# 15 Services for people with disability

## CONTENTS

15.1 Profile of disability services	15.1
15.2 Framework of performance indicators	15.7
15.3 Key performance indicator results	15.9
15.4 Definitions of key terms	15.34
15.5 References	15.39

### Attachment tables

Attachment tables are identified in references throughout this chapter by a '15A' prefix (for example, table 15A.1) and are available from the website at [www.pc.gov.au/rogs/2018](http://www.pc.gov.au/rogs/2018).

This chapter reports on the Australian, State and Territory governments' assistance provided to people with disability and their carers. Performance reporting currently focuses on assistance provided by governments through specialist disability services under the National Disability Agreement (NDA) (COAG 2012) as well as the broad social and economic outcomes of people with disability. Performance information on the National Disability Insurance Scheme (NDIS) will be developed for future reports.

Further information on the Report on Government Services including other reported service areas, the glossary and list of abbreviations is available at [www.pc.gov.au/rogs/2018](http://www.pc.gov.au/rogs/2018).

## 15.1 Profile of disability services

The disability service delivery environment is in a state of transition. The NDIS is being introduced progressively across Australia with full implementation expected by 1 July 2019 (except WA<sup>1</sup>) (table 15A.1). The NDIS will largely replace the existing system of disability

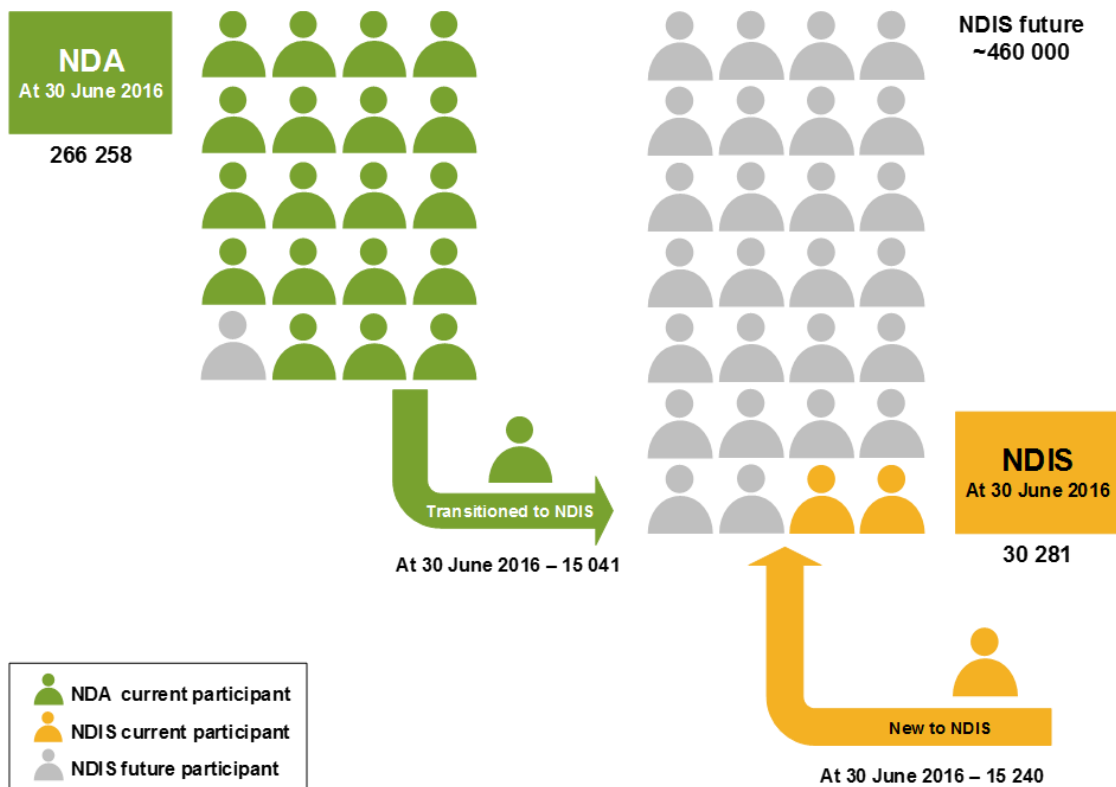

---

<sup>1</sup> Both the National Disability Insurance Agency (NDIA) and WA Government operated trials in WA from 1 July 2014 until 30 June 2017 (this chapter includes the WA Government operated NDIS trial sites in the NDA service user and expenditure data). The bilateral agreement between WA and the Commonwealth Governments signed in January 2017 agreed to the WA Government rolling out the NDIS across WA from 1 July 2017. On 12 December 2017, the WA and Commonwealth Governments announced they had reached an agreement to bring Western Australia into the nationally-delivered National Disability Insurance Scheme (NDIS). This agreement replaces the agreement signed in January 2017 by the previous Western Australian

care and support provided under the NDA. However, not all existing NDA service users will be eligible for the NDIS and not all specialist disability services will be rolled into the NDIS (in particular, open employment services). Governments have agreed that existing service users will not be disadvantaged during the transition under ‘continuity of support’ arrangements (NDIA 2016).

Nationally, most users of disability services are still receiving support under the NDA. In 2015-16<sup>2</sup>, 3519 people who used disability support services under the NDA were identified as transitioning to the NDIS. As at 30 June 2016, there were 15 041 NDIS participants who were previously State/Territory service users (that is, had transferred at some time from NDA services) (figure 15.1). A number of factors affect the comparability of these data (see table 15A.2).

Figure 15.1 NDA and NDIS transitions, as at 30 June 2016<sup>a, b, c, d</sup>

<sup>a</sup> Data are captured at a point in time (30 June 2016) unless otherwise stated. <sup>b</sup> See table 15A.2 for detailed definitions, footnotes and caveats. <sup>c</sup> Does not show numbers for those who leave NDA services but do not transition to the NDIS. <sup>d</sup> Data from the Disability Services National Minimum Data Set (DS NMDS) lag the NDIS data by one year and 30 June 2017 data were not available for the Report. Accordingly, NDIS data for 30 June 2016 are used for comparison purposes in this figure.

Source: Australian Institute of Health and Welfare (AIHW) (unpublished) DS NMDS; NDIA (published and unpublished), *Quarterly Report to COAG Disability Reform Council, 30 June 2016*; table 15A.2.

Government. Under the new agreement the NDIA will assume responsibility for rolling out the NDIS in WA from 1 July 2018 with full roll out by 2020.

<sup>2</sup> 2016-17 data were not available for this Report.

---

## Service overview

Currently assistance is provided by governments to people with disability and their carers through both specialist disability services provided under the NDA as well as the NDIS.

The NDA, effective from 1 January 2009 and revised in 2012, provides the national framework and key areas of reform for the provision of government support and services for people with disability. Specialist disability services funded and provided under the NDA include:

- accommodation support services, community support services, community access services, respite care services, employment services, advocacy, information and alternative forms of communication, and other support services. These services tend to be targeted at those who have profound or severe core activity limitations (see section 15.4 for definitions)
- Basic Community Care (BCC) services funded under the NDA<sup>3</sup> assist people with disability to live independently and to actively participate and engage in their community. BCC services include basic maintenance and support services such as allied health care, assessment, case management and client care coordination, centre based day care, counselling, support, information and advocacy, domestic assistance, home maintenance, nursing, personal and respite care, social support, meals, home modification, linen service, goods and equipment and transport.

The NDIS provides reasonable and necessary supports to people with a permanent and significant disability and who need assistance with everyday activities. The scheme is underpinned by an insurance model and each individual seeking access is assessed according to a common set of criteria. Individuals who are deemed eligible receive a package of funding to purchase the supports identified in their individualised plan. The NDIS was established under the *National Disability Insurance Scheme Act 2013*.

People with disability can also access mainstream services provided to the community as a whole. The *National Disability Strategy 2010–2020* guides public policy across governments and aims to bring about changes to all mainstream services and programs, as well as community infrastructure, to ensure they are accessible and responsive to the needs of people with disability. Some mainstream services give priority to people with disability (for example, social housing) or have programs to meet the special needs of people with disability (for example, school education). Data on the participation of people with disability in various government services can be found in other chapters of this Report (chapters 3, 4, 5, 14, 18, 19 and sector overview G).

---

<sup>3</sup> Except for WA, for which basic community care services continued to be delivered under HACC as a joint Australian and WA State governments' funded program. The Victorian Government assumed full funding and management responsibilities from 1 July 2016 through the HACC Program for Younger People.

---

## Roles and responsibilities

The Australian, State and Territory governments have different but complementary roles and responsibilities:

- State and Territory governments are responsible for the provision of specialist disability services provided under the NDA, except disability employment services. States and territories have full financial and operational responsibility for BCC services for people with disability aged under 65 years (and Aboriginal and Torres Strait Islander people aged under 50 years)<sup>4</sup>.
- The Australian Government is responsible for the oversight and funding of employment services for people with disability and the provision of income support. The Australian Government also funds State and Territory governments to contribute to the achievement of the NDA objectives and outcomes.
- All governments share responsibility for NDIS policy, funding and governance (NDIA 2016).

## Funding

In 2016-17, total government expenditure on specialist disability services provided under the NDA was \$7.8 billion — a real decrease of 9.7 per cent from 2015-16 (table 15A.3). Data are available by source of funding in table 15A.4 (proportions in table 15A.5), but due to differences in funding information provided across jurisdictions for 2015-16 (impacted in large part by the NDIS transition) meaningful comparisons cannot be made. Table 15A.6 provides data on total government expenditure including and excluding payroll tax.

Direct government expenditure on specialist disability services under the NDA (excluding expenditure on administration) was \$7.3 billion in 2016-17 (table 15A.7). The main areas of government expenditure were accommodation support services (51.1 per cent of total direct service expenditure) and community support (16.8 per cent of total direct service expenditure). Employment services were the main area of Australian Government expenditure (81.7 per cent) (table 15A.8).

Total committed support<sup>5</sup> to the NDIS for 2016-17 was \$3.2 billion (NDIA 2017).

---

<sup>4</sup> With the exception of WA. See footnote 3.

<sup>5</sup> Committed support is the amount allocated to specific plans – not all committed support in a plan is used by a participant. Utilisation of committed support is not yet known for 2016-17, but the NDIA has indicated it is tracking lower than 2015-16 when it was 76 per cent (NDIA 2017).

---

Outlays on income support payments and allowances to people with disability and their carers in 2016-17 (on an accrual basis) amounted to \$24.5 billion, comprising \$16.3 billion for the Disability Support Pension, \$5.1 billion for the Carer Payment, \$2.2 billion for the Carer Allowance, \$95.8 million for the Sickness Allowance, \$135.5 million for the Mobility Allowance, \$180.5 million for the Child Disability Assistance Payment and \$578.9 million for the Carer Supplement (Australian Government 2017).

## Size and scope of sector

The ABS estimates that 4.3 million Australians or 18.3 per cent of the population had a disability in 2015 (for those aged under 65 years, this was 2.5 million Australians or 12.5 per cent of this age group), and an estimated 5.8 per cent had a profound or severe core activity limitation (for those aged under 65 years this was 3.6 per cent) — these results are similar to 2012 and 2009 (ABS 2016, 2013, 2011a). Males and females are similarly affected by disability (for all ages, 18.0 per cent and 18.6 per cent respectively; for those aged under 65 years, 12.8 per cent and 12.4 per cent respectively), but this changes with age and severity of disability (ABS 2016).

Aboriginal and Torres Strait Islander people experience higher rates of disability than non-Indigenous people. In 2015, 7.3 per cent of all Aboriginal and Torres Strait Islander Australians had a profound or severe core activity limitation — around 1.5 times the proportion for non-Indigenous Australians (ABS 2016). Table 15A.9 contains additional information on disability prevalence.

## Use of NDA specialist disability services

In 2015-16<sup>6</sup>, 322 579 people were reported as using NDA disability services.

- 192 517 people reported as using specialist disability services administered by State and Territory governments under the NDA (excluding BCC service users [except in the NT] and those who received specialist psychiatric disability services only). Service use varied across service types with the largest number of users reported for community support (142 383 users)
- 145 493 people reported as using employment services administered by the Australian Government, of which nearly all were provided by non-government organisations (table 15A.10).

In 2015-16, the most commonly reported disability of NDA service users was a physical disability (32.9 per cent) followed by intellectual disability (29.0 per cent) (table 15A.12). Information on NDA service users by primary disability group is in table 15A.12 and by need for help in life area is in table 15A.13.

---

<sup>6</sup> These data differ to those reported in figure 15.1 as they are over the full financial year, rather than point in time as at 30 June 2016. 2016-17 data were not available for this Report.

---

An estimate of the population with the potential to require specialist disability services is referred to as the ‘potential population’ — the number of people aged 0–64 years who could most appropriately be supported by specialist disability services, require ongoing and/or long-term episodic support, have a permanent or chronic impairment and substantially reduced capacity in one or more core activities (see section 15.4 for further information). In 2015-16, 32.1 per cent of the estimated potential population were reported as using specialist disability services administered by State and Territory governments under the NDA (excludes service users in the ACT for whom data were not available) (table 15A.10). Data on users of NDA specialist disability services by sex and by age are in table 15A.14. Further information is available from the Disability Support Services report (AIHW 2017).

### Basic Community Care

For 2016-17, BCC data were available for all jurisdictions except Victoria and the NT (for the NT, BCC data are included in the counts of NDA specialist disability service users), with data on the number of service users per 1000 population receiving BCC services in table 15A.15, and data on the number of services received in table 15A.16. The quality of the BCC data reported varies across jurisdictions and comparisons should be made with caution.

### National Disability Insurance Scheme participants

Nationally, as at 30 June 2017, 89 610 NDIS participants had an approved plan (table 15A.2)<sup>7</sup>. People identifying as Aboriginal or Torres Strait Islander made up 5 per cent of participants (NDIA 2017). Additional information on NDIS participants’ access to mainstream services and satisfaction with the NDIS can be found in tables 15A.17–18.

### Income support and allowances

At June 2017, there were around 758 900 recipients of the Disability Support Pension, 263 900 recipients of the Carer Payment, 627 000 recipients of the Carer Allowance, 640 000 recipients of the Carer Supplement (paid to Carer Payment and Carer Allowance recipients), 158 600 recipients of the Child Disability Assistance Payment, 45 200 recipients of the Mobility Allowance and 6300 recipients of the Sickness Allowance (table 15A.19).

### Informal carers

Family and friends provide most of the help and/or care that people with disability receive. Information about informal carers enables governments to plan ahead for the future demand

---

<sup>7</sup> The 89 610 NDIS participants, as at 30 June 2017 with approved plans, includes only active participants. Inactive participants are those who have exited the Scheme. As at 30 June 2017, 1,028 participants with approved plans have exited the Scheme (NDIA 2017).

---

for services that support carers and the people they assist (see section 15.4 for different definitions of informal carers across collections).

In 2015, an estimated 855 900 informal primary carers (of which 621 600 were aged less than 65 years) provided the majority of assistance with self-care, mobility and communication for people with disability (ABS 2016). In 2015-16, of the 322 579 people with disability who accessed NDA specialist disability services, 41.2 per cent reported having an informal carer and 29.1 per cent reported having an informal carer who was a primary carer, with these proportions higher for people in very remote areas (59.3 per cent and 48.9 per cent respectively) (table 15A.20).

## 15.2 Framework of performance indicators

Box 15.1 describes the vision and objectives for the disability services system. The vision and objectives align with the NDA and the NDIS.

### Box 15.1 Objectives of government funded services for people with disability

Disability services aim to help people with disability and their carers have an enhanced quality of life, enjoy choice and wellbeing, achieve independence, social and economic participation, and full inclusion in the community.

For services funded under the NDA, governments aim to achieve this objective by providing access to disability services:

- that meet the individual needs of people with disability and their carers
- that provide skills and support to people with disability to enable them to live as independently as possible
- that meet a particular standard of quality
- on the basis of relative need
- that assist families and carers in their caring role.

Under the NDIS, governments aim to achieve this objective through the provision of an NDIS which:

- enables people with disability to exercise choice and control in the pursuit of their goals and the planning and delivery of their supports
- provides reasonable and necessary supports including early intervention supports
- promotes the provision of high quality and innovative supports.

Governments aim for services for people with disability to meet these objectives in an equitable and efficient manner.

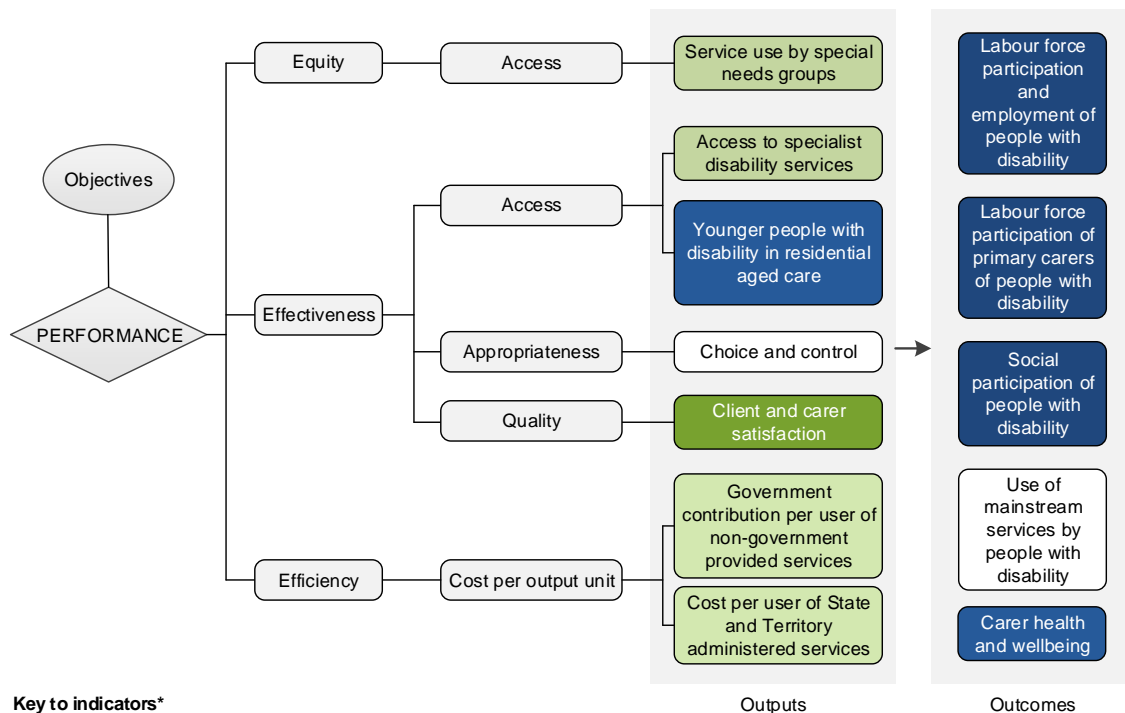

Performance reporting in this chapter focuses on services funded under the NDA. Performance reporting on the NDIS will be developed and progressively introduced into future editions of this Report.

