Attachment tables

Attachment tables are identified in references throughout this chapter by a '16A' prefix (for example, table 16A.1) and are available from the website at www.pc.gov.au/rogs/2017.

This chapter reports on the performance of child protection services across Australia.

All abbreviations used in this Report are available in a complete list in volume A: Approach to performance reporting.

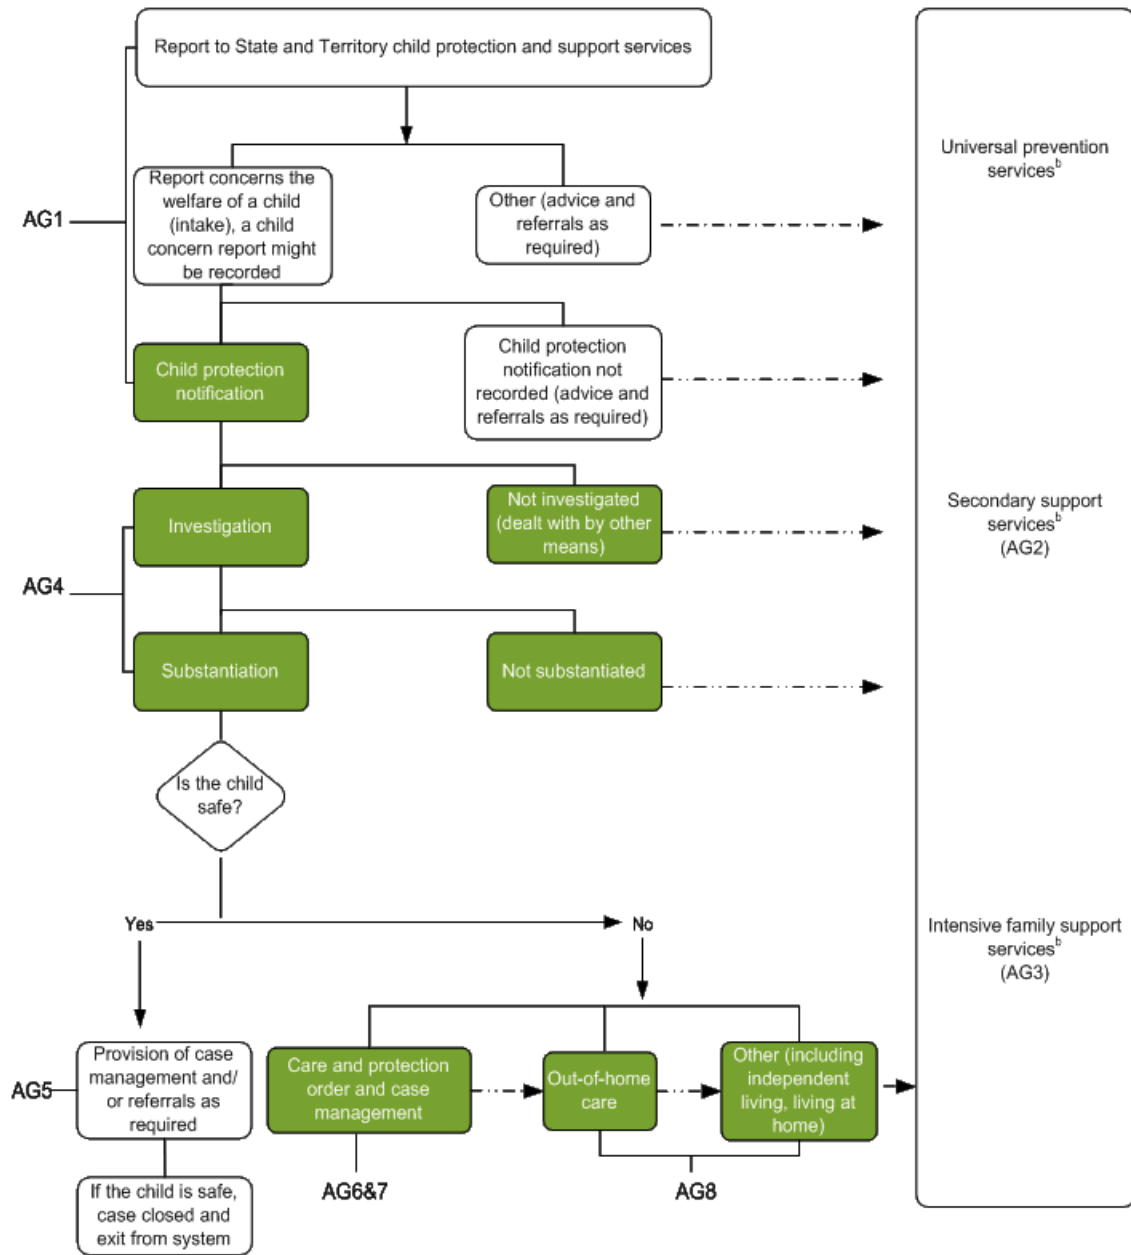

16.1 Profile of child protection services

Service overview

Child protection systems provide services to protect children and young people aged 0–17 years who are at risk of abuse and neglect within their families, or whose families do not have the capacity to protect them.

Figure 16.1 is a simplified representation of the statutory child protection system, depicting common pathways through the system and referrals to support services.

Figure 16.1 The child protection service system^{a, b, c, d}

^a Dashed lines indicate that clients may or may not receive these services, depending on need, service availability, and client willingness to participate in voluntary services. ^b Support services include family preservation and reunification services provided by government and other agencies. Children and families move in and out of these services and the child protection system, and might also be in the child protection system while receiving support services. ^c Shading indicates data availability (green = available; white = not available). ^d AG = Activity Group. See section 16.4 for detailed definitions.

Source: State and Territory governments (unpublished).

Roles and responsibilities

State and Territory governments have responsibility for funding and/or providing child protection services in Australia. Each jurisdiction has its own legislation that determines the policies and practices of its child protection system, and while this legislation varies in detail, its intent is similar across jurisdictions.

Other government service systems can have a role in child protection, including:

- mandatory reporting responsibilities for some jurisdictions
- education and child care services, which in some jurisdictions includes education on protective behaviours
- health services and mental health services, which support the assessment of child protection matters and deliver general medical and dental services as well as therapeutic, counselling and other services
- police services, which investigate serious allegations of child abuse and neglect, particularly criminal matters, and may also work on child protection assessments
- courts, which decide whether a child will be placed on an order.

This chapter reports on services provided by State and Territory governments to promote family wellbeing and to protect children, specifically family support services; intensive family support services; child protection services and out-of-home care services (see section 16.4 for definitions).

Size and scope

Nationally, the following number of children aged 0–17 years received child protection services during 2015-16 (tables 16A.9 and 16A.17):

- 225 487 children were the subject of child protection *notifications*, the equivalent of 42.0 notifications per 1000 children in the population.
- 107 348 children were the subject of a *finalised investigation*, the equivalent of 20.0 finalised investigations per 1000 children in the population.
- 45 714 children were the subject of a *substantiation*, the equivalent of 8.5 substantiations per 1000 children in the population.
- 51 972 children were on *care and protection orders*, the equivalent of 9.6 children on care and protection orders per 1000 children in the population.
- 46 448 children were in *out-of-home care*, the equivalent of 8.6 children in out-of-home care per 1000 children in the population.

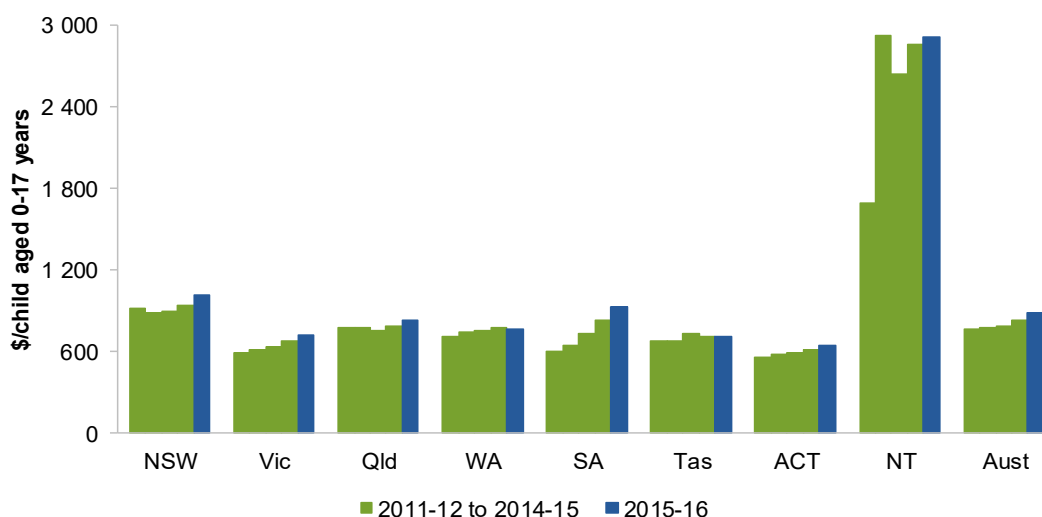

Aboriginal and Torres Strait Islander children are overrepresented in the child protection system (tables 16A.9 and 16A.17). For further details see the performance indicator ‘disproportionality’ in section 16.3.

Funding

Total recurrent expenditure on child protection, out-of-home care, family support services and intensive family support services was \$4.8 billion nationally in 2015-16 (a real increase of 7.7 per cent from 2014-15) of which out-of-home care services accounted for the majority (57.4 per cent, or \$2.7 billion) (table 16A.1).

In 2015-16, real recurrent expenditure on all child protection services per child aged 0–17 years in the population was \$883 nationally (figure 16.2).

Figure 16.2 **Total real recurrent expenditure on all child protection services, per child (2015-16 dollars)^a**

^a See table 16A.1 for detailed footnotes and caveats.

Source: State and Territory governments (unpublished); table 16A.1.

At present, there are some differences across jurisdictions in the calculation of child protection expenditure (see tables 16A.3 and 16A.4 for details).

16.2 Framework of performance indicators

The framework of performance indicators for child protection services is based on shared government objectives (box 16.1).

Box 16.1 Objectives for child protection services

Child protection services aim to promote child and family wellbeing by:

- enabling families to care for, and protect, children and young people
- protecting children and young people who are at risk of abuse and neglect within their families or whose families do not have the capacity to provide care and protection, and
- supporting children and young people in the child protection system to reach their potential.

To achieve these aims, governments seek to provide child protection services that:

- are responsive, ensuring that notifications are responded to, and investigations are completed, in a timely and appropriate manner
- are targeted to children and young people who are at greatest risk
- support and strengthen families so that children can live in a safe and stable family environment
- provide quality care for children and young people aged 0–17 years who cannot live with their parents for reasons of safety or family crisis, with an emphasis on safety, stability and permanency in children's living arrangements
- meet the needs of individual children and young people in the child protection system.

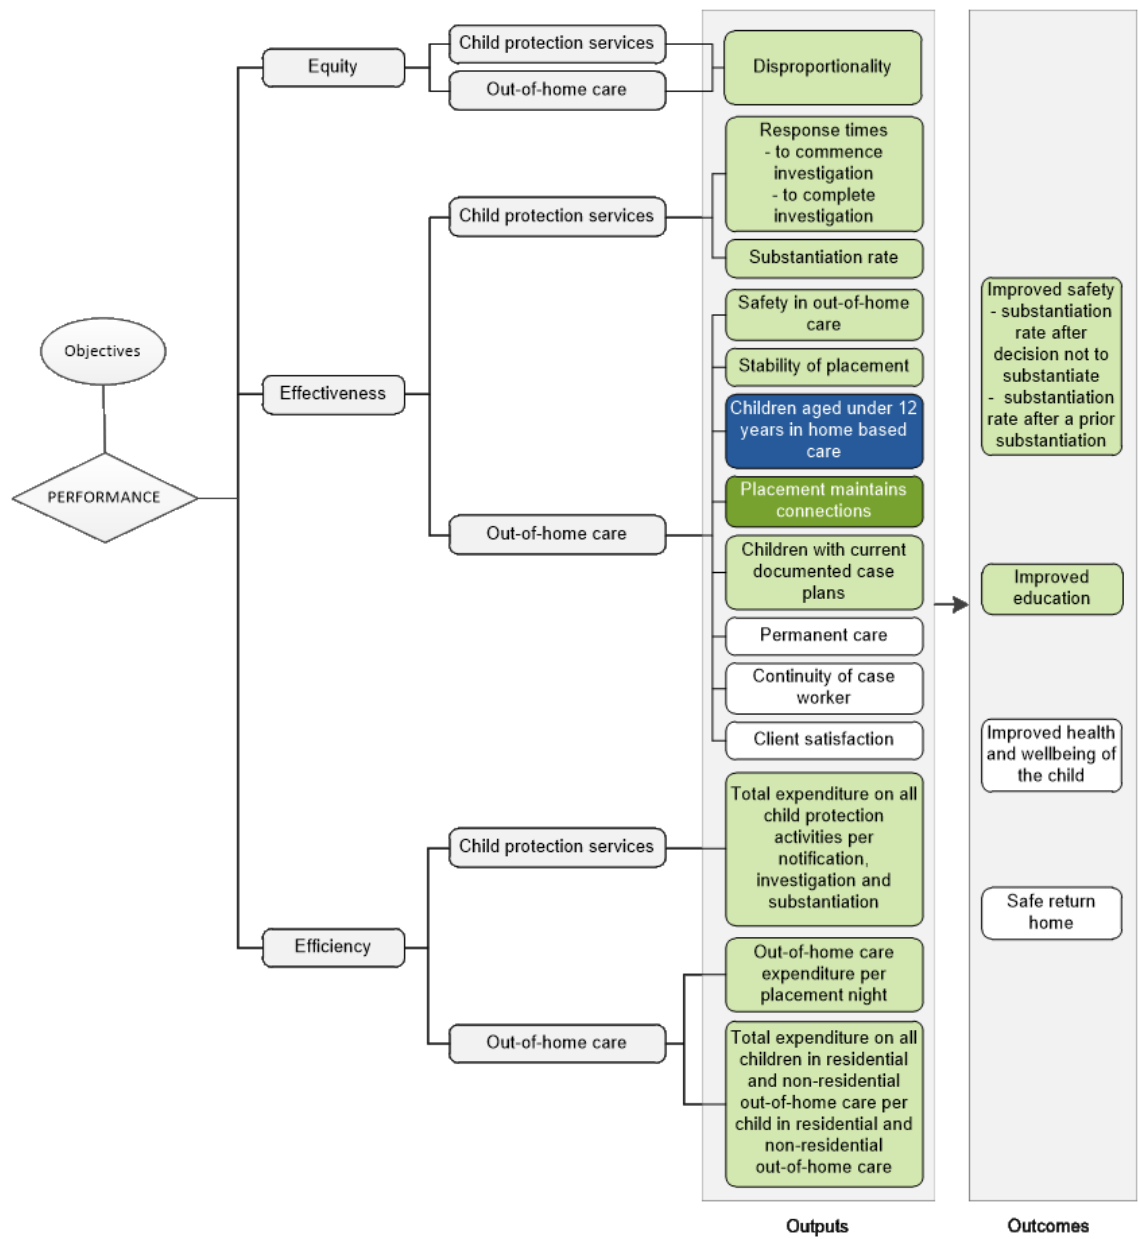

Governments aim for child protection services to meet these objectives in an equitable and efficient manner.

The performance indicator framework provides information on equity, efficiency and effectiveness, and distinguishes the outputs and outcomes of child protection services (figure 16.3).

The performance indicator framework shows which data are complete and comparable in the 2017 Report. For data that are not considered directly comparable, text includes relevant caveats and supporting commentary. Chapter 1 discusses data comparability, data completeness and information on data quality from a Report-wide perspective. In addition to section 16.1, the Report's statistical context chapter (chapter 2) contains data that may assist in interpreting the performance indicators presented in this chapter.

Improvements to performance reporting for child protection services are ongoing and will include identifying indicators to fill gaps in reporting against key objectives and improving the comparability and completeness of data.

Figure 16.3 Child protection services performance indicator framework

Key to Indicators*

- Text Most recent data for all measures are comparable and complete
- Text Most recent data for at least one measure are comparable and complete
- Text Most recent data for all measures are either not comparable and/or not complete
- Text No data reported and/or no measures yet developed

* A description of the comparability and completeness of each measure is provided in indicator interpretation boxes within the chapter

16.3 Key performance indicator results

Different delivery contexts, locations and clients can affect the equity, effectiveness and efficiency of child protection services. Performance indicator results may differ from similar data included in some jurisdictions' annual reports due to different counting rules applied for these jurisdictional reports.

Outputs

Outputs are the services delivered (while outcomes are the impact of these services on the status of an individual or group) (see chapter 1). Output information is also critical for equitable, efficient and effective management of government services.

Equity

'Disproportionality' is an indicator of the governments' objective to provide child protection services in an equitable manner (box 16.2).

Box 16.2 Disproportionality

'Disproportionality' is defined as the extent to which a group's representation in the child protection services system is proportionate to their representation in the child protection services target population (0–17 years). Disproportionality for Aboriginal and Torres Strait Islander children is calculated by dividing the proportion of children in the child protection system who are Aboriginal and Torres Strait Islander children by the proportion of children in the target population who are Aboriginal and Torres Strait Islander children.

The disproportionality ratio is calculated as follows:

$$\left[\text{Ratio} = \left(\frac{\text{Aboriginal and Torres Strait Islander children in the child protection system}}{\text{All children in the child protection system}} \right) / \left(\frac{\text{Aboriginal and Torres Strait Islander children in the target population (0–17 years)}}{\text{All children in the target population (0–17 years)}} \right) \right]$$

If the group's representation is proportionate to their representation in the target population, the disproportionality ratio will equal 1.0. For example, if five per cent of all children in the child protection system are Aboriginal and Torres Strait Islander children, and five per cent of all children in the target population (0–17 years) are Aboriginal and Torres Strait Islander children then the disproportionality ratio will be 1.0.

(continued next page)

Box 16.2 (continued)

This measure comprises six ratios for components of the child protection services system (see figure 16.1 for a simplified representation of the components):

- notifications
- commencing intensive family support services
- investigations and substantiations (each reported separately)
- care and protection orders
- out-of-home care.

Disproportionality provides an indication of the extent to which government's child protection system policies and practices result in differences in the supports and services delivered on the basis of a group's characteristics. A group's representation should be proportional to their need for supports and services. Higher need may result in necessary disproportionality (ie, ratio greater than 1.0). If risk factors and need are the same across groups, then neither overrepresentation or underrepresentation is desirable (that is, the disproportionality ratio should be 1.0). Both overrepresentation and underrepresentation can have undesirable consequences.

