure is included with EBA supplement.									
(e)	While Tasmania finances an EBA supplement to registered nursing staff it is not possible to quantify the amount of that supplement in relation to its aged care services as they are delivered in integrated settings and programs.									
(f)	NT Rural small nursing home supplement expenditure incurred due to non-funding of two services.									
	na Not available. .. Not applicable. – Nil or rounded to zero.

(a) Real dollars are previous years' expenditure in current year's dollars after basing expenditure on the ABS GDP price deflator 2009-10 = 100 (table AA.26).

(b) Other expenditure is Australian Government expenditure that cannot be attributed to individual states or territories.

(c) In 2009-10, DVA expenditure on Veterans Home Care has decreased as it no longer includes Deeds of Agreement expenses. This expenditure is now a Specific Purpose Payment not related to VHC expense. For further detailed notes on DVA community care expenditure data see table 13A.13.

(d) The objective of Community Aged Care Packages are to assist people with complex care needs who otherwise are eligible for low level residential care to remain in the community. Australian Government only funded.

(e) The objective of Extended Aged Care at Home is to provide high level care at home as an alternative to high level residential care. Australian Government only funded.

(f) NRCP includes expenditure on Respite services and Commonwealth Carer Respite Centres and Demonstration Day Respite.

(g) Reports provisional HACC data that have not been validated and may be subject to revision. Data are for expenditure under the HACC Review Agreement.

na Not available. .. Not applicable. – Nil or rounded to zero.

2009-10	160	166	174	239	321	215	155	744	21	212

(a) Real dollars are previous years' expenditure in current year's dollars after basing expenditure on the ABS GDP price deflator 2009-10 = 100 (table AA.26).

(b) Other expenditure is Australian Government expenditure that cannot be attributed to individual states or territories.

(c) The Long Stay Older Patient Initiative is a four year program established by COAG. More details on the program are at box 13.4 of the Aged care services chapter.

(d) The objective of Day Therapy Centres is to assist older people to maintain or recover functional independence, through the provision of therapy services to allow them to remain in the community or in low level residential care. Funding is Australian Government only.

(e) The objective of the National Continence Management Strategy is to improve continence awareness, management and treatment so that more Australians can live and participate in their community with confidence and dignity.

(f) Data relate to expenditure administered under the National Aboriginal and Torres Strait Islander Flexible Aged Care Program which is aimed at providing quality, flexible, culturally appropriate aged care to older Aboriginal and Torres Strait islander people close to their home and community.

na Not available. .. Not applicable. – Nil or rounded to zero.

(a) State and Territory governments' capital expenditure on residential aged care services is included in table 13A.12.

(b) These data are experimental and are not included in calculations of recurrent expenditure in the Report.

(c) In NSW, not all recipients of Post Acute Packages of Care are aged 70 years or over.

(d) Tasmania provides substantial non-HACC funded nursing services to post-acute clients in the community. However, as these are not counted discretely it is not possible to quantify or cost the services.

na Not available. .. Not applicable. – Nil or rounded to zero.

Average number of hours provided per client for Community Nursing per 28 day claiming period (n)	no.	7.0	8.0	6.6	9.5	4.4	7.3	13.3	6.4	7.0
Veterans Community Nursing expense										
Total program expense (o), (p)	\$'000	53 839	17 112	14 855	5 957	10 858	4 929	1 969	63	109 584
Average expense per client (q)	\$	551.2	582.3	507.3	662.0	446.8	518.3	745.7	504.9	542.7

(a) Due to the very small number of clients, some NT client number data have been included with SA.

(b) "Veterans approved for VHC Services" and the "Average number of hours approved per year for non-transitional veterans" relate to services that were approved to occur, but not necessarily provided in 2009-10. The actual number of recipients and average hours provided will be lower than those approved.

(c) Individual service totals will not add to the all services total because veterans may be approved for more than one service. In addition, State/Territory totals may slightly exceed total Australia figure as some veterans move State during the year and are counted in each State of residence.

(d) Transitional veterans are those veterans who transferred to the VHC program from the Home and Community Care (HACC) program, often with grandfathered service and/or fee levels, and so may have been approved for higher hours of service than other VHC clients. Veterans who do not transfer from the HACC program are referred to as "non-transitional".

(e) These figures are approximations only; the data have been derived from percentage age distributions sourced from a separate data set.

(f) VHC expense figures as at 3 August 2010.

(g) The Service Provision expense figures do not include fees for respite care services, as these are paid under separate appropriations. The 2009-10 appropriation for in-home and emergency respite was \$23.1 million. Residential respite is funded under the aged care appropriation and separate figures are not available.

(h) Deeds of Agreement expense is no longer applicable as this is now a Specific Purpose Payment not related to VHC expense.

(i) Average expense per client figures are for core VHC services only; that is, they exclude Respite Services (in-home, emergency and residential) as these are paid under separate appropriations.

Table 13A.13 Australian Government (DVA) Veterans' Home Care (VHC) and Community Nursing programs, 2009-10

	Unit	NSW	Vic	Qld	WA	SA	Tas	ACT	NT	Aust
(j)	Due to the very small number of clients, some ACT client numbers have been included with NSW and some NT client numbers have been included with SA.									
(k)	DVA introduced a new classification system for the Community Nursing program on 1 March 2010. Due to the changeover these data may therefore not be comparable with previous years' reports.									
(l)	Individual State/Territory totals may not add up to the total for Australia because veterans can move between states.									
(m)	Individual service totals may not add up to the total for all services because veterans can move between service types.									
(n)	These are estimates, as some data on hours provided are not available. DVA Community Nursing provision is based on a 28-day service provision/claim									
(o)	Total Program Expense figures are at 27 August 2010. Figures are subject to significant lag and may therefore be subject to revision. These figures may also differ slightly from the figures published in the DVA annual report for this reason.									
(p)	Total program expenses reported does not include an additional \$1.9 million that was spent on wound management consumables.									
(q)	Average expenses is based on a 28-day service provision/claim period and does not include wound management consumables.									

.. Not applicable. **np** Not published.

Source: DVA unpublished.

Veterans 70 years or over (i)	no.	62 938	42 734	37 316	14 414	14 593	5 739	2 801	268	180 803
Veterans in residential care per 1000 eligible veterans 70 years or over										
30 June 2010	no.	139.7	145.3	135.2	128.6	157.9	135.7	95.3	78.4	139.8

(a) Real dollars are previous years' expenditure in current year's dollars after basing expenditure on the ABS GDP price deflator 2009-10 = 100 (table AA.26).

(b) See table 13A.2 for notes and sources of population data.

(c) These figures are sourced from DoHA. The figures are subject to lag and may therefore be subject to revision.

(d) The DVA expenditure figures for 2009-10, which are provided by DoHA, include a variation due to the accounting treatment of an accrual in 2009-10.

(e) The total of the State and Territory expenditure figures may not exactly match the Australian total figure due to rounding.

(f) Number of DVA Gold and White card holders residents as at 30 June.

(g) The Tasmanian client number includes overseas clients

(h) The NT client number figures have been included with SA given the very small number of clients.

(i) The category 'Veterans 70 years or over' includes those whose age is unknown.

np Not published.

(a) Aged Care Assessment — assessments data are for the period before the one noted in the heading. For 2009-10 the data are for 2008-09, for 2008-09 the data are for 2007-08, for 2007-08 the data are for 2006-07, for 2006-07 the data are for 2005-06 and for 2005-06 the data are for 2004-05.

(b) Aged care assessments includes all completed assessments for all age groups. (Incomplete assessments are not included).

(c) Operational places/packages as at 30 June.

(d) Includes CACPs as well as community care places under the National Aboriginal and Torres Strait Islander Flexible Aged Care program, Multi-Purpose Services and Innovative Care, except for 2008-09.