The performance indicator framework provides information on equity, efficiency and effectiveness, and distinguishes the outputs and outcomes of services for people with disability (figure 15.2).

The performance indicator framework shows which data are complete and comparable in the 2018 Report. For data that are not considered directly comparable, text includes relevant caveats and supporting commentary. Chapter 1 discusses data comparability, data completeness and information on data quality from a Report wide perspective. In addition to section 15.1, the Report’s statistical context chapter (chapter 2) contains data that may assist in interpreting the performance indicators presented in this chapter. Chapters 1 and 2 are available from the website at [www.pc.gov.au/rogs/2018](http://www.pc.gov.au/rogs/2018).

Improvements to performance reporting for services for people with disability are ongoing and include identifying data sources to fill gaps in reporting for performance indicators and measures, and improving the comparability and completeness of data.

**Figure 15.2 Services for people with disability performance indicator framework**

**Key to indicators\***

- Text Most recent data for all measures are comparable and complete
- Text Most recent data for at least one measure are comparable and complete
- Text Most recent data for all measures are either not comparable and/or not complete
- Text No data reported and/or no measures yet developed

\* A description of the comparability and completeness of each measure is provided in indicator interpretation boxes within the chapter

---

## 15.3 Key performance indicator results

Different delivery contexts, locations and types of clients may affect the effectiveness and efficiency of services for people with disability.

### Outputs

Outputs are the services delivered (while outcomes are the impact of these services on the status of an individual or group) (see chapter 1). Output information is critical for equitable, efficient and effective management of government services.

### Equity

#### Access — Service use by special needs groups

‘Service use by special needs groups’ is an indicator of governments’ objective to provide disability services in an equitable manner (box 15.2).

#### Box 15.2 Service use by special needs groups

‘Service use by special needs groups’ is defined as the proportion of service users per 1000 potential population in a particular special needs group, compared with the proportion of service users per 1000 potential population outside that special needs group.

The potential population is an estimate of the number of people with the potential to require specialist disability services at some time. Further details on the potential population can be found in in section 15.4.

Data are reported for three special needs groups:

- People from outer regional and remote/very remote areas
- People identified as Aboriginal and Torres Strait Islander Australians
- People from culturally and linguistically diverse backgrounds (defined as people who were born in a non-English speaking country).

Data are reported for accommodation support, community support, community access and employment services. Data per 1000 population are also in tables 15A.23–32 and 15A.36–40.

While a lower proportion within the special needs group relative to outside the special needs group can indicate reduced access, it can also represent strong alternative informal support networks (and a consequent lower level of otherwise unmet need), or a lower tendency of people in a special needs group to choose to access NDA specialist disability services. Similarly, a higher proportion can suggest poor service targeting, the lack of alternative informal support networks or a greater tendency of people in a special needs group to choose to access NDA specialist disability services.

(continued next page)

---

**Box 15.2** (continued)

This indicator does not provide information on whether the services were appropriate for the needs of the people receiving them, or correctly targeted on the basis of relative need. The indicator does not take into account differences in the level of informal assistance that is available for people in special needs groups and outside the special needs groups.

Data reported for these measures are:

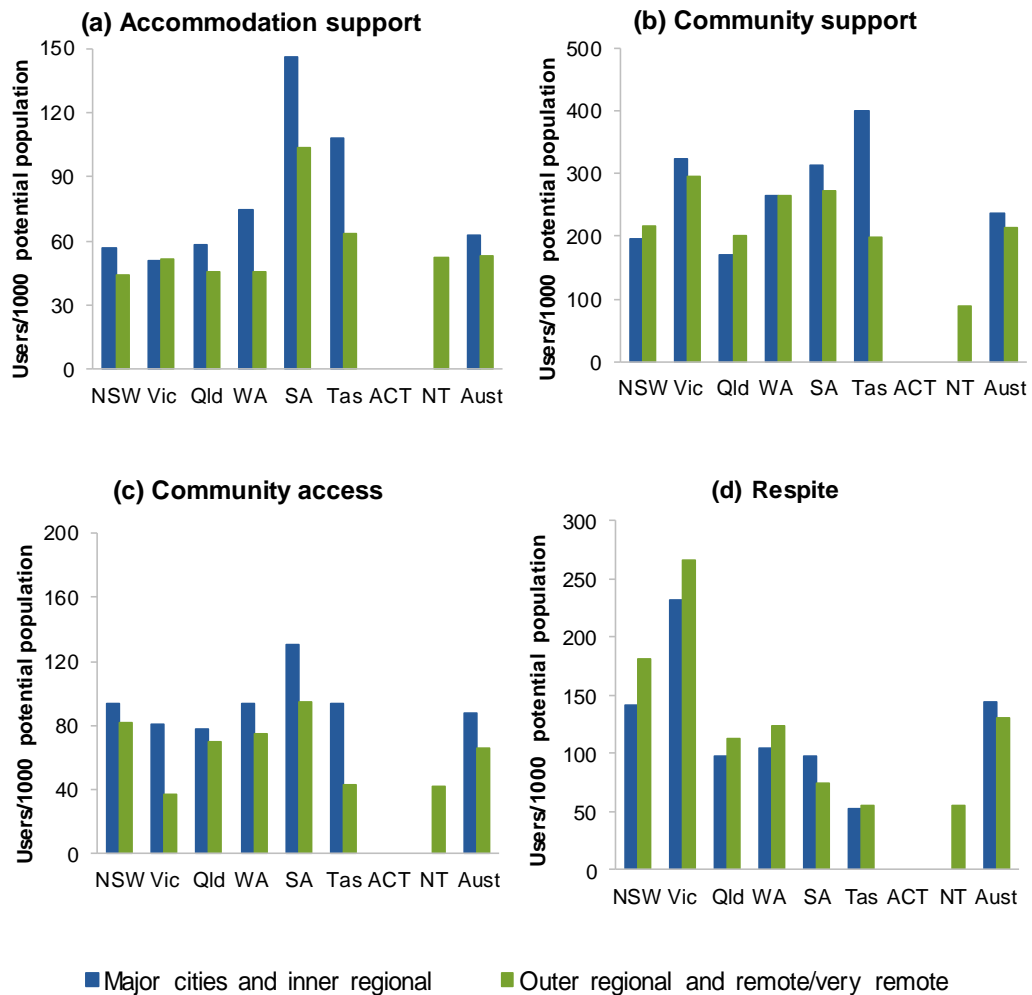

- comparable (subject to caveats) across jurisdictions and over time
- not complete (subject to caveats) for the current reporting period. Service use data were not available for the ACT for 2015-16 with the exception of employment services.

Data on service access by special needs groups for people supported through the NDIS are under development.

*Service use by special needs groups — people in outer regional and remote/very remote areas*

Nationally in 2015-16, the proportion of the potential population in outer regional and remote/very remote areas who used NDA services was lower than the proportion in major cities/inner regional population for accommodation support, community support, community access and respite services (figure 15.3).

Figure 15.3 Users of NDA specialist disability services, by geographic location, 2015-16<sup>a, b, c</sup>

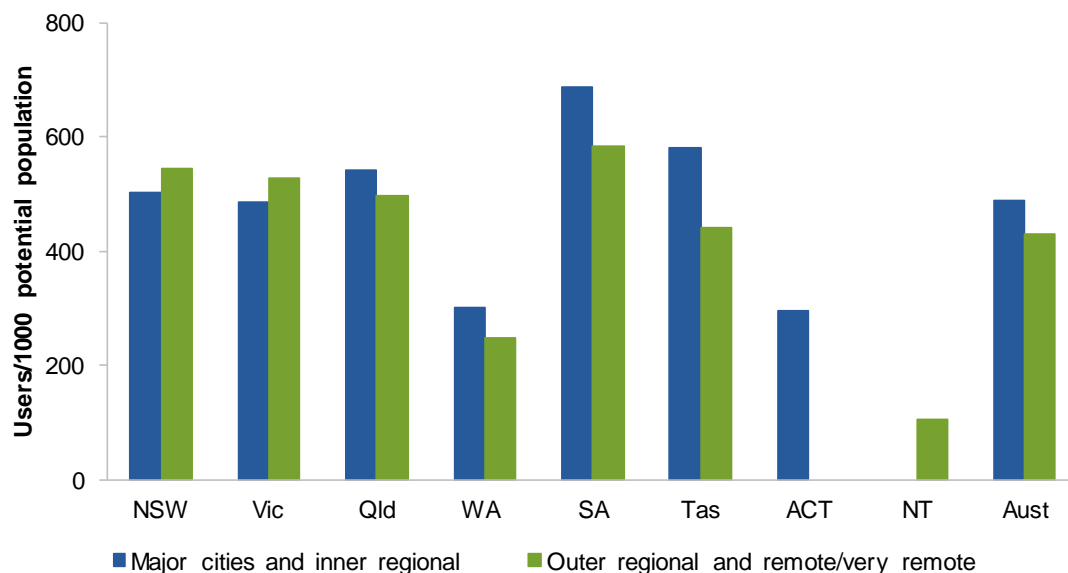

<sup>a</sup> See box 15.2 and tables 15A.23–26 for detailed definitions, footnotes and caveats <sup>b</sup> Tasmania does not have major cities. The ACT does not have outer regional or remote/very remote areas. The NT does not have major cities/ inner regional areas. <sup>c</sup> Data are not available for the ACT for 2015-16. Australian totals exclude ACT service users.

Source: AIHW (unpublished) DS NMDS; AIHW (unpublished), AIHW analysis of the ABS June ERP, ABS Census of Population and Housing and the ABS SDAC; tables 15A.23–26.

Nationally in 2015-16, the proportion of the potential population in outer regional and remote/very remote areas who used NDA employment services (429.1 service users per 1000 potential population) was lower than that for major cities and inner regional areas (488.4 service users per 1000 potential population) (figure 15.4).

Figure 15.4 **Users of NDA employment services, by geographic location, 2015-16<sup>a, b</sup>**

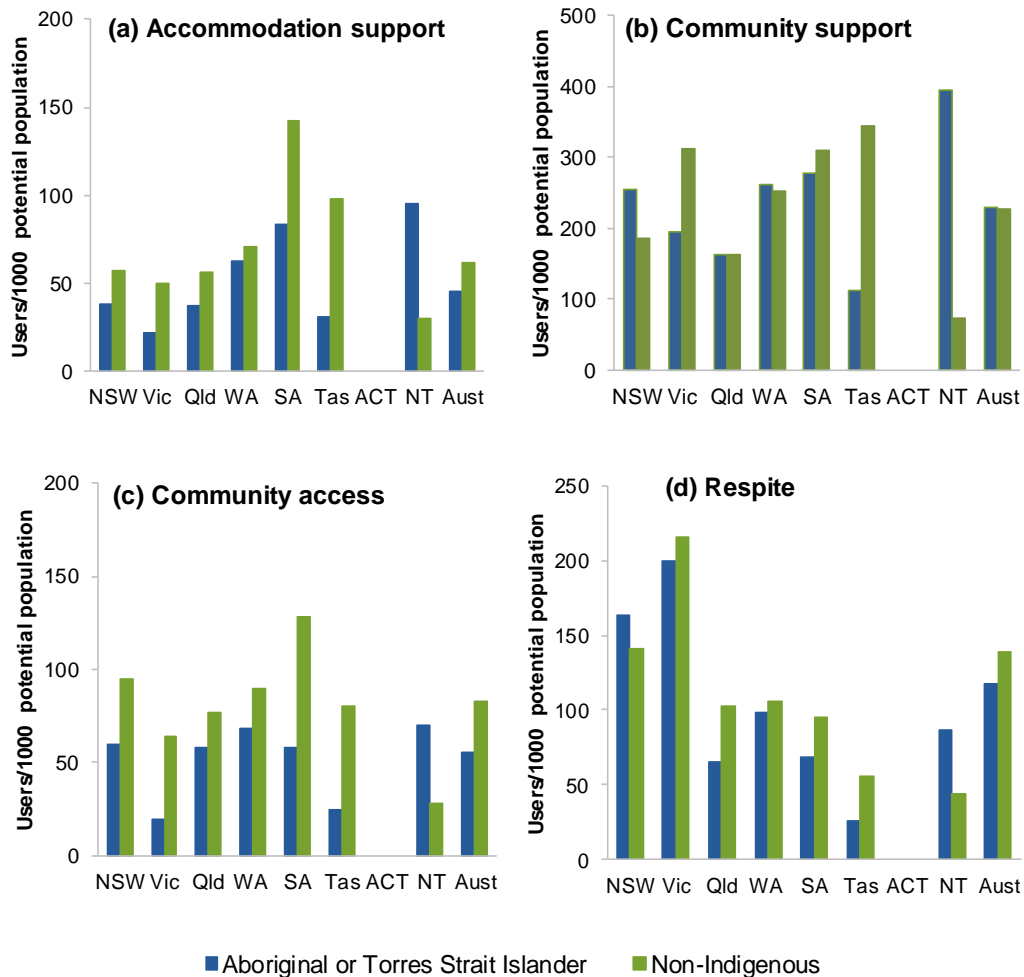

<sup>a</sup> See box 15.2 and table 15A.27 for detailed definitions, footnotes and caveats. <sup>b</sup> Tasmania does not have major cities. The ACT does not have outer regional and remote/very remote areas. The NT does not have major cities or inner regional areas.

### *Service use by special needs groups — Aboriginal and Torres Strait Islander people*

Nationally in 2015-16, the proportion of the potential population of Aboriginal and Torres Strait Islander Australians who used NDA services was lower than the proportion for non-Indigenous Australians for accommodation support, community access services and respite services, but similar for community support (figure 15.5).

Figure 15.5 Users of NDA specialist disability services, by Indigenous status, 2015-16<sup>a, b</sup>

<sup>a</sup> See box 15.2 and tables 15A.28–31 for detailed definitions, footnotes and caveats. <sup>b</sup> Data are not available for the ACT. Australian totals exclude ACT service users.

Source: AIHW (unpublished) DS NMDS; AIHW (unpublished), AIHW analysis of the ABS June ERP, ABS Census of Population and Housing and the ABS SDAC; tables 15A.28–31.

Nationally in 2015-16, the Aboriginal and Torres Strait Islander potential population who used NDA employment services (349.2 service users per 1000 potential population) was lower than that of the non-Indigenous potential population (488.3 service users per 1000 potential population) (figure 15.6).

Figure 15.6 **Users of NDA employment services, by Indigenous status, 2015-16<sup>a</sup>**

<sup>a</sup> See box 15.2 and table 15A.32 for detailed definitions, footnotes and caveats.

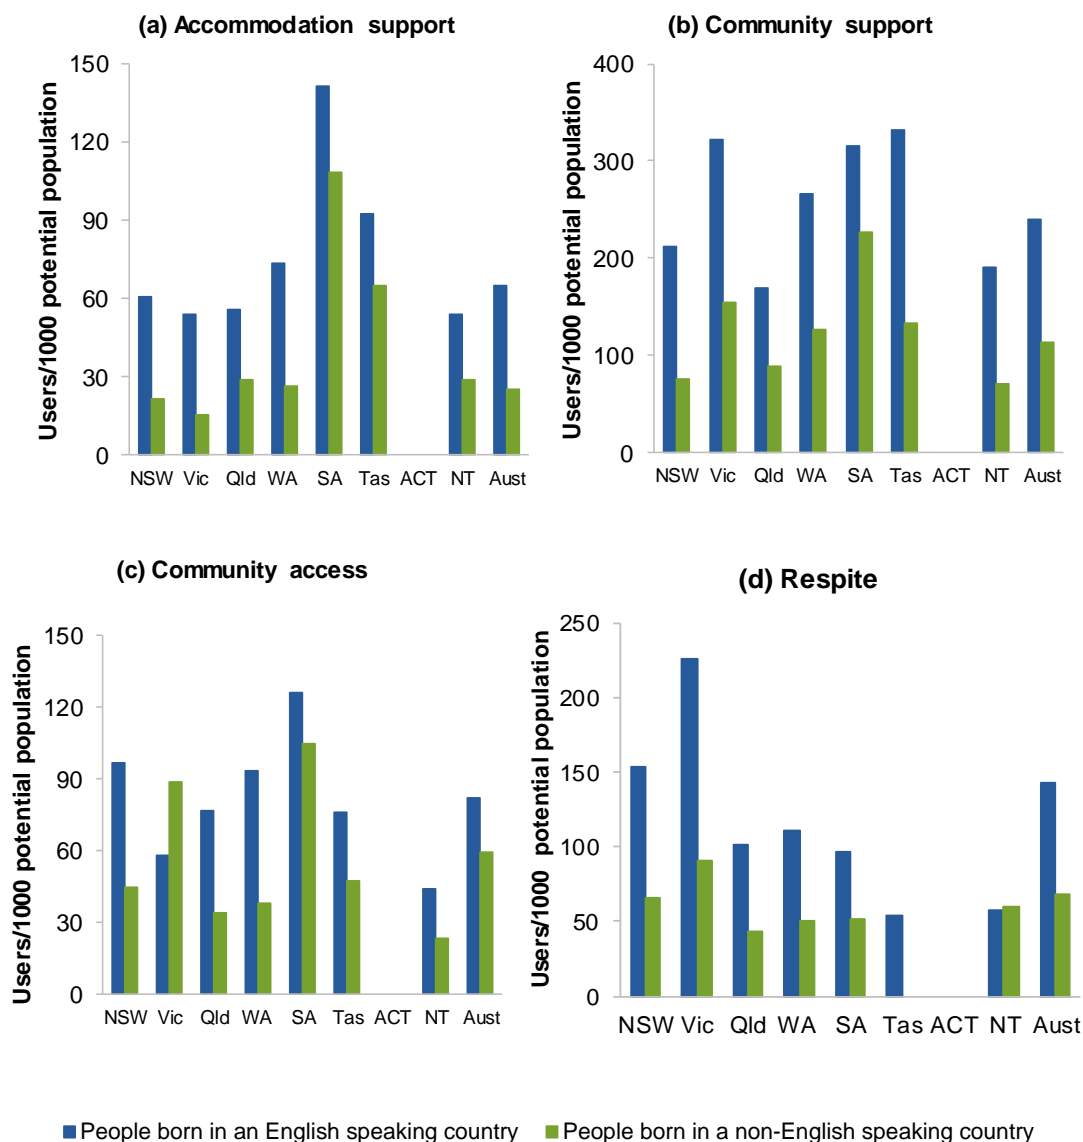

Source: AIHW (unpublished) DS NMDS; AIHW (unpublished), AIHW analysis of the ABS June ERP, ABS Census of Population and Housing and the ABS SDAC; table 15A.32.

Data for Aboriginal and Torres Strait Islander service users for 2008-09 to 2015-16 are available in table 15A.41 (specialist disability services) and by age group in tables 15A.33–35 (employment services).

#### *Service use by special needs groups — people born in a non-English speaking country*

Nationally in 2015-16, the proportion of the potential population born in a non-English speaking country who used NDA services was lower than that of the potential population born in an English speaking country, for all service types (figure 15.7).