Disproportionality can reflect the uneven distribution of structural and relative disadvantage throughout the population, in addition to risk factors including economic and social factors, and can indicate a greater need for appropriate supports and services. At the same time disproportionality can reflect biases in the system that should be avoided.

The six disproportionality ratios can be influenced by a range of factors and might fluctuate because of policy, funding and practice changes, such as increased investment in intensive family support and services to divert children from care, better targeting of investigative resources, the impact of mandatory reporting or factors such as increased community awareness and willingness to notify suspected instances of child abuse, neglect or harm.

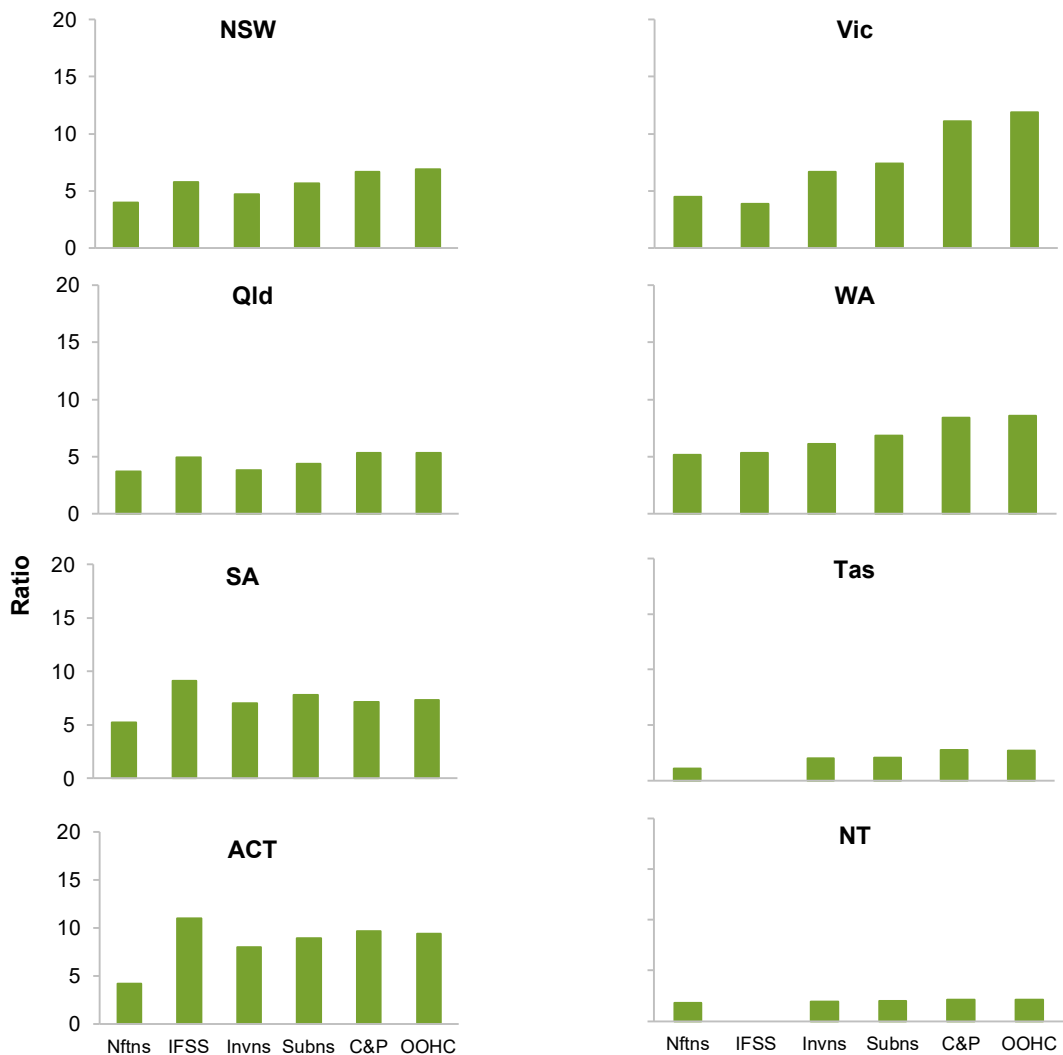

Identification of Indigenous status may lead to data quality issues for this indicator, in particular underidentification of Indigenous status which is likely to result in the disproportionality ratios understating Aboriginal and Torres Strait Islander children's representation in the child protection system. Data should be considered in conjunction with the proportion of children for whom Indigenous status is recorded as not stated. The number of children for whom Indigenous status is recorded as not stated varies across states and territories (refer to tables 16A.9; 16A.18 and 16A.30).

Data reported for this indicator are:

- comparable (subject to caveats) within jurisdictions over time, but are not comparable across jurisdictions (see caveats in attachment tables)
- incomplete (subject to caveats) for the current reporting period. Intensive family support service data for Tasmania and the NT were unavailable.

The 2015-16 disproportionality ratios for Aboriginal and Torres Strait Islander children vary within jurisdictions across each of the six service types (figure 16.4 and 16A.5).

Effectiveness

Child protection services — response times

‘Response times’ is an indicator of governments’ objective to provide child protection services that are responsive, ensuring that notifications are responded to, and investigations are completed, in a timely and appropriate manner (box 16.3).

Box 16.3 **Response times**

‘Response times’ is defined by two measures:

- response time to *commence* investigations, defined as the proportion of investigations commenced within specified time periods, where the length of time (measured in days) between the date a child protection department records a notification and the date an investigation is subsequently commenced
- response time to *complete* investigations, defined as the proportion of investigations completed within specified time periods, where the length of time (measured in days) between the date a child protection department records a notification and the date an investigation is completed (that is, the date an investigation outcome is determined).

A higher and increasing proportion of investigations commenced and completed in shorter time periods is desirable.

The length of time between recording a notification and commencing an investigation indicates the promptness in responding to child protection concerns. The length of time between recording a notification and completing an investigation indicates the effectiveness in conducting investigations in a timely manner.

Data reported for these measures are:

- comparable (subject to caveats) within some jurisdictions over time, but are not comparable across jurisdictions
- complete (subject to caveats) for the current reporting period. All required 2015-16 data were available.

Response times to commence and complete investigations varied across jurisdictions in 2015-16. Nationally in 2015-16, 62.2 per cent of investigations were commenced within seven days of notification (figure 16.5(a)) and 40.7 per cent of investigations were completed in 28 days or less — around one in five investigations (19.4 per cent) took longer than 90 days to complete (figure 16.5(b)). These patterns are broadly consistent with available time series data (tables 16A.14–15).

Figure 16.5 **Proportion of investigations commenced and completed, by time taken, 2015-16^a**

^a See box 16.3 and tables 16A.14–15 for detailed definitions, footnotes and caveats.

Source: AIHW data collection (unpublished); tables 16A.14–15.

Child protection services — substantiation rate

‘Substantiation rate’ is an indicator of governments’ objective that child protection services are targeted to children and young people who are at greatest risk (box 16.4).

Box 16.4 **Substantiation rate**

‘Substantiation rate’ is defined as the proportion of finalised investigations where abuse or neglect, or risk of abuse or neglect, was confirmed.

The substantiation rate provides an indication of the extent to which services were targeted to those at greatest risk, thereby avoiding the human and financial costs of an investigation where no abuse or neglect had occurred or was at risk of occurring.

Neither a very high nor very low substantiation rate is desirable. A very low substantiation rate might indicate that notifications and investigations are not accurately targeted to appropriate cases, with the undesirable consequence of distress to families and undermining the likelihood that families will voluntarily seek support. It might also reflect a greater propensity to substantiate abuse incidents rather than situations of risk. A very high substantiation rate might indicate that the criteria for substantiation are unnecessarily bringing ‘lower risk’ families into the statutory system.

The substantiation rate is influenced by a range of factors and might fluctuate because of policy, funding and practice changes, such as better targeting of investigative resources, the impact of mandatory reporting or factors such as increased community awareness and willingness to notify suspected instances of child abuse, neglect or harm.

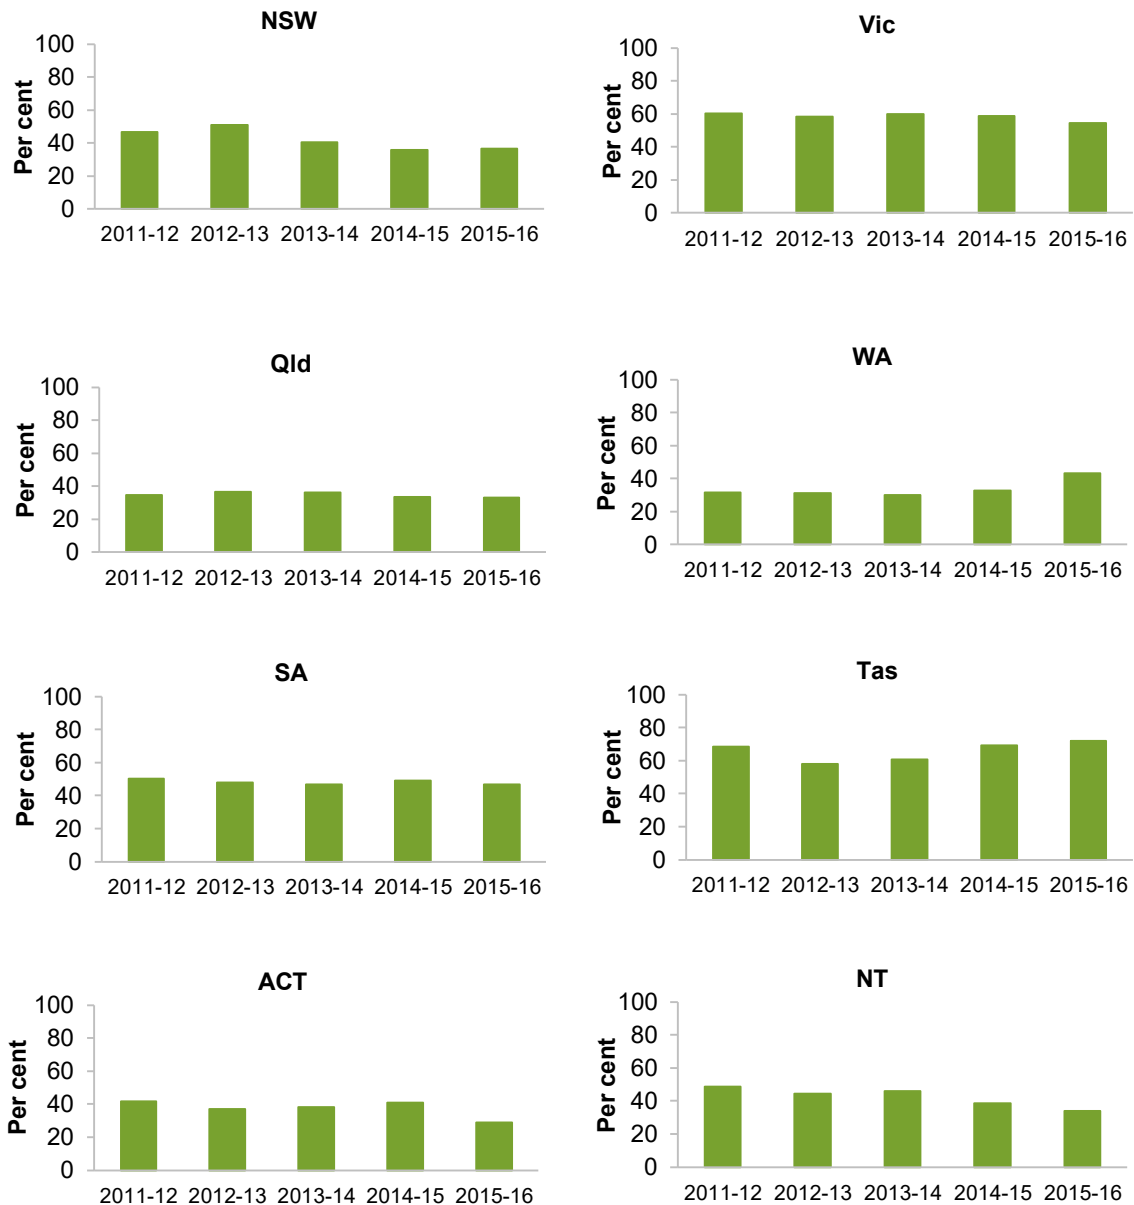

Varying thresholds for recording a substantiation across jurisdictions should also be considered when interpreting data for this indicator (see section 16.4).

Data reported for this indicator are:

- comparable (subject to caveats) within some jurisdictions over time, but are not comparable across jurisdictions
- complete (subject to caveats) for the current reporting period. All required 2015-16 data were available.

The proportion of finalised child protection investigations that were substantiated varied across jurisdictions and over time (figure 16.6 and table 16A.10).

Figure 16.6 Proportion of finalised child protection investigations that were substantiated^a

^a See box 16.4 and table 16A.10 for detailed definitions, footnotes and caveats.

Source: AIHW data collection (unpublished); table 16A.10.

Out-of-home care — safety in out-of-home care

‘Safety in out-of-home care’ is an indicator of governments’ objective to provide quality care for children and young people aged 0–17 years who cannot live with their parents for reasons of safety or family crisis, with an emphasis on safety, stability and permanency in children’s living arrangements (box 16.5).

Box 16.5 Safety in out-of-home care

'Safety in out-of-home care' is defined by two measures:

- the proportion of children in out-of-home care who were the subject of a substantiation of sexual abuse, physical abuse, emotional abuse or neglect (data for this measure are experimental)
- the proportion of children in out-of-home care who were the subject of a substantiation where the person responsible was living in the household providing out-of-home care.

For the first measure, the person responsible can be anyone who comes into contact with the child while the child is in out-of-home care (ie, not limited to a person living in the household), and is for notifications received within the period. For the second measure, the person responsible is limited to someone in the household providing out-of-home care, and is irrespective of the date of notification.

A low or decreasing proportion of substantiations for both measures is desirable. Care should be taken when interpreting this indicator as the threshold for substantiating abuse or neglect or risk involving a child in care is generally lower than that for a child in the care of his or her own parents. This is because governments assume a duty of care for children removed from the care of their parents for protective reasons.

Data reported for these measures are:

- comparable (subject to caveats) within some jurisdictions over time but are not comparable across jurisdictions.
- incomplete for the current reporting period. All required 2015-16 data were not available for NSW and Victoria (which did not provide data for the first measure), and SA and the NT (which did not provide data for the second measure).

Experimental data for the proportion of children in out-of-home care who were the subject of a substantiation of abuse or neglect (from notifications in the current year) varied across jurisdictions (table 16A.27). Data on the proportions where the person responsible was living in the household are summarised in table 16.1 (16A.26).

Table 16.1 Children in out-of-home care who were the subject of a substantiation and the person responsible was living in the household, 2015-16^a

	<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>
Children in care who were the subject of a substantiation and the person responsible was in the household	no.	95	163	163	5	na	7	12	na
Children aged 0–17 years in at least one care placement during the year	no.	20 316	12 473	10 709	4 967	3 671	1 300	879	1 299
Proportion	%	0.5	1.3	1.5	0.1	na	0.5	1.4	na

^a See box 16.5 and table 16A.26 for detailed definitions, footnotes and caveats. **na** Not available.

Source: State and Territory governments (unpublished); table 16A.26.

Out-of-home care — stability of placement

‘Stability of placement’ is an indicator of governments’ objective to provide quality care for children and young people aged 0–17 years who cannot live with their parents for reasons of safety or family crisis, with an emphasis on safety, stability and permanency in children’s living arrangements (box 16.6).

Box 16.6 **Stability of placement**

‘Stability of placement’ is defined as the proportion of children who had one or two placements during a period of continuous out-of-home care.

A low number of child placements (one or two) per period of care is desirable, but must be balanced against other placement indicators.

Children can have multiple short-term placements for appropriate reasons (for example, an initial placement followed by a longer-term placement) or it may be desirable to change placements to achieve better compatibility between a child and family. It is not desirable for a child to stay in an unsatisfactory or unsupportive placement. Also, older children are more likely to have multiple placements as they move towards independence and voluntarily seek alternate placements.