(e) Community Care Grants include Flexible Care Grants and grants allocated outside of the aged care approvals round.

(f) National Respite for Carers includes carers assisted through Commonwealth Respite and Carelink Centres. Numbers may be less than actual carers assisted as not all Centres submitted data for all quarters.

(g) Commonwealth Carelink Centres refers to number of instances of assistance, not carers assisted. Numbers of instances of assistance are less than actual instances of assistance as Carelink data for Access Points is not available.

(h) Number of clients at 30 June.

na Not available. - Nil or rounded to zero.

(a) This table is based on the operational status of the residential aged care service operator or provider. Data exclude flexible places under the National Aboriginal and Torres Strait Islander Flexible Aged Care Program, Innovative Pool programs and care provided by Multi-Purpose services.

(b) Services to an identifiable community based on locality or ethnicity, not for financial gain.

(c) Services to the general community or an appreciable section of the public, not for financial gain.

– Nil or rounded to zero.

(a) Excludes flexible places under the National Aboriginal and Torres Strait Islander Flexible Aged Care Program, Innovative Pool programs and care provided by Multi-Purpose services.

(b) Includes basic subsidy plus Conditional Adjustment Payment (CAP).

(c) Subsidy plus CAP divided by the number of bed days, multiplied by 365. Differences in average annual subsidies reflect differences in the dependency of residents.

(a) The occupancy rate is defined as the number of residents in care as a proportion of operational places. Occupancy is measured over the financial year however places are reported at June 30.

(b) Excludes flexible places under the National Aboriginal and Torres Strait Islander Flexible Aged Care Program, Innovative Pool programs and care provided by Multi-Purpose services.

(c) See footnotes to table 13A.2 for detail on regional data classification.

– Nil or rounded to zero. .. Not applicable.

(a) The occupancy rate is defined as the number of residents in care as a proportion of operational places. Occupancy is measured over the financial year however places are reported at June 30.

Table 13A.19 Size and distribution of residential aged care services with over 80 per cent high care residents (a), (b), (c), (d), (e)

	<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
(b)	Services have been defined as high care, low care or mixed care based on the proportion of high care and low care residents in each service. Excludes multi-purpose services and flexibly funded services.									
(c)	See footnotes to table 13A.2 for detail on regional data classification.									
(d)	This table shows occupancy rates of services that have been categorised on the basis of the proportions of high care or low care residents. Therefore this table cannot be used to draw valid conclusions relating to the occupancy of places of a particular care level.									
(e)	In March 2008, the Residential Classification Scale (RCS) was replaced by the Aged Care Funding Instrument (ACFI), but some residents remained under the RCS in June 2008. See box 13.5 in the Aged care services chapter for more detail on these classifications.									

– Nil or rounded to zero. .. Not applicable.

(a) The occupancy rate is defined as the number of residents in care as a proportion of operational places. Occupancy is measured over the financial year however places are reported at June 30.

Table 13A.20 Size and distribution of residential aged care services with over 80 per cent low care residents (a), (b), (c), (d), (e)

	<i>Unit</i>	<i>NSW</i>	<i>(f)</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
(b)	Services have been defined as high care, low care or mixed care based on the proportion of high care and low care residents in each service. Excludes multi-purpose services and flexibly funded services.										
(c)	See footnotes to table 13A.2 for detail on regional data classification.										
(d)	This table shows occupancy rates of services that have been categorised on the basis of the proportions of high care or low care residents. Therefore this table cannot be used to draw valid conclusions relating to the occupancy of places of a particular care level.										
(e)	In March 2008, the RCS was replaced by the ACFI, but some residents remained under the RCS in June 2008. See box 13.5 in the Aged care services chapter for more detail on these classifications.										
(f)	For 2008, data excludes one service in NSW with 60 places, which is included in calculations for tables 13A.19 and 13A.22.

Table 13A.21 Size and distribution of mixed residential aged care services with less than 80 per cent high care residents and more than 20 per cent low care residents (a), (b), (c), (d), (e), (f)

	<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
(a)	A service that is neither high care nor low care is a mixed care service. Aged care residential services with 80 per cent or more residents classified as high care are described as high care services. Aged care residential services with 80 per cent or more residents classified as low care are described as low care services.									
(b)	The occupancy rate is defined as the number of residents in care as a proportion of operational places. Occupancy is measured over the financial year however places are reported at June 30.									
(c)	Services have been defined as high care, low care or mixed care based on the proportion of high care and low care residents in each service. Excludes flexible places under the National Aboriginal and Torres Strait Islander Flexible Aged Care Program, Innovative Pool programs and care provided by Multi-Purpose services.									
(d)	See footnotes to table 13A.2 for detail on regional data classification.									
(e)	This table shows occupancy rates of services that have been categorised on the basis of the proportions of high care or low care residents. Therefore this table cannot be used to draw valid conclusions relating to the occupancy of places of a particular care level.									
(f)	In March 2008, the RCS was replaced by the ACFI, but some residents remained under the RCS in June 2008. See box 13.5 in the Aged care services chapter for more detail on these classifications.

Total places (h)									
2006	103.8	106.1	104.5	104.7	112.2	108.5	95.8	238.9	105.7
2007	106.1	108.1	106.6	105.1	114.2	108.6	98.8	243.0	107.6
2008	111.0	112.0	108.5	107.7	119.1	110.7	106.9	225.0	111.5
2009	111.0	111.6	107.3	108.4	117.3	111.5	102.1	222.9	111.0
2010	112.3	112.6	110.5	109.7	116.6	111.6	113.8	219.9	112.5

(a) Places do not include those that have been approved but are not yet operational.

(b) This table differs from table 13A.28, which refers to residents.

(c) Includes all flexible residential places under the National Aboriginal and Torres Strait Islander Flexible Aged Care Program, multi-purpose services and innovative pool programs.

(d) Government planning targets are based on providing 113 places per 1000 people aged 70 years or over by June 2011. However, in recognition of poorer health among Indigenous communities, planning in some cases also takes account of the Indigenous population aged 50–69 years. This means that the provision ratio based on the population aged 70 years or over will appear high in areas with a high Indigenous population (such as the NT). Transition Care Program (TCP) places are not included in the target of 113.

(e) In this Report, provision ratios since 2008 for aged care places were calculated using population projections (at the Statistical Local Area level) prepared by ABS (see table 13A.2). The projections were based on the 2006 Census and prepared for DoHA by ABS according to assumptions agreed to by DoHA. Ratios prior to 2008 were calculated using projections based on the 2001 Census.

(f) Population data for 2008 and 2009 are calculated on a different basis to years prior to 2008. See table 13A.2 for notes and sources of population data.

(g) In this table, CACPs include community care places under the National Aboriginal and Torres Strait Islander Flexible Aged Care Program, multi-purpose services and innovative care.

(h) Totals may not add due to rounding.

– Nil or rounded to zero.

Katherine	63.1	61.5	62.3	75.7

(a) Population is people aged 70 years or over plus Indigenous people aged 50–69 years at 30 June.

(b) Count is of residential places allocated to an Aged Care Planning Region which were delivered in an Australian Government subsidised residential aged care facility and were operational at 30 June, and includes Multi-Purpose Services and places delivered under the National Aboriginal and Torres Strait Islander Flexible Aged Care Program provided in a residential aged care facility and Innovative Care Programs provided in a residential aged care facility.

(c) Count is community care places allocated to an Aged Care Planning Region which were operational at 30 June and includes: CACP, EACH and EACH-D, and Multi-Purpose Services and places delivered under the National Aboriginal and Torres Strait Islander Flexible Aged Care and Innovative Care Programs provided in the community. Note that it does not include places allocated under the Transition Care Program as it is not possible to disaggregate these places by Aged Care Planning Region.