Figure 15.7 Users of State and Territory administered NDA specialist disability services, by country of birth, 2015-16<sup>a, b, c</sup>

<sup>a</sup> See box 15.2 and tables 15A.36–39 for detailed definitions, footnotes and caveats. <sup>b</sup> Data are not available for the ACT for 2015-16. Australian totals exclude ACT service users. <sup>c</sup> There were no users of respite services in Tasmania in 2015-16 who were born in a non-English speaking country.

Source: AIHW (unpublished) DS NMDS 2014-15; AIHW (unpublished), AIHW analysis of the ABS June ERP, ABS Census of Population and Housing and the ABS SDAC; tables 15A.36–39.

Nationally in 2015-16, the proportion of the potential population of people born in a non-English speaking country who used NDA employment services (453.1 service users per 1000 potential population) was lower than that of the potential population of people born in an English speaking country (484.9 service users per 1000 potential population) (figure 15.8).

Figure 15.8 **Users of NDA employment services, by country of birth, 2015-16<sup>a</sup>**

<sup>a</sup> See box 15.2 and table 15A.40 for detailed definitions, footnotes and caveats.

Source: AIHW (unpublished) DS NMDS; AIHW (unpublished), AIHW analysis of the ABS June ERP, ABS Census of Population and Housing and the ABS SDAC; table 15A.40.

## Effectiveness

### Access — Access to specialist disability services

‘Access to NDA specialist disability services’ is an indicator of governments’ objective to provide access to disability services on the basis of relative need (box 15.3).

#### Box 15.3 **Access to specialist disability services**

‘Access to specialist disability services’ is defined as the number of people using a particular NDA specialist disability service divided by the potential population for that service (see section 15.4 for further information on the potential population). Data are reported for NDA accommodation support, community support, community access, respite services and employment services (open and supported).

A high or increasing proportion of the relevant estimated potential population using a particular service (the potential population can differ across service types – see section 15.4 for further details) suggests greater access to that service. However, not all people in the estimated potential population will need the service or seek to access the service in the relevant period.

Differences in access between service types may reflect differences in the intensity of a service (for example, it is expected that use of community support services (low intensity) will be higher than accommodation support services (high intensity)).

(continued next page)

**Box 15.3** (continued)

Information on the proportion of the potential population and the proportion of primary carers who report a need for more formal assistance are available in tables 15A.42–45. This indicator does not provide information on whether the services are appropriate for the needs of the people receiving them, or accessed by those most in need.

Data reported for this measure are:

- comparable (subject to caveats) across jurisdictions and over time
- not complete (subject to caveats) for the current reporting period. Service use data were not available for the ACT for 2015-16 with the exception of employment services.

Data on service access by people supported through the NDIS are under development.

Nationally in 2015-16, the proportion of the estimated potential population using NDA specialist disability services was highest for community support services (22.0 per cent) (figure 15.9) and respite services (13.9 per cent) (figure 15.10), followed by community access services (7.7 per cent) (table 15A.48) and accommodation support services (5.5 per cent) (table 15A.46).

**Figure 15.9 Users of NDA community support services as a proportion of the estimated potential population<sup>a, b</sup>**

<sup>a</sup> See box 15.3 and table 15A.47 for detailed definitions, footnotes and caveats. <sup>b</sup> Data are not available for the ACT for 2015-16. The Australian total for 2015-16 excludes ACT service users.

Source: AIHW (unpublished), DS NMDS, AIHW analysis of the ABS June ERP, ABS Census of Population and Housing and the ABS SDAC; table 15A.47.

Figure 15.10 Users of NDA respite services as a proportion of the estimated potential population<sup>a, b</sup>

<sup>a</sup> See box 15.3 and table 15A.49 for detailed definitions, footnotes and caveats. <sup>b</sup> Data are not available for the ACT for 2015-16. The Australian total for 2015-16 excludes ACT service users.

Source: AIHW (unpublished) DS NMDS, AIHW analysis of the ABS June ERP, ABS Census of Population and Housing and the ABS SDAC; table 15A.49.

Nationally in 2015-16, for people aged 15–64 years with disability with an employment restriction, 8.8 per cent were using NDA open employment services (Employment Support Services (ESS)) — an increase from 7.5 per cent in 2011-12 (figure 15.11).

Nationally in 2016-17, for people aged 15–64 years with disability with an employment restriction, 8.8 per cent were using NDA open employment services (Disability Management Services (DMS)) — similar to 8.4 per cent in 2012-13 (figure 15.12).

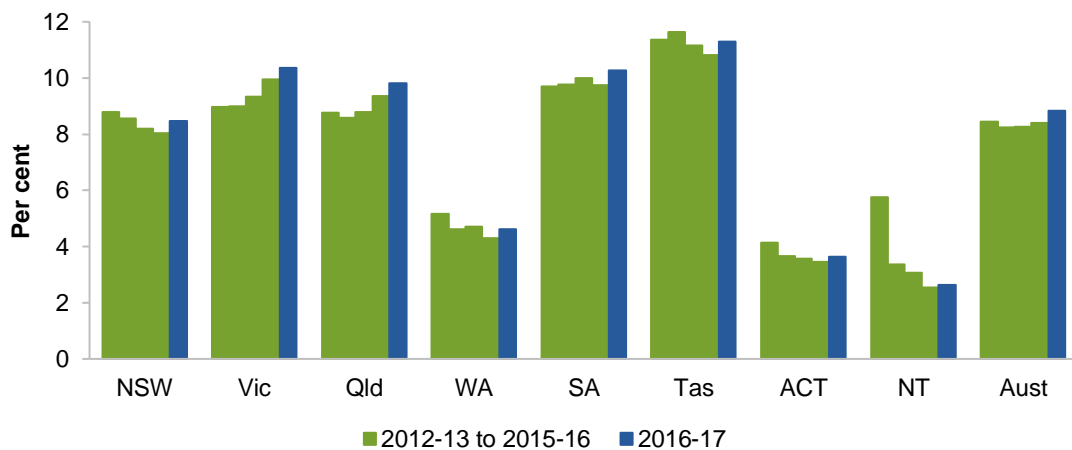

**Figure 15.11 Users of NDA open employment services (ESS) aged 15–64 years as a proportion of the estimated number of people with an employment restriction<sup>a</sup>**

Nationally in 2015-16, the number of people with disability who used NDA supported employment services as a proportion of the potential population (aged 15–64 years) was 6.4 per cent — a decrease from 7.7 per cent in 2011-12 (figure 15.13).

**Figure 15.13 Users of NDA supported employment services aged 15–64 years as a proportion of the total estimated potential population for supported employment services<sup>a</sup>**

## Access — Younger people with disability in residential aged care

‘Younger people with disability in residential aged care’ is an indicator of governments’ objective to provide access to disability services on the basis of relative need; and through the NDIS, to provide reasonable and necessary supports, including early intervention supports (box 15.4).

### Box 15.4 Younger people with disability in residential aged care

‘Younger people with disability in residential aged care’ is defined as the rate of non-Indigenous persons aged 0–64 years and Aboriginal and Torres Strait Islander persons aged 0–49 years admitted to permanent residential aged care per 10 000 potential population. Further details on the potential population can be found in in section 15.4.

These data should be interpreted with care, as some younger people choose to remain in residential aged care for a variety of reasons, such as:

- their physical and nursing needs can be best met in residential aged care

(continued next page)

---

**Box 15.4** (continued)

- they are satisfied with their current living situation (that is, it is their preferred facility)
- the facility is located close to family and friends
- it is a familiar home environment.

Data reported for these measures are:

- comparable (subject to caveats) across jurisdictions and over time
- complete (subject to caveats) for the current reporting period. All required 2016-17 data are available for all jurisdictions.

Data by disability status are not available. Further work is required to record disability status for young people entering, receiving or exiting residential aged care.

Nationally in 2016-17, the rate of people aged 0–64 years admitted to permanent residential aged care was 32.8 per 10 000 potential population — around 90 per cent were aged 50 years or over (table 15A.53). Data on the number of younger people receiving and separating from residential aged care to return to home/family are available in tables 15A.54–55. Data on the number of younger people receiving residential aged care by Indigenous status are available in table 15A.56. State and Territory government expenditure for younger people with disability in residential aged care is reported in table 14A.3, chapter 14.

### Appropriateness — Choice and control

‘Choice and control’ is an indicator of governments’ objective under the NDIS to enable people with disability to exercise choice and control in the pursuit of their goals and the planning and delivery of their supports (box 15.5).

---

**Box 15.5** **Choice and control**

‘Choice and control’ is defined as the proportion of NDIS participants with an active plan in place, who experience independence, and choice and control over their care.

High or increasing proportions of NDIS participants with an active plan in place, who experienced independence and control of their care, is desirable.

Data on NDIS plan activation, client experience of choice and control and assistance to exercise and implement choice and control are being investigated for future reports.

### Quality — Client and carer satisfaction

‘Client and carer satisfaction’ is an indicator of governments’ objective to provide access to disability services that meet a particular standard of quality; and under the NDIS, to promote the provision of high quality and innovative supports (box 15.6).

---

### Box 15.6 Client and carer satisfaction

'Client and carer satisfaction' is defined by four measures:

- the proportion of people with disability aged 15–64 years who are satisfied with the quality of assistance received from organised and formal services in the last six months
- the proportion of people with disability aged 15–64 years who are satisfied with the range of organised and formal service options available
- the proportion of primary carers (of people with disability aged 0–64 years) who are satisfied with the quality of assistance received from formal services, by the person with disability and by the carer in the last six months
- the proportion of primary carers (of people with disability aged 0–64 years), who are satisfied with the range of formal service options available to help them in their caring role.

A high or increasing proportion of clients and carers who are satisfied is desirable as it suggests that the service received was of a higher quality.

Data reported for this measure are:

- comparable across jurisdictions and over time
- complete (subject to caveats) for the current reporting period. All required 2015 data are available for all jurisdictions.

Nationally in 2015, of people aged 15–64 years with disability who received formal services in the previous six months, 78.7 per cent were satisfied with the *quality* of assistance they received (table 15A.57), and 49.2 per cent were satisfied with the *range* of services received (table 15A.62). These figures were not significantly different from 2012 (tables 15A.57 and 15A.62).

Nationally, the proportion of primary carers who were satisfied with the *quality* of services received was 73.4 per cent in 2015 compared to 69.0 per cent in 2012 (figure 15.14), however there was no significant change in satisfaction with the *range* of services received (32.5 per cent in 2015) (table 15A.63).

Data disaggregated by special needs groups are available in tables 15A.59–61 and 15A.63–65.

Figure 15.14 **Proportion of carers of people with disability who are satisfied with the quality of services received<sup>a</sup>**

<sup>a</sup> See box 15.6 and table 15A.58 for detailed definitions, footnotes and caveats.

Source: ABS (unpublished) SDAC; table 15A.58.

## Efficiency

This Report includes 2016-17 expenditure data provided by Australian, State and Territory governments. However, as 2016-17 service user data were not available for this Report, the cost per service user efficiency indicators are reported using expenditure and service use data for 2015-16. Expenditure data in this Report might differ from information reported elsewhere (for example, data here exclude users of specialist psychiatric disability services only). Information on differences in calculating the reported efficiency indicators can be found in table 15A.66.

### Cost per output unit — Government contribution per user of non-government provided services

‘Government contribution per user of non-government provided services’ is an indicator of governments’ objective to provide access to disability services in an efficient manner (box 15.7).

---

**Box 15.7 Government contribution per user of non-government provided services**

'Government contribution per user of non-government provided services' is defined as the net government expenditure divided by the number of users of non-government provided NDA services. Measures are reported for the following non-government provided services:

- Accommodation support services in:
  - institutional/residential settings
  - group homes
  - other community settings.
- Employment services (reported per employment service user assisted).

Assuming all other factors remain constant (such as service quality and accessibility), low or decreasing government expenditure per service user reflects a more efficient provision of this service.

Efficiency data are difficult to interpret. Although high or increasing expenditure per unit of output can reflect deteriorating efficiency, it can also reflect improvements in the quality or other attributes of the services provided, or an increase in the service needs of users. Similarly, low or declining expenditure per unit of output can reflect improving efficiency, or lower quality and less effective services.

Data reported for this measure are:

- comparable (subject to caveats) within some jurisdictions over time but are not comparable across jurisdictions or over time for other jurisdictions (see caveats in attachment tables). The transition of the NDIS impacts results for many jurisdictions
- not complete (subject to caveats) for the current reporting period. Service use data for 2015-16 were not available for the ACT (relevant to group homes and other community settings) and Australian totals do not include the ACT.

*Government contribution per user of non-government provided services — accommodation support services*

Estimated annual government funding on non-government provided accommodation support services in 2015-16 was:

- \$145 796 (excluding the ACT) per service user in group homes (figure 15.15)
- \$76 672 per service user in institutional/residential settings
- \$39 580 (excluding the ACT) per service user in other community settings (table 15A.67).

Figure 15.15 **Government contribution per user of non-government provided accommodation support services in group homes (2015-16 dollars)<sup>a, b</sup>**

<sup>a</sup> See box 15.7 and table 15A.67 for detailed definitions, footnotes and caveats. <sup>b</sup> The Australian total for 2015-16 does not include the ACT, for which service use data were not available.

Source: AIHW (unpublished) DS NMDS 2011-12 to 2015-16; State and Territory governments (unpublished); table 15A.67.

Data on the cost per user of government provided accommodation support services, along with historical data on costs and contributions per user, are reported in table 15A.67.

#### *Government contribution per user of non-government provided services — employment services*

Nationally, for all employment services, the estimated Australian Government contribution per service user assisted (non-government provided employment services) was \$4628 in 2015-16 (figure 15.16) — \$3489 per user of open services (employed or seeking employment in the open labour market) and \$11 921 per user of supported services (employed by the service provider) (table 15A.68).

Figure 15.16 **Australian Government contribution per user of non-government provided employment services (2015-16 dollars)<sup>a</sup>**

<sup>a</sup> See box 15.7 and table 15A.69 for detailed definitions, footnotes and caveats.

Source: Australian Government (unpublished); AIHW (unpublished) DS NMDS 2011-12 to 2015-16; table 15A.69.

### Cost per output unit — Cost per user of State and Territory administered services

‘Cost per user of State and Territory administered services’ is an indicator of governments’ objective to provide access to disability services in an efficient manner (box 15.8).

#### Box 15.8 **Cost per user of State and Territory administered services**

‘Cost per user of State and Territory administered services’ is defined as government expenditure on NDA State and Territory administered services per service user. Two measures are reported:

- Estimated government expenditure per user of NDA services.
- Cost per user of government provided accommodation support services in:
  - institutional/residential settings
  - group homes
  - other community settings.

Assuming other factors were constant (such as service quality and accessibility), low or decreasing government expenditure per service user reflects a more efficient provision of this service.

(continued next page)

---

**Box 15.8** (continued)

Efficiency data are difficult to interpret. Although high or increasing expenditure per unit of output can reflect deteriorating efficiency, it can also reflect improvements in the quality or attributes of the services provided, or an increase in the service needs of service users. Similarly, low or decreasing expenditure per unit of output can reflect improving efficiency, or lower quality and less effective services.

Data reported for these measures are:

- comparable (subject to caveats) within some jurisdictions over time but are not comparable across jurisdictions or over time for other jurisdictions. The transition of the NDIS impacts results for many jurisdictions
- not complete (subject to caveats) for the current reporting period. Service use data for 2015-16 were not available for the ACT (relevant to group homes and other community settings) and Australian totals do not include the ACT.

Nationally in 2015-16 (excluding the ACT), estimated expenditure per NDA service user excluding payroll tax was \$38 600 (table 15A.71).

---

**Table 15.1 Total estimated expenditure per NDA service user excluding actual payroll tax (2015-16 dollars)<sup>a</sup>**

<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust (excl. ACT)</i>
43 174	28 504	47 352	47 573	37 878	31 065	na	35 513	38 600

<sup>a</sup> See box 15.8 and table 15A.71 for detailed definitions, footnotes and caveats. **na** Not available.

Source: AIHW (unpublished) DS NMDS; State and Territory government (unpublished); table 15A.71.

---

Estimated annual government expenditure on government-provided accommodation support services in 2015-16 was:

- \$333 724 per service user in institutional/residential settings
- \$188 195 (excluding the ACT) per service user in group homes
- \$15 390 (excluding the ACT) per service user in other community settings (table 15A.67).

Nationally in 2015-16, 6.0 per cent of total recurrent expenditure (excluding payroll tax) was administrative (15A.70).

## Outcomes

Outcomes are the impact of services on the status of an individual or group (see chapter 1).

---

## Labour force participation and employment of people with disability

‘Labour force participation and employment of people with disability’ is an indicator of governments’ objective to help people with disability achieve economic participation (box 15.9).

### Box 15.9 Labour force participation and employment of people with disability

‘Labour force participation and employment of people with disability’ is defined by three measures (each by disability status):

- *Labour force participation rate* defined as the number of people with disability aged 15–64 years who are in the labour force (employed or unemployed) divided by the number of people with disability aged 15–64 years
- *Employment-to-population ratio* defined as the number of people with disability aged 15–64 years who are employed divided by the number of people with disability aged 15–64 years
- *Unemployment rate* defined as the number of people with disability aged 15–64 years who are unemployed divided by the number of people with disability aged 15–64 years who are in the labour force (employed or unemployed).

High or increasing labour force participation and employment rates and low or decreasing unemployment rates for people with disability are desirable.

This indicator does not specify whether the employment positions are appropriate or fulfilling. Data on underemployment (see section 15.4 for definition) can be found in table 15A.72.