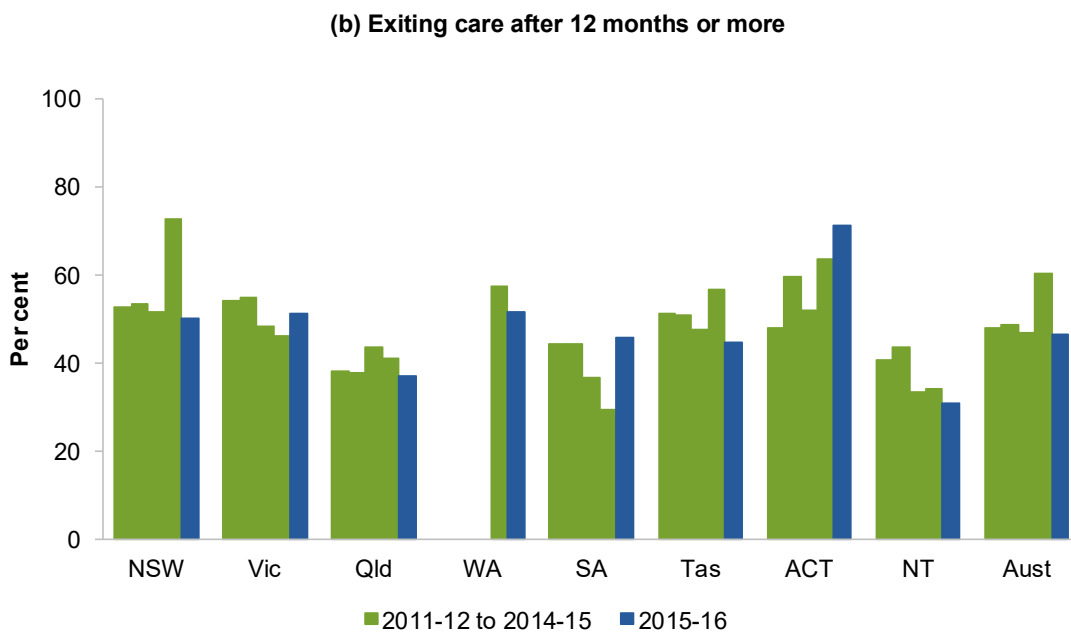

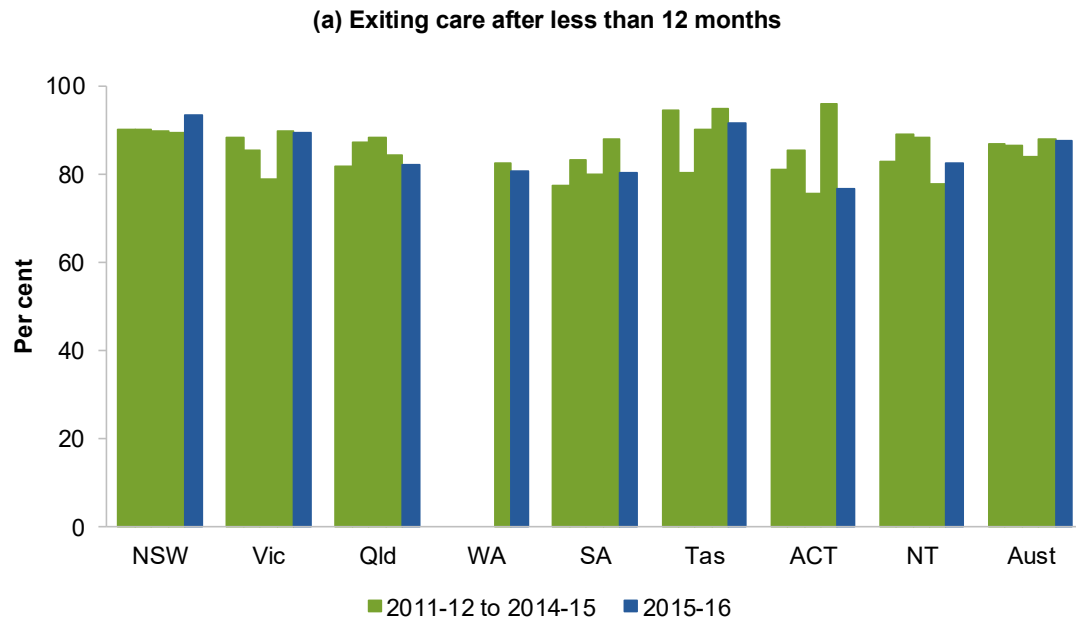

Data are collected only for children who are on orders and who exit care during the reporting period. There are limitations to counting placement stability using a cohort of children on exit from care rather than longitudinally tracking a cohort of children on their entry into care; an exit cohort is biased to children who stayed a relatively short time in care and thus were more likely to have experienced fewer placements. Further, for the 2014-15 period onwards, the counting rules for this indicator were modified to clarify that all placements lasting less than seven days should be excluded from the count of number of placements.

Data reported for this indicator are:

- comparable (subject to caveats) within some jurisdictions over time but are not comparable across jurisdictions
- complete for the current reporting period. All required 2015-16 data were available.

Nationally in 2015-16, 87.5 per cent of children on a care and protection order who exited care within 12 months experienced one or two placements (figure 16.7(a)), whilst for children who had been in out-of-home care 12 months or more this proportion was lower at 46.3 per cent indicating they tended to have more placements (figure 16.7(b)) (table 16A.25).

Figure 16.7 Proportion of children on an order exiting care who had one or two placements^{a, b}

^a See box 16.6 and table 16A.25 for detailed definitions, footnotes and caveats. ^b Data were not available for WA between 2010-11 and 2013-14.

Source: AIHW data collection (unpublished); table 16A.25.

Out-of-home care — children aged under 12 years in home-based care

‘Children aged under 12 years in home-based care’ is an indicator of governments’ objective to provide services that meet the needs of individual children and young people in the child protection system (box 16.7).

Box 16.7 Children aged under 12 years in home-based care

‘Children aged under 12 years in home-based care’ is defined as the number of children aged under 12 years placed in home-based care divided by the total number of children aged under 12 years in out-of-home care.

A high or increasing rate of children aged under 12 years in out-of-home care that are placed in home-based care is desirable.

Placing children in home-based care is generally considered to be in their best interests, particularly for younger children. Children will generally make better developmental progress in family settings rather than in residential or institutional care environments.

Data reported for this indicator are:

- comparable (subject to caveats) across jurisdictions and over time
- complete for the current reporting period. All required data for 30 June 2016 were available.

Nationally at 30 June 2016, the proportion of all children aged under 12 years in care who were placed in home-based care was 97.4 per cent. Proportions were similar for Aboriginal and Torres Strait Islander and non-Indigenous children, and have been consistent across available time series data (table 16A.24).

Out-of-home care — placement maintains connections

‘Placement maintains connections’ is an indicator of governments’ objective to provide services that meet the needs of individual children and young people in the child protection system (box 16.8).

Box 16.8 Placement maintains connections

'Placement maintains connections' is defined by four measures:

- *placement with relatives or kin* – the proportion of all children in out-of-home care who are placed with relatives or kin who receive government financial assistance to care for that child
- *placement in accordance with the Aboriginal and Torres Strait Islander child placement principle (ATSICPP)* – the proportion of Aboriginal and Torres Strait Islander children in out-of-home care placed with the child's extended family, Aboriginal and Torres Strait Islander community or other Aboriginal and Torres Strait Islander people
- *local placement* – the proportion of children in out-of-home care attending the same school that they were attending before entering out-of-home care
- *placement with sibling* – the proportion of children who are on orders and in out-of-home care at 30 June who have siblings also on orders and in out-of-home care, who are placed with at least one of their siblings.

High or increasing rates for all four measures are desirable, though a placement decision needs to consider all factors regarding the child's safety and wellbeing and therefore may involve weighing up the measures separately. Placing children so that connections with family, kin and/or community can be maintained or enhanced is generally the preferred out-of-home care placement option due to the increased continuity, familiarity and stability for the child, and the association with improved long-term outcomes. However, placements with family, kin and/or community may not always be the best option.

The measure 'placement in accordance with the ATSICPP' should be interpreted with care as it is a proxy, reporting the placement outcomes of Aboriginal and Torres Strait Islander children rather than compliance with the principle.

Identification of Indigenous status may lead to data quality issues for this indicator, in particular underidentification of Indigenous status which may understate rates by Indigenous status.

Data for the measures 'local placement' and 'placement with sibling' are under development and are not available for this report.

Data reported for the 'placement with relatives or kin' and 'placement in accordance with the Aboriginal and Torres Strait Islander child placement principle' measures are:

- comparable (subject to caveats) across jurisdictions and over time
- complete for the current reporting period. All required data for 30 June 2016 were available.

Nationally at 30 June 2016, the proportion of children placed with relatives or kin was 48.7 per cent, with the proportion slightly higher for Aboriginal and Torres Strait Islander children (49.9 per cent) than for non-Indigenous children (48.1 per cent) (figure 16.8).

The proportion of children placed with relatives or kin has increased 4.4 percentage points since 30 June 2007, though has decreased 5.2 percentage points over the same period for Aboriginal and Torres Strait Islander children (table 16A.22).

Figure 16.8 Proportion of children in out-of-home care placed with relatives/kin, by Indigenous status, at 30 June 2016^a

^a See box 16.8 and table 16A.22 for detailed definitions, footnotes and caveats.

Source: AIHW data collection (unpublished); table 16A.22.

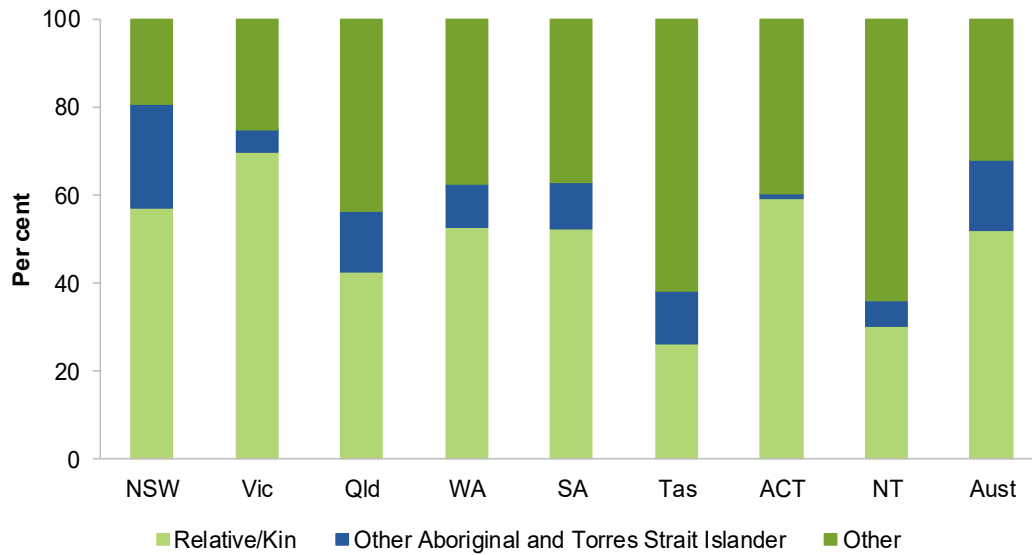

The ATSI CPP comprises five domains; prevention, partnership, placement, participation and connection (SNAICC 2013; DSS 2015). The placement domain of the ATSI CPP specifies placement of an Aboriginal or Torres Strait Islander child in out-of-home care is prioritised in the following way:

- placement with Aboriginal or Torres Strait Islander relatives or extended family members, or other relatives or extended family members
- with Aboriginal and Torres Strait Islander family-based carers.

If the preferred options are not available, the child may be placed with a non-Indigenous carer or in a residential setting. If the child is not placed with their extended Aboriginal or Torres Strait Islander family, the placement must be within close geographic proximity to the child's family. All jurisdictions have adopted the ATSI CPP in both legislation and policy.

Nationally at 30 June 2016, 52.1 per cent of Aboriginal and Torres Strait Islander children in out-of-home care were placed with relatives/kin (this proportion differs to the first measure as it excludes those in independent living). A further 15.8 per cent were placed with other Aboriginal and Torres Strait Islander carers or in Aboriginal and Torres Strait Islander residential care. Proportions varied across jurisdictions (figure 16.9). Nationally, the proportion of Aboriginal and Torres Strait Islander children in out-of-home care who were placed with relatives/kin, other Aboriginal and Torres Strait Islander carers, or in Aboriginal and Torres Strait Islander residential care has decreased over the past 10 years (from 75.3 per cent at 30 June 2007 to 67.9 per cent at 30 June 2016) (table 16A.23).

Figure 16.9 **Placement of Aboriginal and Torres Strait Islander children in out-of-home care, at 30 June 2016^a**

^a See box 16.8 and table 16A.23 for detailed definitions, footnotes and caveats.

Source: AIHW data collection (unpublished); table 16A.23.

Out-of-home care — children with current documented case plans

‘Children with current documented case plans’ is an indicator of governments’ objective to provide services that meet the needs of individual children and young people in the child protection system (box 16.9).

Box 16.9 Children with current documented case plans

'Children with current documented case plans' is defined as the number of children who have a current documented and approved case plan as a proportion of all children who are required to have a current documented and approved case plan.

A case plan is an individualised, dynamic written plan (or support agreement) developed between a family and an agency on the basis of an assessment process. A current documented case plan is one that has been approved and/or reviewed within the previous 12 months.

A high or increasing rate of children with current documented case plans is desirable.

The indicator does not assess the quality of case plans, nor the extent to which identified needs and actions are put into place. These factors should be taken into account when considering the results reported for this indicator.

Data reported for this indicator are:

- comparable (subject to caveats) within jurisdictions over time, but are not comparable across jurisdictions
- incomplete for the current reporting period. All required 2015-16 data were not available for SA and the NT.

Nationally, 86.3 per cent of children required to have a current documented case plan, had such a plan at 30 June 2016 (figure 16.10) — a decrease from 86.6 per cent in the previous year (table 16A.16).

Figure 16.10 Proportion of children with current documented case plans, at 30 June 2016^{a, b}

^a See box 16.9 and table 16A.16 for detailed definitions, footnotes and caveats. ^b Data were not available for SA and the NT.

Source: AIHW data collection (unpublished); table 16A.16.

Out-of-home care — client satisfaction

‘Client satisfaction’ is an indicator of governments’ objective to provide quality care for children and young people aged 0–17 years who cannot live with their parents for reasons of safety or family crisis, with an emphasis on safety, stability and permanency in children’s living arrangements (box 16.10).

Box 16.10 **Client satisfaction**

‘Client satisfaction’ is yet to be defined. It is intended that this indicator will measure client satisfaction with the out-of-home care system.

This indicator has been identified for development and future reporting.

Information on initiatives across jurisdictions to measure client satisfaction is included in table 16A.35.

Out-of-home care — continuity of case worker

‘Continuity of case worker’ is an indicator of governments’ objective to provide quality care for children and young people aged 0–17 years who cannot live with their parents for reasons of safety or family crisis, with an emphasis on safety, stability and permanency in children’s living arrangements (box 16.11).

Box 16.11 **Continuity of case worker**

‘Continuity of case worker’ is yet to be defined.

The turnover of workers is a frequent criticism of the quality of child protection services. A productive, stable working relationship between the case worker and the child assists to deliver quality out-of-home care services.

This indicator has been identified for development and future reporting.

Efficiency

Data reported for the existing efficiency indicators do not necessarily provide an accurate reflection of the costs involved in providing various child protection services. To improve measures of child protection system efficiencies, the Steering Committee initiated a project (the ‘Pathways’ project), which uses a combination of direct costs (those costs which can be clearly allocated by a jurisdiction to a particular child protection activity) and indirect costs (which form part of the overall expenditure base, but which cannot be clearly allocated to a specific activity).

The Pathways model is based on a top-down application of the activity-based costing method. Eight national pathways have been developed as a high level representation of the services that a child protection client could receive in any jurisdiction. Each pathway consists of common activity groups which act as the ‘building blocks’ for each of the pathways. The aggregate cost of each activity group within the pathway will allow the unit cost of an individual pathway to be derived.

The activity groups and detailed definitions are included in section 16.4. Development of national reporting against these activity groups is ongoing. Preliminary pathway data are presented in tables 16A.36-37 and are subject to further refinement in future reports.

Child protection — Total expenditure on all child protection activities per notification, investigation and substantiation

‘Total expenditure on all child protection activities, per notification, investigation, and substantiation’ are reported as proxy indicators of governments’ objective to provide child protection services in an efficient manner (box 16.12).

Box 16.12 Total expenditure on all child protection activities per notification, investigation and substantiation

‘Total expenditure on all child protection activities per notification, investigation and substantiation’ is defined by three measures:

- total expenditure on all child protection activities divided by the number of notifications
- total expenditure on all child protection activities divided by the number of investigations
- total expenditure on all child protection activities divided by the number of substantiations.

Low or decreasing expenditure per child protection activity can suggest more efficient services, but could also indicate lower quality and should be considered together with the results for other indicators in this chapter.

These indicators are proxy indicators and need to be interpreted with care. Because each of these proxy indicators is based on total expenditure on child protection activities, they do not represent unit costs for notifications, investigations or substantiations, and cannot be added together to determine overall cost of child protection services.

Data reported for this indicator are:

- comparable (subject to caveats) within some jurisdictions over time but are not comparable across jurisdictions (see caveats in attachment tables)
 - complete for the current reporting period. All required 2015-16 data were available.
-

Total expenditure on all child protection activities per investigation (figure 16.11(a)) and substantiation (figure 16.11(b)) from 2010-11 to 2015-16 varied across jurisdictions. Total expenditure on all child protection activities per notification are presented in table 16A.2.

Figure 16.11 **Child protection efficiency indicators (2015-16 dollars)^a**

^a See box 16.12 and table 16A.2 for detailed definitions, footnotes and caveats.

Source: AIHW data collection (unpublished); State and Territory governments (unpublished); table 16A.2.

Out-of-home care — Out-of-home care expenditure per placement night

‘Out-of-home care expenditure per placement night’ is an indicator of governments’ objective to provide child protection services in an efficient manner (box 16.13).

Box 16.13 Out-of-home care expenditure per placement night

'Out-of-home care expenditure per placement night' is defined as total real recurrent expenditure on out-of-home care services divided by the total number of placement nights in out-of-home care.

Low or decreasing expenditure per placement night can suggest more efficient services but could also indicate lower quality and should be considered together with the results for other indicators in this chapter.

Data reported for this indicator are:

- comparable (subject to caveats) within jurisdictions over time but are not comparable across jurisdictions
- complete for the current reporting period.

Nationally in 2015-16, out-of-home care expenditure per placement night was \$166.28 (figure 16.12).

Figure 16.12 Real out-of-home care expenditure per placement night (2015-16 dollars)^a

^a See box 16.13 and table 16A.28 for detailed definitions, footnotes and caveats.

Source: AIHW data collection (unpublished); State and Territory governments (unpublished); table 16A.28.

Out-of-home care — Total expenditure on residential and non-residential out-of-home care per child in residential and non-residential out-of-home care

‘Total expenditure on all out-of-home care services per child in out-of-home care, by residential and non-residential care’ are reported as proxy indicators of governments’ objective to provide child protection services in an efficient manner (box 16.14).

Box 16.14 Total expenditure on residential and non-residential out-of-home care per child in residential and non-residential out-of-home care

Total expenditure on children in residential and non-residential out-of-home care per child in residential and non-residential out-of-home care is defined by three measures:

- total expenditure on *residential* out-of-home care divided by the number of children in residential out-of-home care at 30 June
- total expenditure on *non-residential* out-of-home care divided by the number of children in non-residential out-of-home care at 30 June
- total expenditure on *all* out-of-home care divided by the number of children in all out-of-home care at 30 June.

Low or decreasing expenditure per child in care can suggest more efficient services but may indicate lower quality and should be considered together with the results for other indicators in this chapter.

These indicators are proxy indicators and need to be interpreted with care as they do not represent a measure of unit costs. Expenditure per child in care at 30 June overstates the cost per child because significantly more children are in care during a year than at a point in time. In addition, the indicator does not reflect the length of time that a child spends in care.

Data reported for these measures are:

- comparable (subject to caveats) within some jurisdictions over time but are not comparable across jurisdictions
- incomplete for the current reporting period. All required 2015-16 data were not available for NSW, Queensland and the NT for the measures by residential and non-residential out-of-home care.