– Nil or rounded to zero.

(a) Data include high care residential (permanent and respite), low care residential (permanent and respite), EACH packages, EACH-D packages and CACPs. Data for EACH-D packages prior to 2009 are included in EACH packages.

(b) See table 13A.2 for notes and sources of population data for recipients from non-English speaking countries.

(c) For high and low care residential, CACPs and total: includes flexible places under the National Aboriginal and Torres Strait Islander Flexible Aged Care Program, Innovative Pool programs and care provided by Multi-Purpose services, in all years except 2007.

(d) Totals may not add due to rounding.

(e) Includes permanent residents and respite care recipients.

Source: DoHA unpublished.

- (a) Data include high care residential (permanent and respite), low care residential (permanent and respite), EACH packages, EACH-D packages and CACPs. Data for EACH-D packages prior to 2009 are included in EACH packages.
- (b) For high and low care residential, CACPs and total: Includes flexible places under the National Aboriginal and Torres Strait Islander Flexible Aged Care Program, in all years except 2007. In 2010, Innovative Pool programs and care provided by Multi-Purpose services are included.
- (c) Ratios in remote areas can be affected by small movements in resident numbers.
- (d) Geographical data are based on the ABS Australian Standard Geographic Classification of Remoteness Areas (RA) (see table 13A.2 note (a)). For more information refer to the Australian Standard Geographic Classification (ABS Publication 1216.0). The proportions of population in each Statistical Local Area (SLA) are attributed to Remoteness Areas (RA) by DoHA, using ABS SLA to RA concordance.
- (e) Totals may not add due to rounding.
- (f) High care residential aged care includes permanent residents and respite care recipients. Low care residential aged care includes permanent residents and respite care recipients.
- (g) Very remote totals for 2007 do not include EACH.
.. Not applicable. – Nil or rounded to zero.

HACC recipients from a non-English speaking country	-2.9	-0.6	-0.7	6.7	10.5	20.3	18.3	-17.0	1.6

(a) See table 13A.2 for notes and sources of population data.

(b) Reports provisional HACC data that has not been validated and may be subject to revision.

(c) Excludes National Aboriginal and Torres Strait Islander Flexible Aged Care Program recipients.

(d) Some of these proportions are calculated using small numbers. In particular, this applies to the proportions for EACH and EACH-D. A "*" indicates the rate has been calculated with values between 10 to <20. A "***" indicates the rate has been calculated with values below 10.

(e) Indigenous people aged 50 or over as a percentage of the total population aged 70 or over plus the number of Indigenous people aged 50 to 69 years old.

(f) Indigenous status based on self-identification.

(g) The proportion of HACC clients with unknown or null Indigenous status differed across jurisdictions and ranged from 5.8 per cent to 12.8 per cent. Nationally, the proportion of HACC clients with unknown or null Indigenous status was 8.6 per cent.

(h) The proportion of HACC clients with unknown or invalid date of birth differed across jurisdictions and ranged from zero per cent to 1.5 per cent. Nationally, the proportion of HACC clients with unknown or invalid date of birth was 0.5 per cent.

Table 13A.30 Aged care recipients from special needs groups, June 2010 (per cent) (a), (b), (c), (d)

	NSW	Vic	Qld	WA	SA	Tas	ACT	NT	Aust
(i) The proportion of HACC clients with unknown country of birth differed across jurisdictions and ranged from 1.9 per cent to 11.1 per cent. Nationally, the proportion of HACC clients with unknown country of birth was 5.4 per cent.									

– Nil or rounded to zero.

(a) Data include high care residential (permanent and respite), low care residential (permanent and respite), EACH packages, EACH-D packages and CACPs. Data for EACH-D packages prior to 2009 are included in EACH packages.

(b) Unknown responses have been distributed *pro rata*.

(c) People from a non-English speaking country of birth are those who are born overseas in countries other than UK, Ireland, NZ, Canada, South Africa and USA.

(d) Population estimates for groupings of Non-English speaking countries of birth are based on ratios from ABS 2006 census data applied to Population Projections by SLA 2007–2027. See table 13A.2 for more information.

(e) Geographical data are based on the ABS Australian Standard Geographic Classification of Remoteness Areas (RA) (see table 13A.2 note (a)). For more information refer to the Australian Standard Geographic Classification (ABS Publication 1216.0). The proportions of population in each Statistical Local Area (SLA) are attributed to Remoteness Areas (RA) by DoHA, using ABS SLA to RA concordance.

(f) Totals may not add due to rounding.

(g) Data include National Aboriginal and Torres Strait Islander Flexible Aged Care Program places attributed as residents and exclude multi-purpose services.

(h) High care residential aged care includes permanent residents and respite care recipients. Low care residential aged care includes permanent residents and respite care recipients.

.. Not applicable. – Nil or rounded to zero.

Source : DoHA unpublished.

(a) Data include high care residential (permanent and respite), low care residential (permanent and respite), EACH packages, EACH-D packages and CACPs. Data for EACH-D packages prior to 2009 are included in EACH packages.

(b) Unknown responses have been attributed *pro rata*.

(c) Reports only people who are recorded as Indigenous.

(d) Includes National Aboriginal and Torres Strait Islander Flexible Aged Care Program places attributed as residents. Excludes multi-purpose services.

(e) Geographical data are based on the ABS Australian Standard Geographic Classification of Remoteness Areas (RA) (see table 13A.2 note (a)). For more information refer to the Australian Standard Geographic Classification (ABS Publication 1216.0). The proportions of population in each Statistical Local Area (SLA) are attributed to Remoteness Areas (RA) by DoHA, using ABS SLA to RA concordance.

(f) Indigenous population estimates based on ratios from unpublished ABS 2006 Indigenous ERP data applied to Population Projections by SLA 2007–2027. See table 13A.2 for further information.

(g) Totals may not add due to rounding.

(h) High care residential aged care includes permanent residents and respite care recipients. Low care residential aged care includes permanent residents and respite care recipients.

(i) The ACT has a very small Indigenous population aged over 50 years and a small number of CACPs will result in a very high provision ratio.

.. Not applicable. – Nil or rounded to zero.

(a) Data exclude flexible places under the National Aboriginal and Torres Strait Islander Flexible Aged Care Program, Innovative Pool programs and care provided by Multi-Purpose services.

(b) Population data derived using projections by SLA for 2007–2027 based on 2006 census prepared by ABS according to assumptions agreed to by the Department of Health and Ageing. See table 13A.2 for notes and sources of population data.

– Nil or rounded to zero.

(a) For 2005-06 and 2006-07, data include concessional or assisted residents. Data for 2007-08 include concessional, assisted or supported residents. Data from 2008-09 include supported residents only.

(b) Concessional residents are those who receive an income support payment and have not owned a home for the last two or more years (or whose home is occupied by a 'protected' person, for example, the care recipient's partner), and have assets of less than 2.5 times the annual single basic age pension. Assisted residents are those meeting the above criteria, but with assets between 2.5 and 4.0 times the annual single basic age pension. Supported residents are those who have entered permanent residential care on or after 20 March 2008 (or who re-enter care on or after 20 March 2008 after a break in care of more than 28 days) and have assets of up to a set value (20 March 2008 to 19 March 2010 — \$91 910.40 and from 20 March 2010 — \$93 10.40).

(c) These data refer to permanent residents only, at their first admission.

(a) Geographical data are based on the ABS Australian Standard Geographic Classification of Remoteness Areas. Data are classified according to an index of remoteness which rates each ABS census district based on the number and size of towns, the distance to major towns and urban centres. For more information refer to the Australian Standard Geographic Classification (ABS Publication 1216.0). See notes to table 13A.2.