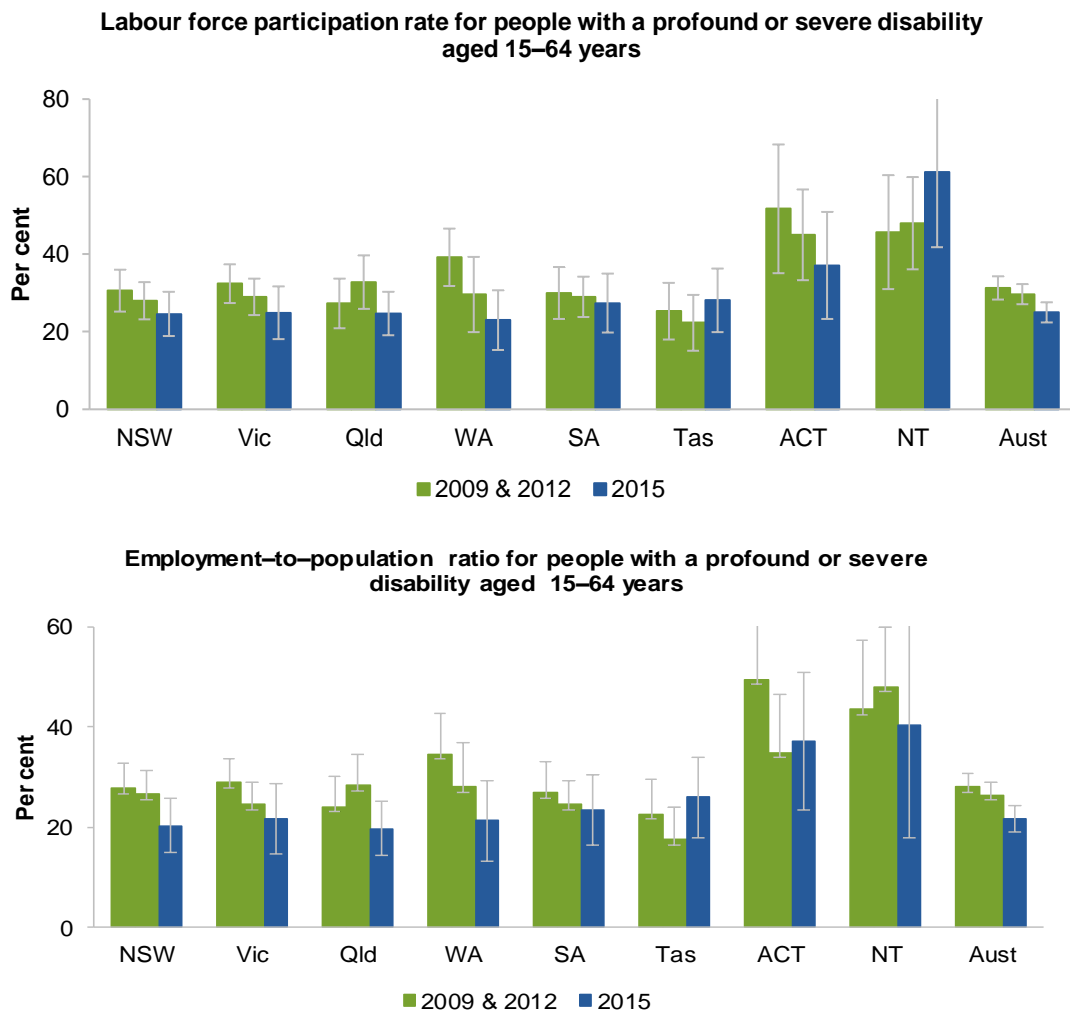

Data reported for these measures are:

- comparable across jurisdictions and over time
- complete (subject to caveats) for the current reporting period. All required 2015 data are available for all jurisdictions.

For people aged 15–64 years with a profound or severe core activity limitation, the labour force participation rate and the employment-to-population ratio decreased from 2009 (31.3 per cent and 28.0 per cent respectively) to 2015 (25.0 per cent and 21.6 per cent respectively) — both by around 6 percentage points (figure 15.17).

The unemployment rate of those with a profound or severe core activity limitation was 13.7 per cent in 2015; not significantly different from 2009 (10.6 per cent) and 2012 (10.3 per cent) (table 15A.75).

Figure 15.17 **Labour force participation and employment of people with a profound or severe disability, by State/Territory<sup>a</sup>**

<sup>a</sup> See box 15.9 and table 15A.73 for detailed definitions, footnotes and caveats.

Source: ABS (unpublished) SDAC; table 15A.73–74.

Data by remoteness area and country of birth are available in tables 15A.76–79.

### Labour force participation of primary carers of people with disability

‘Labour force participation of primary carers of people with disability’ is an indicator of governments’ objective to help carers of people with disability achieve economic participation (box 15.10).

---

### Box 15.10 **Labour force participation of primary carers of people with disability**

'Labour force participation of primary carers of people with disability' is defined by three measures:

- *Labour force participation rate* defined as the number of primary carers of people with disability aged 15–64 years who are in the labour force (employed or unemployed) divided by the number of primary carers of people with disability aged 15–64 years
- *Employment-to-population ratio* defined as the number primary carers of people with disability aged 15–64 years who are employed divided by the number of primary carers of people with disability aged 15–64 years
- *Unemployment rate* defined as the number of primary carers of people with disability aged 15–64 years who are unemployed divided by the number of primary carers of people with disability aged 15–64 years who are in the labour force (employed or unemployed).

High or increasing labour force participation and employment rates and low or decreasing unemployment rates for carers of people with disability are desirable.

This indicator does not provide information on whether the participation in the labour force is fulfilling. Information on the rate of underemployment can be found in table 15A.80 (see section 15.4 for definition).

Data reported for this measure are:

- comparable across jurisdictions and over time
- complete (subject to caveats) for the current reporting period. All required 2015 data are available for all jurisdictions.

Nationally in 2015, the labour force participation rate and employment-to-population ratio for primary carers of people with disability aged 15–64 years was 57.0 per cent and 51.4 per cent respectively; these proportions are not significantly different from 2012 (52.8 per cent and 47.6 per cent respectively) (figure 15.18).

Nationally, the unemployment rate for primary carers of people with disability aged 15–64 years was 10.5 per cent in 2015; similar to 2012 (9.2 per cent) (table 15A.88).

Additional data disaggregated by special needs groups are available in tables 15A.84–88.

Figure 15.18 **Labour force participation and employment for primary carers of people with disability aged 15–64 years, by State/Territory<sup>a, b</sup>**

<sup>a</sup> See box 15.10 and tables 15A.81–82 for detailed definitions, footnotes and caveats. <sup>b</sup> Results were not published for SA, Tasmania, the ACT and the NT for employment-to-population ratios in 2009 due to small numbers.

Source: ABS (unpublished) SDAC; tables 15A.81–82.

### Social participation of people with disability

‘Social participation of people with disability’ is an indicator of governments’ objective to help people with disability achieve social participation (box 15.11).

---

### Box 15.11 Social participation of people with disability

‘Social participation of people with disability’ is defined by three measures:

- The proportion of people with disability aged 15–64 years who have had face-to-face contact with ex-household family or friends in the previous week
- The proportion of people with disability aged 15–64 years who travelled to a social activity in the last two weeks
- The proportion of people with disability aged 5–64 years who report the main reason for not leaving home as often as they would like is their disability or condition.

A high or increasing proportion of people with disability who participate in social or community activities reflects greater inclusion in the community.

This indicator does not provide information on the degree to which the identified types of social or community activities contribute to people’s quality of life.

Data reported for this measure are:

- comparable across jurisdictions and over time
- complete (subject to caveats) for the current reporting period. All required 2015 data are available for all jurisdictions.

Social participation outcomes have worsened over time.

- Nationally, for people with disability aged 15–64 years, the proportion with a profound or severe core activity limitation:
  - who had face-to-face contact with ex-household family or friends in the previous week decreased from 72.5 per cent in 2009 to 67.9 per cent in 2015 (table 15A.89)
  - who travelled to a social activity decreased from 88.2 per cent in 2009 to 82.4 per cent in 2015 (table 15A.90)
- Nationally, for people with disability aged 5–64 years, the proportion who reported the main reason for not leaving home as often as they would like is their disability or condition increased from 12.7 per cent in 2009 to 15.7 per cent in 2015 (table 15A.91).

Additional data disaggregated by special needs groups are available in tables 15A.92–97.

### Use of mainstream services by people with disability

‘Use of mainstream services by people with disability’ is an indicator of governments’ objective that people with disability and their carers have an enhanced quality of life and enjoy choice and wellbeing (box 15.12).

---

**Box 15.12 Use of mainstream services by people with disability**

‘Use of mainstream services by people with disability’ is defined as the proportion of people with disability who sought to access mainstream services and were able to do so confidently (that is without experiencing difficulty or discrimination).

High or increasing proportions of people with disability who wanted to access mainstream services, and were able to do so confidently, is desirable.

Data are under investigation for reporting against this indicator in future.

### Carer health and wellbeing

‘Carer health and wellbeing’ is an indicator of governments’ objective that people with disability and their carers have an enhanced quality of life and enjoy choice and wellbeing (box 15.13).

---

**Box 15.13 Carer health and wellbeing**

‘Carer health and wellbeing’ is defined using two measures:

- the proportion of primary carers of people with disability who feel satisfied with their caring role
- the proportion of primary carers of people with disability who do not experience negative impacts on their wellbeing due to their caring role

A high or increasing rate of carers who feel satisfied with their caring role and who do not experience negative impacts on their wellbeing due to their caring role is desirable.

Data reported for this indicator are:

- comparable across jurisdictions and over time
- complete (subject to caveats) for the current reporting period. All required 2015 data are available for all jurisdictions.

Nationally in 2015, less than one-quarter of primary carers of people with disability were satisfied with their caring role (22.9 per cent and table 15A.21) and less than half of carers did not experience negative impacts on their wellbeing due to their caring role (44.4 per cent and table 15A.22). Rates of satisfaction and absence of negative impacts on wellbeing were higher for male carers compared to female carers (tables 15A.21–22).

---

## 15.4 Definitions of key terms

### Core activities as per the 2015 ABS SDAC

#### Disability

Communication, mobility and self-care.

The United Nation's Convention on the Rights of Persons with Disabilities, ratified by Australia on 17 July 2008, defines 'persons with disabilities' as those who have long term physical, mental, intellectual or sensory impairments which in interaction with various barriers may hinder their full and effective participation in society on an equal basis with others.

The World Health Organisation defines 'disabilities' as impairments, activity limitations, and participation restrictions: an impairment is a problem in body function or structure; an activity limitation is a difficulty encountered by an individual in executing a task or action; and a participation restriction is a problem experienced by an individual in involvement in life situations. Disability is a complex phenomenon, reflecting an interaction between features of a person's body and features of the society in which he or she lives (WHO 2009).

In the ABS SDAC 2015, a person has a disability if they 'report they have a limitation, restriction or impairment, which has lasted, or is likely to last, for at least six months and restricts everyday activities. This includes:

- loss of sight (not corrected by glasses or contact lenses)
- loss of hearing where communication is restricted, or an aid to assist with, or substitute for, hearing is used
- speech difficulties
- shortness of breath or breathing difficulties causing restriction
- chronic or recurrent pain or discomfort causing restriction
- blackouts, seizures, or loss of consciousness
- difficulty learning or understanding
- incomplete use of arms or fingers
- difficulty gripping or holding things
- incomplete use of feet or legs
- nervous or emotional condition causing restriction
- restriction in physical activities or in doing physical work
- disfigurement or deformity
- mental illness or condition requiring help or supervision
- long term effects of head injury, stroke or other brain damage causing restriction
- receiving treatment or medication for any other long term conditions or ailments and still being restricted
- any other long term conditions resulting in a restriction.

The third CSTDA (2003, p. 9) defined 'people with disabilities' as those whose disability manifests itself before the age of 65 years and for which they require significant ongoing and/or long term episodic support. For these people, the disability will be attributable to an intellectual, psychiatric, sensory, physical or neurological impairment or acquired brain injury (or some combination of these) which is likely to be permanent and results in substantially reduced capacity in at least one of the following: self-care/management, mobility and communication.

#### Employment services

Employment services comprise open employment services and supported employment services. Where users of employment services are described without further qualification, this includes people who use either or both open and supported employment services.

---

	<p>All open employment services are now included in the Disability Employment Services (DES) program administered by the Department of Social Services (DSS). Disability Employment Services has two parts: Disability Management Services (DMS) is for job seekers with disability, injury or health condition who need assistance to find a job and occasional support to keep a job; and Employment Support Services (ESS) provides assistance to people with permanent disability and who need regular, ongoing support to keep a job. Supported employment services are administered by DSS (formerly FaHCSIA) under the Disability Employment Assistance activity as Australian Disability Enterprises. Australian Disability Enterprises are commercial businesses that provide employment for people with disability in a supportive environment.</p>
<b>Funded agency</b>	<p>An organisation that delivers one or more NDA service types (service type outlets). Funded agencies are usually legal entities. They are generally responsible for providing DS NMDS data to jurisdictions. Where a funded agency operates only one service type outlet, the service type outlet and the funded agency are the same entity.</p>
<b>Geographic location</b>	<p>Geographic location is based on the Australian Statistical Geography Standard of Remoteness Areas, which categorises areas as 'major cities', 'inner regional', 'outer regional', 'remote', 'very remote' and 'migratory'. The criteria for Remoteness Areas are based on the Accessibility/Remoteness Index of Australia, which measures the remoteness of a point based on the physical road distance to the nearest urban centre in each of five size classes (ABS 2011b). The 'outer regional and remote/very remote' classification used in this Report was derived by adding outer regional, remote and very remote data.</p>
<b>Government and non-government provided services</b>	<p>Efficiency indicators are reported for both government and non-government provided services. Government provision means that a service is both funded and directly provided by a government department, agency or local government. Non-government provision is a service purchased or part-funded by a government department or agency, but provided by a non-government organisation. Non-government service providers may receive funds from the private sector and the general public in addition to funding, grants and input tax concessions (such as payroll tax exemptions) from governments. Data on funds that non-government service providers receive from the private sector and the general public are outside the scope of this Report.</p>
<b>Informal carer</b>	<p><i>ABS informal carer:</i> a carer is a person of any age who provides any informal assistance, in terms of help or supervision, to persons with disability or older persons (i.e. aged 65 years and over). The assistance has to be ongoing, or likely to be ongoing, for at least six months. Assistance to a person in a different household relates to 'everyday activities', without specific information on the type of activity (ABS 2015).</p> <p><i>NDA Informal Carer:</i> See NDA primary carer.</p> <p><i>DS NMDS informal carer:</i> an informal carer is a person such as a family member, friend or neighbour who provides regular and sustained care and assistance to the person requiring support (AIHW 2012). This includes people who may receive a pension or benefit associated with their caring role, but does not include people, either paid or voluntary, whose services are arranged by a formal service organisation. Informal carers can be defined as primary if they help with one or more of the activities of daily living: self care, mobility or communication.</p> <p>See also primary carer.</p>
<b>Labour force participation rate for people with a profound or severe core activity limitation</b>	<p>The total number of people with a profound or severe core activity limitation in the labour force (where the labour force includes employed and unemployed people), divided by the total number of people with a profound or severe core activity limitation who are aged 15–64 years, multiplied by 100.</p>

---

---

**Mild core activity limitation**

An employed person is a person who, in his or her main job during the remuneration period (reference week):

- worked one hour or more for pay, profit, commission or payment in kind in a job or business, or on a farm (including employees, employers and self-employed people)
- worked one hour or more without pay in a family business, or on a farm (excluding people undertaking other unpaid voluntary work), or
- was an employer, employee or self-employed person or unpaid family helper who had a job, business or farm, but was not at work.

An unemployed person is a person aged 15–64 years who was not employed during the remuneration period, but was looking for work.

The person needs no help and has no difficulty with any of the core activity tasks, but:

- uses aids or equipment, or has one or more of the following limitations
- cannot easily walk 200 metres
- cannot walk up and down stairs without a handrail
- cannot easily bend to pick up an object from the floor
- cannot use public transport
- can use public transport, but needs help or supervision
- needs no help or supervision, but has difficulty using public transport. (as per the 2015 SDAC).

**Moderate core activity limitation**

The person needs no help, but has difficulty with a core activity task (as per the 2015 SDAC).

**Payroll tax**

A tax levied on employers based on the value of wages and certain supplements paid or payable to, or on behalf of, their employees (SCRCSSP 1999). Payroll tax arrangements for government funded and delivered services differ across jurisdictions. Differences in the treatment of payroll tax can affect the comparability of unit costs across jurisdictions and services. These differences include payroll tax exemptions, marginal tax rates, tax free thresholds and clawback arrangements (see SCRCSSP 1999).

There are two forms of payroll tax reported:

- *actual* — payroll tax actually paid by non-exempt services
- *imputed* — a hypothetical payroll tax amount estimated for exempt services. A jurisdiction's estimate is based on the cost of salaries and salary related expenses, the payroll tax threshold and the tax rate.

**Potential population**

The 'potential population' is the number of people with the potential to require disability support services, including individuals who meet the service eligibility criteria but who do not demand the services. The potential population is the number of people aged 0–64 years (and Aboriginal and Torres Strait Islander people aged 0–49 years) who are most appropriately supported by disability services, require ongoing and/or long term episodic support, have a permanent or chronic impairment, and who have a substantially reduced capacity in one or more core activities.

For respite services, only those people with a primary carer are included. For supported employment services, only the potential population aged 15–64 years participating in the labour force are included. For open employment services, the potential population is not used; instead, an estimate of all people with a disability and an employment restriction aged 15–64 is used. Where combined employment services denominators or rates are presented, the supported employment potential population is used.

Potential populations have been estimated for each of the special needs groups (outer regional and remote/very remote areas, Aboriginal and Torres Strait Islander people and people born in a non-English speaking country) and for those outside of the special needs groups (major cities and inner regional areas, non-Indigenous and people born in an English speaking country).

---

As Aboriginal and Torres Strait Islander people have significantly higher disability prevalence rates and greater representation in some NDA specialist disability services than non-Indigenous people, and there are differences in the share of different jurisdictions' populations who are Aboriginal and Torres Strait Islander, a further Aboriginal and Torres Strait Islander factor adjustment was undertaken. The Aboriginal and Torres Strait Islander factor was multiplied by the 'expected current population estimate' of people in the potential population in each jurisdiction to derive the 'potential population'.

The potential populations for 2005-06 to 2006-07 were calculated using national age and sex specific rates of severe or profound core activity limitation from the ABS Survey of Disability, Ageing and Carers (SDAC) conducted in 2003. In 2011, the 2009 SDAC was released, and recalculation of the potential population has resulted in a break in series between the 2003 and 2009 surveys. In 2014, the 2012 SDAC was released, and recalculation of the potential population has resulted in a break in series between the 2009 and 2012 surveys. In 2016, the 2015 SDAC was released, and recalculation of the potential population has resulted in a break in series between the 2012 and 2015 surveys. For this report, the potential population was recalculated based on data from the 2015 SDAC, and has been backcast to the 2013-14 year.

Data measuring the potential population is not available for each reported year and so has been estimated from several sources based on the following assumptions:

- a) for the purposes of calculation, it is assumed that age-sex specific proportions of the potential population changed smoothly from 2009 to 2012 and then from 2012 to 2015.
- b) the assumption that national age-sex specific proportions of the potential population from SDAC 2009, SDAC 2012 and SDAC 2015 apply consistently across states/territories is untested.

For more information on the method of calculation of the potential population, see appendix A of SCRGSP 2013.

## Primary carer

*ABS SDAC primary carer:* A primary carer is a person who provides the most informal assistance, in terms of help or supervision, to a person with disability with one or more of the core activities of mobility, self-care or communication. The assistance has to be ongoing, or likely to be ongoing, for at least six months. In this survey, primary carers only include persons aged 15 years and over. Persons aged 15 to 17 years were only interviewed personally if parental permission was granted.

Where the primary carer has more than one recipient of care, the main recipient of care is the one receiving the most help or supervision. A sole recipient is also classed as a main recipient.

Where the care recipient lives in the same household, the assistance is for one or more of the following core and non-core activities (cognition/emotion, communication, health care, household chores, meal preparation, mobility, property maintenance, reading or writing, self-care, transport (ABS 2015).

*NDA primary carer*

The scope of primary carers is primary carers aged 15-64 years with:

- a main recipient of care aged 0-64 years, or
- a non-main recipient of care aged 0-64 years with a profound or severe core activity limitation.