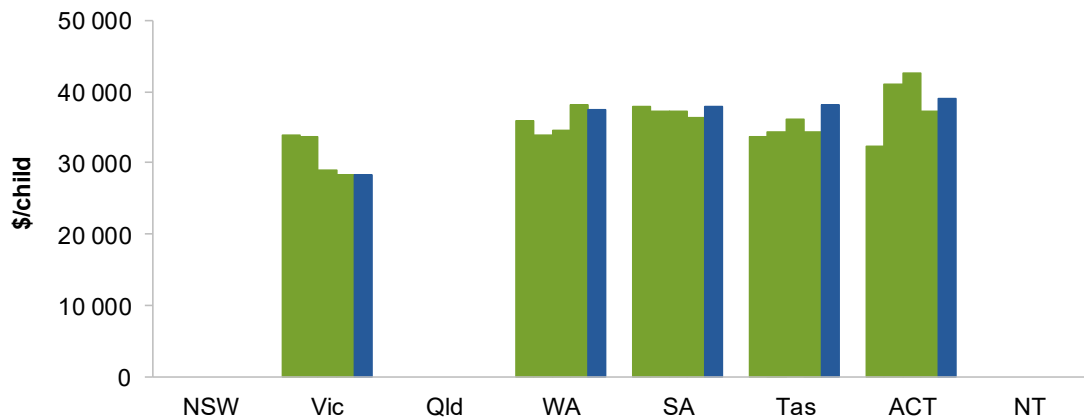

Total expenditure on all out-of-home care per child in out-of-home care at 30 June 2016 varied across jurisdictions ranging between \$45 000 and \$110 000 (figure 16.13(c)) — considerably higher for residential care (ranging between \$217 000 and \$639 000) compared to non-residential care (ranging between \$28 000 and \$40 000) (figures 16.13(a) and 16.13(b)).

Figure 16.13 **Out-of-home care efficiency indicators, at 30 June**
(2015-16 dollars)^{a, b}

(a) Annual real recurrent expenditure on residential out-of-home care per child in residential care

(b) Annual real expenditure on non-residential out-of-home care per child in non-residential care

(c) Annual real expenditure on all out-of-home care per child in out-of-home care at 30 June

^a See box 16.14 and table 16A.3 for detailed definitions, footnotes and caveats. ^b NSW, Queensland and the NT could not disaggregate expenditure on out-of-home care.

Source: AIHW data collection (unpublished); State and Territory governments (unpublished); table 16A.3.

Outcomes

Outcomes are the impact of services on the status of an individual or group (see chapter 1).

Improved safety — substantiation rate after decision not to substantiate

‘Improved safety’ is an indicator of governments’ objective to protect children and young people who are at risk of abuse and neglect within their families, or whose families do not have the capacity to provide care and protection (box 16.15).

Box 16.15 Improved safety

‘Improved safety’ is defined by two measures:

- substantiation rate *after a decision not to substantiate*, defined as the proportion of children who were the subject of an investigation in the previous financial year that led to a decision not to substantiate, and who were later the subject of a substantiation within 3 or 12 months of the initial decision not to substantiate. The year reported relates to the year of the initial decision not to substantiate
- substantiation rate *after a prior substantiation*, defined as the proportion of children who were the subject of a substantiation in the previous financial year, who were subsequently the subject of a further substantiation within the following 3 or 12 months. The year reported relates to the year of the initial substantiation.

A low or decreasing rate for these measures is desirable. However, reported results can be affected by the finalisation of investigations, factors beyond the control of child protection services, or a change in circumstances after the initial decision not to substantiate was made. A demonstrable risk of abuse or neglect might not have existed in the first instance. In addition, this indicator does not distinguish between subsequent substantiations which are related to the initial notification (that is, the same source of risk of abuse or neglect) and those which are unrelated to the initial notification (that is, a different source of risk of abuse or neglect). This indicator partly reveals the extent to which an investigation has not succeeded in identifying the risk of abuse or neglect to a child who is subsequently the subject of a substantiation. It also provides a measure of the adequacy of interventions offered to children to protect them from further abuse or neglect. This indicator should be considered with other outcome indicators.

Varying thresholds for recording a substantiation across jurisdictions, should also be considered when interpreting data for this indicator (see section 16.4).

Data reported for these measures are:

- comparable (subject to caveats) within jurisdictions over time but are not comparable across jurisdictions (see caveats in attachment tables)
- complete for the current reporting period. All required 2014-15 data were available.

The proportion of substantiations that occurred within 3 and 12 months of a decision not to substantiate are provided in figure 16.14. Rates for the most recent available year were under 26 per cent in all jurisdictions. The proportion of substantiations that occurred within

12 months of a prior substantiation are provided in figure 16.15. Rates for the most recent available year were under 28 per cent in all jurisdictions.

Figure 16.14 Improved safety — substantiation rate within 3 and/or 12 months after a decision not to substantiate^a

Source: AIHW data collection (unpublished); table 16A.12.

Improved education

‘Improved education’ is an indicator of governments’ objective to support children and young people in the child protection system to reach their potential (box 16.16).

Box 16.16 Improved education

'Improved education' is defined as the proportion of children on guardianship and custody orders achieving at or above national minimum standards in reading and numeracy in Year 5, compared with all children.

A high or increasing rate of children on guardianship and custody orders achieving at or above national minimum standards in reading and numeracy is desirable.

Factors outside the control of child protection services have an influence on the educational outcomes of children on guardianship and custody orders, and care should be exercised when interpreting results.

When interpreting NAPLAN data, it is important to take into account student participation rates (table 16A.13). Children exempted from NAPLAN testing are recorded as not having met the national minimum standards in reading and numeracy. Experimental data indicate that children on guardianship and custody orders are exempted from NAPLAN testing at significantly higher rates than the general student population, which might contribute to poorer reported NAPLAN results for children on orders, compared with the general student population.

Data reported for this measure are:

- comparable (subject to caveats) across jurisdictions
- complete for the reporting period of 2013. Only Queensland and SA have data available for the 2014 reporting period.

In 2013, the proportions of children in care at or above the national minimum standards for Year 5 reading and numeracy varied across jurisdictions (table 16.2), and were below the proportions for all students (by at least 10 percentage points for the majority of jurisdictions) (table 16A.13).

Table 16.2 Proportion of children on guardianship/custody orders achieving the national reading and numeracy benchmarks, Year 5 level, 2013 (per cent)

	<i>Reading</i>		<i>Numeracy</i>	
	<i>Children on orders</i>	<i>All students</i>	<i>Children on orders</i>	<i>All students</i>
NSW	86.0	96.8	74.9	93.9
Victoria	79.2	96.5	71.5	94.4
Queensland	78.0	96.2	64.5	93.6
WA	80.1	96.0	64.8	92.7
SA	78.9	95.7	62.9	92.0
Tasmania	79.2	95.5	70.2	92.4
ACT	88.2	97.0	88.9	95.0
NT	66.7	73.7	41.7	69.7

^a See box 16.16 and table 16A.13 for detailed definitions, footnotes and caveats.

Source: State and Territory Governments (unpublished); AIHW (unpublished) derived from AIHW linked child protection and NAPLAN data set; table 16A.1.

Improved health and wellbeing of the child

‘Improved health and wellbeing of the child’ is an indicator of governments’ objective to support children and young people in the child protection system to reach their potential (box 16.17).

Box 16.17 Improved health and wellbeing of the child

‘Improved health and wellbeing of the child’ is yet to be defined.

Good health and wellbeing are considered vital ingredients for optimising children’s life chances. Therefore, ensuring the health and wellbeing of children in the child protection system is considered a high priority.

This indicator has been identified for development and future reporting.

Safe return home

‘Safe return home’ is an indicator of governments’ objective to promote child and family wellbeing by enabling families to care for and protect children and young people (box 16.18).

Box 16.18 Safe return home

‘Safe return home’ is yet to be defined.

For children who cannot be protected within their family and are removed from home, often the best outcome is when effective intervention to improve their parents’ skills or capacity to care for them enables them to return home.

This indicator has been identified for development and future reporting.

Permanent care

‘Permanent care’ is an indicator of governments’ objective to protect children and young people who are at risk of abuse and neglect within their families or whose families do not have the capacity to provide care and protection (box 16.19).

Box 16.19 Permanent care

'Permanent care' is yet to be defined.

Appropriate services are those that minimise the length of time before stable, permanent placement is achieved.

This indicator has been identified for development and future reporting.

16.4 Definitions of key terms

Aboriginal and Torres Strait Islander person

Person of Aboriginal or Torres Strait Islander descent who identifies as being an Aboriginal or Torres Strait Islander and is accepted as such by the community with which he or she lives.

Activity Group 1 (pathways)

Receipt and assessment of initial information about a potential protection or support issue

Activities that are typically associated with receipt and assessment of initial information including receipt and recording of information, review of department databases, initial assessment of information and decisions about the appropriate response. This activity can also include consultation, with possible provision of advice. Activities by non-government organisations (NGOs) may be included if appropriate.

Activity Group 2 (pathways)

Provision of generic family support services

Activities that are typically associated with provision of lower level family support services at various stages including identification of family needs, provision of support services and diversionary services, some counselling and active linking of the family to support networks. Services are funded by government but can be delivered by either the relevant agency or a NGO. This bundle of services does not involve planned follow-up by the relevant agency after initial service delivery. The services will be delivered under voluntary arrangements between the relevant agency and family. Clients may receive these services more than once.

Activity Group 3 (pathways)

Provision of intensive family support services

Activities that are typically associated with provision of complex or intensive family support services including provision of therapeutic and in-home supports such as counselling and mediation, modelling of positive parenting strategies, referrals to intensive support services that may be provided by NGOs, advocacy on behalf of clients, and intensive support for a family in a residential setting and/or supported accommodation. These services may be provided if other diversionary services are inappropriate to the case and may lead to statutory services being provided to the client.

Activity Group 4 (pathways)

Secondary information gathering and assessment

Activities that are typically associated with secondary information gathering and assessment are currently counted as 'investigations' in the Report on Government Services. As part of this activity group a decision may be made to substantiate or not substantiate. Information gathering activities include:

- sighting the child
- contacting people with relevant information about the child or family (for example, teachers, police, support services)
- interviewing the child, sibling(s) and parents
- observing family interactions
- obtaining assessments of the child and/or family
- conducting family group conferences
- liaising with agencies providing services to the child and family
- recording a substantiation or non-substantiation decision
- case conferences with partners and contributors in the investigation and assessment process.

Activity Group 5

Activities that are typically associated with provision of short-term protective

(pathways)

Provision of short-term protective intervention and coordination services for children not on an order

intervention and coordination services including:

- working with the family to address protective issues
- developing networks of support for the child
- monitoring and reviewing the safety of the child
- monitoring and reviewing family progress against case planning goals
- case conferences with agencies providing services to the child and/or family, internal discussions and reviews
- specialist child-focused therapeutic support.

Activity Group 6 (pathways)

Seeking an order

Activities that are typically associated with seeking orders (court orders or voluntary/administrative orders) including:

- preparing applications for the order
- preparing reports for the court
- obtaining assessment reports to submit to the court
- informing parties to the court proceedings, including parents, the child, and lawyers
- informing and briefing legal counsel or internal court groups
- going through internal pre-court review processes
- attending court
- conducting family group conferences.

Activity Group 7 (pathways)

Provision of protective intervention, support and coordination services for children on an order

Activities that are typically associated with provision of longer-term protective intervention and coordination services including:

- monitoring the child or young person's progress and development (for example, social development and education progress) and undertaking activities that facilitate progress and development
- meeting any specific requirements of any court order
- reviewing appropriateness of the order for the circumstances of the child or young person. This usually occurs at intervals established by the court or in legislation
- reporting back to court
- long term cases involving out-of-home care.

Activity Group 8 (pathways)

Provision of out-of-home care services

Activities that are typically associated with provision of out-of-home care services including:

- finding suitable placement(s) for the child
- assisting the child or young person to maintain contact with his/her family
- in some cases, staff payments for recruiting and training carers
- assessing suitability of potential kinship carers
- assisting the child or young person to maintain contact with their family
- working to return the child home
- assisting the child or young person as they prepare to leave care as the end of the order approaches.

Care and protection orders

Care and protection orders are legal orders or arrangements which give child protection departments some responsibility for a child's welfare. The scope of departmental involvement mandated by a care and protection order is dependent on the type of order, and can include:

- responsibility for overseeing the actions of the person or authority caring for the child
- reporting or giving consideration to the child's welfare (for example, regarding the child's education, health, religion, accommodation and financial matters).

Types of care and protection orders:

- Finalised guardianship or custody orders – involve the transfer of legal guardianship to the relevant state or territory department or non-government agency. These orders involve considerable intervention in a child's life and that of his or her family, and are sought only as a last resort. Guardianship orders convey responsibility for the welfare of a child

to a guardian. Guardianship orders do not necessarily grant the right to the daily care and control of a child, or the right to make decisions about the daily care and control of a child, which are granted under custody orders. Custody orders generally refer to orders that place children in the custody of the state or territory, or department responsible for child protection or non-government agency. These orders usually involve the child protection department being responsible for the daily care and requirements of a child, while his or her parent retains legal guardianship. Custody alone does not bestow any responsibility regarding the long-term welfare of the child.

- Finalised third party parental responsibility orders – transfer all duties, powers, responsibilities and authority parents are entitled to by law, to a nominated person(s) considered appropriate by the court. The nominated person may be an individual such as a relative or an officer of a state or territory department. Third party parental responsibility may be ordered when a parent is unable to care for a child. ‘Permanent care orders’ are an example of a third party parental responsibility order and involve the transfer of guardianship to a third party carer. It can also be applied to the achievement of a stable arrangement under a long-term guardianship order to 18 years without guardianship being transferred to a third party. These orders are only applicable in some jurisdictions.
- Finalised supervisory orders – give the department responsible for child protection some responsibility for a child’s welfare. Under these orders, the department supervises and/or directs the level and type of care that is to be provided to the child. Children under supervisory orders are generally under the responsibility of their parents and the guardianship or custody of the child is unaffected. Finalised supervisory orders are therefore less interventionist than finalised guardianship orders but require the child’s parent or guardian to meet specified conditions, such as medical care of the child.
- Interim and temporary orders – generally cover the provision of a limited period of supervision and/or placement of a child. Parental responsibility under these orders may reside with the parents or with the department responsible for child protection. Orders that are not finalised (such as an application to a court for a care and protection order) are also included in this category, unless another finalised order is in place.
- Administrative arrangements – agreements with child protection departments that have the same effect as a court order in transferring custody or guardianship. These arrangements can also allow a child to be placed in out-of-home care without going through court.

Children are counted only once, even if they are on more than one care and protection order.

Child	A person aged 0–17 years (including, at times, unborn children).
Child at risk	A child for whom no abuse or neglect can be substantiated but where there are grounds to suspect the possibility of prior or future abuse or neglect, and for whom continued departmental involvement is warranted.
Child concern reports	Reports to departments responsible for child protection regarding concerns about a child, where there is no indication that a child may have been, or is at risk of being, harmed through abuse or neglect.
Children in out-of-home care during the year	The total number of children who were in at least one out-of-home care placement at any time during the year. A child who is in more than one placement is counted only once.
Child protection services	Functions of government that receive and assess allegations of child abuse and neglect, and/or harm to children and young people, provide and refer clients to family support and other relevant services, and intervene to protect children.
Dealt with by other means	A notification that is responded to by means other than an investigation, such as the provision of advice or referral to services. This category can also include notifications where the decision to investigate has not been reached (that is, notifications ‘in process’).

Exited out-of-home care	Where a child leaves a government-funded placement for more than 60 days. This does not necessarily mean that a child has returned to the care of his or her family.
Family based care	Home-based care (see 'Out-of-home care').
Family group homes	Family group homes are care settings that provide care to children in a departmentally or community sector agency provided home. These homes have live-in, non-salaried carers who are reimbursed and/or subsidised for the provision of care.
Family support services	<p>Activities associated with the provision of lower level (that is, non-intensive) services to families in need, including identification and assessment of family needs, provision of support and diversionary services, some counselling and active linking and referrals to support networks. These types of services are funded by government but can be delivered by a child protection agency or a non-government organisation.</p> <p>These services are typically delivered via voluntary arrangements (as distinct from court orders) between the relevant agency and family. This suite of services does not typically involve planned follow-up by the applicable child protection agency after initial service referral or delivery.</p>
Foster care	Care of a child who is living apart from his or her natural or adoptive parents in a private household, by one or more adults who act as 'foster parents' and are paid a regular allowance by a government authority or non-government organisation for the child's support. The authorised department or non-government organisation provides continuing supervision or support while the child remains in the care of foster parents. Foster parents are chosen from a list of people registered, licensed or approved as foster parents by an authorised department or non-government organisation.
Foster parent	Any person (or such a person's spouse) who is being paid a foster allowance by a government or non-government organisation for the care of a child (excluding children in family group homes).
Guardian	Any person who has the legal and ongoing care and responsibility for the protection of a child.
Intensive family support services	<p>Specialist services that aim to prevent the imminent separation of children from their primary caregivers as a result of child protection concerns and to reunify families where separation has already occurred. These services:</p> <ul style="list-style-type: none"> • are funded or established explicitly to prevent the separation of or to reunify families • provide a range of services as part of an integrated strategy focusing on improving family functioning and skills, rather than providing a single type of service • are intensive in nature, averaging at least four hours of service provision per week for a specified short term period (usually less than six months) <p>Families are generally referred to these services by the statutory child protection agency and will have been identified through the child protection process. Intensive family support services may use some or all of the following strategies: assessment and case planning; parent education and skill development; individual and family counselling; drug and alcohol counselling and domestic and family violence support; anger management; respite and emergency care; practical and financial support; mediation, brokerage and referral services; and training in problem solving.</p>
Investigation	An investigation is the process whereby the relevant department obtains more detailed information about a child who is the subject of a notification and makes an assessment about the risk of abuse or neglect to the child, and his or her protective needs. Not all notifications are investigated in all jurisdictions. For example, if a determination is made that a child and family are better served by family support services rather than a child protection response, children and families might be referred to diversionary and support services. Once it has been decided that an investigation is required,