(b) Numbers fewer than three are not published and the relevant totals do not include these figures. Proportions which may identify numbers fewer than three are not published. The proportions published for Australia and all areas, take into account all residents, including those numbers not published.

.. Not applicable. – Nil or rounded to zero. np Not published.

(a) Number is younger people, under 65, receiving aged care services at any time in the 12 month period to 30 June 2010. Number is provided as a count of distinct clients, however, an individual may have had more than one care type, or care in different states. Hence, number of clients in Australia total is not a sum of the states figures.

Table 13A.41

Table 13A.41 Number of younger people with a disability using residential, CACP, EACH and EACH-D aged care services (a)

	NSW	Vic	Qld	WA	SA	Tas	ACT	NT	Aust
--	-----	-----	-----	----	----	-----	-----	----	------

- (b) Residential aged care services includes permanent residential care only.
- (c) In the ACT, includes people aged <50 years who cannot be reported separately as the numbers are too small.
- (d) Community care services includes recipients of CACP, EACH and EACH-D only.
- (e) In Tasmania and the ACT, includes people aged <50 years who cannot be reported separately as the numbers are too small.

– Nil or rounded to zero. **np** Not published.

- (a) Geographical data are based on the ABS Australian Standard Geographic Classification of Remoteness Areas. Data are classified according to an index of remoteness which rates each ABS census district based on the number and size of towns, the distance to major towns and urban centres. For more information refer to the Australian Standard Geographic Classification (ABS Publication 1216.0). See table 13A.2 for notes and sources of population data.
- (b) Low usage rates in remote and very remote regions may reflect that clients have moved to other regions to access services.
- (c) Data exclude flexible places under the National Aboriginal and Torres Strait Islander Flexible Aged Care Program, Innovative Pool programs and care provided by Multi-Purpose services.

2007-08	88	90	94	98	95	99	100	98	91
2008-09	89	95	95	99	98	99	100	99	93
2009-10	96	96	96	91	99	98	100	96	96

- (a) Reports provisional data that have not been validated and may be subject to revision.
- (b) Data in this table represent HACC services received by people aged 70 years or over, plus Indigenous people aged 50-69 years, divided by people aged 70 years or over, plus Indigenous people aged 50-69 years. In some previous reports, data represented total HACC services received, divided by people aged 70 years or over, plus Indigenous people aged 50-69 years. Data for 2005-06 to 2007-08 have been revised for this reason.
- (c) The proportion of HACC funded agencies that submitted HACC MDS data differed across jurisdictions and years. For 2009-10, the proportion ranged from 91 per cent and 100 per cent. Actual service levels will be higher than those reported here.
- (d) Population projections by SLA for 2007–2027 prepared for DoHA by ABS according to assumptions agreed to by DoHA. Indigenous population estimates for June 2010 are based on ratios from ABS 2006 experimental Indigenous ERP data applied to population projections by SLA 2007–2027.
- (e) The proportion of HACC clients with unknown or null Indigenous status differed across jurisdictions and years. In 2009-10, the proportion ranged from 5.8 per cent to 12.8 per cent. Nationally, the proportion of HACC clients with unknown or null Indigenous status was 8.6 per cent.
- (f) The proportion of HACC clients with unknown or invalid date of birth differed across jurisdictions and years. In 2009-10, it ranged from zero to 1.5 per cent. Nationally, the proportion of HACC clients with unknown or invalid date of birth was 0.5 per cent.
- (g) NSW service levels for 2009-10 are higher than the service levels reported in this table. Processes causing the under reporting are being investigated.
- (h) Validation processes for the Victorian Data Repository and the HACC MDS differ and actual service levels may be up to 5 per cent higher or lower than stated. In the case of respite care, the Victorian Data Repository recorded service levels 50 per cent higher than stated in 2008-09.
- (i) Validation processes for South Australian data differ from HACC MDS and actual service levels may be up to 5 per cent higher or lower than stated. Some goods and equipment quantities for South Australia have been excluded due to a data error in 2009-10.
- (j) For 2009-10, results for Tasmania exclude HACC services provided under the Multipurpose Services Program. Transport Trips for Tasmania may be significantly under-reported due to a reporting exemption.
- (k) Allied Health Care includes at home and at centre. Allied Health hours in the ACT are under reported in 2008-09.
- (l) Nursing Care includes at home and at centre. Nursing hours in the ACT are under reported in 2008-09.

na Not available. – Nil or rounded to zero.

2009-10	96	96	96	91	99	98	100	96	96

- (a) Reports provisional data that have not been validated and may be subject to revision.
- (b) Data in this table represent HACC services received by people aged 70 years or over, plus Indigenous people aged 50-69 years, divided by people aged 70 years or over, plus Indigenous people aged 50-69 years. In some previous reports, data represented total HACC services received, divided by people aged 70 years or over, plus Indigenous people aged 50-69 years. Data for 2005-06 to 2007-08 have been revised for this reason.
- (c) The proportion of HACC funded agencies that submitted HACC MDS data differed across jurisdictions and years. For 2009-10, the proportion ranged from 91 per cent and 100 per cent. Actual service levels will be higher than those reported here.
- (d) Population projections by SLA for 2007–2027 prepared for DoHA by ABS according to assumptions agreed to by DoHA. Indigenous population estimates for June 2010 are based on ratios from ABS 2006 experimental Indigenous ERP data applied to population projections by SLA 2007–2027.
- (e) The proportion of HACC clients with unknown or null Indigenous status differed across jurisdictions and years. In 2009-10, the proportion ranged from 5.8 per cent to 12.8 per cent. Nationally, the proportion of HACC clients with unknown or null Indigenous status was 8.6 per cent.
- (f) The proportion of HACC clients with unknown or invalid date of birth differed across jurisdictions and years. In 2009-10, it ranged from zero to 1.5 per cent. Nationally, the proportion of HACC clients with unknown or invalid date of birth was 0.5 per cent.
- (g) NSW service levels for 2009-10 are higher than the service levels reported in this table. Processes causing the under reporting are being investigated.
- (h) Validation processes for the Victorian Data Repository and the HACC MDS differ and actual service levels may be up to 5 per cent higher or lower than stated. In the case of respite care, the Victorian Data Repository recorded service levels 50 per cent higher than stated.
- (i) Validation processes for South Australian data differ from HACC MDS and actual service levels may be up to 5 per cent higher or lower than stated. Some goods and equipment quantities for South Australia have been excluded due to a data error in 2009-10.
- (j) Allied Health Care includes at home and at centre. Allied Health hours in the ACT are under reported in 2008-09.
- (k) Nursing Care includes at home and at centre. Nursing hours in the ACT are under reported in 2008-09.

na Not available. .. Not applicable. – Nil or rounded to zero.