The SDAC collects limited information about non-main recipients of care who do not co-reside with the carer. As such, the data may exclude some carers who would have otherwise been in scope for the NDA definitions if the same information was available for all recipients of care.

*DS NMDS primary carer:* an informal carer who assists the person requiring support, in one or more of the following activities of daily living, self-care, mobility or communication.

See also informal carer.

---

<b>Primary disability group</b>	Disability group that most clearly expresses the experience of disability by a person. The primary disability group can also be considered as the disability group causing the most difficulty to the person (overall difficulty in daily life, not just within the context of the support offered by a particular service).
<b>Profound core activity limitation</b>	The person is unable to do or always needs help with, a core activity task. (as per the 2015 SDAC).
<b>Real expenditure</b>	Actual expenditure (accrual) adjusted for changes in prices, using the General Government Final Consumption Expenditure (GGFCE) deflator, and expressed in terms of current year dollars.
<b>Schooling or employment restriction</b>	<p><i>Schooling restriction:</i> as a result of disability, being Unable to attend school, attends a special school, attends special classes at an ordinary school, needs at least one day a week off school on average, has difficulty at school.</p> <p><i>Employment restriction:</i> as a result of disability, permanently unable to work, restricted in the type of work they can or could do, need, or would need, at least one day a week off work on average, restricted in the number of hours they can, or could, work, requires special equipment, modified work environment or special arrangements, needs ongoing assistance or supervision, would find it difficult to change jobs or get a preferred job, needs assistance from a disability job placement program or agency.</p>
<b>Service</b>	A service is a support activity provided to a service user, in accord with the NDA. Services within the scope of the collection are those for which funding has been provided during the specified period by a government organisation operating under the NDA.
<b>Service type</b>	<p>The support activity that the service type outlet has been funded to provide under the NDA. The DS NMDS classifies services according to 'service type'. The service type classification groups services into seven categories: accommodation support; community support; community access; respite; employment; advocacy, information and alternative forms of communication; and other support services. Each of these categories has subcategories.</p> <p>Service user data are not collected for the following NDA specialist disability service types: advocacy, information/referral, combined information/advocacy, mutual support/self-help groups, print disability/alternative formats of communication, research and evaluation, training and development, peak bodies and other support services. In addition, some service types are not required to collect all service user data items. In particular:</p> <ul style="list-style-type: none"> <li>• 'recreation/holiday programs' (service type 3.02) are required to collect only information related to the statistical linkage key (selected letters of name, date of birth, sex, commencement date and date of last service)</li> <li>• employment services (service types 5.01 and 5.02) are not required to collect selected informal carer information, including primary status (AIHW 2007).</li> </ul>
<b>Service type outlet</b>	A service type outlet is the unit of the funded agency that delivers a particular NDA service type at or from a discrete location. If a funded agency provides, for example, both accommodation support and respite services, it is counted as two service type outlets. Similarly, if an agency is funded to provide more than one accommodation support service type (for example, group homes and attendant care), then it is providing (and is usually separately funded for) two different service types — that is, there are two service type outlets for the funded agency.
<b>Service user</b>	A service user is a person with disability who receives a NDA specialist disability service. A service user may receive more than one service over a period of time or on a single day.
<b>Severe core activity limitation</b>	The person sometimes needs help with a core activity task, and/or has difficulty understanding or being understood by family or friends, or can communicate more easily using sign language or other non-spoken forms of communication. (as per the SDAC 2015).

---

---

<b>Specialist psychiatric disability services</b>	Data for specialist psychiatric disability services are excluded to improve the comparability of data across jurisdictions. People with psychiatric disability may use a range of NDA specialist disability service types. In some jurisdictions (Victoria and Queensland), specialist psychiatric disability services are funded specifically to provide such support (AIHW 2015). Nationally in 2015-16, 9238 people used only specialist psychiatric disability services (AIHW unpublished). Data for these services are included in other publications on the DS NMDS, such as AIHW (2017). Therefore, service user data for Victoria, Queensland, and Australia in this chapter will differ from other publications.
<b>Statistical linkage key</b>	For information on the DS NMDS statistical linkage key see the DS NMDS data quality statement <a href="http://meteor.aihw.gov.au/content/index.phtml/itemId/518043">http://meteor.aihw.gov.au/content/index.phtml/itemId/518043</a>
<b>Underemployment</b>	Underemployed people are defined as persons with disability aged 15–64 years who are employed and usually work less than 35 hours per week, who wanted to work more hours and would be able to start work with more hours in the next 4 weeks.
<b>Users of NDA accommodation support services</b>	People using one or more accommodation support services that correspond to the following DS NMDS service types: 1.01 large residential/institutions (more than 20 places); 1.02 small residential/institutions (7–20 places); 1.03 hostels; 1.04 group homes (usually less than seven places); 1.05 attendant care/personal care; 1.06 in home accommodation support; 1.07 alternative family placement; and 1.08 other accommodation support.
<b>Users of NDA community access services</b>	People using one or more services that correspond to the following DS NMDS service types: 3.01 learning and life skills development; 3.02 recreation/holiday programs; and 3.03 other community access.
<b>Users of NDA community support services</b>	People using one or more services that correspond to the following DS NMDS service types: 2.01 therapy support for individuals; 2.02 early childhood intervention; 2.03 behaviour/specialist intervention; 2.04 counselling; 2.05 regional resource and support teams; 2.06 case management, local coordination and development; and 2.07 other community support.
<b>Users of NDA employment services</b>	People using one or more services that correspond to the following DS NMDS service types: 5.01 open employment and 5.02 supported employment.
<b>Users of NDA respite services</b>	People using one or more services that correspond to the following DS NMDS service types: 4.01 own home respite; 4.02 centre based respite/respite homes; 4.03 host family respite/peer support respite; 4.04 flexible/combo respite; and 4.05 other respite

# 15A Services for people with disability — attachment

Information on the comparability and completeness of the data for the performance indicators and measures is in sections 15.2-3 Definitions for the descriptors in this attachment are in section 15.4 of the chapter. Unsourced information was obtained from the Australian, State and Territory governments.

Data in this chapter are examined by the Disability and Aged Care Working Group, but have not been formally audited by the Secretariat.

Data reported in the attachment tables are the most accurate available at the time of data collection. Historical data may have been updated since the last edition of RoGS.

This file is available on the Review website at [www.pc.gov.au/rogs/2018](http://www.pc.gov.au/rogs/2018).

(a) NDIS data are captured at a point in time and DS NMDS data (used for reporting against the NDA) are for a full financial year.

(b) NDIS data are self-reported and some participants may have been incorrectly identified as existing NDA users when they may be new service users.

(c) Some people recorded in the DS NMDS may no longer be receiving services under the NDA, but they have not been removed from the DS NMDS.

(d) Number of NDIS participants with approved plans includes active participants only for 30 June 2017 and 30 June 2015, and all participants (both active and inactive) for 30 June 2016 and 30 June 2014. Inactive participants are those who have exited the Scheme.

(e) Data represent people who were reported in the DS NMDS who then transitioned to the NDIS and may not represent all service users who have transitioned to the NDIS.

(f) Service users may appear as transitioned to the NDIS in jurisdictions in which there are no NDIS trial sites. This is because a service user identified as transitioning to the NDIS has moved between jurisdictions during the 12 month period.

(g) Data represents people who participated in the NDIS and reported receiving funded supports from Commonwealth and State/Territory disability programs.

(h) Data from the DS NMDS lag the NDIS data by one. Data from the 2016-17 DS NMDS will be available for the next Report.

(i) There were 19 active participants with approved plans for whom there was no information on whether they were previously accessing existing disability programs.

**na** Not available .. Not applicable – Nil or rounded to zero.

(a) Time series financial data are adjusted to 2016-17 dollars using the General Government Final Consumption Expenditure (GGFCE) chain price deflator (2016-17= 100). See table 2A.49 and chapter 2 (sections 2.5-6) for more information.

(b) In NSW, administrative expenditure for 2008-09 have been revised to exclude capital grants to non-government service providers, as this expenditure is now reported separately. Data for 2008-09 to 2014-15 exclude payroll tax. The decrease in NSW administration expenditure in 2012-13 results from a change to the way in which administration expenditure has been calculated and from efficiency savings arising from an organisational restructure, which consolidated corporate services of several Government Divisions. NSW provided funding via a transfer (in nominal dollars) of \$131 million (2011-12), \$130 million (2012-13), \$143 million (2013-14), \$152.5 million (2014-15) and \$155.6 million (2015-16) to the Australian Government for the notional support costs for younger people receiving residential and packaged aged care, as required under the National Partnership Agreement on Transitioning Responsibilities for Aged Care and Disability Services. This expenditure is not included in this table (but is included in NSW figures when reporting to NSW central agencies). This expenditure is included in the Aged Care expenditure in chapter 14.

Table 15A.3 **Government expenditure, by type (2016-17 dollars) (\$'000) (a)**

	<i>NSW (b)</i>	<i>Vic (c)</i>	<i>Qld</i>	<i>WA (d)</i>	<i>SA (e)</i>	<i>Tas (f)</i>	<i>ACT</i>	<i>NT</i>	<i>S/T (g)</i>	<i>Aus Gov</i>	<i>Aust</i>
(c)	In Victoria, administrative expenditure for 2013-14 relates to activity based expenditure inclusive of Direct Management (Output Management) as part of a Departmental restructure.										
(d)	WA data includes expenditure on service users who received services under the WA Government operated trial sites of the NDIS. The trial commenced on 1 July 2014 and ran until 30 June 2017.										
(e)	For SA, for 2007-08, expenditure includes capital funds under the supported accommodation memorandum of understanding with the Australian Government, and fringe benefit tax transition payments to government providers. Expenditure in SA includes expenditure on equipment services for all years.										
(f)	For Tasmania, 2007-08 expenditure includes significant one-off additional expenses related to the outsourcing of government provided group homes. In Tasmania, capital grants to non-government service providers include transfer payments to Housing Tasmania for development of disability specific accommodation. In 2009-10, a reduction in administrative expenditure was due to improved processes for aligning administrative and direct service delivery expenditure. From 2012-13 to 2014-15, administrative expenditure varied due to changes in methodology for allocation of corporate and divisional overheads.										
(g)	Total of states and territories.										
(h)	Excludes actual payroll tax for NSW, Victoria and the NT. Actual payroll tax is included: for Queensland from 2007-08 to 2013-14, for SA for all years, for Tasmania from 2007-08 to 2011-12 (and in part for 2012-13).										
(i)	From 2013-14 (NSW, Victoria, SA and Tasmania), 2014-15 (NT, WA and the ACT) are affected by the introduction of the National Disability Insurance Scheme (NDIS). For NSW, SA and Tasmania, total government expenditure includes 'in-kind' funding to the National Disability Insurance Agency (NDIA), but excludes 'cash' contributions. For Victoria, NT, and the ACT total government expenditure includes both 'cash' and 'in-kind' funding to the NDIS. The NT total government expenditure for 2014-15 includes cash funding of \$2.0 million to the NDIA. Australian Government expenditure excludes both 'cash' and 'in-kind' funding to the NDIA. For SA, cash contributions to the NDIA for 2013-14 were \$2.6 million. For SA in 2013-14, expenditure reduced by revenue received from NDIS trial (\$485 000) and grant recoveries received in relation to transitioned clients (\$672 000).										
	.. Not applicable. – Nil or rounded to zero.

- (a) Time series financial data are adjusted to 2016-17 dollars using the General Government Final Consumption Expenditure (GGFCE) chain price deflator (2016-17=100). See table 2A.49 and chapter 2 (sections 2.5-6) for more information.
- (b) NSW provided funding via a transfer (in nominal dollars) of \$131 million (2011-12), \$130 million (2012-13), \$143 million (2013-14), \$152.5 million (2014-15) and \$155.6 million (2015-16) to the Australian Government for the notional support costs for younger people receiving residential and packaged aged care, as required under the National Partnership Agreement on Transitioning Responsibilities for Aged Care and Disability Services. This expenditure is not included in this table (but is included in NSW figures when reporting to NSW central agencies). This expenditure is included in the Aged Care expenditure in chapter 14. Transfer data for 2016-17 include the full ND SPP transfer from the Commonwealth (ie, not net of transfer repayments to the Commonwealth for NDA users that have transitioned to the NDIS).
- (c) Victorian transfer data for 2016-17 include the full ND SPP transfer from the Commonwealth (ie, not net of transfer repayments to the Commonwealth for NDA users that have transitioned to the NDIS).
- (d) Queensland transfer data for 2016-17 are net of ND SPP transfer repayments to the Commonwealth for NDA participants that have transferred to the NDIS during the year. Transfer payments include the NP for specialist disability services, NP for specialist disability services for persons aged 65 and over, and the NP for community services for disability workers.
- (e) WA data includes expenditure on service users who received services under the WA Government operated trial sites of the NDIS. The trial commenced on 1 July 2014 and ran until 30 June 2017. WA transfer payments data include Australian Government funding for specific projects in addition to core-CSTDA funding. A cash accounting method to record transfer payments has been used in 2009-10. Transfer data for 2016-17 are net of ND SPP transfer repayments to the Commonwealth for NDA participants that have transferred to the NDIS during the year.
- (f) For SA for 2007-08, expenditure includes capital funds under the supported accommodation memorandum of understanding with the Australian Government, and fringe benefit tax transition payments to government providers. Expenditure in SA includes expenditure on equipment services for all years. For 2013-14, excludes portion of Commonwealth funding relating to the NDIS trial (\$333 000). Transfer data for 2016-17 include the full ND SPP transfer from the Commonwealth (ie, not net of transfer repayments to the Commonwealth for NDA users that have transitioned to the NDIS).

Table 15A.4 **Total real government expenditure, by source of funding (2016-17 dollars) (\$'000) (a)**

	<i>NSW (b)</i>	<i>Vic (c)</i>	<i>Qld (d)</i>	<i>WA (e)</i>	<i>SA (f)</i>	<i>Tas (g)</i>	<i>ACT (h)</i>	<i>NT (i)</i>	<i>S/T (j)</i>	<i>Aus Gov</i>	<i>Aust</i>
(g)	For Tasmania, 2007-08 expenditure includes significant one-off additional expenses related to the outsourcing of government provided group homes. Transfer data for 2016-17 include the full ND SPP transfer from the Commonwealth (ie, not net of transfer repayments to the Commonwealth for NDA users that have transitioned to the NDIS).										
(h)	ACT transfer data for 2016-17 are net of ND SPP transfer repayments to the Commonwealth for NDA participants that have transferred to the NDIS during the year. Transfer payments for 2014-15 and 2015-16 include repayments to the Commonwealth for the disability component of the SACS NP, and transfer payments for 2015-16 also include repayments for the NP for specialist disability services for persons aged 65 and over.										
(i)	For the NT, transfer payments include the ND SPP and, for 2016-17, NP for specialist disability services for persons aged 65 and over. Transfer payments do not include the NP for community services for disability workers (SACS NP).										
(j)	Total of states and territories.										
(k)	Transfer payments data are provided by State and Territory governments.										
(l)	From 2013-14, data for NSW, Victoria, SA and Tasmania and from 2014-15 data for NT, WA and the ACT are affected by the introduction of the National Disability Insurance Scheme (NDIS). For NSW, SA and Tasmania, total government expenditure includes 'in-kind' funding to the National Disability Insurance Agency (NDIA), but excludes 'cash' contributions. For Victoria, NT, and the ACT total government expenditure includes both 'cash' and 'in-kind' funding to the NDIA. The NT total government expenditure for 2014-15 includes cash funding of \$2.0 million to the NDIA. Australian Government expenditure excludes both 'cash' and 'in-kind' funding to the NDIA. For SA, cash contributions to the NDIA for 2013-14 were \$2.6 million. For SA in 2013-14, expenditure reduced by revenue received from NDIS trial (\$485 000) and grant recoveries received in relation to transitioned clients (\$672 000).										
(m)	Excludes actual payroll tax for NSW, Victoria and the NT. Actual payroll tax is included: for Queensland from 2007-08 to 2013-14, for SA for all years, for Tasmania from 2007-08 to 2011-12 (and in part for 2012-13).

(a) All figures in the table are calculated based on data presented in table 15A.4. For details of the original data, please refer to footnotes in table 15A.4.

(b) WA data includes expenditure on service users who received services under the WA Government operated trial sites of the NDIS. The trial commenced on 1 July 2014 and ran until 30 June 2017.

.. Not applicable.

(a) Time series financial data are adjusted to 2016-17 dollars using the General Government Final Consumption Expenditure (GGFCE) chain price deflator (2016-17= 100). See table 2A.49 and chapter 2 (sections 2.5-6) for more information.

**Table 15A.6 Real government direct service delivery and total expenditure adjusted for payroll tax (2016-17 dollars) (\$'000)**  
**(a)**

	<i>NSW (b)</i>	<i>Vic (c)</i>	<i>Qld (d)</i>	<i>WA (e)</i>	<i>SA (f)</i>	<i>Tas (g)</i>	<i>ACT</i>	<i>NT</i>	<i>S/T (h)</i>	<i>Aus Gov</i>	<i>Aust</i>
(b)	The decrease in NSW administration expenditure in 2012-13 results from a change to the way in which administration expenditure has been calculated and from efficiency savings arising from an organisational restructure, which consolidated corporate services of several Government Divisions. NSW provided funding via a transfer (in nominal dollars) of \$131 million (2011-12), \$130 million (2012-13), \$143 million (2013-14), \$152.5 million (2014-15) and \$155.6 million (2015-16) to the Australian Government for the notional support costs for younger people receiving residential and packaged aged care, as required under the National Partnership Agreement on Transitioning Responsibilities for Aged Care and Disability Services. This expenditure is not included in this table (but is included in NSW figures when reporting to NSW central agencies). This expenditure is included in the Aged Care expenditure in chapter 14.										
(c)	The increase in actual payroll tax in Victoria is a result of government delivered services no longer being exempt from the tax. Administrative expenditure for 2013-14 relates to activity based expenditure inclusive of Direct Management (Output Management) as part of a Departmental restructure. Payroll tax relates to internally delivered services only.										
(d)	Payroll tax data for Queensland include paid payroll tax and accrued payroll tax. Direct service delivery expenditure and administrative expenditure data exclude payroll tax.										
(e)	WA data includes expenditure on service users who received services under the WA Government operated trial sites of the NDIS. The trial commenced on 1 July 2014 and ran until 30 June 2017. The decrease in WA administrative expenditure in 2007-08 mainly reflects the abolition of the capital user charge by Department of Treasury and Finance. The increase in WA administrative expenditure in 2009-10 consists mainly of one off (non capital) projects.										
(f)	In SA for 2007-08 expenditure includes capital funds under the supported accommodation memorandum of understanding with the Australian Government, and fringe benefit tax transition payments to government providers. Expenditure in SA includes expenditure on equipment services for all years.										
(g)	For Tasmania, 2007-08 expenditure includes significant one-off additional expenses related to the outsourcing of government provided group homes. In Tasmania, capital grants to non-government service providers include transfer payments to Housing Tasmania for development of disability specific accommodation. From 2012-13 to 2014-15, administrative expenditure varied due to changes in methodology for allocation of corporate and divisional overheads.										
(h)	Total of states and territories.										
(i)	Excludes actual payroll tax for NSW, Victoria and the NT. Actual payroll tax is included: for Queensland from 2007-08 to 2013-14, for SA for all years, for Tasmania from 2007-08 to 2011-12 (and in part for 2012-13). WA and the ACT are exempt from payroll tax.										
(j)	From 2013-14, data for NSW, Victoria, SA and Tasmania and from 2014-15 data for NT, WA and the ACT are affected by the introduction of the National Disability Insurance Scheme (NDIS). For NSW, SA and Tasmania, total government expenditure includes 'in-kind' funding to the National Disability Insurance Agency (NDIA), but excludes 'cash' contributions. For Victoria, NT, and the ACT total government expenditure includes both 'cash' and 'in-kind' funding to the NDIS. The NT total government expenditure for 2014-15 includes cash funding of \$2.0 million to the NDIA. Australian Government expenditure excludes both 'cash' and 'in-kind' funding to the NDIA. For SA, cash contributions to the NDIA for 2013-14 were \$2.6 million. For SA in 2013-14, expenditure reduced by revenue received from NDIS trial (\$485 000) and grant recoveries received in relation to transitioned clients (\$672 000).										