	<p>the investigation process is similar across jurisdictions.</p> <p>The department responsible for child protection may obtain further information about the child and his or her family by checking information systems for any previous history, undertaking discussions with agencies and individuals, interviewing/sighting the child and/or interviewing the caregivers/parents. At a minimum, the child is sighted whenever practicable, and the child's circumstances and needs are assessed. Where possible, an investigation determines whether a notification is substantiated or not substantiated.</p>
Investigation finalised	Where an investigation is completed and an outcome of 'substantiated' or 'not substantiated' is recorded by 31 August.
Investigation in process	Where an investigation is commenced but an outcome is not recorded by 31 August.
Investigation closed – no outcome possible	Where an investigation is commenced but is not able to be finalised in order to reach the outcome of 'substantiated' or 'not substantiated'. These files would be closed for administrative purposes. This may happen in instances where the family has relocated.
Length of time in continuous out-of-home care	The length of time a child is in out-of-home care on a continuous basis. Any break of 60 days or more is considered to break the continuity of the placement. Where a child returns home for less than 60 days and then returns to the former placement or to a different placement, this does not affect the length of time in care. Holidays or authorised absences (less than 60 days) in a placement do not break the continuity of placement. A break in a placement does not necessarily mean a child has returned to the care of his or her family.
Non-respite care	Out-of-home care for children for child protection reasons (see definition of respite care below).
Notification	<p>Notifications are reports lodged by members of the community with the appropriate statutory child protection department to signify that they have reason to believe that a child is in need of protection. Depending on the circumstances, not all reports received by child protection departments will be recorded as notifications. Most jurisdictions assess incoming reports to determine whether they meet the threshold for recording a notification. Where, for example, a determination is made that the alleged behaviour does not meet the definition of a child in need of protection, a child concern report or equivalent might be recorded instead. If the alleged behaviour does not meet the threshold for recording a notification or a child concern report, the person reporting the matter might be provided with general advice and/or a referral.</p> <p>Jurisdictions count notifications at different points in the response to a report, ranging from the point of initial contact with the source of the report to the end of a screening and decision making process. This means the number of notifications is not strictly comparable across jurisdictions. Notifications are subsequently investigated based on the policies and practices in each jurisdiction.</p> <p>Notification and investigation data are collected early in the child protection process and often before an agency has full knowledge of a child's circumstances. This lack of information and the inherent difficulties in identifying Indigenous status mean that data on the number of notifications and investigations by Indigenous status should be interpreted with care.</p>
Other relative	A grandparent, aunt, uncle or cousin, whether the relationship is half, full, step or through adoption, and can be traced through or to a person whose parents were not married to each other at the time of the child's birth. This category includes members of Aboriginal communities who are accepted by that community as being related to the child.
Out-of-home care	Overnight care, including placement with relatives (other than parents) where the government makes a financial payment. Includes care of children in legal and voluntary placements (that is, children on and not on a legal order) but excludes placements solely funded by disability services,

	psychiatric services, youth justice facilities and overnight child care services.
Relatives/kin	People who are family or close friends, or are members of a child or young person's community (in accordance with their culture) who are reimbursed (or who have been offered but declined reimbursement) by the State/Territory for the care of a child. For Aboriginal and Torres Strait Islander children, a kinship carer may be another Aboriginal and Torres Strait Islander person who is a member of their community, a compatible community or from the same language group.
Respite care	Respite care is a form of out-of-home care used to provide short-term accommodation for children where the intention is for the child to return to their prior place of residence. Respite placements include: <i>respite from birth family</i> , where a child is placed in out-of-home care on a temporary basis for reasons other than child protection (for example, the child's parents are ill or unable to care for them on a temporary basis; or as a family support mechanism to prevent entry into full time care, as part of the reunification process, as a shared care arrangement); <i>respite from placement</i> , where a child spends regular, short and agreed periods of time with another carer other than their primary carer.
Stability of placement	<p>Number of placements for children who exited out-of-home care and did not return within 60 days. Placements exclude respite or temporary placements lasting less than 7 days. Placements are counted separately where there is:</p> <ul style="list-style-type: none"> • a change in the placement type — for example, from a home-based to a facility-based placement • within placement type, a change in venue or a change from one home-based placement to a different home-based placement. <p>Each placement should only be counted once. A return to a previous placement is not included as a different placement. A return home is not counted as a placement, although if a child returns home for 60 days or more they are considered to have exited care.</p>
Substantiation	<p>A substantiation is the outcome of an investigated notification which has resulted in the conclusion that there is reasonable cause to believe a child has been, is being or is likely to be abused, neglected or otherwise harmed. It does not necessarily require sufficient evidence for a successful prosecution and does not imply that treatment or case management is, or is to be, provided. However, if an investigation results in a substantiation, intervention by child protection services might be needed to protect the child. This intervention can take a number of forms, including one or more of: referral to other services; supervision and support; an application to court; and a placement in out-of-home care.</p> <p>The legal definitions of abuse and neglect are similar across jurisdictions. However, while the legal definitions for substantiating notifications are similar across jurisdictions, there remain some differences in practice, including different thresholds for recording a substantiation (that is, some jurisdictions substantiate harm or risk of harm to a child, and others substantiate actions by parents or incidents that cause harm). These differences impact on the comparability of these data.</p>

16A Child protection services — attachment

Definitions for the indicators and descriptors in this attachment are in section 16.5 of the chapter. Unsourced information was obtained from the Australian, State and Territory governments.

Data in this Report are examined by the Child Protection and Youth Justice Working Group, but have not been formally audited by the Secretariat.

Data reported in the attachment tables are the most accurate available at the time of data collection. Historical data may have been updated since the last edition of the Report on Government Services.

This file is available in Adobe PDF format on the Review web page (www.pc.gov.au/rogs/2017).

- (a) Time series financial data are adjusted to 2015-16 dollars using the General Government Final Consumption Expenditure (GGFCE) chain price deflator (2015-16 = 100). See chapter 2 for details.
- (b) Population data used to derive rates are revised to the ABS' final 2011 Census rebased estimates.
- (c) Refer to table 16A.4 for information on the comparability of expenditure data.
- (d) Numbers may not sum due to rounding.
- (e) Expenditure on family support services was introduced in the 2013 Report.
- (f) For child protection services, prior to 2009-10, expenditure per child related to children aged 0-16 years in the residential population. From 2009-10 onwards, expenditure per child relates to children aged 0-17 years in the residential population.
- (g) NSW: The movement in expenditure for intensive family support services between 2011-12 and 2012-13 is mainly due to the movement and reclassification of previously identified early intervention services (Brighter Futures) to statutory child protection activities (Strengthening Families) and overhead re-allocations due to the change in mix across all the programs. In addition, NSW data for 2014-15 includes payments to children and young people on Guardianship Orders. NSW data from 2015-16 onwards excludes payments for children and young people on Guardianship Orders.

Table 16A.1 State and Territory Government real recurrent expenditure on child protection, out-of-home care, intensive family support and family support services (2015-16 dollars) (a), (b), (c), (d), (e), (f), (g), (h), (i), (j), (k), (l), (m), (n)

	<i>Unit</i>	<i>2006-07</i>	<i>2007-08</i>	<i>2008-09</i>	<i>2009-10</i>	<i>2010-11</i>	<i>2011-12</i>	<i>2012-13</i>	<i>2013-14</i>	<i>2014-15</i>	<i>2015-16</i>
(h)	Victoria: The reduction in out-of-home care salary expenses in 2010-11 is due to the conversion of internally delivered residential care services in the North West Metropolitan region to externally managed services. Child protection services, IFSS, FSS and OOHC data from 2012-13 onwards are not comparable to data for earlier years as the methodology used for attributing internal costs changed following a major restructure of the department in 2012-13. Data for 2013-14 have been restated to include Long Service Leave under 'salary expenses' rather than 'other non salary expenses'.										
(i)	Queensland: Expenditure from 2004-05 onwards reflects full absorption costing on an accrual accounting basis.										
(j)	WA: Due to a new method of expenditure reporting, expenditure data for 2011-12 are not comparable to expenditure data for previous years. Child protection services, IFSS and FSS data for 2012-13 and 2013-14 are not comparable to data for earlier years as in 2013-14, some services previously considered to be IFSS were re-allocated to child protection services and FSS to be consistent with unit counting rules. 2012-13 data have been revised to be consistent with 2013-14.										
(k)	SA: Expenditure data were recast from 2008-09 due to the inclusion of expenditure previously incorrectly omitted. The significant increase in out-of-home care expenditure in 2009-10 was the result of growth in the alternative care system. Family Support Services data were not available for 2011-12 and 2012-13 so the totals for SA and Australia are understated. The 2013-14 and 2014-15 expenditure data were re-cast as a result of an internal review being conducted for 2015-16 expenditure data, which resulted in the realignment of costs allocation in accordance with the counting rules. To ensure consistency when comparing prior years, the methodology has been applied to the 2013-14 and 2014-15 years. Data prior to 2013-14 were calculated using a different methodology and therefore data from 2013-14 onwards are not comparable to previous years.										
(l)	Tasmania: In Tasmania in 2014-15 the calculation methodology for allocation of umbrella costs was altered and the total departmental overhead allocated to Children and Youth Services has reduced following significant internal restructuring of the Department. This has led to a decrease in the reported umbrella costs. In 2012-13, the allocation of Targeted Youth Support Services (TYSS) was included as being relevant to the IFSS program. However following recent discussions the inclusion of TYSS in future reporting is under review. Payroll tax was ceased in October 2012.										
(m)	ACT: Data for the ACT are not comparable with previous years due to the integration of Child Protection and Youth Justice to a single case management system in July 2015 and the subsequent changes to expenditure reporting for 2015-16.										
(n)	NT: In years prior to 2013-14, a grant program with Catholic Care NT was reported in the IFSS category. In 2013-14 the agreement was modified to be more general so has been relocated in reporting to the FSS category. All NGO funded programs include an element of intensive support with families, however this is on a voluntary basis. The decrease in child protection expenditure and increases in OOHC and family support expenditure relate to a methodology change in how the agency measures its associated costs to each category. Predominantly, the changes relate to the separation of case work between child protection activities and OOHC case management. In the past case workers have been allocated to child protection. There was also an element of child protection expenditure which was reallocated to family and parent support through the methodology review.

Table 16A.2 State and Territory Government real recurrent expenditure on child protection services, per notification, per investigation and per substantiation (2015-16 dollars) (a), (b), (c), (d), (e), (f), (g)

	<i>Unit</i>	<i>2006-07</i>	<i>2007-08</i>	<i>2008-09</i>	<i>2009-10</i>	<i>2010-11</i>	<i>2011-12</i>	<i>2012-13</i>	<i>2013-14</i>	<i>2014-15</i>	<i>2015-16</i>
ACT	\$	16 343.82	14 659.58	14 260.77	16 726.10	17 463.27	14 648.49	17 366.93	26 993.50	23 863.48	23 914.93
NT	\$	17 637.56	18 337.41	20 915.95	17 418.05	20 545.48	25 760.23	49 700.69	22 337.19	18 220.19	17 537.83

- (a) Time series financial data are adjusted to 2015-16 dollars using the General Government Final Consumption Expenditure (GGFCE) chain price deflator (2015-16 = 100). See chapter 2 for details.
- (b) These data need to be interpreted with care. These data are based on total expenditure on child protection activities, they do not represent and cannot be interpreted as unit costs for notifications, investigations or substantiations. These data cannot be added together to determine the overall cost of child protection services.
- (c) Refer to table 16A.4 for information on the comparability of expenditure data.
- (d) Refer to tables 16A.1 and 16A.6 for detailed footnotes.
- (e) Qld: In Queensland, any reports that do not require a statutory investigation are considered to be a child concern report and not a notification. This reporting practice is different to other jurisdictions, where concerns that do not require an investigation may be recorded as a notification. The costs associated with child concern reports for Queensland are included in expenditure data for child protection activities.
- (f) ACT: Data for the ACT are not comparable with previous years due to the integration of Child Protection and Youth Justice to a single case management system in July 2015 and the subsequent changes to expenditure reporting for 2015-16.
- (g) These data do not necessarily provide an accurate reflection of the costs involved in providing various child protection services. Preliminary data based on a top-down application of activity-based costing are presented in tables 16A.36-37. These data will be subject to further refinement and development in future reports.

- (a) Time series financial data are adjusted to 2015-16 dollars using the General Government Final Consumption Expenditure (GGFCE) chain price deflator (2015-16 = 100). See chapter 2 for details.
- (b) Refer to table 16A.4 for information on the comparability of expenditure data.
- (c) Numbers may not sum due to rounding.
- (d) Non-residential out-of-home care services includes family group homes, except for Victoria.
- (e) These data need to be interpreted with care because they do not represent and cannot be interpreted as unit cost measures. Expenditure per child in care at 30 June overstates the cost per child because significantly more children are in care during a year than at a point in time. In addition, these data do not reflect the length of time that a child spends in care.
- (f) Data relating to annual real expenditure per child in out-of-home care should be interpreted with caution due to the effect of different proportions of children in residential out-of-home care across jurisdictions.
- (g) NSW: NSW data for 2014-15 includes payments to children and young people on Guardianship Orders. NSW data from 2015-16 onwards excludes payments for children and young people on Guardianship Orders.
- (h) Vic: OOHC data for 2012-13 and 2013-14 are not comparable to data for earlier years as following a major restructure of the department in 2012-13, the methodology used for attributing internal costs changed.
- (i) Qld: From 2014-15 Queensland supplied unit record (child-level) files extracted from the Integrated Client Management System according to nationally determined definitions and technical specifications. Data for this measure are not comparable to previous years and will not match Queensland figures published elsewhere.
- (j) ACT: Data for the ACT are not comparable with previous years due to the integration of Child Protection and Youth Justice to a single case management system in July 2015 and the subsequent changes to expenditure reporting for 2015-16.

(a) Disproportionality ratios for Aboriginal and Torres Strait Islander children are calculated by dividing the proportion of children in the child protection system who are Aboriginal and Torres Strait Islander children by the proportion of children in the target population who are Aboriginal and Torres Strait Islander children. This is a different calculation to rates and rate ratios published elsewhere. Data for the calculation of disproportionality ratios were sourced from 16A.9, 16A.18; 16A.30 and 16A.34. See these tables for detailed footnotes.

(b) Disproportionality ratios are comparable (subject to caveats) within jurisdictions over time, but are not comparable across jurisdictions.

(c) Data on the number of notifications and investigations by Indigenous status should be interpreted with care. These data are collected very early in the child protection process and often before the agency has full knowledge of the child's family circumstances. As a result of this lack of full knowledge and the other inherent difficulties in identifying Indigenous status, these data are not considered reliable.

na Not available.

- (a) Prior to 2009-10, children of unknown Indigenous status were reported in the non-Indigenous status category. For 2009-10 onwards, a separate unknown Indigenous status category is reported.
- (b) If a child is the subject of more than one notification, investigation or substantiation, each of these is counted.
- (c) Investigations relate to notifications received during the financial year. If the investigation was completed by 31 August it is classified as finalised. If the investigation was not completed by 31 August it is classified as not finalised.
- (d) The definition of an investigation includes interviewing or sighting the child where practicable.
- (e) 'Investigation closed – no outcome possible' includes cases where an outcome of substantiated or not substantiated could not be reached, but where the file may be closed for administrative reasons.
- (f) 'Dealt with by other means' includes notifications that were responded to by means other than an investigation, such as referral to family services or provision of advice.
- (g) NSW: Data for NSW relating to 'Notifications investigated', 'Notifications resolved without investigations' and 'Notifications dealt with by other means' from 2011-12 onwards are not comparable to previous years. The counting rules changed for 2011-12 data to better account for recent practice changes. NSW figures are not comparable with those of other jurisdictions. NSW has a differential investigation response whereby an investigation can be undertaken over two stages (stage 1 - information gathering; stage 2 - assessment). NSW data for 2014-15 onwards may not be fully comparable to previous years' data. NSW Safe Home For Life (SHFL) legislative reforms enable eligible children/young people to be in the independent care of their guardian from 29 October 2014.

Table 16A.6 **Child protection notifications, investigations and substantiations by Indigenous status (a), (b), (c), (d), (e), (f), (g), (h), (i), (j), (k), (l), (m), (n)**

	<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>
(h)	Victoria: If a case is open following the first notification, no further notifications concerning the child are recorded. During 2006-07, Victoria introduced a major new data system, which was progressively rolled out across the State. In parallel, the Children, Youth and Families Act 2005 which commenced in April 2007, introduced new service pathways and processes in Victorian Child Protection and Family Services to support earlier intervention and prevention for vulnerable children and their families. Due to these new service and data reporting arrangements, Victorian child protection data from 2006-07 onwards may not be fully comparable with data from previous years.								
(i)	Qld: The category 'investigation closed – no outcome possible' is considered to be a finalised investigation. For Queensland, this category includes investigations that were unable to be either commenced, or commenced but not able to be completed, despite all reasonable steps being undertaken by Child Safety Services to identify and/or locate the child and family. All notifications require a full investigation to ensure the safety and well-being of children. In 2015 Queensland commenced the introduction of a new strength-based framework for practice. This includes a focus on greater engagement with complex families during the investigation and assessment. 2006-07: Any new child protection concerns received by the department that relate to an open notification or investigation and assessment are recorded as an additional concern and linked to the open notification/investigation and assessment. Previously, any new child protection concerns received by the department were recorded as an additional notification. 2011-12: Additional staff focused on investigations and assessments were deployed across Queensland. This resulted in a decrease in the number of investigations not yet finalised, and an increase in the number of investigations with a finalised outcome of substantiated, unsubstantiated or no investigation and assessment outcome. 2014-15: From 2014-15, Queensland supplied unit record (child-level) files extracted from the Integrated Client Management System according to nationally determined definitions and technical specifications. As such, figures may not match Queensland figures published elsewhere. 2015-16: From January 2015, amendments to the <i>Child Protection Act</i> 1999 commenced, with the consolidation of mandatory reporting requirements and new provisions enabling referral of families to support services (such as Family and Child Connect services).								
(j)	WA: The definition of emotional abuse in Western Australia has been broadened to include children witnessing family and domestic violence from 2015-16.								
(k)	SA: During 2009-10, SA implemented new service and reporting arrangements. Therefore, data for 2009-10 are not fully comparable to previous years' data.								
(l)	Tasmania: A change was made to the business processes for recording notifications in February 2008. New contacts made about similar concerns during an open notification/investigation period, within 6 weeks of the first contact, were added to the notification as a 'case note'. Case notes are not included in the count of notifications and hence comparison between values from 2007-08 to 2008-09 should be made with caution. From February 2016, any notification to Child Protection Services Tasmania finalised under Section 17(2)(a) of the <i>Children, Young Persons and Their Families Act 1997</i> (ie. the notification was based on information or observations that were not sufficient to constitute reasonable grounds for the belief or suspicion contained in the notification) was classified as a child concern report for the purpose of national reporting and was not counted as a notification. As such, the number of notifications reported nationally for Tasmania for 2015-16 has decreased compared to previous years. Due to changes in the way in which notifications have been defined in Tasmania, information related to notifications reported nationally may differ from that published in state-based publications such as the Annual Report and Budget Papers. The proportions of notifications, finalised investigations and substantiations for children of unknown Indigenous status impacts the reliability of these data. As such, any comparisons of the Indigenous status breakdown between years should be made with caution.								
(m)	ACT: Includes in 'notifications' all intakes that meet the definition of a child concern report or a child protection report, as defined in the <i>Children and Young People Act 2008</i> .								