2008-09	89	95	95	99	98	99	100	99	93
2009-10	96	96	96	91	99	98	100	96	96

- (a) Reports provisional data that have not been validated and may be subject to revision.
- (b) Data in this table represent HACC services received by people aged 70 years or over, plus Indigenous people aged 50-69 years, divided by people aged 70 years or over, plus Indigenous people aged 50-69 years. In some previous reports, data represented total HACC services received, divided by people aged 70 years or over, plus Indigenous people aged 50-69 years. Data for 2005-06 to 2007-08 have been revised for this reason.
- (c) The proportion of HACC funded agencies that submitted HACC MDS data differed across jurisdictions and years. For 2009-10, the proportion ranged from 91 per cent and 100 per cent. Actual service levels will be higher than those reported here.
- (d) Population projections by SLA for 2007-2027 prepared for DoHA by ABS according to assumptions agreed to by DoHA. Indigenous population estimates for June 2010 are based on ratios from ABS 2006 experimental Indigenous ERP data applied to population projections by SLA 2007–2027.
- (e) The proportion of HACC clients with unknown or null Indigenous status differed across jurisdictions and ranged from 5.8 per cent to 12.8 per cent. Nationally, the proportion of HACC clients with unknown or null Indigenous status was 8.6 per cent.
- (f) The proportion of HACC clients with unknown or null Indigenous status differed across jurisdictions and years. In 2009-10, the proportion ranged from 5.8 per cent to 12.8 per cent. Nationally, the proportion of HACC clients with unknown or null Indigenous status was 8.6 per cent.
- (g) NSW service levels for 2009-10 are higher than the service levels reported in this table. Processes causing the under reporting are being investigated.
- (h) Validation processes for the Victorian Data Repository and the HACC MDS differ and actual service levels may be up to 5 per cent higher or lower than stated. In the case of respite care, the Victorian Data Repository recorded service levels 50 per cent higher than stated.
- (i) Validation processes for South Australian data differ from HACC MDS and actual service levels may be up to 5 per cent higher or lower than stated. Some Goods and Equipment quantities for South Australia have been excluded due to a data error in 2009-10.
- (j) For 2009-10, results for Tasmania exclude HACC services provided under the Multipurpose Services Program. Transport Trips for Tasmania may be significantly under-reported due to a reporting exemption.
- (k) Allied Health Care includes at home and at centre.
- (l) Nursing Care includes at home and at centre.

Proportion of HACC agencies who reported MDS data by end of the revision period (all regions)									
2005-06	na	na	na	na	na	na	na	na	na
2006-07	na	na	na	na	na	na	na	na	na
2007-08	88	90	94	98	95	99	100	98	91
2008-09	89	95	95	99	98	99	100	99	93
2009-10	96	96	96	91	99	98	100	96	96

- (a) Reports provisional data that have not been validated and may be subject to revision.
- (b) Data in this table represent HACC services received by people aged 70 years or over, plus Indigenous people aged 50-69 years, divided by people aged 70 years or over, plus Indigenous people aged 50-69 years. In some previous reports, data represented total HACC services received, divided by people aged 70 years or over, plus Indigenous people aged 50-69 years. Data for 2005-06 to 2007-08 have been revised for this reason.
- (c) The proportion of HACC funded agencies that submitted HACC MDS data differed across jurisdictions and years. For 2009-10, the proportion ranged from 91 per cent and 100 per cent. Actual service levels will be higher than those reported here.
- (d) Population projections by SLA for 2007–2027 prepared for DoHA by ABS according to assumptions agreed to by DoHA. Indigenous population estimates for June 2010 are based on ratios from ABS 2006 experimental Indigenous ERP data applied to population projections by SLA 2007–2027.
- (e) The proportion of HACC clients with unknown or null Indigenous status differed across jurisdictions and years. In 2009-10, the proportion ranged from 5.8 per cent to 12.8 per cent. Nationally, the proportion of HACC clients with unknown or null Indigenous status was 8.6 per cent.
- (f) The proportion of HACC clients with unknown or invalid date of birth differed across jurisdictions and years. In 2009-10, it ranged from zero to 1.5 per cent. Nationally, the proportion of HACC clients with unknown or invalid date of birth was 0.5 per cent.
- (g) NSW service levels for 2009-10 are higher than the service levels reported in this table. Processes causing the under reporting are being investigated.
- (h) Validation processes for the Victorian Data Repository and the HACC MDS differ and actual service levels may be up to 5 per cent higher or lower than stated. In the case of respite care, the Victorian Data Repository recorded service levels 50 per cent higher than stated.
- (i) Validation processes for South Australian data differ from HACC MDS and actual service levels may be up to 5 per cent higher or lower than stated.
- (j) For 2009-10, results for Tasmania exclude HACC services provided under the Multipurpose Services Program. Transport Trips for Tasmania may be significantly under-reported due to a reporting exemption.
- (k) Allied Health Care includes at home and at centre.
- (l) Nursing Care includes at home and at centre.

na Not available. Not applicable. – Nil or rounded to zero.

2009-10	91	95	95	89	96	92	100	96	92
Proportion of HACC agencies who reported MDS data by end of the revision period (all regions)									
2005-06	na	na	na	na	na	na	na	na	na
2006-07	na	na	na	na	na	na	na	na	na
2007-08	88	90	94	98	95	99	100	98	91
2008-09	89	95	95	99	98	99	100	99	93
2009-10	96	96	96	91	99	98	100	96	96

- (a) Reports provisional data that have not been validated and may be subject to revision.
- (b) Data in this table represent HACC services received by people aged 70 years or over, plus Indigenous people aged 50-69 years, divided by people aged 70 years or over, plus Indigenous people aged 50-69 years. In some previous reports, data represented total HACC services received, divided by people aged 70 years or over, plus Indigenous people aged 50-69 years. Data for 2005-06 to 2007-08 have been revised for this reason.
- (c) The proportion of HACC funded agencies that submitted HACC MDS data differed across jurisdictions and years. For 2009-10, the proportion ranged from 91 per cent and 100 per cent. Actual service levels will be higher than those reported here.
- (d) Population projections by SLA for 2007–2027 prepared for DoHA by ABS according to assumptions agreed to by DoHA. Indigenous population estimates for June 2010 are based on ratios from ABS 2006 experimental Indigenous ERP data applied to population projections by SLA 2007–2027.
- (e) The proportion of HACC clients with unknown or null Indigenous status differed across jurisdictions and years. In 2009-10, the proportion ranged from 5.8 per cent to 12.8 per cent. Nationally, the proportion of HACC clients with unknown or null Indigenous status was 8.6 per cent.
- (f) The proportion of HACC clients with unknown or invalid date of birth differed across jurisdictions and years. In 2009-10, it ranged from zero to 1.5 per cent. Nationally, the proportion of HACC clients with unknown or invalid date of birth was 0.5 per cent.
- (g) NSW service levels for 2009-10 are higher than the service levels reported in this table. Processes causing the under reporting are being investigated.
- (h) Validation processes for South Australian data differ from HACC MDS and actual service levels may be up to 5 per cent higher or lower than stated.
- (i) For 2009-10, results for Tasmania exclude HACC services provided under the Multipurpose Services Program. Transport Trips for Tasmania may be significantly under-reported due to a reporting exemption.
- (j) Allied Health Care includes at home and at centre.
- (k) Nursing Care includes at home and at centre.
- na** Not available. Not applicable. – Nil or rounded to zero.

(a) The HACC target population is people in the Australian community who, without basic maintenance and support services provided under the scope of the HACC Program, would be at risk of premature or inappropriate long term residential care, including older and frail people with moderate, severe or profound disabilities. The HACC target population is estimated by applying the proportion of people in households with moderate, severe or profound disability as reported in the ABS 2003 Survey of Disability, Ageing and Carers to the ABS Preliminary population projections 2007–2027.