.. Not applicable. – Nil or rounded to zero.

- (a) Time series financial data are adjusted to 2016-17 dollars using the General Government Final Consumption Expenditure (GGFCE) chain price deflator (2016-17= 100). See table 2A.49 and chapter 2 (sections 2.5-6) for more information.
- (b) For NSW, 2008-09 to 2014-15 data exclude payroll tax. NSW provided funding via a transfer (in nominal dollars) of \$131 million (2011-12), \$130 million (2012-13), \$143 million (2013-14), \$152.5 million (2014-15) and \$155.6 million (2015-16) to the Australian Government for the notional support costs for younger people receiving residential and packaged aged care, as required under the National Partnership Agreement on Transitioning Responsibilities for Aged Care and Disability Services. This expenditure is not included in this table (but is included in NSW figures when reporting to NSW central agencies). This expenditure is included in the Aged Care expenditure in chapter 14.
- (c) For Victoria, data for 2008-09, 2009-10 and 2011-12 exclude payroll tax. Data for accommodation support services in 2008-09 excludes former Homefirst (personal/attendance care) program and Infrastructure development and enhancement grants for non-government services. Data for community support in 2008-09 includes former Homefirst (personal/attendance care) and Community Options programs now delivered through Individual Support Packages. Data for community access services in 2008-09 excludes former Community Options program (ongoing community access support and activities). In 2012-13, the reduction in expenditure dollars in Community Access was offset equally by a corresponding increase in Community Support. This was due to an output structure realignment, whereby Day Programs was amalgamated under Individualised Support Packages from 2012-13 onwards.
- (d) For Queensland, direct service delivery expenditure data exclude payroll tax for all years reported.
- (e) WA data includes expenditure on service users who received services under the WA Government operated trial sites of the NDIS. The trial commenced on 1 July 2014 and ran until 30 June 2017. For WA, 2008-09 includes a transfer payment to the Dept of Housing of \$13.8M. Services in WA are not subject to payroll tax. In 2013-14, the increase in accommodation support expenditure and decrease in respite services expenditure reflects the transfer of approximately 500 service users, previously captured against respite transferred to accommodation as a result of the WA Procurement Reforms that commenced mid-year 2013-14.

Table 15A.7 **Real government direct service delivery expenditure, by service type (2016-17 dollars) (\$'000) (a)**

	<i>NSW (b)</i>	<i>Vic (c)</i>	<i>Qld (d)</i>	<i>WA (e)</i>	<i>SA (f)</i>	<i>Tas (g)</i>	<i>ACT (h)</i>	<i>NT (i)</i>	<i>S/T (j)</i>	<i>Aus Gov</i>	<i>Aust</i>
(f)	For SA, data include payroll tax. For 2007-08, expenditure on 'other support' includes capital funds under the supported accommodation memorandum of understanding with the Australian Government, and fringe benefit tax transition payments to government providers. Expenditure on other support in SA includes expenditure on equipment services for all years.										
(g)	For Tasmania, direct service expenditure includes payroll tax until 2011-12 and partial for 2012-13. For 2007-08, accommodation support expenditure includes significant one-off additional expenses related to the outsourcing of government provided group homes.										
(h)	Services in the ACT are not subject to payroll tax. 2014-15 data include \$109,164 in government expenditure through Enhanced Services Offer for 15 clients.										
(i)	In the NT, the decrease in expenditure on advocacy, information and print disability in 2007-08 is due to the reclassification of a service. Direct service expenditure includes payroll tax.										
(j)	Total of states and territories.										
(k)	Other support services includes advocacy, information and print disability.										
(l)	Excludes actual payroll tax for NSW, Victoria and the NT. Actual payroll tax is included: for Queensland from 2007-08 to 2013-14, for SA for all years, for Tasmania from 2007-08 to 2011-12 (and in part for 2012-13).										
(m)	From 2013-14, data for NSW, Victoria, SA and Tasmania and from 2014-15 data for NT, WA and the ACT are affected by the introduction of the National Disability Insurance Scheme (NDIS). For NSW, SA and Tasmania, total government expenditure includes 'in-kind' funding to the National Disability Insurance Agency (NDIA), but excludes 'cash' contributions. For Victoria, NT, and the ACT total government expenditure includes both 'cash' and 'in-kind' funding to the NDIS. The NT total government expenditure for 2014-15 includes cash funding of \$2.0 million to the NDIA. Australian Government expenditure excludes both 'cash' and 'in-kind' funding to the NDIA. For SA, cash contributions to the NDIA for 2013-14 were \$2.6 million. For SA in 2013-14, expenditure reduced by revenue received from NDIS trial (\$485 000) and grant recoveries received in relation to transitioned clients (\$672 000).										
	.. Not applicable.

(a) All figures in the table are calculated based on data presented in Table 15A.7. For details of the original data, please refer to footnotes in Table 15A.7.

(b) WA data includes expenditure on service users who received services under the WA Government operated trial sites of the NDIS. The trial commenced on 1 July 2014 and ran until 30 June 2017.

.. Not applicable.

\* Indicates the estimate or proportion has a relative standard error between 25 per cent and 50 per cent and should therefore be used with caution.

- (a) Core activities comprise communication, mobility and self care.
- (b) For the ABS Survey of Disability, Ageing and Carers 2003 the sample in the NT was reduced to a level such that NT records contributed appropriately to national estimates but could not support reliable estimates for the NT. As a result, estimates for the NT are not published separately by the ABS.
- (c) WA data includes service users who received services under the WA Government operated trial sites of the NDIS. The trial commenced on 1 July 2014 and ran until 30 June 2017.
- Nil or rounded to zero. **np** Not published.

- (a) Numbers for Australia may not equal the sum of numbers for each State and Territory because some users accessed services in more than one State or Territory.
- (b) Numbers for all State and Territory government-administered services, and all services, may not equal the sum of numbers of each service type, as some users accessed more than one service type.
- (c) Numbers for total government/non-government services may not equal the sum of government services and non-government services as some users accessed government and non-government services.
- (d) Changes in the linking procedures implemented for 2007-08 and 2008-09 data may have the effect of slightly increasing the number of unique service users within the CSTDA NMDS for these years.
- (e) Government and non-government sectors have not been accurately recorded in the NSW DS NMDS up to 2009-10. Some non-government providers have been coded as government and this will affect the comparability of the number of service users from government and non-government sectors over time.
- (f) WA data includes service users who received services under the WA Government operated trial sites of the NDIS. The trial commenced on 1 July 2014 and ran until 30 June 2017.
- (g) South Australia State/Territory services sector data have been revised for 2012-13, updating the figures published in AIHW 2014 (table B14 of that report). SA data for 2012-13 are not comparable to previous years. A large non-government provider in SA ceased reporting non-NDA clients which were incorrectly included in previous years' data, while another SA agency experienced data reporting problems, resulting in some clients not being reported. Data for 2011-12 are not comparable with other years. A large government service provider in SA ceased reporting case management services for people who received telephone contact only once or twice a year. This contributed to a large decrease in clients.

Table 15A.10 **Users of NDA government and non-government provided services, by service type (a), (b), (c), (d)**

	<i>Unit</i>	<i>NSW (e)</i>	<i>Vic</i>	<i>Qld</i>	<i>WA (f)</i>	<i>SA (g)</i>	<i>Tas</i>	<i>ACT (h)</i>	<i>NT (i)</i>	<i>Aust (h)</i>
--	-------------	----------------	------------	------------	---------------	---------------	------------	----------------	---------------	-----------------

(h) ACT data for state/territory government service users were not available for 2015-16 as the ACT did not provide data for the DS NMDS for this year. Therefore, Australian totals exclude ACT service users in 2015-16.

(i) From 2012-13 onwards, data for the NT includes users of basic community care.

(j) The definition of the potential population was revised in 2015, effective from 2012-13. See section 15.4.

(k) Australian Government administered services classified as 'government' are not provided by the Australian Government, but by organisations classified as government related, such as local councils.

(l) Data for 2012-13 do not include a number of 'not stated' sector records (nationally, 52 426 non-government Open employment records) and are not comparable with previous years.

**na** Not available .. Not applicable – Nil or rounded to zero.

(a) Numbers for Australia may not equal the sum of numbers for each State and Territory because some users accessed services in more than one State or Territory.

(b) Changes in the linking procedures implemented for 2007-08 and 2008-09 data may have the effect of slightly increasing the number of unique service users within the CSTDA NMDS for these years.

Table 15A.11 **Users of NDA services, by primary disability group (a), (b)**

	<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA (c)</i>	<i>SA (d)</i>	<i>Tas</i>	<i>ACT (e)</i>	<i>NT (f)</i>	<i>Aus Gov</i>	<i>Aust (e)</i>
(c)	WA data includes service users who received services under the WA Government operated trial sites of the NDIS. The trial commenced on 1 July 2014 and ran until 30 June 2017.										
(d)	SA data for 2012-13 are not comparable to previous years. A large non-government provider in SA ceased reporting non-NDA clients which were incorrectly included in previous years' data, while another SA agency experienced data reporting problems, resulting in some clients not being reported. Data for 2011-12 are not comparable with other years. A large government service provider in SA ceased reporting case management services for people who received telephone contact only once or twice a year. This contributed to a large decrease in clients.										
(e)	ACT data for state/territory government service users were not available for 2015-16 as the ACT did not provide data for the DS NMDS for this year. Therefore, Australian totals do not include ACT service users in 2015-16.										
(f)	From 2012-13 onwards, data for the NT includes users of basic community care.										
(g)	'Not reported' primary disability includes both service users accessing only recreation and holiday program services (for whom primary disability data were not collected) and other service users without a reported response.										

**na** Not available – Nil or rounded to zero.

Source: AIHW (unpublished), DS NMDS 2009-10 to 2015-16; CSTDA NMDS 2006-07 to 2008-09.

(a) Numbers for Australia may not equal the sum of numbers for each State and Territory because some users accessed services in more than one State or Territory.

Table 15A.12 **Users of NDA services, by disability group as a proportion of total users (a), (b), (c)**

<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA (d)</i>	<i>SA (e)</i>	<i>Tas</i>	<i>ACT (f)</i>	<i>NT (g)</i>	<i>Aus Gov</i>	<i>Aust (f)</i>
(b) Changes in the linking procedures implemented for 2007-08 and 2008-09 data may have the effect of slightly increasing the number of unique service users within the CSTDA NMDS for these years.										
(c) Service users may be in more than one disability group so the sum of proportions for each jurisdiction can be greater than 100 per cent.										
(d) WA data includes service users who received services under the WA Government operated trial sites of the NDIS. The trial commenced on 1 July 2014 and ran until 30 June 2017.										
(e) SA data for 2012-13 are not comparable to previous years. A large non-government provider in SA ceased reporting non-NDA clients which were incorrectly included in previous years' data, while another SA agency experienced data reporting problems, resulting in some clients not being reported. Data for 2011-12 are not comparable with other years. A large government service provider in SA ceased reporting case management services for people who received telephone contact only once or twice a year. This contributed to a large decrease in clients.										
(f) ACT data for state/territory government service users were not available for 2015-16 as the ACT did not provide data for the DS NMDS for this year. Therefore, Australian totals do not include ACT service users in 2015-16.										
(g) From 2012-13 onwards, data for the NT includes users of basic community care.										

**na** Not available – Nil or rounded to zero.

- (a) Data on the need for help with Activities of daily living (ADL) in 2007-08 are derived using information on the level of support needed in one or more of the core support areas: self care, mobility, and communication. Service users who need help with ADL reported always/sometimes needing help in one or more of these areas (people who need help with ADL are 'conceptually comparable' with people who have a profound or severe core activity limitation). Service users who did not need help with ADL, reported needing no support in all the core activity support areas. For these service users, help may be needed in other areas, for example, with interpersonal interactions, learning, and community and economic life.
- (b) Data on the need for help with ADL (2008-09 and later) are derived using information on the level of support needed in one or more of the core support areas: self care, mobility, and communication. Data for service users who need help with independent living or work, education and community living were reported for the first time in 2008-09. This includes people who need help with such things as interpersonal interactions and relationships, learning, applying knowledge and general tasks and demands; and domestic life or help with education, community (civic) and economic life; and work but who do not need help with ADL.
- (c) State/Territory delivered disability support services comprise accommodation support, community support, community access and respite.
- (d) Numbers for Australia may not equal the sum of numbers for each State and Territory because some users accessed services in more than one State or Territory.

Table 15A.13 **Users of NDA services aged 0–64 years, by need for help in life area (a), (b), (c), (d), (e)**

	<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA (g)</i>	<i>Tas</i>	<i>ACT (h)</i>	<i>NT (i)</i>	<i>Aust (h)</i>
(e)	Changes in the linking procedures implemented for 2007-08 and 2008-09 data may have the effect of slightly increasing the number of unique service users within the CSTDA NMDS for these years.									
(f)	WA data includes service users who received services under the WA Government operated trial sites of the NDIS. The trial commenced on 1 July 2014 and ran until 30 June 2017.									
(g)	SA data for 2012-13 are not comparable to previous years. A large non-government provider in SA ceased reporting non-NDA clients which were incorrectly included in previous years' data, while another SA agency experienced data reporting problems, resulting in some clients not being reported. Data for 2011-12 are not comparable with other years. A large government service provider in SA ceased reporting case management services for people who received telephone contact only once or twice a year. This contributed to a large decrease in clients. SA has a relatively high proportion of clients who do not need help with ADL. Most of these people have a vision/sensory disability with lower level support needs. In 2012-13, 12.9 per cent of SA clients had a vision related disability, compared with 4.2 per cent nationally (table 15A.11).									
(h)	ACT data for state/territory government service users were not available for 2015-16 as the ACT did not provide data for the DS NMDS for this year. Therefore, Australian totals do not include ACT service users in 2015-16.									
(i)	From 2012-13 onwards, data for the NT includes users of basic community care.									
(j)	Includes people whose need for assistance was 'not stated', 'not collected' or 'not applicable (due to age)'.

(a) The definition of the potential population was revised in 2015, effective from 2012-13. See section 15.4.

(b) WA data includes service users who received services under the WA Government operated trial sites of the NDIS. The trial commenced on 1 July 2014 and ran until 30 June 2017.

(c) ACT data for state/territory government service users were not available for 2015-16 as the ACT did not provide data for the DS NMDS for this year. Therefore, Australian totals do not include ACT service users in 2015-16.

(d) Data for the NT includes users of basic community care.

- (a) The proportion of BCC funded agencies that submitted HACC MDS data differed across jurisdictions and ranged from 93 per cent to 100 per cent in 2011-12, 51 per cent to 100 per cent in 2012-13, 75 per cent to 100 per cent in 2013-14, 75 per cent to 100 per cent in 2014-15. Data not available for 2015-16. Actual client numbers may be higher than those reported here.
- (b) Includes service users with not stated Indigenous status aged 50 to 64 years, and excludes service users who turned 65 (or 50 if Aboriginal or Torres Strait Islander) during the 12-month reference period.
- (c) With the commencement of transition of disability service users to the NDIS in NSW from 1 July 2013, there has been reduced emphasis on data collection and reporting by Government and service providers. This will be reflected in a greater drop in service user numbers than accounted for by NDIS transitions.
- (d) 2016-17 data were not available for Victoria and the NT. The 2016-17 total for Australia does not include Vic and the NT and is not comparable to previous years.
- (e) Data for Australia from 2013-14 onwards is not comparable to previous years due to the inclusion of Victoria and WA.
- (f) Data for 2015-16 has been revised from the previous Report with the inclusion of SA and Australian totals.
- (g) 2015-16 data for service users born in non-English speaking countries has been revised from the previous Report for all jurisdictions.

na Not available – Nil or rounded to zero.

--	-------------	----------------	----------------	------------	-----------	-----------	------------	------------	---------------	----------------------

- (a) Reports provisional BCC data that have not been validated and may be subject to revision.
- (b) The proportion of BCC funded agencies that submitted HACC MDS data differed across jurisdictions and ranged from 93 per cent to 100 per cent in 2011-12, 51 per cent to 100 per cent in 2012-13, 75 per cent to 100 per cent in 2013-14, 75 per cent to 100 per cent in 2014-15. Data were not available for 2015-16 or 2015-17. Actual client numbers may be higher than those reported here.
- (c) Includes service users with not stated Indigenous status aged 50 to 64 years, and excludes service users who turned 65 (or 50 if Aboriginal or Torres Strait Islander) during the 12-month reference period.
- (d) With the commencement of transition of disability service users to the NDIS in NSW from 1 July 2013, there has been reduced emphasis on data collection and reporting by Government and service providers. This will be reflected in a greater drop in service user numbers than accounted for by NDIS transitions.
- (e) 2016–17 data were not available for Victoria and the NT. The 2016-17 total for Australia does not include Vic and the NT and is not comparable to previous years.
- (f) Data for Australia for 2013-14 onwards is not comparable to previous years due to the inclusion of data for Victoria and WA.
- (g) Allied Health Care includes at Home and at Centre.
- (h) Nursing Care includes at Home and at Centre.
- (i) Data for 2015-16 has been revised from the previous Report with the inclusion of SA and Australian totals, and revised hours data for Case management and client care co-ordination services.
- Nil or rounded to zero. **na** Not available.

Source: DSS (unpublished) Home and Community Care Minimum Data Set (HACC MDS) 2011-12 to 2016-17.

(a) The NDIA records information on mainstream supports in the following categories: education and training, community participation (sport, child care and recreation), community support (youth services, parenting programs, etc.), health, legal and justice, housing, employment, transport, income support and other assistance.

(b) Data are not comparable across jurisdictions due to different cohorts of people with disability transitioning to the NDIS, and their different requirements for mainstream supports.