Table 16A.6 **Child protection notifications, investigations and substantiations by Indigenous status (a), (b), (c), (d), (e), (f), (g), (h), (i), (j), (k), (l), (m), (n)**

	<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>
--	-------------	------------	------------	------------	-----------	-----------	------------	------------	-----------

(n) NT: In 2015-16 the number of notifications involving children of unknown Indigenous status totals include one client for whom Indigenous status was not recorded (no client record). 2014-15: As a result of administrative changes, multiple open investigations concerning the same child are now consolidated into a single open investigation, with one resulting substantiation from each finalised investigation (either substantiated or not substantiated). Prior to 2014-15, each open investigation would result in a separate substantiation outcome. The decrease in the substantiation rate (table 16A.10) since 2014-15 can be partially attributed to this administrative change.

na Not available. .. Not applicable. – Nil or rounded to zero.

Had prior admissions to orders	1 069	1 047	2 288	199	456	283	140	81
Total children admitted	3 495	2 934	3 998	1 362	888	582	261	304
Children discharged from orders	1 967	2 510	2 346	422	286	296	153	260

Table 16A.7 Number of children admitted to and discharged from care and protection orders by Indigenous status (a), (b), (c), (d), (e), (f)

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>
(a)	Prior to 2009-10, the category 'non-Indigenous' included children whose Indigenous status was unknown or not stated. In 2009-10, a separate category 'children of unknown Indigenous' status was introduced.							
(b)	NSW: Data do not include children on finalised supervisory orders. NSW is working to improve the way it counts admissions to care and protection orders and does not currently strictly adhere to the national counting rules.							
(c)	Queensland: From 2014-15 Queensland supplied unit record (child-level) files extracted from the Integrated Client Management System according to nationally determined definitions and technical specifications. Data for this measure are not comparable to previous years and will not match Queensland figures published elsewhere.							
(d)	WA admissions and discharges data for 2013-14 onwards are not comparable to previous years due to a change in methodology in 2013-14.							
(e)	Tasmania: Data may not be comparable year to year due to issues with the recording of order status.							
(f)	NT: Due to a data misinterpretation, the figure provided for the number of children admitted to orders in 2006-07 is likely to be an underestimation of the true number and thus should be treated with caution.							
	na Not available. – Nil or rounded to zero.							

Source: State and Territory Governments (unpublished) for 2012-13 to 2015-16 data; AIHW (unpublished), derived from *Child protection Australia* data collection for data prior to 2012-13.

- (a) Prior to 2009-10, the category 'non-Indigenous' included children whose Indigenous status was unknown or not stated. In 2009-10, a separate category 'children of unknown Indigenous' status was introduced.
- (b) NSW: NSW data for 2014-15 onwards may not be fully comparable to previous years' data. NSW Safe Home for Life (SHFL) legislative reforms enable eligible children/young people to be in the independent care of their guardian from 29 October 2014. NSW data do not include children on finalised supervisory orders.
- (c) Vic: Prior to 2013-14 Third party parental responsibility orders were included in finalised guardianship or custody orders and a small minority of Victoria's interim and temporary orders were reported.
- (d) Qld: From 2008, data for the category 'third party parental responsibility orders' are reported separately. Previously, these were counted as a subset of 'guardianship or custody orders'. From 2014-15, Queensland supplied unit record (child-level) files extracted from the Integrated Client Management System according to nationally determined definitions and technical specifications. As such, figures may not match Queensland figures published elsewhere.
- (e) WA: Children on care applications are included in the category 'interim and temporary orders'. Specifically, in WA, the application for a care and protection order to be issued for a child is counted as an interim order for national reporting purposes. However, no order is actually issued during this stage. It is thus not valid to compare the number of orders on a percentage basis. Implementation of the Children and Community Services Act 2004 in March 2006 required the legal status of children in care to be reviewed and Protection Orders were sought for a number of children already in care but not under care and protection orders, for 2006 onwards. In 2006-07, the number of children on orders included 24 children who were placed on Enduring Parental Responsibility orders.
- (f) NT: For reporting purposes it is not possible to accurately extract Third Party Parental Responsibility data due to data integrity and guardianship order mapping concerns.

na Not available. .. Not applicable. – Nil or rounded to zero.

Source: State and Territory Governments (unpublished) for 2012-13 to 2015-16 data; AIHW (unpublished), derived from *Child protection Australia* data collection for data prior to 2012-13.

Table 16A.9 Children in notifications, investigations and substantiations and on care and protection orders, per 1000 children in the target population, and by Indigenous status (a), (b), (c), (d), (e), (f), (g), (h), (i), (j), (k)

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
(a)	Data on the number of notifications by Indigenous status should be interpreted with care. These data are collected very early in the child protection process and often before the agency has full knowledge of the child's family circumstances. As a result of this lack of full knowledge and the other inherent difficulties in identifying Indigenous status, these data are not considered reliable.								
(b)	Prior to 2009-10, rates of children in notifications, investigations and substantiations were calculated as the number of children aged 0–16 years in each category (including children whose ages were not stated) divided by the estimated population of children aged 0–16 years at 31 December, multiplied by 1000. For Aboriginal and Torres Strait Islander children, the June projections for two years were averaged to obtain a population figure for December of the relevant year. For 2009-10 onwards, rates of children in notifications, investigations and substantiations are calculated as the number of children aged 0-17 years in each category (including children whose ages were not stated) divided by the estimated population of children aged 0-17 years at 31 December, multiplied by 1000.								
(c)	Rates of non-Indigenous children on care and protection orders were calculated as the number of children aged 0–17 years (including children whose ages were not stated) who were on a care and protection order as at 30 June, divided by the estimated population aged 0–17 at 31 March, multiplied by 1000. Rates of Aboriginal and Torres Strait Islander children on care and protection orders were calculated as the number of children aged 0–17 years (including children whose ages were not stated) who were on a care and protection order as at 30 June, divided by the estimated population aged 0-17 at 30 June using 'Series B', Experimental estimates and projections, Aboriginal and Torres Strait Islander Australians, 1991 to 2021 (Cat. No. 3238.0).								
(d)	Prior to 2009-10, children of unknown Indigenous status were reported in the non-Indigenous status category. For 2009-10 onwards, a separate unknown Indigenous status category is reported.								
(e)	Rates are not able to be calculated for children of unknown Indigenous status as corresponding population data are not available.								
(f)	NSW: See table 16A.6 for detailed footnotes.								
(g)	Qld: From 2014-15, Queensland supplied unit record (child-level) files extracted from the Integrated Client Management System according to nationally determined definitions and technical specifications. As such, figures may not match Queensland figures published elsewhere. From January 2015, amendments to the <i>Child Protection Act</i> 1999 commenced, with the consolidation of mandatory reporting requirements and new provisions enabling referral of families to support services (such as Family and Child Connect services).								
(h)	WA: The number of notifications increased between 2005-06 and 2006-07 as all Concern for Child Wellbeing reports are now classified as a notification. Previously, only those that were followed by an investigation were counted as a notification. Implementation of the <i>Children and Community Services Act</i> 2004 in March 2006 required the legal status of children in care to be reviewed and Protection Orders were sought for a number of children already in care but not under care and protection orders. Children on care applications are included in the category 'interim and temporary orders'.								
(i)	SA: Includes in 'notifications' only those reports which have met the criteria for a reasonable suspicion of child abuse or neglect.								

Table 16A.9 **Children in notifications, investigations and substantiations and on care and protection orders, per 1000 children in the target population, and by Indigenous status (a), (b), (c), (d), (e), (f), (g), (h), (i), (j), (k)**

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
(j) Tasmania: From February 2016, any notification to Child Protection Services Tasmania finalised under Section 17(2)(a) of the <i>Children, Young Persons and Their Families Act 1997</i> (ie. the notification was based on information or observations that were not sufficient to constitute reasonable grounds for the belief or suspicion contained in the notification) was classified as a child concern report for the purpose of national reporting and was not counted as a notification. As such, the number of notifications reported nationally for Tasmania for 2015-16 has decreased compared to previous years. Due to changes in the way in which notifications have been defined in Tasmania, information related to notifications reported nationally may differ from that published in state-based publications such as the Annual Report and Budget Papers. The proportions of notifications, finalised investigations and substantiations for children of unknown Indigenous status impacts the reliability of these data. As such, any comparisons of the Indigenous status breakdown between years should be made with caution.									
(k) ACT: Includes in 'notifications' all intakes that meet the definition of a child concern report or a child protection report, as defined in the <i>Children and Young People Act 2008</i> .									

na Not available. – Nil or rounded to zero.

Source: State and Territory Governments (unpublished) for 2012-13 to 2015-16 data; AIHW (unpublished), derived from *Child protection Australia* data collection for data prior to 2012-13.

(a) See notes to source tables for a description of how the data were defined and collected.

(b) Jurisdictions provide the denominator for this indicator (denominator is all children who were the subject of an investigation and a decision not to substantiate). From 2014-15 the AIHW derives the denominator from the CP NMDS for all jurisdictions except NSW. Previously, the denominator was derived by the AIHW for two jurisdictions in 2012-13 and all jurisdictions except NSW and Qld in 2013-14. Data in this Report may therefore differ from previous Reports.

(c) Proportions are calculated on the basis of all children who were the subject of an investigation and a decision not to substantiate in a given year.

Table 16A.11 Children who were the subject of a decision not to substantiate during the year and who were also the subject of a subsequent substantiation within 3 and/or 12 months (a), (b), (c), (d), (e), (f)

	<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>
(d)	NSW: NSW figures are not comparable with those of other jurisdictions. NSW has a differential investigation response whereby an investigation can be undertaken over two stages (stage 1 - information gathering; stage 2 - assessment).								
(e)	Qld: From 2014-15, Queensland supplied unit record (child-level) files extracted from the Integrated Client Management System according to nationally determined definitions and technical specifications. As such, data may not match Queensland figures published elsewhere.								
(f)	NT: Data from 2012-13 to 2014-15 were derived from the AIHW NMDS, which did not include investigations which relate to notifications received prior to 1 July 2012.								
<i>Source:</i>	State and Territory Governments (unpublished) for 2012-13 to 2015-16 data; AIHW (unpublished), derived from Child protection Australia data collection for data prior to 2012-13.

(a) Jurisdictions provide the denominator for this indicator (denominator is all children who were the subject of an investigation). From 2014-15 the AIHW derives the denominator from the CP NMDS for all jurisdictions except NSW. Previously, the denominator was derived by the AIHW for two jurisdictions in 2012-13 and all jurisdictions except NSW and Qld in 2013-14. Data in this Report may therefore differ from previous Reports.

(b) As a proportion of all children who were the subject of a substantiation.

(c) NSW: NSW data are not comparable with those of other jurisdictions. NSW has a differential investigation response whereby an investigation can be undertaken over two stages (stage 1 - information gathering; stage 2 - assessment).

Table 16A.13 **Proportion of children on guardianship/custody orders achieving the national reading and numeracy benchmarks, Year 5 level (per cent) (a), (b), (c), (d), (e), (f)**

<i>Reading</i>		<i>Numeracy</i>	
<i>Children on orders</i>	<i>All students</i>	<i>Children on orders</i>	<i>All students</i>

- (a) Australian national minimum standards for reading and numeracy have been developed as part of the National Assessment Program—Literacy and Numeracy (NAPLAN).
- (b) The availability of NAPLAN data for government and non-government school students varied across jurisdictions. Qld includes government and non-government schools. For 2013 data: NSW, Vic and ACT includes government, Catholic and Independent schools; WA and Tas includes government schools only; NT includes government and Christian schools. This should be considered when interpreting the results, along with other contextual factors.
- (c) For the national minimum standards (NMS) achievement rates, the denominator includes assessed students (those present or exempt from testing), and the numerator includes assessed students who achieved at or above the NMS (exempt students are deemed to be below the NMS).
- (d) Data include children in care at the time of NAPLAN testing. Children 'in care' are defined those aged 0–17 years whose care arrangements have been ordered through the Children's Court, where parental responsibility for the child or young person has been transferred to the Minister/Chief Executive. Please note that the titles of the relevant 'Children's Courts' may vary across states/territories.
- (e) Qld: Results for Queensland are for those children subject to a child protection order granting custody or guardianship to the Chief Executive for a minimum of two years at the time of the test.
- (f) Significant care should be taken when interpreting the results for the Tasmania, ACT and the NT as the number of children on guardianship/custody orders in these jurisdictions are small.

na Not available.

- (a) Caution should be used when interpreting results as jurisdictions count notifications at different points in response to a report, and have different policies and protocols governing the type of response to a notification.
- (b) NSW: Data were not available prior to 2011-12.
- (c) Qld: Queensland practice is that an investigation is not considered commenced until the child is sighted or, in the case of an unborn child, the pregnant woman is interviewed. Prior to sighting the child (or interviewing the pregnant woman) child safety officers begin actively working on the case through reviewing the child protection history of the child and family and determining who will be involved in the investigation process. This may include making contact with other agencies such as police, schools and hospitals. From 2014-15, Queensland supplied unit record (child-level) files extracted from the Integrated Client Management System according to nationally determined definitions and technical specifications. As such, figures may not match Queensland figures published elsewhere.
- (d) Tasmania: There are issues with the recording of the date commenced for the measure 'response times to commence investigations'. In the current system, the 'date investigation commenced' defaults to the date referred for investigation. This date is often not updated to reflect the actual date commenced which means the number of days to commence investigations is often understated. Data quality for 2015-16 has been improved using the date the investigation was allocated to a worker, when the commencement date preceded the allocation date, which means data for 2015-16 are not comparable to data for earlier years.

na Not available.

Source: State and Territory Governments (unpublished) for 2012-13 to 2015-16 data; AIHW (unpublished), derived from Child protection Australia data collection for data prior to 2012-13.

- (a) Caution should be used when interpreting results as jurisdictions count notifications at different points in response to a report, and have different policies and protocols governing the type of response to a notification.
- (b) NSW: Data were not available prior to 2011-12.
- (c) Qld: 2011-12: Additional staff focused on investigations and assessments were deployed across Queensland. This resulted in a decrease in the number of investigations not yet finalised, and an increase in the number of investigations with a finalised outcome of substantiated, unsubstantiated or no investigation and assessment outcome. 2014-15: From 2014-15, Queensland supplied unit record (child-level) files extracted from the Integrated Client Management System according to nationally determined definitions and technical specifications. As such, figures may not match Queensland figures published elsewhere. 2015-16: From January 2015, amendments to the *Child Protection Act* 1999 commenced, with the consolidation of mandatory reporting requirements and new provisions enabling referral of families to support services (such as Family and Child Connect services).
- (d) NT: Prior to 2013-14 data have included investigations closed as 'no possible outcome'. Data from 2013-14 are not comparable to prior years data. Data from 2013-14 onwards have been derived from AIHW Child Protection NMDS which does not include investigations which relate to a notification received prior to 1 July 2012.

na Not available.

Table 16A.16 Children with documented case plans, by Indigenous status, at 30 June (a), (b), (c), (d), (e), (f), (g), (h)

	<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
(a)	These data were collected for the first time for the 2011-12 reporting period. Data are experimental and subject to further review and refinement in future reports.									
(b)	Data are not comparable across jurisdictions as policies and legislation varies regarding timeframes within which children are required to have case plans prepared.									
(c)	NSW: NSW procedures state that a case plan is to be developed for a CYP within 30 days of the CYP entering care, therefore CYP who have been in care for less than 30 days are excluded from the base count.									
(d)	Qld: From 2014-15, Queensland supplied unit record (child-level) files extracted from the Integrated Client Management System according to nationally determined definitions and technical specifications. As such, data may not match Queensland figures published elsewhere.									
(e)	SA: South Australia has not reported a result for children with a case plan due to systems changes in the case management and data reporting system to support the casework practice model, Solution Based Casework.									
(f)	Tasmania: A child with a populated case plan has not been counted as having a 'documented case plan' if the case plan was not approved or if the review date was overdue.									
(g)	ACT: Data for 2013-14 are not comparable with ACT data for earlier years due to data entry issues during a period of change. Data for the ACT for 2015-16 are not comparable with previous years due to a continuing period of reform, including the integration of child protection and youth justice and a new service delivery model for out of home care.									
(h)	NT: data are not available due to recording issues.									
	na Not available. – Nil or rounded to zero.									

Source: State and Territory Governments (unpublished) for 2012-13 to 2015-16 data; AIHW (unpublished), derived from Child protection Australia data collection for data prior to 2012-13.

(a) Prior to 2009-10, children of unknown Indigenous status were reported in the non-Indigenous status category. For 2009-10 onwards, a separate unknown Indigenous status category is reported.

(b) The scope for out-of-home care was expanded in 2007-08 to include children in care where a financial payment was offered but was declined by the carer.

Table 16A.17 Children in out-of-home care: number and rate per 1000 children aged 0–17 years by Indigenous status (a), (b), (c), (d), (e), (f), (g), (h), (i), (j)

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
(c)	Rates for non-Indigenous children were calculated as the number of children aged 0–17 years (including those whose age was not stated) in out-of-home care at 30 June, divided by the estimated population aged 0–17 at 31 March, multiplied by 1000. Rates for Indigenous children were calculated as the number of children aged 0-17 years (including those whose age was not stated) in out-of-home care at 30 June, divided by the estimated population aged 0-17 at 30 June using 'Series B', Experimental estimates and projections, Aboriginal and Torres Strait Islander Australians, 1991 to 2021 (cat. no. 3238.0).								
(d)	Rates were calculated as the number of children aged 0–17 years (including those whose age was not stated) in at least one out of home care placement during the year, divided by the estimated population aged 0–17 at 31 December, multiplied by 1000. For Indigenous children, the June projections for two years were averaged to obtain a population figure for December of the relevant year. Rates could not be calculated for children of unknown Indigenous status as corresponding population data were not available.								
(e)	NSW: Payments are made to relative/kin carers as well as foster carers. Relative/kin carers may care for children who are not on an order. NSW data for 2014-15 onwards is not comparable to previous years' data. NSW Safe Home for Life (SHFL) legislative reforms effective 29 October 2014 transitioned eligible children/young people to the independent care of their guardian. These children/young people exited and are no longer counted in out-of-home care.								
(f)	Victoria: The foster care category includes children on permanent care orders where carers are in receipt of foster care payment and children in individually tailored home-based arrangements.								
(g)	Qld: From 2014-15, Queensland supplied unit record (child-level) files extracted from the Integrated Client Management System according to nationally determined definitions and technical specifications. As such, data may not match Queensland figures published elsewhere. From 2015-16, results for all children aged 0-17 in at least one out-of-home care placement were derived by the AIHW based on the unit record (child-level) files supplied by Queensland. In previous years, results were derived from aggregate data sourced by Queensland. As a result, comparing results for Queensland prior to 2015-16 may not be valid.								
(h)	Tasmania: The scope for out-of-home care was expanded in 2007-08 to include children in care where a financial payment was offered but was declined by the carer. Tasmania is not able to adhere to this definition of out-of-home care, however, the number of carers declining a financial payment is likely to be low. Tasmanian data exclude children not under care and protection orders placed with relatives for whom a financial contribution is made under the Supported Extended Family or Relatives Allowance programs.								
(i)	ACT: Out-of-home care data includes some children 18 years and over whose carers receive a full carer payment. This is generally to facilitate completion of schooling without change to the placement.								
(j)	NT: Improvement in data quality in 2008-09 resulted in a more accurate count of children in out of home care. The number of children reported to be in out-of-home care in 2007-08 was likely to be undercounted.								

na Not available. – Nil or rounded to zero.