Proportion of HACC agencies who reported MDS data by end of the revision period (all regions)									
2005-06	na	na	na	na	na	na	na	na	na
2006-07	na	na	na	na	na	na	na	na	na
2007-08	88	90	94	98	95	99	100	98	91
2008-09	89	95	95	99	98	99	100	99	93
2009-10	96	96	96	91	99	98	100	96	96

- (a) Reports provisional data that have not been validated and may be subject to revision.
- (b) The proportion of HACC funded agencies that submitted HACC MDS data differed across jurisdictions and years. For 2009-10, the proportion ranged from 91 per cent and 100 per cent. Actual service levels will be higher than those reported here.
- (c) The HACC target population is people in the Australian community who, without basic maintenance and support services provided under the scope of the HACC Program, would be at risk of premature or inappropriate long term residential care, including older and frail people with moderate, severe or profound disabilities. The HACC target population is estimated by applying the proportion of people in households with moderate, severe or profound disability as reported in the ABS 2003 Survey of Disability, Ageing and Carers to the ABS Preliminary population projections 2007–2027 (unpublished).
- (d) NSW service levels for 2009-10 are higher than the service levels reported in this table. Processes causing the under reporting are being investigated.
- (e) Validation processes for the Victorian Data Repository and the HACC MDS differ and actual service levels may be up to 5 per cent higher or lower than stated. In the case of respite care, the Victorian Data Repository recorded service levels 50 per cent higher than stated.
- (f) Validation processes for South Australian data differ from HACC MDS and actual service levels may be up to 5 per cent higher or lower than stated. Some Goods and Equipment quantities for South Australia have been excluded due to a data error in 2009-10.
- (g) For 2009-10, results for Tasmania exclude HACC services provided under the Multipurpose Services Program. Transport Trips for Tasmania may be significantly under-reported due to a reporting exemption.
- (h) Allied Health Care includes at home and at centre. Allied Health hours in the ACT are under reported in 2008-09.
- (i) Nursing Care includes at home and at centre. Nursing hours in the ACT are under-reported in 2008-09.

2009-10	91	95	95	89	96	92	100	96	92
Proportion of HACC agencies who reported MDS data by end of the revision period (all regions)									
2005-06	na	na	na	na	na	na	na	na	na
2006-07	na	na	na	na	na	na	na	na	na
2007-08	88	90	94	98	95	99	100	98	91
2008-09	89	95	95	99	98	99	100	99	93
2009-10	96	96	96	91	99	98	100	96	96

- (a) Reports provisional data that have not been validated and may be subject to revision.
- (b) The proportion of HACC funded agencies that submitted HACC MDS data differed across jurisdictions and years. For 2009-10, the proportion ranged from 91 per cent and 100 per cent. Actual service levels will be higher than those reported here.
- (c) The HACC target population is people in the Australian community who, without basic maintenance and support services provided under the scope of the HACC Program, would be at risk of premature or inappropriate long term residential care, including older and frail people with moderate, severe or profound disabilities. The HACC target population is estimated by applying the proportion of people in households with moderate, severe or profound disability as reported in the ABS 2003 Survey of Disability, Ageing and Carers to the ABS Preliminary population projections 2007–2027 (unpublished).
- (d) NSW service levels for 2009-10 are higher than the service levels reported in this table. Processes causing the under reporting are being investigated.
- (e) Validation processes for the Victorian Data Repository and the HACC MDS differ and actual service levels may be up to 5 per cent higher or lower than stated. In the case of respite care, the Victorian Data Repository recorded service levels 50 per cent higher than stated.
- (f) Validation processes for South Australian data differ from HACC MDS and actual service levels may be up to 5 per cent higher or lower than stated. Some Goods and Equipment quantities for South Australia have been excluded due to a data error in 2009-10.
- (g) For 2009-10, results for Tasmania exclude HACC services provided under the Multipurpose Services Program. Transport Trips for Tasmania may be significantly under-reported due to a reporting exemption.
- (h) Allied Health Care includes at home and at centre. Allied Health hours in the ACT are under reported in 2008-09.
- (i) Nursing Care includes at home and at centre. Nursing hours in the ACT are under reported in 2008-09.
- na** Not available. .. Not applicable. – Nil or rounded to zero.

2009-10	91	95	95	89	96	92	100	96	92
Proportion of HACC agencies who reported MDS data by end of the revision period (all regions)									
2005-06	na	na	na	na	na	na	na	na	na
2006-07	na	na	na	na	na	na	na	na	na
2007-08	88	90	94	98	95	99	100	98	91
2008-09	89	95	95	99	98	99	100	99	93
2009-10	96	96	96	91	99	98	100	96	96

- (a) Reports provisional data that have not been validated and may be subject to revision.
- (b) The proportion of HACC funded agencies that submitted HACC MDS data differed across jurisdictions and years. For 2009-10, the proportion ranged from 91 per cent and 100 per cent. Actual service levels will be higher than those reported here.
- (c) The HACC target population is people in the Australian community who, without basic maintenance and support services provided under the scope of the HACC Program, would be at risk of premature or inappropriate long term residential care, including older and frail people with moderate, severe or profound disabilities. The HACC target population is estimated by applying the proportion of people in households with moderate, severe or profound disability as reported in the ABS 2003 Survey of Disability, Ageing and Carers to the ABS Preliminary population projections 2007–2027 (unpublished).
- (d) NSW service levels for 2009-10 are higher than the service levels reported in this table. Processes causing the under reporting are being investigated.
- (e) Validation processes for the Victorian Data Repository and the HACC MDS differ and actual service levels may be up to 5 per cent higher or lower than stated. In the case of respite care, the Victorian Data Repository recorded service levels 50 per cent higher than stated.
- (f) Validation processes for South Australian data differ from HACC MDS and actual service levels may be up to 5 per cent higher or lower than stated.
- (g) For 2009-10, results for Tasmania exclude HACC services provided under the Multipurpose Services Program. Transport Trips for Tasmania may be significantly under-reported due to a reporting exemption.
- (h) Allied Health Care includes at home and at centre. Allied Health hours in the ACT are under reported in 2008-09.
- (i) Nursing Care includes at home and at centre. Nursing hours in the ACT are under reported in 2008-09.

na Not available. .. Not applicable. – Nil or rounded to zero.

Table 13A.57 HACC services received within remote areas per 1000 HACC target population (a), (b), (c)

	NSW (d)	Vic (e)	Qld	WA	SA (f)	Tas (g)	ACT	NT	Aust
2009-10	91	95	95	89	96	92	100	96	92
Proportion of HACC agencies who reported MDS data by end of the revision period (all regions)									
2005-06	na	na	na	na	na	na	na	na	na
2006-07	na	na	na	na	na	na	na	na	na
2007-08	88	90	94	98	95	99	100	98	91
2008-09	89	95	95	99	98	99	100	99	93
2009-10	96	96	96	91	99	98	100	96	96

- (a) Reports provisional data that have not been validated and may be subject to revision.
- (b) The proportion of HACC funded agencies that submitted HACC MDS data differed across jurisdictions and years. For 2009-10, the proportion ranged from 91 per cent and 100 per cent. Actual service levels will be higher than those reported here.
- (c) The HACC target population is people in the Australian community who, without basic maintenance and support services provided under the scope of the HACC Program, would be at risk of premature or inappropriate long term residential care, including older and frail people with moderate, severe or profound disabilities. The HACC target population is estimated by applying the proportion of people in households with moderate, severe or profound disability as reported in the ABS 2003 Survey of Disability, Ageing and Carers to the ABS Preliminary population projections 2007-2027 (unpublished).
- (d) NSW service levels for 2009-10 are higher than the service levels reported in this table. Processes causing the under reporting are being investigated.
- (e) Validation processes for the Victorian Data Repository and the HACC MDS differ and actual service levels may be up to 5 per cent higher or lower than stated. In the case of respite care, the Victorian Data Repository recorded service levels 50 per cent higher than stated.
- (f) Validation processes for South Australian data differ from HACC MDS and actual service levels may be up to 5 per cent higher or lower than stated. Some Goods and Equipment quantities for South Australia have been excluded due to a data error in 2009-10.
- (g) For 2009-10, results for Tasmania exclude HACC services provided under the Multipurpose Services Program. Transport Trips for Tasmania may be significantly under-reported due to a reporting exemption.
- (h) Allied Health Care includes at home and at centre. Allied Health hours in the ACT are under reported in 2008-09.
- (i) Nursing Care includes at home and at centre. Nursing hours in the ACT are under reported in 2008-09.
- na** Not available. ... Not applicable. – Nil or rounded to zero.