(c) This data refers to the Commonwealth Government operated trial of the NDIS in WA.

(d) Data for 2017 includes all plans approved in transition from 1 July 2016 to 30 June 2017.

(e) Data for 2016 includes all plans approved in transition to 30 June 2016.

*Source:* NDIA (unpublished) and NDIA (2017), *Quarterly Report to COAG Disability Reform Council, Q4 for 2016-17.*

Table 15A.18 **Proportion of NDIS participants decribing satisfaction with the agency as good or very good, 1 April to 30 June (a), (b)**

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i> (c)	<i>SA</i> (d)	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>

<i>2015</i>	96	86	np	95	98	np	94	np	96

(a) Participant satisfaction indicates the satisfaction of participants with the Agency, in particular, the planning process. Experience satisfaction indicates the overall satisfaction of a participant with their current life experience and outcomes

(b) The survey is completed after the planning process by the participant, their family, or carer.

(c) This data refers to the Commonwealth Government operated trial of the NDIS in WA.

(d) Data not available for SA for 2017 as survey was not undertaken in this quarter.

(a) Pensions, allowances and payments are not funded under the CSTDA/NDA. Australian totals may not sum as a result of rounding.

(b) The Disability Support Pension is a means tested income support payment for people aged 16 or over who have a physical, intellectual or psychiatric impairment (meeting set criteria) resulting in an inability to work or to be re-skilled for work for at least the next two years (as a result of impairment), or who are participating in the supported wage system. Special rules apply to the vision impaired.

(c) The Mobility Allowance is a non-means tested income supplement to assist with transport costs for people aged 16 or over with a disability who are in employment, vocational training, a combination of vocational training and employment, job search activities or voluntary work, and who are unable to use public transport without substantial assistance.

**Table 15A.19 Recipients of Disability Support Pension, Mobility Allowance, Carer Payment, Carer Allowance, Sickness Allowance, Child Disability Assistance Payment and Carer Supplement ('000) (a)**

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Other</i>	<i>Aust</i>
(d) The Carer Payment provides income support to people who, as a result of the demands of their caring role, are unable to support themselves through substantial workforce participation.										
(e) The Carer Allowance is a supplementary payment available to people who provide daily care and attention at home for an adult or a child with a disability or severe medical condition. Data include Health Care Card only recipients.										
(f) Sickness Allowance is a means tested income support payment for people aged 21 or over who are temporarily incapacitated from doing their normal work or study, due to illness or injury, and have a job or study to return to when they are fit.										
(g) The Child Disability Assistance Payment is an annual payment made for a child with disability under 16 years who attracts a payment of Carer Allowance for their carer. The payment can be used to assist families purchase support, aids, therapies, or respite that they require for their child with disability.										
(h) An annual supplement to Carer Payment recipients and to Carer Allowance recipients for each person to which they provide care. – Nil or rounded to zero.

- (a) Data relating to primary carers are not reported for all service users. Some service types are not required to collect all service user data items. For example, employment services are not required to collect selected informal carer information, including primary status. Percentages of informal carer categories are affected by the levels of unknown responses. For example, in 2014-15 for Australia, 33 per cent of all users with a known response had no informal carer, compared with 21 per cent of all users. Similarly, 53 per cent of all users where primary carer status was known had an informal carer who is a primary carer, compared with 30 per cent. High levels of not stated responses are mainly for users of open employment services, for whom 83 per cent had not stated informal carer status.
- (b) Total includes data for service users whose location was not collected/identified.
- (c) WA data includes service users who received services under the WA Government operated trial sites of the NDIS. The trial commenced on 1 July 2014 and ran until 30 June 2017.
- (d) ACT data for state/territory government service users were not available for 2015-16 as the ACT did not provide data for the DS NMDS for this year. Therefore, Australian totals do not include ACT service users in 2015-16.
- (e) Numbers for Australia may not equal the sum of numbers for each State and Territory because some users accessed services in more than one State or Territory.

– Nil or rounded to zero

\* Indicates the estimate or proportion has a relative standard error between 25 per cent and 50 per cent and should therefore be used with caution.

(a) Includes primary carers (aged 15 years and over) with a main recipient aged 0-64 years or a non-main recipient aged 0-64 years with a profound or severe core activity limitation. See section 15.4 for more details.

(b) Cells in the table have been randomly adjusted to avoid the release of confidential data. Discrepancies may occur between sums of the component items and totals. Refer to the SDAC Summary of Findings Publication (ABS cat. no. 4430.0) for more details.

(c) Data includes only those persons who undertook a personal interview, and does not include proxy interviews.

(d) Primary carers who did not state their satisfaction with their caring role have been excluded from both the numerator and denominator. Proportions have been calculated excluding these 'not stated' responses. These 'not stated' responses from primary carers represent 14.5 per cent of all primary carers included in the NDA definition (see section 15.4 for more details). Refer to SDAC Summary of Findings Publication (ABS cat. no. 4430.0) for further information about the 'not stated' responses for these data items.

– Nil or rounded to zero. **np** Not published.

(a) The definition of the potential population was revised in 2015, effective from 2012-13. See section 15.4.

(b) Data on service users in each geographic location were estimated based on service users' residential postcodes. In some jurisdictions, there are services users from geographical locations that do not exist in that jurisdiction. This occurs when service users have accessed services in a State or Territory other than their jurisdiction of residence (data are not reported in this table where the geography does not exist). In addition, some postcode areas were split between two or more geographic locations. Where this was the case the data were weighted according to the proportion of the population of the postcode area in each geographic location.

(c) Numbers for Australia may not equal the sum of numbers for each State and Territory because some users accessed services in more than one State or Territory.

(d) Data for all service users exclude 382 service users in 2006-07, 269 service users in 2007-08 whose postcode was not reported and 259 service users in 2008-09 whose geographic location could not be derived. Hence service user totals may differ from other tables and care should be taken when interpreting this indicator. The calculation of non-response rates for service users with not stated/not known responses for postcode has been modified slightly, hence non-response rates have increased slightly for 2007-08 and 2008-09.

(e) Changes to linking procedures implemented for 2007-08 and 2008-09 data may have the effect of slightly increasing the number of unique service users within the CSTDA NMDS for these years.

(f) Comparisons of access per 1000 population between the outer regional and remote/very remote population and other populations should be undertaken with care. Outer regional and remote/very remote areas have a higher proportion of Indigenous Australians than other areas and therefore the need for services may be greater in outer regional and remote areas due to the higher prevalence of disability.

(g) NSW data has had lower-than-average response rates, which has led to underreporting of service user numbers compared to other jurisdictions.

(h) WA data includes service users who received services under the WA Government operated trial sites of the NDIS. The trial commenced on 1 July 2014 and ran until 30 June 2017.

(i) SA data for 2012-13 are not comparable to previous years. A large non-government provider in SA ceased reporting non-NDA clients which were incorrectly included in previous years' data, while another SA agency experienced data reporting problems, resulting in some clients not being reported. Data for 2011-12 are not comparable with other years. A large government service provider in SA ceased reporting case management services for people who received telephone contact only once or twice a year. This contributed to a large decrease in clients.

(j) ACT data for service users per 1000 population in inner regional areas are not published as they are based on a small number of service users.

Table 15A.23 **Users of NDA accommodation support services, by remoteness (a), (b), (c), (d), (e), (f)**

	<i>Unit</i>	<i>NSW (g)</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA (i)</i>	<i>Tas</i>	<i>ACT (j), (k)</i>	<i>NT</i>	<i>Aust (k)</i>
--	-------------	----------------	------------	------------	-----------	---------------	------------	---------------------	-----------	-----------------

(k) ACT data for state/territory government service users were not available for 2015-16 as the ACT did not provide data for the DS NMDS for this year. Therefore, Australian totals do not include ACT service users in 2015-16.

.. Not applicable. **np** Not published. – Nil or rounded to zero. **na** Not available.

(a) See section 15.4 for detailed information on the estimated potential population.

(b) Data on service users in each geographic location were estimated based on service users' residential postcodes. In some jurisdictions, there are services users from geographical locations that do not exist in that jurisdiction. This occurs when service users have accessed services in a state or territory other than their jurisdiction of residence (data are not reported in this table where the geography does not exist). In addition, some postcode areas were split between two or more geographic locations. Where this was the case the data were weighted according to the proportion of the population of the postcode area in each geographic location.

Table 15A.24 **Users of NDA community support services, by remoteness (a), (b), (c), (d), (e), (f)**

	<i>Unit</i>	<i>NSW (g)</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA (i)</i>	<i>Tas</i>	<i>ACT (j)</i>	<i>NT</i>	<i>Aust (j)</i>
(c)	Numbers for Australia may not equal the sum of numbers for each State and Territory because some users accessed services in more than one State or Territory.									
(d)	Data for all service users exclude 3752 service users in 2007-08 whose postcode was not reported and 5489 service users in 2008-09 whose geographic location could not be derived. Hence service user totals may differ from other tables and care should be taken when interpreting this indicator. The calculation of non-response rates for service users with not stated/not known responses for postcode has been modified slightly, hence non-response rates have increased slightly for 2007-08 and 2008-09.									
(e)	Changes to linking procedures implemented for 2007-08 and 2008-09 data may have the effect of slightly increasing the number of unique service users within the CSTDA NMDS for these years.									
(f)	Comparisons of access per 1000 population between the outer regional and remote/very remote population and other populations should be undertaken with care. Outer regional and remote/very remote areas have a higher proportion of Indigenous Australians than other areas and therefore the need for services may be greater in outer regional and remote areas due to the higher prevalence of disability.									
(g)	NSW data has had lower-than-average response rates, which has led to underreporting of service user numbers compared to other jurisdictions.									
(h)	WA data includes service users who received services under the WA Government operated trial sites of the NDIS. The trial commenced on 1 July 2014 and ran until 30 June 2017.									
(i)	SA data for 2012-13 are not comparable to previous years. A large non-government provider in SA ceased reporting non-NDA clients which were incorrectly included in previous years' data, while another SA agency experienced data reporting problems, resulting in some clients not being reported. Data for 2011-12 are not comparable with other years. A large government service provider in SA ceased reporting case management services for people who received telephone contact only once or twice a year. This contributed to a large decrease in clients.									
(j)	ACT data for state/territory government service users were not available for 2015-16 as the ACT did not provide data for the DS NMDS for this year. Therefore, Australian totals do not include ACT service users in 2015-16.									

.. Not applicable. **np** Not published. **na** Not available.

(a) The definition of the potential population was revised in 2015, effective from 2012-13. See section 15.4.

Table 15A.25 **Users of NDA community access services, by remoteness (a), (b), (c), (d), (e), (f), (g)**

	<i>Unit</i>	<i>NSW (h)</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA (j)</i>	<i>Tas</i>	<i>ACT (k)</i>	<i>NT</i>	<i>Aust (k)</i>
(b)	Data on service users in each geographic location were estimated based on service users' residential postcodes. In some jurisdictions, there are services users from geographical locations that do not exist in that jurisdiction (data are not reported in this table where the geography does not exist). This occurs when service users have accessed services in a State or Territory other than their jurisdiction of residence. In addition, some postcode areas were split between two or more geographic locations. Where this was the case the data were weighted according to the proportion of the population of the postcode area in each geographic location.									
(c)	Numbers for Australia may not equal the sum of numbers for each State and Territory because some users accessed services in more than one State or Territory.									
(d)	Data for all service users exclude 2258 service users in 2008-09 whose geographic location could not be derived. Hence service user totals may differ from other tables and care should be taken when interpreting this indicator. The calculation of non-response rates for service users with not stated/not known responses for postcode has been modified slightly, hence non-response rates have increased slightly for 2007-08 and 2008-09.									
(e)	Data on service users per 1000 people are derived by dividing the number of service users in a geographic location by the number of population aged under 65 years in that geographic location, multiplied by 1000. Data on service users per 1000 potential population are derived by dividing the number of service users in a geographic location by the potential population aged under 65 years in that geographic location, multiplied by 1000. The 'major cities and inner regional' classification was derived by adding major cities and inner regional data. The 'outer regional and remote/very remote' classification was derived by adding outer regional, remote and very remote data.									
(f)	Changes to linking procedures implemented for 2008-09 data may have the effect of slightly increasing the number of unique service users within the CSTDA NMDS for these years.									
(g)	Comparisons of access per 1000 people between the outer regional and remote/very remote population and other populations should be undertaken with care. Outer regional and remote/very remote areas have a higher proportion of Indigenous Australians than other areas and therefore the need for services may be greater in outer regional and remote areas due to the higher prevalence of disability.									
(h)	NSW data has had lower-than-average response rates, which has led to underreporting of service user numbers compared to other jurisdictions.									
(i)	WA data includes service users who received services under the WA Government operated trial sites of the NDIS. The trial commenced on 1 July 2014 and ran until 30 June 2017.									
(j)	SA data for 2012-13 are not comparable to previous years. A large non-government provider in SA ceased reporting non-NDA clients which were incorrectly included in previous years' data, while another SA agency experienced data reporting problems, resulting in some clients not being reported. Data for 2011-12 are not comparable with other years. A large government service provider in SA ceased reporting case management services for people who received telephone contact only once or twice a year. This contributed to a large decrease in clients.									
(k)	ACT data for state/territory government service users were not available for 2015-16 as the ACT did not provide data for the DS NMDS for this year. Therefore, Australian totals do not include ACT service users in 2015-16.									

.. Not applicable. **np** Not published. – Nil or rounded to zero. **na** Not available.

Users	%	0.9	0.1	2.2	7.7	3.2	2.0	..	39.6	1.7

- (a) Data on service users in each geographic location were estimated based on service users' residential postcodes. In some jurisdictions, there are services users from geographical locations that do not exist in that jurisdiction. This occurs when service users have accessed services in a state or territory other than their jurisdiction of residence (data are not reported in this table where the geography does not exist). In addition, some postcode areas were split between two or more geographic locations. Where this was the case the data were weighted according to the proportion of the population of the postcode area in each geographic location.
- (b) Numbers for Australia may not equal the sum of numbers for each State and Territory because some users accessed services in more than one State or Territory.
- (c) Data for all service users exclude 512 service users in 2008-09 whose geographic location could not be determined. Hence service user totals may differ from other tables and care should be taken when interpreting this indicator. The calculation of non-response rates for service users with not stated/not known responses for postcode has been modified slightly, hence non-response rates have increased slightly for 2007-08 and 2008-09.
- (d) Changes to linking procedures implemented for 2008-09 data may have the effect of slightly increasing the number of unique service users within the CSTDA NMDS for these years.
- (e) Comparisons of access per 1000 people between the outer regional and remote/very remote population and other populations should be undertaken with care. Outer regional and remote/very remote areas have a higher proportion of Indigenous Australians than other areas and therefore the need for services may be greater in outer regional and remote areas due to the higher prevalence of disability. From 2015-16 onwards, comparisons are per 1000 potential population (in place of total population).
- (f) NSW data has had lower-than-average response rates, which has led to underreporting of service user numbers compared to other jurisdictions.
- (g) WA data includes service users who received services under the WA Government operated trial sites of the NDIS. The trial commenced on 1 July 2014 and ran until 30 June 2017.

<i>Unit</i>	<i>NSW (f)</i>	<i>Vic</i>	<i>Qld</i>	<i>WA (g)</i>	<i>SA (h)</i>	<i>Tas</i>	<i>ACT (i)</i>	<i>NT</i>	<i>Aust (i)</i>
-------------	----------------	------------	------------	---------------	---------------	------------	----------------	-----------	-----------------

(h) SA data for 2012-13 are not comparable to previous years. A large non-government provider in SA ceased reporting non-NDA clients which were incorrectly included in previous years' data, while another SA agency experienced data reporting problems, resulting in some clients not being reported. Data for 2011-12 are not comparable with other years. A large government service provider in SA ceased reporting case management services for people who received telephone contact only once or twice a year. This contributed to a large decrease in clients.

(i) ACT data for state/territory government service users were not available for 2015-16 as the ACT did not provide data for the DS NMDS for this year. Therefore, Australian totals do not include ACT service users in 2015-16.

.. Not applicable. **np** Not published. – Nil or rounded to zero. **na** Not available.

- (a) The definition of the potential population was revised in 2015, effective from 2012-13. See section 15.4.
- (b) Data on service users in each geographic location were estimated based on service users' residential postcodes. In some jurisdictions, there are services users from geographical locations that do not exist in that jurisdiction. This occurs when service users have accessed services in a state or territory other than their jurisdiction of residence (data are not reported in this table where the geography does not exist). In addition, some postcode areas were split between two or more geographic locations. Where this was the case the data were weighted according to the proportion of the population of the postcode area in each geographic location.
- (c) Numbers for Australia may not equal the sum of numbers for each State and Territory because some users accessed services in more than one State or Territory.
- (d) Changes to linking procedures implemented for 2007-08 and 2008-09 data may have the effect of slightly increasing the number of unique service users within the CSTDA NMDS for these years.
- (e) Data for all service users exclude 231 service users in 2005-06, 13 service users in 2006-07, 136 service users in 2007-08 whose postcode was not reported and 83 service users in 2008-09 whose geographic location could not be derived, thus totals may differ from other tables. The calculation of non-response rates for service users with not stated/not known responses for postcode has been modified slightly, hence non-response rates have increased slightly for 2007-08 and 2008-09.

.. Not applicable. **np** Not published. – Nil or rounded to zero.

2015-16	1.6	1.4	1.7	2.1	4.1	2.8	na	2.1	1.8

- (a) Data for all service users exclude 686 service users in 2007-08 and 748 service users in 2008-09 whose Indigenous status was not reported, thus accommodation support service users per 1000 total population aged under 65 years may differ from other tables. Due to the relatively high missing rate of data, care should be taken when interpreting this indicator.
- (b) Where Indigenous status was inconsistently recorded for the same user, the user was counted as an Indigenous Australian.
- (c) Changes to linking procedures implemented for 2007-08 and 2008-09 data may have the effect of slightly increasing the number of unique service users within the CSTDA NMDS for these years.
- (d) See section 15.4 for detailed information on the estimated potential population.
- (e) NSW data has had lower-than-average response rates, which has led to underreporting of service user numbers compared to other jurisdictions.
- (f) WA data includes service users who received services under the WA Government operated trial sites of the NDIS. The trial commenced on 1 July 2014 and ran until 30 June 2017.
- (g) SA data for 2012-13 are not comparable to previous years. A large non-government provider in SA ceased reporting non-NDA clients which were incorrectly included in previous years' data, while another SA agency experienced data reporting problems, resulting in some clients not being reported. Data for 2011-12 are not comparable with other years. A large government service provider in SA ceased reporting case management services for people who received telephone contact only once or twice a year. This contributed to a large decrease in clients.
- (h) ACT data for service users per 1000 Indigenous Australians/potential population are not published for some years as they are based on a small number of service users. Data are not available for 2015-16 as the ACT did not provide data for the DS NMDS. Therefore, Australian totals do not include ACT service users in 2015-16.