Source: State and Territory Governments (unpublished) for 2012-13 to 2015-16 data; AIHW (unpublished), derived from Child protection Australia data collection for data prior to 2012-13.

(a) Family group homes are included as part of residential care. However, in this table they have been disaggregated.

(b) The scope for out-of-home care was expanded in 2007-08 to include children in care where a financial payment was offered but was declined by the carer.

Table 16A.18 **Children in out-of-home care by Indigenous status and placement type, at 30 June (number) (a), (b), (c), (d), (e), (f), (g), (h), (i)**

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
(c)	Prior to 2009-10, children of unknown Indigenous status were reported in the non-Indigenous status category. For 2009-10 onwards, a separate unknown Indigenous status category is reported.								
(d)	NSW data for 2014-15 onwards is not comparable to previous years' data. NSW Safe Home for Life (SHFL) legislative reforms effective 29 October 2014 transitioned eligible children/young people to the independent care of their guardian. These children/young people exited and are no longer counted in out-of-home care.								
(e)	Qld: From 2014-15, Queensland supplied unit record (child-level) files extracted from the Integrated Client Management System according to nationally determined definitions and technical specifications. As such, data may not match Queensland figures published elsewhere.								
(f)	WA: WA reported children in family group homes separately to residential care for the first time in 2005. A small number of children are placed with externally managed foster carers who are also their relative and have been recorded in the foster care category in 2007. For 2014-15, Independent living and other supported placements are not reported as they have been re-classified as unfunded placements. From 2015-16 children placed in boarding schools have been excluded.								
(g)	Tasmania: The scope for out-of-home care was expanded in 2007-08 to include children in care where a financial payment was offered but was declined by the carer. Tasmania is not able to adhere to this definition of out-of-home care, however, the number of carers declining a financial payment is likely to be low. Tasmanian data exclude children not under care and protection orders placed with relatives for whom a financial contribution is made under the Supported Extended Family or Relatives Allowance programs. Children under third-party guardianship orders are counted under 'Other' living arrangements.								
(h)	ACT: Out-of-home care data includes some children 18 years and over whose carers receive a full carer payment. This is generally to facilitate completion of schooling without change to the placement. Children on third-party parental responsibility orders have been classified as other home-based care, of these 50 children were placed with relative/kin. Prior to 2015-16 'other home-based care' included only children on third party orders where the carer was originally a foster carer and all placements with kin were counted in the Relative/kinship count.								
(i)	NT: Data from 2013-14 onwards has been derived from the AIHW Child Protection National Minimum Data Set (CPNMDS) and is not comparable with data for 2012-13 and earlier years. Prior year data includes unfunded kinship care places in the count of relative/kinship care. In the NT's client information system, the majority of children in a relative/kinship placement are captured in the foster care placement type. In 2014-15 approximately 50 per cent of children in the 'foster care' category are placed in a relative/kinship household.								

na Not available. .. Not applicable. – Nil or rounded to zero.

Source State and Territory Governments (unpublished) for 2012-13 to 2015-16 data; AIHW (unpublished), derived from Child protection Australia data collection for data prior to 2012-13.

(a) 'On a care and protection order' includes children on guardianship or custody orders or arrangements; and those on interim or temporary orders. 'On another type of order' includes offence orders or other orders that are not care and protection orders.

(b) Prior to 2009-10, children of unknown Indigenous status were reported in the non-Indigenous status category. For 2009-10 onwards, a separate unknown Indigenous status category is reported.

Table 16A.19 Children in out-of-home care by Indigenous status and whether on a care and protection order, at 30 June (number) (a), (b), (c), (d), (e)

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>
(c)	NSW data for 2014-15 onwards is not comparable to previous years' data. NSW Safe Home for Life (SHFL) legislative reforms effective 29 October 2014 transitioned eligible children/young people to the independent care of their guardian. These children/young people exited and are no longer counted in out-of-home care.							
(d)	Qld: From 2014-15, Queensland supplied unit record (child-level) files extracted from the Integrated Client Management System according to nationally determined definitions and technical specifications. As such, data may not match Queensland figures published elsewhere.							
(e)	Tasmania: The scope for out-of-home care was expanded in 2007-08 to include children in care where a financial payment was offered but was declined by the carer. Tasmania is not able to adhere to this definition of out-of-home care, however, the number of carers declining a financial payment is likely to be low. Tasmanian data exclude children not under care and protection orders placed with relatives for whom a financial contribution is made under the Supported Extended Family or Relatives Allowance programs.							

na Not available. ... Not applicable. – Nil or rounded to zero.

Source: State and Territory Governments (unpublished) for 2012-13 to 2015-16 data; AIHW (unpublished), derived from Child Protection Australia data collection for data prior to 2012-13.

- (a) This indicates the length of time a child has been in out-of-home placement on a continuous basis at 30 June. Any break of 60 days or more is considered to break the continuity of the placement, however holidays or authorised absences of less than 60 days in a placement do not break the continuity of placement. If a child returns home for less than 60 days and then returns to to the former placement or to a different placement, this does not affect the length of time in care.
- (b) Prior to 2009-10, children of unknown Indigenous status were reported in the non-Indigenous status category. For 2009-10 onwards, a separate unknown Indigenous status category is reported.
- (c) NSW data for 2014-15 onwards is not comparable to previous years' data. NSW Safe Home for Life (SHFL) legislative reforms effective 29 October 2014 transitioned eligible children/young people to the independent care of their guardian. These children/young people exited and are no longer counted in out-of-home care.
- (e) Queensland: Prior to 2008, Queensland was not able to report on the length of time in continuous out-of-home care placement, instead reporting on the length of time in the current out-of-home care placement. From 2008 data refer to the length of time in continuous out-of-home care and is therefore not comparable with previous years. Only limited data were available for 2006-07 due to the transition to a new information management system. From 2014-15, Queensland supplied unit record (child-level) files extracted from the Integrated Client Management System according to nationally determined definitions and technical specifications. As such, data may not match Queensland figures published elsewhere.
- (f) Tasmania: The scope for out-of-home care was expanded in 2007-08 to include children in care where a financial payment was offered but was declined by the carer. Tasmania is not able to adhere to this definition of out-of-home care, however, the number of carers declining a financial payment is likely to be low. Tasmanian data exclude children not under care and protection orders placed with relatives for whom a financial contribution is made under the Supported Extended Family or Relatives Allowance programs. Tasmania was unable to distinguish between respite and non-respite care prior to 2010-11. Both types of placement are included if they satisfy the general definition of out-of-home care.
- (g) NT: Respite and non-respite care data for 2004-05 to 2007-08 are unable to be distinguished between reliably so both types of placement are included if they satisfy the definition of OOHC. A change in the counting algorithm for 2008-09 resulted in a more accurate distribution in the length of time in OOHC compared with 2007-08. In addition, improvement in data quality in 2008-09 resulted in a more accurate count of children in OOHC. The number of children in OOHC reported in 2007-08 was likely to be undercounted. Data from 2013-14 onwards have been derived from the AIHW Child Protection National Minimum Data Set (CP NMDS) and are not comparable with prior years data.

na Not available. – Nil or rounded to zero.

Source: State and Territory Governments (unpublished) for 2012-13 to 2015-16 data; AIHW (unpublished), derived from Child protection Australia data collection for data prior to 2012-13.

- (a) Prior to 2009-10, children of unknown Indigenous status were reported in the non-Indigenous status category. For 2009-10 onwards, a separate unknown Indigenous status category is reported.
- (b) Exits from out-of-home care are defined as occasions when children leave care and do not return within 60 days. Placement breaks which do not exceed 7 days are not counted as exits.
- (c) NSW data for 2014-15 onwards is not comparable to previous years' data. NSW Safe Home for Life (SHFL) legislative reforms effective 29 October 2014 transitioned eligible children/young people to the independent care of their guardian. These children/young people exited and are no longer counted in out-of-home care.
- (d) Qld: From 2014-15, Queensland supplied unit record (child-level) files extracted from the Integrated Client Management System according to nationally determined definitions and technical specifications. As such, data may not match Queensland figures published elsewhere.
- (e) ACT: Out-of-home care data includes some children 18 years and over whose carers receive a full carer payment. This is generally to facilitate completion of schooling without change to the placement.

na Not available. – Nil or rounded to zero.

Source: State and Territory Governments (unpublished) for 2012-13 to 2014-15 data; AIHW (unpublished), derived from Child protection Australia data collection for data prior to 2012-13.

- (a) The denominator for this indicator includes all placement types, including where the placement type is unknown. For the number of placements by placement type by Indigenous status see attachment table 16A.18.
- (b) Prior to 2009-10, children of unknown Indigenous status were reported in the non-Indigenous status category. For 2009-10 onwards, a separate unknown Indigenous status category is reported.
- (c) The scope for OOHC was expanded in 2007-08 to include children in care where a financial payment was offered but was declined by the carer.
- (d) NSW: Payments may be made to relative/kin carers where children are not on an order. NSW data for 2014-15 onwards is not comparable to previous years' data. NSW Safe Home for Life (SHFL) legislative reforms effective 29 October 2014 transitioned eligible children/young people to the independent care of their guardian. These children/young people exited and are no longer counted in out-of-home care.
- (e) Qld: From 2014-15, Queensland supplied unit record (child-level) files extracted from the Integrated Client Management System according to nationally determined definitions and technical specifications. As such, data may not match Queensland figures published elsewhere.

Table 16A.22 **Children in out-of-home care placed with relatives/kin by Indigenous status, 30 June (a), (b), (c), (d), (e), (f), (g), (h), (i)**

	<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
(f)	WA: A small number of children are placed with externally managed foster carers who are also their relative and have been recorded in the foster care category in 2007.									
(g)	Tasmania: The scope for out-of-home care was expanded in 2007-08 to include children in care where a financial payment was offered but was declined by the carer. Tasmania is not able to adhere to this definition of out-of-home care, however, the number of carers declining a financial payment is likely to be low. Tasmanian data exclude children not under care and protection orders placed with relatives for whom a financial contribution is made under the Supported Extended Family or Relatives Allowance programs.									
(h)	ACT: For 2015-16, data for the ACT includes the 50 children and young people on third party responsibility orders placed with relatives/kin as noted in Table 16A.18.									
(i)	NT: due to a stringent assessment process in the NT, kinship carers are registered as foster carers. Due to system limitations, data reported for the NT for this measure do not provide a realistic view of children placed with relatives/kin (refer to table 16A.23). Improvement in data quality in 2008-09 resulted in a more accurate count of children in out-of-home care. The number of children in out-of-home care reported in 2007-08 was likely to be undercounted. Due to realignment of placement types to ensure better data integrity, data for the financial year 2012-13 may not be comparable with data provided for previous financial years.									

na Not available. - Nil or rounded to zero.

Source State and Territory Governments (unpublished) for 2012-13 to 2015-16 data; AIHW (unpublished), derived from Child protection Australia data collection for data prior to 2012-13.

Table 16A.23 Aboriginal and Torres Strait Islander children in out-of-home care by relationship of caregiver, 30 June (a), (b), (c), (d), (e), (f), (g), (h), (i), (j)

	<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
(a)	From 2015, reference to the 'Aboriginal child placement principle' has been amended to the 'Aboriginal and Torres Strait Islander child placement principle' in accordance with the National Framework for Protecting Australia's Children third three-year action plan, 2015–18.									
(b)	The denominator for calculating the proportion of children excludes Indigenous children living independently and those whose living arrangements were unknown.									
(c)	The scope for out-of-home care was expanded in 2007-08 to include children in care where a financial payment was offered but was declined by the carer.									
(d)	Residential care includes family group homes.									
(e)	NSW data for 2014-15 onwards is not comparable to previous years' data. NSW Safe Home for Life (SHFL) legislative reforms effective 29 October 2014 transitioned eligible children/young people to the independent care of their guardian. These children/young people exited and are no longer counted in out-of-home care.									
(f)	Qld: There may be some children in the category residential care/independent living who had Indigenous caregivers in facility-based care. From 2014-15, Queensland supplied unit record (child-level) files extracted from the Integrated Client Management System according to nationally determined definitions and technical specifications. As such, data may not match Queensland figures published elsewhere.									
(g)	WA: A small number of children may be placed with externally managed foster carers who are also their relative and have been recorded in the foster care category.									
(h)	SA: During 2012-13, SA changed databases, which resulted in a data recording issue leading to an undercount of children placed in compliance with the Aboriginal Child Placement Principle. Due to these data issues, 2012-13 child protection data for this indicator for this indicator are likely to be incorrect and cannot be reliably compared with data for previous years.									
(i)	Tasmania: The proportion of caregivers of unknown Indigenous status impacts the reliability of these data.									
(j)	NT: Children placed with family members have been included in the 'Aboriginal and Torres Strait Islander relative/kin' category. Improvement in data quality in 2008-09 resulted in a more accurate count of children in OOH. The number of children in OOH reported in 2007-08 was likely to be under counted. Due to realignment of placement types to ensure better data integrity, data for 2012-13 may not be comparable with data for previous years. In 2013-14 and 2014-15 data for this indicator were provided by the NT in aggregate form. As such there are small differences in totals for this indicator when compared with other OOH tables.									

na Not available. – Nil or rounded to zero.

Source: State and Territory Governments (unpublished) for 2012-13 to 2015-16 data; AIHW (unpublished), derived from Child protection Australia data collection for data prior to 2012-13.

- (a) The denominator for this indicator includes all placement types, including where the placement type is unknown.
- (b) Prior to 2009-10, children of unknown Indigenous status were reported in the non-Indigenous status category. For 2009-10 onwards, a separate unknown Indigenous status category is reported.
- (c) NSW data for 2014-15 onwards is not comparable to previous years' data. NSW Safe Home for Life (SHFL) legislative reforms effective 29 October 2014 transitioned eligible children/young people to the independent care of their guardian. These children/young people exited and are no longer counted in out-of-home care.
- (d) Qld: From 2014-15, Queensland supplied unit record (child-level) files extracted from the Integrated Client Management System according to nationally determined definitions and technical specifications. As such, data may not match Queensland figures published elsewhere.

na Not available. – Nil or rounded to zero.

Source: State and Territory Governments (unpublished) for 2012-13 to 2015-16 data; AIHW (unpublished), derived from Child protection Australia data collection for data prior to 2012-13.

- (a) For number of different placements, only new placements in which the child had previously not been placed were counted as separate placements. Further, for the 2014-15 period onwards, the counting rules for this indicator were modified to clarify that all placements lasting less than seven days should be excluded from the count of number of placements.
- (b) This table includes all children exiting care who had been in care for 1 month or more and who had been on a care and protection order at some point in the six months prior to exiting care.
- (c) NSW data for 2014-15 onwards is not comparable to previous years' data. NSW Safe Home for Life (SHFL) legislative reforms effective 29 October 2014 transitioned eligible children/young people to the independent care of their guardian. These children/young people exited and are no longer counted in out-of-home care.
- (d) Qld: From 2014-15, Queensland supplied unit record (child-level) files extracted from the Integrated Client Management System according to nationally determined definitions and technical specifications. As such, data may not match Queensland figures published elsewhere.

Table 16A.25 Children on a care and protection order and exiting out-of-home care during the year by number of placements, by the length of time in out-of-home care (number) (a), (b), (c), (d), (e), (f)

--	------------	------------	------------	-----------	-----------	------------	------------	-----------	-------------

(e) WA: Data for 2010-11 to 2013-14 were not available as these data could not be extracted from the client system.

(f) Tasmania: Prior to September 2010, data for respite placements were unable to be identified and excluded from the count of placements. Results for 'proportion of children in 1-2 placements' for 2011-12 to 2013-14 should not be compared with prior years as respite placements were excluded from the count of placements during these two years. Exclusion of this placement type was not possible in previous years due to system limitations.

na Not available. – Nil or rounded to zero.

Table 16A.26 Children in out-of-home care by whether they were the subject of a child protection substantiation and the person believed responsible was living in the household providing out-of-home care (a), (b), (c), (d), (e), (f), (g)

	<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>
(a) NSW: Data for this indicator prior to 2010-11 are not available. For all years, the numerator provided for this measure (i.e., the number of children in care who were the subject of a substantiation and the person believed responsible was in the household providing out-of-home care (OOHC)) excludes children who are in government authorised and funded OOHC placements where the OOHC placement is facilitated by a non-government organisation (NGO) and children who were victims of allegations which were finalised after left OOHC. The denominator for this measure (i.e., all children aged 0-17 in at least one care placement during the year) encompasses all children in OOHC (including children in government authorised and funded OOHC placements where the OOHC placement is facilitated by an NGO). This affects the reported rate (i.e., a lower rate is derived than would be the case if the numerator and denominator aligned). Therefore, NSW data are narrower than the scope of the national counting rule and should not be compared with other jurisdictions' data. Further, NSW data comprises victims of sustained allegations of reportable conduct and does not include substantiations of harm that do not meet the threshold for reportable conduct. Therefore, NSW data are narrower than the scope of the national counting rule and should not be compared to other jurisdictions' data.									
(b) Victoria: Quality of care concerns can range from minor quality issues through to possible physical or sexual abuse. All reports are treated seriously at the outset of the process and the best interests of the child or young person are considered paramount. Substantiated abuse may involve physical, emotional or sexual abuse, neglect (including medical neglect). An allegation of abuse may not be substantiated if at any stage during the investigation process insufficient evidence is found to support the allegation. Substantiated quality of care concerns encompass completed investigations where quality of care concerns are substantiated and action is taken in response. Data up to and including 2011-12 are not comparable to data for 2012-13 and 2013-14 due to the recent implementation of a new quality of care database. Previously published data for 2012-13 have been revised and differ from those in the 2014 Report.									