Table 13A.59

Table 13A.59 HACC client characteristics (a)

	Unit	NSW	Vic	Qld	WA	SA	Tas	ACT	NT	Aust
--	------	-----	-----	-----	----	----	-----	-----	----	------

- (b) The proportion of HACC clients with 'date of birth' unknown differed across jurisdictions and years.
- (c) The proportion of HACC clients with unknown gender differed across jurisdictions and years.
- (d) The proportion of HACC clients with unknown Indigenous status differed across jurisdictions and years.
- (e) The proportion of HACC clients with unknown language spoken at home differed across jurisdictions and years.
- (f) The proportion of HACC clients with unknown carer status differed across jurisdictions and years.
- (g) The proportion of HACC funded agencies that submitted HACC MDS data differed across jurisdictions and years. For 2009-10, the proportion ranged from 91 per cent and 100 per cent. Actual service levels will be higher than those reported here.

(a) Reports provisional data that have not been validated and may be subject to revision.

(b) The proportion of HACC clients with unknown or null Indigenous status differed across jurisdictions and years. In 2009-10, the proportion ranged from 5.8 per cent to 12.8 per cent. Nationally, the proportion of HACC clients with unknown or null Indigenous status was 8.6 per cent.

(c) The proportion of HACC clients with unknown date of birth differed across jurisdictions and years.

(d) Totals may not add as a result of rounding.

(e) Calculations include HACC clients with unknown or null Indigenous Status.

– Nil or rounded to zero.

Table 13A.61

Table 13A.61 Comparative characteristics of Indigenous HACC clients (a), (b), (c), (d), (e), (f), (g), (h)

	Unit	NSW	Vic	Q/d	WA	SA	Tas	ACT	NT	Aust
(a)	Population projections by SLA for 2007-2027 prepared by ABS according to assumptions agreed to by DoHA. Indigenous population estimates for June 2010 are based on ratios from ABS 2006 Experimental Indigenous ERP data applied to Population Projections by SLA 2007-2027.									
(b)	The proportion of HACC clients with unknown or null Indigenous status differed across jurisdictions and years. In 2009-10, the proportion ranged from 5.8 per cent to 12.8 per cent. Nationally, the proportion of HACC clients with unknown or null Indigenous status was 8.6 per cent.									
(c)	The proportion of HACC clients with unknown or invalid date of birth differed across jurisdictions and years. In 2009-10, it ranged from zero to 1.5 per cent. Nationally, the proportion of HACC clients with unknown or invalid date of birth was 0.5 per cent.									
(d)	The proportion of HACC clients with 'Nil' and 'Not stated' sex differed across jurisdictions and years.									
(e)	The proportion of HACC clients with 'Nil' and 'Not stated' main language spoken at home differed across jurisdictions and years.									
(f)	The proportion of HACC clients with 'Nil' and 'Not stated' pension benefit status differed across jurisdictions and years.									
(g)	The proportion of HACC clients with 'Nil' and 'Not stated' living arrangements differed across jurisdictions and years.									
(h)	The proportion of HACC clients with 'Nil' and 'Not stated' carer availability differed across jurisdictions and years.									

- Nil or rounded to zero.

(a) Contacts include phone calls, emails, visits and facsimiles.

(b) People making contact self identify as Indigenous. Therefore, there is likely to be substantial under reporting of Indigenous status.

(c) Indigenous people aged 50 years or over. See footnotes to table 13A.2 for details of population calculations.

(d) Number of instances of assistance not carers.

(e) All people aged 70 years or over plus Indigenous people aged 50-69 years. See footnotes to table 13A.2 for details of population calculations.

- (a) Data in this table includes complete assessments only for years after 2006-07. For previous years the following information applies: in May 2003 a new Minimum Data Set (MDSv2) was introduced for the Aged Care Assessment Program. With the exception of Queensland and about half of NSW, it had been adopted by states and territories when data shown in this table was collected. The data in this table has been selected to match MDSv1 and MDSv2 coding and to be comparable as closely as possible with previous reports containing MDSv1 data. Includes only assessments (completed and not completed) for the stated client group. (Some assessments are not completed because, for example, the client's circumstances may change or the client may withdraw mid-way through the assessment process. Separate counting of completed and not completed assessments has been introduced over time with the adoption of the MDSv2).
- (b) The number of Indigenous assessments is based on self-identification of Indigenous status. Therefore these figures may not accurately represent the assessment of Indigenous persons.
- (c) The total number of assessments for Queensland in 2005-06 is underestimated by approximately 2000 due to technical failure.

(a) Socio-Economic Indexes for Areas (SEIFA) quintiles are based on the ABS Index of Relative Socio-economic Disadvantage (IRSD), with quintile 1 being the most disadvantaged and quintile 5 being the least disadvantaged. The SEIFA quintiles represent approximately 20 per cent of the national population, but do not necessarily represent 20 per cent of the population in each State or Territory.

(b) Rate is expressed as number of people in the nominated age group who have had an Aged Care Assessment Team (ACAT) assessment in that State, Territory or nationally, per 1000 people in that age group in that state, territory or nationally.

(c) Relevant population is people aged 70 years or over plus Indigenous people aged 50–69 years.

.. Not applicable. – Nil or rounded to zero.

Source: DoHA unpublished, Ageing and Aged Care data warehouse; Population projections by SLA for 2007–2027 based on 2006 Census prepared for DoHA by ABS according to the assumptions agreed to by DoHA and Indigenous population based on the ABS unpublished, Indigenous experimental estimates and projections (series B).

(a) Data only includes records where ACAT approval is before admission date.

Table 13A.66 Elapsed time between ACAT approval and entry into residential, EACH, EACH-D or CACP service (a), (b)

	<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT (c)</i>	<i>Aust</i>
(b)	The measure of 'elapsed time' is utilised because the period of time between the ACAT approval and entry into residential care may be due to factors which cannot be categorised as 'waiting' time.									
(c)	NT data are based on the experience of a small number of residents and may not be representative of the experience of NT residents over time.									

na Not available. – Nil or rounded to zero.

(a) Data in this table includes complete assessments only for years after 2006-07. For previous years the following information applies: in May 2003 a new Minimum Data Set (MDSv2) was introduced for the Aged Care Assessment Program. With the exception of Queensland and about half of NSW, it had been adopted by states and territories when data shown in this table was collected. The data in this table has been selected to match MDSv1 and MDSv2 coding and to be comparable as closely as possible with previous reports containing MDSv1 data. The data in this table refers to ACAT recommendations of longer term care arrangement, not appeals against decisions by delegates for Australian Government subsidised aged care services. More than one recommendation is possible for each completed assessment.

Table 13A.67

Table 13A.67 Recommended location of longer term living arrangements of Aged Care Assessment Teams (ACAT) clients (a), (b)

	Unit	NSW	Vic	Qld	WA	SA	Tas	ACT	NT	Aust
(b)	The client count is sourced from the Ageing and Aged Care Data Warehouse from unpublished 2008-09 ACAP Minimum Data Set data and may change in subsequent data loads. The individual client count was achieved by taking the most recent assessment for an individual client (if the client had more than one assessment in the financial year).									
(c)	Includes independent living in retirement villages, supported community accommodation and boarding houses.									
(d)	Includes hospital, other institutional care and other.									
(e)	Assessment not completed because the person was medically or functionally unstable.									

– Nil or rounded to zero.

(a) Data includes completed hospital separations with a care type of maintenance care for persons aged 70 years or over and Indigenous persons aged 50–69 years, with a principle or additional diagnosis of Z75.11 or Z74.2. Z75.11 is defined as "person awaiting admission to residential aged care". Z74.2 is defined as "need for assistance at home and no other household member able to render care".

(b) These data only account for completed unlinked separations — that is, if a change in the type of care occurs during a patient's hospital stay, these data do not combine these separations to reflect the full length of hospital stay for a patient.

(c) Diagnosis codes may not be applied consistently across jurisdictions, or over time.

(d) Although the diagnosis codes reflect a care type, they do not determine a persons appropriate requirement for residential aged care (this is determined by an ACAT assessment).

(e) The code 'need for assistance at home and no other household member able to render care' may also be used for respite care for aged care residents or those receiving community care and some jurisdictions may have a high proportion of this type of use. This is particularly relevant in some rural areas where there are few alternative options for these clients.

(f) Includes separations with a care type of maintenance only.

np Not published.

(a) Data for Tasmania and ACT should be interpreted with caution until further assessment of Indigenous identification is completed. The Australian totals for Indigenous/Other Australians do not include data for the ACT or Tasmania.

(b) 'Other Australians' includes non-Indigenous people and those for whom Indigenous status was not stated.

(c) Disaggregation by remoteness area is by usual residence, not remoteness of hospital. Separations are reported by jurisdiction of hospital, regardless of the jurisdiction of usual residence.

(d) SEIFA quintiles are based on the ABS Index of Relative Socio-economic Disadvantage (IRSD), with quintile 1 being the most disadvantaged and quintile 5 being the least disadvantaged. The SEIFA quintiles represent approximately 20 per cent of the national population, but do not necessarily represent 20 per cent of the population in each state or territory. Disaggregation by SEIFA area is by usual residence, not location of the hospital.

(e) Total includes separations for which a SEIFA category or remoteness area could not be assigned as the place of residence was not known or not stated.

(f) Data for Tasmania does not include two private hospitals that account for approximately one eighth of Tasmania's total hospital separations.

– Nil or rounded to zero. **np** Not published.

(a) Refers to the number of hospital separations involving one or more falls in an aged care facility, not the number of falls.

(b) Data for Tasmania and ACT should be interpreted with caution until further assessment of Indigenous identification is completed. The Australian totals for Indigenous/Other Australians do not include data for the ACT or Tasmania.

(c) Disaggregation by remoteness area is by usual residence (numerator) and client postcode prior to admission to residential aged care (denominator), not remoteness of hospital. Separations are reported by jurisdiction of hospitalisation, regardless of the jurisdiction of usual residence or residential aged care facility.

(d) SEIFA quintiles are based on the ABS Index of Relative Socio-economic Disadvantage (IRSD), with quintile 1 being the most disadvantaged and quintile 5 being the least disadvantaged. The SEIFA quintiles represent approximately 20 per cent of the national population, but do not necessarily represent 20 per cent of the population in each State or Territory. Disaggregation by SEIFA is based on the patient's usual residence (numerator) and client postcode prior to admission to residential aged care (denominator), not the location of the hospital or residential aged care facility.

(e) Total includes separations for which place of residence was not known or not stated.

(a) Not all HACC agencies were required to undergo external assessment, and some are exempt, so the number of HACC agencies may be higher than those listed.

(b) The results of the appraisals will, in addition, reflect different methodologies applied across each state and territory.

Table 13A.76 HACC National Service Standards appraisals — results of appraisals (a), (b)

	<i>Unit</i>	<i>NSW (c), (d)</i>	<i>Vic Qld (e)</i>	<i>WA</i>	<i>SA Tas (f)</i>	<i>ACT(g)</i>	<i>NT</i>	<i>Aust</i>
(c)		The NSW Health reviews undertaken during 2009-10 were a representative sample of all NSW Health HACC funded services and covered all service types and geographic areas to determine any variations. This sample was used to validate the self assessment completed by 100 per cent of NSW Health HACC funded services. All NSW NGO providers are required to revalidate annual compliance with Standards. An action plan is developed for any required remedial action. That return is assessed using a risk monitoring tool to determine the level of intervention required to support the provider. In 2009-10, 96 per cent of HACC providers reported ongoing compliance against the standards.						
(d)		All HACC services were reviewed using a comprehensive monitoring tool between November 2005 and June 2009. That monitoring activity verified NGO self assessment against the HACC instrument. Remaining services to be appraised are mainly community transport services due to complete in December 2010. Over 84 per cent of appraisals undertaken indicated scores above 15 across NSW and with 70 per cent above 17.5.						
(e)		In Queensland some agencies were reviewed twice in the four year period. This table includes outcomes of all appraisals during the cycle.						
(f)		One agency in Tasmania declined the appraisal process in 2006-07 and was therefore scored as zero.						
(g)		Quality Assessments in the ACT occurred in 2008-09 only.						
(h)		The average score for 2006-07 to 2009-10 is obtained by using a weighted average of the number of assessments in a year multiplied by the average score for that year. These multiplied scores are then added together for all four years and divided by the total number of assessments over four years to obtain the average score.						

.. Not applicable – Nil or rounded to zero.

Aged care assessment, unit costs (2008-09 dollars)										
Cost per assessment (all people) (b), (d), (e)										
2004-05	\$	320	288	370	361	416	352	199	1 158	332
2005-06	\$	332	304	383	346	365	340	215	1 080	338
2006-07	\$	351	324	379	379	399	336	288	877	356
2007-08	\$	333	311	367	356	388	317	355	874	341
2008-09	\$	340	324	384	356	385	319	322	953	352

(a) The high cost for each assessment in the NT may be influenced by the remoteness of people requiring assessments, clients having English as a second or third language and a lack of supporting health and community services infrastructure to assist with assessments.

(b) Aged care assessment expenditure is Australian Government spending only.

(c) Includes one non-government funded ACAT team in NSW.

(d) Cost per assessment will include clients aged less than 70 years.

(e) From 2006-07, includes completed assessments only. Earlier years may include complete and incomplete assessments. See footnote (a) of table 13A.63 for more detailed explanation.

2009-10	1 002	1 002	970	992	986	983	990	995	991

- (a) The HACC target population is people in the Australian community who, without basic maintenance and support services provided under the scope of the HACC Program, would be at risk of premature or inappropriate long term residential care, including (i) older and frail people with moderate, severe or profound disabilities; (ii) younger people with moderate, severe or profound disabilities; and their unpaid carers. The HACC target population is estimated by applying the proportion of people in households with a moderate, severe, or profound disability as reported in the ABS 2003 Survey of Disability, Ageing and Carers to the ABS Population Projections.
- (b) This table only represents expenditure under the HACC Review agreements.
- (c) Reports provisional data that have not been validated and may be subject to revision.
- (d) There are significant differences in the per capita level of HACC Program funding for the target population in each State and Territory. An equalisation strategy is in place to ensure that per capita funding for the Program is the same across all jurisdictions by 2010-11.
- (e) Constant price expenditure for all years expressed in 2009-10 prices, using Gross Domestic Product price deflator. Details provided in the Statistical appendix (table AA.26).

Source: DoHA unpublished; table AA.26.

Table 13A.80 Australian, State and Territory government total real expenditure on HACC services, per person aged 70 years or over plus Indigenous people aged 50–69 years (2009-10 dollars) (a), (b), (c), (d), (e)

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>

(a) At 30 June.

(b) Allocated places include places that will not be funded and therefore cannot become operational until the next financial year.

(c) Nominal expenditure for the year. Includes direct funding only.

(d) Nominal expenditure for the year. Includes direct funding and in-kind contributions.

(e) The Modified Barthel Index is a measure of activities of daily functioning reported for Transition Care Program recipients who successfully completed a transition care episode with zero being fully dependent and 100 being fully independent. Data are available from 2007-08 onwards.