Table 16A.26 Children in out-of-home care by whether they were the subject of a child protection substantiation and the person believed responsible was living in the household providing out-of-home care (a), (b), (c), (d), (e), (f), (g)

	<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>
(c) Queensland: Data are not comparable with other jurisdictions or across the time-series due to changes in policy and recording as follows; for 2006-07 only limited data were available due to the transition to a new information management system; for 2007-08 Queensland commenced reporting on Matter of Concern substantiations which refer to those children in the custody or guardianship of the Chief Executive and placed in accordance with Section 82(1) of the Child Protection Act 1999; for 2008-09 the Queensland denominator now counts the number of children aged 0-17 years who were in at least one out-of-home care placement during the year and who were also subject to a child protection order granting custody or guardianship to the Chief Executive. This reflects the group of children who could be subject to a Matter of Concern substantiation in accordance with Queensland legislation and policy; for 2011-12, prior to 2011-12 reporting, a system issue with the Integrated Client Management System was identified whereby some matter of concern substantiations recorded since 2009 were not being transferred for corporate reporting. Data for 2011-12 onward are therefore not comparable to previous years; for 2013-14 onward Queensland data are reported in accordance with the department's new policy 'Responding to concerns about the standards of care' introduced in July 2013 and are not directly comparable with previous years. Queensland's data comprise children subject to a harm report substantiation, which refer to children in the custody or guardianship of the chief executive and who are placed in out-of-home care. Figures include both harm and unacceptable risk of future harm, and relate to the reference period during which the harm was recorded, which is not necessarily when the harm actually occurred. Queensland also does not report on whether the person believed responsible was living in the household. This is as a carer or staff member of a care service may be held responsible for harm occurring if their actions or inactions resulted in a child being harmed (that is, failure to protect). Queensland figures are therefore broader than the scope of this measure. From 2015-16, results for all children aged 0-17 years in at least one out-of-home care placement were derived by the AIHW based on the unit record (child-level) files supplied by Queensland. In previous years, results were derived from aggregate data sourced by Queensland. As a result, comparing results for Queensland prior to 2015-16 may not be valid.									
(d) WA: Data do not include substantiations relating to relatives of foster carers or other children in the household.									
(e) SA: In 2014-15, South Australia did not report a result due to a change in the reporting database requiring further verification in matching addresses of children and alleged perpetrators.									
(f) Tasmania: Data are not able to separately identify whether the person responsible was living in the household or visiting.									
(g) NT: Data for this measure are not available as the NT data system does not specifically identify the relationship between the person believed responsible and the OOH household.

Proportion	%	6.0	na	3.7	1.9	na	2.1	2.0	1.9

(a) Data were introduced in the 2013 Report for the 2011-12 reporting period.

(b) NSW: In 2011-12, NSW data were not comparable to data supplied by other jurisdictions because NSW data encompassed a more inclusive set of substantiated issues, for example, children who absconded from out-of-home care (OOHC) placements and reported incidents of self harm. In addition, NSW has a significantly lower threshold for investigating notifications relating to children in care compared with children in the general population. Data for this measure for the period 2012-13 to 2014-15, were not available. NSW has made changes to its source system which, subject to quality assurance, will enable submission of data for 2016-17.

(c) Victoria: Data were not available for Victoria, as the Victorian Child Protection Service does not record the required data for children who are in OOHC.

Table 16A.27 Children in out-of-home care who were the subject of a substantiation of sexual abuse, physical abuse, emotional abuse or neglect (a), (b), (c), (d), (e), (f)

	<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>
(d) Queensland: Data are not comparable with other jurisdictions or across the time-series due to changes in policy and recording as follows; for 2006-07 only limited data were available due to the transition to a new information management system; for 2007-08 Queensland commenced reporting on Matter of Concern substantiations which refer to those children in the custody or guardianship of the Chief Executive and placed in accordance with Section 82(1) of the Child Protection Act 1999; for 2008-09 the Queensland denominator now counts the number of children aged 0-17 years who were in at least one out-of-home care placement during the year and who were also subject to a child protection order granting custody or guardianship to the Chief Executive. This reflects the group of children who could be subject to a Matter of Concern substantiation in accordance with Queensland legislation and policy; for 2011-12 prior to 2011-12 reporting, a system issue with the Integrated Client Management System was identified whereby some matter of concern substantiations recorded since 2009 were not being transferred for corporate reporting. Data for 2011-12 onward are therefore not comparable to previous years; for 2013-14 onward Queensland data are reported in accordance with the department's new policy 'Responding to concerns about the standards of care' introduced in July 2013 and are not directly comparable with previous years. Queensland's data comprise children subject to a harm report substantiation, which refer to children in the custody or guardianship of the chief executive and who are placed in out-of-home care. Figures include both harm and unacceptable risk of future harm, and relate to the reference period during which the harm was recorded, which is not necessarily when the harm actually occurred. A carer or staff member of a care service may be held responsible for harm occurring if their actions or inactions resulted in a child being harmed (that is, failure to protect). From 2015-16, results for all children aged 0-17 years in at least one out-of-home care placement were derived by the AIHW based on the unit record (child-level) files supplied by Queensland. In previous years, results were derived from aggregate data sourced by Queensland. As a result, comparing results for Queensland prior to 2015-16 may not be valid.									
(e) SA: The increase in numbers from 2013-14 to 2014-15 is due to a change in the reporting database which captures a broader range of children subject to a care concern.									
(f) NT: Data are not comparable with other jurisdictions or across the time series due to changes in legislation, policy and recording in the 2014-15 financial year. The 2014-15 data does not reflect substantiated abuse but substantiated 'harm' or 'risk of harm' related to incidents that occurred prior to a child's entry into care as well as incidents when a child is in care. On 1 January 2014 the Care and Protection of Children Act was amended to give the Department of Children and Families the power to investigate allegations that a child in out-of-home care was harmed or at risk of harm. Prior to this date the Department had no power to investigate these concerns. Aligned to the new legislation the threshold for recording concerns was changed and the new policy definition of 'harm' now includes "any safety or wellbeing concern about a child in care" and does not have exclusions relating to the alleged causes, perpetrators, location where the harm occurred or form of care the child is in. A new process for recording concerns for the safety and wellbeing of children in care was instigated at the same time as the changes in legislation and policy, this has resulted in greater consistency and accuracy in data. This alongside increased expectation for external providers to make reports to the Department, the introduction of a Charter of Rights for Children in Care, and formalisation of Standards of Care within the out of home care sector has resulted in an increase in the number of concerns reported and responded to.

(a) Time series financial data are adjusted to 2015-16 dollars using the General Government Final Consumption Expenditure (GGFCE) chain price deflator (2015-16 = 100). See Chapter 2 for details.

(b) Where jurisdictions could only provide total expenditure on out-of-home and not the total number of placement nights in out-of-home care, their total expenditure data are excluded from the national average.

(c) NSW: Data for 2014-15 'real recurrent expenditure on OOHC services' for 2014-15 includes payments to children and young people on Guardianship Orders. Data for 2014-15 'placement nights in out-of-home care' excludes data relating to children and young people on Guardianship Orders. NSW data for 2014-15 onwards for 'placement nights in out-of-home care' and 'real expenditure per placement night' are not comparable to data for previous years' data. NSW Safe Home for Life (SHFL) legislative reforms effective 29 October 2014 transitioned eligible children/young people to the independent care of their guardian. These children and young people exited and are no longer counted in out-of-home-care.

(d) Qld: From 2014-15, Queensland supplied unit record (child-level) files extracted from the Integrated Client Management System according to nationally determined definitions and technical specifications. As such, data may not match Queensland figures published elsewhere.

(e) WA: See notes to table 16A.1, whereby OOHC data have been revised since the 2014 Report.

(f) NT: See notes to table 16A.1, whereby OOHC data have been revised since the 2014 Report.

- (a) Time series financial data are adjusted to 2015-16 dollars using the General Government Final Consumption Expenditure (GGFCE) chain price deflator (2015-16 = 100). See Chapter 2 for details.
- (b) The service must average at least 4 hours of service provision per week for a specified short-term period (usually less than six months).
- (c) The Australian figure for total real expenditure represents the sum of figures for those jurisdictions able to provide data. The Australian figure for real expenditure per child represents the sum of expenditure for those jurisdictions able to provide data divided by the number of children aged 0–17 years commencing intensive family support services. In previous reports, data were divided by the sum of the residential population for the target group.
- (d) NSW: The movement in expenditure for intensive family support services between 2011-12 and 2012-13 is mainly due to the movement and reclassification of previously identified early intervention services (Brighter Futures) to statutory child protection activities (Strengthening Families) and overhead re-allocations due to the change in mix across all the programs.

Table 16A.29 **Intensive family support services: total real recurrent expenditure, number of children aged 0-17 years commencing and receiving intensive family support services and real recurrent expenditure per child (2015-16 dollars) (a), (b), (c), (d), (e), (f), (g), (h), (i)**

Unit	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
(e) Qld: Queensland provides a range of services and support that fall within the definition of intensive family support services (IFSS). Due to issues with data availability, the number of children reported in this measure reflects only one type of service, known in Queensland as the Family Intervention Services. This number does not reflect the full scope of services and support as reflected in the expenditure for IFSS (see 16A.1 for expenditure by service type). Action is being undertaken to widen the data collection to include other intensive family support services in the future.									
(f) WA: Due to a new method of expenditure reporting, expenditure data for 2011-12 are not comparable to expenditure data for previous years. IFSS data for 2012-13 and 2013-14 are not comparable to data for earlier years as in 2013-14, some services previously considered to be IFSS were re-allocated to child protection services and FSS to be consistent with unit counting rules. 2012-13 data have been revised to be consistent with 2013-14.									
(g) Tasmania: Intensive family support services activity data were not available for Tasmania for the period 2009-10 to 2011-12. Tasmanian data is compiled from aggregate data provided by Community Sector Organisations (CSOs). It should be noted that as data is not provided by all CSOs the reported amounts may understate the true number of clients receiving a service.									
(h) ACT: IFSS data were not available for 2009-10 due to a change in data systems during the counting period. The data system was undergoing subsequent refinements so 2010-11 data should be treated with caution.									
(i) NT: Financial data for children commencing IFSS were not separately available for 2013-14 and have been included in data for children commencing family support services. IFSS expenditure for 2015-16 were for scoping works conducted during 2015-16 for an IFSS program to commence in 2016-17.

- (a) The service must average at least 4 hours of service provision per week for a specified short-term period (usually less than six months).
- (b) NSW: Data for 2011-12 and 2012-13 include children and young people supported through the Strengthening Families program, which is within the statutory child protection spectrum. In 2013-14, limited data were available for some services.
- (c) Qld: Queensland provides a range of services and support that fall within the definition of intensive family support services (IFSS). Due to issues with data availability, the number of children reported in this measure reflects only one type of service, known in Queensland as the Family Intervention Services. This number does not reflect the full scope of services and support as reflected in the expenditure for IFSS (see 16A.1 for expenditure by service type). Action is being undertaken to widen the data collection to include other intensive family support services in the future.
- (d) WA: Data for 2013-14 include five children aged 18 years and over. Data for 2014-15 includes eight children aged 18 years.
- (e) Tasmania: Intensive family support services activity data were not available for Tasmania for the period 2009-10 to 2011-12. Services in Tasmania are provided under the title of Integrated Family Support Services. Tasmanian data is compiled from aggregate data provided by Community Sector Organisations (CSOs). It should be noted that as data is not provided by all CSOs the reported amounts may understate the true number of clients receiving a service. Tasmania is not able to disaggregate this data by living situation.
- (f) ACT: IFSS data were not available for 2009-10 due to a change in data systems during the counting period. The data system was undergoing subsequent refinements so 2010-11 data should be treated with caution.
- (g) In 2014-15 and 2015-16 the NT did not fund services that met the definition of Prevention or Reunification services.

na Not available. – Nil or rounded to zero.

Table 16A.35 **Developments in client satisfaction**

Aust Gov
<p>A national survey of the views of children in out-of-home care was undertaken in 2015 to enable reporting against a set of indicators under the National Standards for Out-of-Home Care. The first national report on this survey was released in March 2016 and included qualitative and quantitative information about children's experience of out-of-home care.</p>
NSW
<p>In 2014-15, FACS commenced the development of a Client Experience Action Plan, which aims to achieve excellence in client experience. A Service Charter that states common values and service commitments will be drafted for implementation to help support a client-centred culture in the delivery of services. In addition, development of a client experience and satisfaction survey measurement tool is also being considered. It is expected that conducting a client satisfaction survey will facilitate identification of both common and service specific factors that impact on client satisfaction and dissatisfaction. The survey will also support performance reporting against the Service Charter and client outcomes and performance frameworks.</p>
Vic
<p>Child Protection clients and families were surveyed in 2001 about their experience of child protection intervention. Findings identified areas for practice improvement and also a range of strengths in child protection practice, including that in the majority of cases, child protection intervention improved the safety and life circumstances of children and young people. A more comprehensive survey commenced in 2011 (the Child and Family Services Outcomes Survey, or CAFSOS). An independent survey of the parents and carers of children receiving child protection, out-of-home care and intensive family support services was completed in 2012. A national survey of young people who are clients of these services is scheduled for 2014. Both surveys will be repeated after a 2-year interval to measure change. Client feedback is also routinely sought by Community Services Organisations as part of meeting Victorian out-of-home care service registration standards.</p>
Qld
<p>In 2015, Queensland participated in the inaugural national survey on the views of children in out-of-home care to enable reporting against a set of national indicators under the National Standards for Out-of-Home Care. Data was collected for this survey as part of local case management processes. The in-scope population was children aged 8-17 years residing in out-of-home care (including foster care, relative/kinship care, family group homes, residential care and independent living), whose care arrangements had been ordered by the relevant Children's Court and where parental responsibility for the child had been transferred to the Minister or Chief Executive, and who had been on a relevant court order for three months or more. Results of the survey were released by the AIHW through the The Views of Children and Young People in Out-of-Home Care report. Results in this report were published at the national level only. Queensland has reviewed the survey findings and considered implications for policy, planning and practice. Queensland is exploring future use of survey activities as part of regular case management activities.</p>

Table 16A.35 **Developments in client satisfaction**

 WA

The Department for Child Protection and Family Support has a number of system feedback loops to measure and respond to client satisfaction, including the collection of feedback from children and families, avenues for decisions to be reviewed, mechanisms for formal complaints, standards monitoring and an ongoing evaluation and review cycle for specific policies and services. The Viewpoint system is an online, interactive program for children in the care of the CEO aged 4–17 years, which enables children to express their views, wishes and experiences and to contribute meaningfully to their care plan. The Department's corporate executive staff receive regular reports about the views of children collected through Viewpoint. The Advocate for Children in Care provides advocacy and complaint management services for children and young people in the care of the CEO. Formal complaints about Department services can also be made through the Complaints Management Unit. Requests from children and families to review Department decisions can be made through the Case Review Panel and the State Administration Tribunal. The Department's Standards Monitoring Unit reviews both Department and community sector organisation services against the Better Care Better Service standards. The Department's Information Research and Evaluation unit, and engaged external agencies, undertake a cycle of review and evaluation projects for key policies and services.

 SA

Client complaints, compliments and suggestions are reported to the Families SA client feedback system, 'RiskMan'. This information is assessed for appropriate follow up, and is reported to the Health and Community Services Complaints Commissioner on a quarterly basis, and the Families SA Executive Director. In addition, Create SA is contracted as the peak body representing the voices of all children in care. Children have the opportunity to provide evaluation feedback on training and programs they are involved in through formal surveys, and are encouraged to provide feedback on their experiences with Create SA through various media. Young people also complete an annual 'Report Card Survey' to provide feedback on their experiences in care and with Create SA. In 2013, the Guardians Office completed a report on the experiences of children who move placements in out-of-home care. The Guardian's Inquiry into the Impact and Experience of Moving While in Care sought children's views about the impact of changing their care placement and what would make it a better experience. The Inquiry also sought the views of people who most influence placement moves.

 Tas

The Children and Youth Services Practice Manual Project is systematically reviewing all operational procedural documentation with a view to ensuring robust, consistent evidence based practice. This will specifically include a review of:

- compliments and complaints processes with a view to strengthening the feedback loops for children and young people in the child protection system to express their views and relate experiences; and
- request for review of decisions.

All new procedures will contain quality indicators to assist with further review and evaluation.

The CREATE Foundation is funded to provide support to children and young people in out of home care. CREATE aims to ensure that young people in care or previously in care are connected to each other, CREATE and the community; are empowered to build self-confidence, self-esteem and the skills that will enable them to have a voice and be heard; and have a have a say in matters that impact on their care experience.

In addition, during 2015 Tasmania participated in the pilot national survey of children in out-of-home care, collecting data on the views of children in out-of-home care to enable reporting against a set of indicators within the National Standards for Out-of-Home Care.

Table 16A.35 **Developments in client satisfaction**

ACT
<p>The ACT has strengthened mechanisms to improve transparency and accountability in decision-making, and the provision of services to vulnerable and at risk children, young people and their families. These mechanisms include the establishment of a Decision Making Review Panel (the Panel) and a Complaints Unit in 2012. The Panel will review significant administrative decisions within the Office for Children, Youth and Family Support (OCYFS), Community Services Directorate. The Panel can review decisions made by staff of OCYFS, out-of-home care agencies or carers including: significant administrative decisions that have been reviewed by the line area and the senior delegate of OCYFS; decisions regarding matters of compensation or reimbursements; review of decisions directly referred to the Panel by the Director-General, the Deputy Director-General or the Executive Director, OCYFS; administrative decisions that have a significant or long term impact on the wellbeing of children and young people, carers or agencies; matters that might proceed to the ACT Civil and Administrative Tribunal for a review of an internal decision; and, matters where no decision has been reached and where it is established this delay has had a significant effect on the child or young person or their care environment. The aim of the Complaints Unit is to improve processes to record and respond to complaints and feedback, report complaints data to executive, analyse data and identify areas requiring improvement, ensure accessible information on complaints and feedback is available to service users, and provision of feedback to staff regarding individual and systemic issues.</p>
NT
<p>In 2014-15 the Department initiated projects designed to improve outcome performance measurement for children involved in child protection and out of home care services. The Department participated in the National Survey of Children in out of home care, improved its placement matching meeting process to include attendance of children when it was age appropriate, and continued to promote the Charter of Rights and the complaints system to all children in care.</p>