**na** Not available. **np** Not published.

2015-16	2.7	1.8	2.3	2.6	3.6	2.3	na	1.7	2.4

- (a) Data for all service users exclude 3218 service users in 2006-07, 3499 service users in 2007-08 and 4875 service users in 2008-09 whose Indigenous status was not reported, thus community access service users per 1000 total population may differ from other tables. This 'not reported' total includes recreation/holiday programs (service type 3.02) who were not required to complete the item on Indigenous status; however those who did provide a response are included in the data. Due to the relatively high missing rate of data, care should be taken when interpreting this indicator.
- (b) Where Indigenous status was inconsistently recorded for the same user, the user was counted as an Indigenous Australian.
- (c) Changes to linking procedures implemented for 2007-08 and 2008-09 data may have the effect of slightly increasing the number of unique service users within the CSTDA NMDS for these years.
- (d) The definition of the potential population was revised in 2015, effective from 2012-13. See section 15.4.
- (e) NSW data has had lower-than-average response rates, which has led to underreporting of service user numbers compared to other jurisdictions.
- (f) WA data includes service users who received services under the WA Government operated trial sites of the NDIS. The trial commenced on 1 July 2014 and ran until 30 June 2017.
- (g) SA data for 2012-13 are not comparable to previous years. A large non-government provider in SA ceased reporting non-NDA clients which were incorrectly included in previous years' data, while another SA agency experienced data reporting problems, resulting in some clients not being reported. Data for 2011-12 are not comparable with other years. A large government service provider in SA ceased reporting case management services for people who received telephone contact only once or twice a year. This contributed to a large decrease in clients.
- (h) ACT data for service users per 1000 Indigenous Australians/potential population are not published for some years as they are based on a small number of service users. Data are not available for 2015-16 for the ACT as the ACT did not provide data for the DS NMDS. Therefore, Australian totals for 2015-16 do not include ACT service users.

**np** Not published. **na** Not available.

Table 15A.31 **Users of NDA respite services, by Indigenous status (a), (b), (c)**

	<i>NSW (d)</i>	<i>Vic</i>	<i>Qld</i>	<i>WA (e)</i>	<i>SA (f)</i>	<i>Tas</i>	<i>ACT (g)</i>	<i>NT</i>	<i>Aust (g)</i>
(a)	Data for all service users exclude 1879 service users in 2006-07, 1885 service users in 2007-08 and 1832 service users in 2008-09 whose Indigenous status was not reported, thus respite service users per 1000 total population may differ from other tables. Due to the relatively high missing rate of data, care should be taken when interpreting this indicator.								
(b)	Where Indigenous status was inconsistently recorded for the same user, the user was counted as an Indigenous Australian.								
(c)	Changes to linking procedures implemented for 2007-08 and 2008-09 data may have the effect of slightly increasing the number of unique service users within the CSTDA NMDS for these years.								
(d)	NSW data has had lower-than-average response rates, which has led to underreporting of service user numbers compared to other jurisdictions.								
(e)	WA data includes service users who received services under the WA Government operated trial sites of the NDIS. The trial commenced on 1 July 2014 and ran until 30 June 2017.								
(f)	SA data for 2012-13 are not comparable to previous years. A large non-government provider in SA ceased reporting non-NDA clients which were incorrectly included in previous years' data, while another SA agency experienced data reporting problems, resulting in some clients not being reported. Data for 2011-12 are not comparable with other years. A large government service provider in SA ceased reporting case management services for people who received telephone contact only once or twice a year. This contributed to a large decrease in clients.								
(g)	Data are not available for 2015-16 for the ACT as the ACT did not provide data for the DS NMDS. Therefore, Australian totals do not include ACT service users in 2015-16.

2015-16	1.6	1.4	1.7	2.1	4.1	2.9	na	2.1	1.8

- (a) Data for service users born in a non-English speaking country were based on responses for country of birth with English Proficiency Groups 2–4. This includes all countries except Australia, New Zealand, Canada, United Kingdom, South Africa, Ireland or the United States of America, which are classified as English speaking countries. Where country of birth was inconsistently recorded for the same service user, the service user was counted as having been born in a non-English speaking country.
- (b) Data for all service users exclude 834 service users in 2006-07, 603 service users in 2007-08 and 705 service users in 2008-09 whose country of birth was not reported, thus accommodation support service users per 1000 total population aged under 65 years may differ from other tables. Due to the relatively high missing rate of data, care should be taken when interpreting this indicator.
- (c) The potential populations and general populations of people born in an English/non-English speaking country are derived using country of birth data from the Australian Census of Population and Housing and the estimated resident population of states and territories in the relevant year. Estimates exclude people whose country of birth was not stated or who were visitors to Australia.
- (d) The definition of the potential population was revised in 2015, effective from 2012-13. See section 15.4.
- (e) Changes to linking procedures implemented for 2007-08 and 2008-09 data may have the effect of slightly increasing the number of unique service users within the CSTDA NMDS for these years.
- (f) NSW data has had lower-than-average response rates, which has led to underreporting of service user numbers compared to other jurisdictions.
- (g) WA data includes service users who received services under the WA Government operated trial sites of the NDIS. The trial commenced on 1 July 2014 and ran until 30 June 2017.
- (h) SA data for 2012-13 are not comparable to previous years. A large non-government provider in SA ceased reporting non-NDA clients which were incorrectly included in previous years' data, while another SA agency experienced data reporting problems, resulting in some clients not being reported. Data for 2011-12 are not comparable with other years. A large government service provider in SA ceased reporting case management services for people who received telephone contact only once or twice a year. This contributed to a large decrease in clients.
- (i) Data are not available for 2015-16 for the ACT as the ACT did not provide data for the DS NMDS. Therefore, Australian totals do not include ACT service users in 2015-16.

**na** Not available.

2014-15	5.5	8.3	4.8	7.6	9.9	10.9	10.3	8.2	6.8
2015-16	5.7	8.5	5.0	7.6	9.1	10.2	na	7.5	6.7

- (a) Data for service users born in a non-English speaking country were based on responses for country of birth with English Proficiency Groups 2–4. This includes all countries except Australia, New Zealand, Canada, United Kingdom, South Africa, Ireland or the United States of America, which are classified as English speaking countries. Where country of birth was inconsistently recorded for the same service user, the service user was counted as having been born in a non-English speaking country.
- (b) Data for all service users exclude 5760 service users in 2007-08 and 8910 service users in 2008-09 whose country of birth was not reported, thus community support service users per 1000 total population aged under 65 years may differ from other tables. Due to the relatively high missing rate of data, care should be taken when interpreting this indicator.
- (c) The potential populations and general populations of people born in an English/non-English speaking country are derived using country of birth data from the Australian Census of Population and Housing and the estimated resident population of states and territories in the relevant year. Estimates exclude people whose country of birth was not stated or who were visitors to Australia.
- (d) Changes to linking procedures implemented for 2007-08 and 2008-09 data may have the effect of slightly increasing the number of unique service users within the CSTDA NMDS for these years.
- (e) The definition of the potential population was revised in 2015, effective from 2012-13. See section 15.4.
- (f) NSW data has had lower-than-average response rates, which has led to underreporting of service user numbers compared to other jurisdictions.
- (g) WA data includes service users who received services under the WA Government operated trial sites of the NDIS. The trial commenced on 1 July 2014 and ran until 30 June 2017.
- (h) SA data for 2012-13 are not comparable to previous years. A large non-government provider in SA ceased reporting non-NDA clients which were incorrectly included in previous years' data, while another SA agency experienced data reporting problems, resulting in some clients not being reported. Data for 2011-12 are not comparable with other years. A large government service provider in SA ceased reporting case management services for people who received telephone contact only once or twice a year. This contributed to a large decrease in clients.
- (i) Data are not available for 2015-16 for the ACT as the ACT did not provide data for the DS NMDS. Therefore, Australian totals do not include ACT service users in 2015-16.

na Not available.

2015-16	9.7	9.0	10.5	5.8	12.7	10.3	5.8	2.9	9.2

- (a) Changes to linking procedures implemented for 2007-08 and 2008-09 data may have the effect of slightly increasing the number of unique service users within the CSTDA NMDS for these years.
- (b) Data for service users born in a non-English speaking country were based on responses for country of birth with English Proficiency Groups 2–4. Data includes all countries except Australia, New Zealand, Canada, United Kingdom, South Africa, Ireland or the United States of America, which are classified as English speaking countries. Where country of birth was inconsistently recorded for the same service user, the service user was counted as having been born in a non-English speaking country.
- (c) Data for all service users exclude 750 in 2007-08 and 400 service users in 2008-09 whose country of birth was not reported, thus employment service users per 1000 total population aged 15–64 years may differ from other tables. Due to the relatively high missing rate of data, care should be taken when interpreting this indicator.
- (d) The potential populations and general populations of people born in an English/non-English speaking country are derived using country of birth data from the Australian Census of Population and Housing and the estimated resident population of states and territories in the relevant year. Estimates exclude people whose country of birth was not stated or who were visitors to Australia.
- (e) The definition of the potential population was revised in 2015, effective from 2012-13. See section 15.4.

2014-15	%	31.3	26.0	20.5	29.5	36.7	13.4	47.0	41.7	28.4
2013-14	%	30.6	26.6	20.6	29.6	41.8	16.9	78.4	43.0	29.1
2012-13	%	30.3	26.7	21.1	29.1	39.9	16.0	51.9	45.3	28.8
2011-12	%	28.6	32.7	20.3	33.3	40.8	14.3	50.6	45.3	29.0
2010-11	%	28.3	49.1	21.9	45.0	52.7	16.3	48.3	53.5	33.2
2009-10	%	24.8	62.9	20.9	43.0	50.4	13.0	44.6	22.0	30.0
2008-09	%	19.6	65.5	20.1	38.9	54.6	8.8	29.9	33.5	28.2

- (a) State/Territory delivered disability support services comprise accommodation support, community support, community access and respite.
- (b) The definition of the potential population was revised in 2015, effective from 2012-13. See section 15.4.
- (c) Changes in the linking procedures implemented for 2008-09 data may have the effect of slightly increasing the number of unique service users within the CSTDA NMDS for this year.
- (d) Disability support services reported in this table are delivered by states and territories. Since 2011, under the National Health Reform Agreement the Commonwealth funds these services for Indigenous people aged 50-64, except in Victoria and WA.
- (e) The definition of the potential population was revised in 2015, effective from 2012-13. See section 15.4.
- (f) WA data includes service users who received services under the WA Government operated trial sites of the NDIS. The trial commenced on 1 July 2014 and ran until 30 June 2017.
- (g) SA data for 2012-13 are not comparable to previous years. A large non-government provider in SA ceased reporting non-NDA clients which were incorrectly included in previous years' data, while another SA agency experienced data reporting problems, resulting in some clients not being reported. Data for 2011-12 are not comparable with other years. A large government service provider in SA ceased reporting case management services for people who received telephone contact only once or twice a year. This contributed to a large decrease in clients.
- (h) Data are not available for 2015-16 for the ACT as the ACT did not provide data for the DS NMDS. Therefore, Australian totals do not include ACT service users in 2015-16.
- (i) From 2012-13 onwards, data for the NT include users of basic community care.

**na** Not available.

\* Indicates the estimate or proportion has a relative standard error between 25 per cent and 50 per cent and should therefore be used with caution.

- (a) Excludes need for assistance with health care.
- (b) Excludes people who are residents of cared accommodation.
- (c) Need for more formal assistance includes those who do not currently receive any assistance.
- (d) Formal assistance comprises need for assistance from organised services with cognitive or emotional tasks, communication, household chores, meal preparation, mobility activities, property maintenance, reading or writing, self-care tasks and transport. Data excludes need for assistance with health care
- (e) The rates reported in this table include 95 per cent confidence intervals (for example, X per cent ± X per cent).
- (f) Cells in the table have been randomly adjusted to avoid the release of confidential data. Discrepancies may occur between sums of the component items and totals. Refer to the SDAC Summary of Findings Publication (ABS cat. no. 4430.0) for more details.
- (g) The definition of the potential population was revised in 2015. See section 15.4.

\* Indicates the estimate or proportion has a relative standard error between 25 per cent and 50 per cent and should therefore be used with caution.

- (a) Excludes people who are residents of cared accommodation.
- (b) Need for more formal assistance includes those who do not currently receive any assistance.
- (c) Formal assistance comprises need for assistance from organised services with cognitive or emotional tasks, communication, household chores, meal preparation, mobility activities, property maintenance, reading or writing, self-care tasks and transport. Data excludes need for assistance with health care tasks.
- (d) The rates reported in this table include 95 per cent confidence intervals (for example, X per cent ± X per cent).
- (e) Cells in the table have been randomly adjusted to avoid the release of confidential data. Discrepancies may occur between sums of the component items and totals. Refer to the SDAC Summary of Findings Publication (ABS cat. no. 4430.0) for more details.

\* Indicates the estimate or proportion has a relative standard error between 25 per cent and 50 per cent and should therefore be used with caution.

- (a) Includes primary carers (aged 15 years and over) with a main recipient aged 0-64 years or a non-main recipient aged 0-64 years with a profound or severe core activity limitation. See section 15.4 for more details.
- (b) The rates reported in this table include 95 per cent confidence intervals (for example, X per cent ± X per cent).
- (c) Cells in the table have been randomly adjusted to avoid the release of confidential data. Discrepancies may occur between sums of the component items and totals. Refer to the SDAC Summary of Findings Publication (ABS cat. no. 4430.0) for more details.
- (d) Reported need for further assistance relates to main recipient of care only.
- (e) Includes primary carers who had not previously received assistance but reported needing assistance.
- (f) Includes inner regional, outer regional and remote areas. Excludes very remote and migratory areas. Refer to the SDAC Summary of Findings publication (ABS cat. no. 4430.0) for further details.

– Nil or rounded to zero. **np** Not published. .. Not applicable.

2013-14	no.	180 158	134 665	117 932	63 212	39 523	12 788	9 314	8 923	566 514
2014-15	no.	185 409	139 119	121 516	65 162	40 406	13 001	9 557	9 137	583 309
2015-16	no.	190 576	143 311	124 760	66 890	41 211	13 209	9 815	9 343	599 114

(a) Numbers for Australia may not equal the sum of numbers for each State and Territory because some users accessed services in more than one State or Territory

(b) See section 15.4 for detailed information on the estimated potential population.

(c) Changes in the linking procedures implemented for 2007-08 and 2008-09 data may have the effect of slightly increasing the number of unique service users within the CSTDA NMDS for these years.

(d) The definition of the potential population was revised in 2015, effective from 2012-13. See section 15.4.

(e) NSW data has had lower-than-average response rates, which has led to underreporting of service user numbers compared to other jurisdictions.

(f) WA data includes service users who received services under the WA Government operated trial sites of the NDIS. The trial commenced on 1 July 2014 and ran until 30 June 2017.

(g) SA data for 2012-13 are not comparable to previous years. A large non-government provider in SA ceased reporting non-NDA clients which were incorrectly included in previous years' data, while another SA agency experienced data reporting problems, resulting in some clients not being reported. Data for 2011-12 are not comparable with other years. A large government service provider in SA ceased reporting case management services for people who received telephone contact only once or twice a year. This contributed to a large decrease in clients.

(h) Data are not available for 2015-16 for the ACT as the ACT did not provide data for the DS NMDS. Therefore, Australian totals do not include ACT service users in 2015-16.

**na** Not available.

(a) Numbers for Australia may not equal the sum of numbers for each State and Territory because some users accessed services in more than one State or Territory.

(b) The definition of the potential population was revised in 2015, effective from 2012-13. See section 15.4.

(c) Changes in the linking procedures implemented for 2007-08 and 2008-09 data may have the effect of slightly increasing the number of unique service users within the CSTDA NMDS for these years.

(d) NSW data has had lower-than-average response rates, which has led to underreporting of service user numbers compared to other jurisdictions.

(e) As part of an output structure review in Victoria, an activity that was previously classified under community access was amalgamated under community support in that jurisdiction from 2012–13 onwards.

**Table 15A.48 Users of NDA community access services (aged 0–64 years), as a proportion of the potential population for community access services (a), (b), (c)**

	<i>Unit</i>	<i>NSW (d)</i>	<i>Vic (e)</i>	<i>Qld</i>	<i>WA (f)</i>	<i>SA (g)</i>	<i>Tas</i>	<i>ACT (h)</i>	<i>NT</i>	<i>Aust (h)</i>
--	-------------	----------------	----------------	------------	---------------	---------------	------------	----------------	-----------	-----------------

(f) WA data includes service users who received services under the WA Government operated trial sites of the NDIS. The trial commenced on 1 July 2014 and ran until 30 June 2017.

(g) SA data for 2012-13 are not comparable to previous years. A large non-government provider in SA ceased reporting non-NDA clients which were incorrectly included in previous years' data, while another SA agency experienced data reporting problems, resulting in some clients not being reported. Data for 2011-12 are not comparable with other years. A large government service provider in SA ceased reporting case management services for people who received telephone contact only once or twice a year. This contributed to a large decrease in clients.

(h) Data are not available for 2015-16 for the ACT as the ACT did not provide data for the DS NMDS. Therefore, Australian totals do not include ACT service users in 2015-16.

(c) Changes in the linking procedures implemented for 2007-08 and 2008-09 data may have the effect of slightly increasing the number of unique service users within the CSTDA NMDS for these years.

(d) Numbers for Australia may not equal the sum of numbers for each State and Territory because some users accessed services in more than one State or Territory.

(a) Disability Management Services are delivered by the Australian Government.

(b) See section 15.4 for detailed information on the estimation of the number of people with an employment restriction.

(c) Numbers for Australia may not equal the sum of numbers for each State and Territory because some users accessed services in more than one State or Territory.

- (a) Supported employment services are delivered by the Australian Government.
- (b) The definition of the potential population was revised in 2015, effective from 2012-13. See section 15.4.
- (c) Changes in the linking procedures implemented for 2007-08 and 2008-09 data may have the effect of slightly increasing the number of unique service users within the CSTDA NMDS for these years.
- (d) Numbers for Australia may not equal the sum of numbers for each State and Territory because some users accessed services in more than one State or Territory.
- Nil or rounded to zero.

(a) Data are for permanent residents in aged care.

(b) These data should be interpreted with care (particularly for the NT). There may be issues related to the age of Indigenous residents being incorrectly recorded. An assessment of the data set in the NT has previously shown that approximately half of Indigenous Australians' ages were incorrectly recorded.

– Nil or rounded to zero.

Proportion of primary carers who are satisfied with the quality of formal services received to help in their caring role										
Major cities	%	69.9 ± 7.6	61.1 ± 13.4	81.1 ± 19.0	83.3 ± 26.2	75.4 ± 17.0	..	60.2 ± 18.2	..	70.7 ± 6.6
Other (f)	%	53.7 ± 18.6	82.5 ± 18.7	61.0 ± 28.2	26.1 ± 40.0	np	82.5 ± 22.1	..	100.0 ± –	68.4 ± 8.6
<b>Total</b>	<b>%</b>	<b>65.0 ± 8.1</b>	<b>68.4 ± 12.8</b>	<b>74.9 ± 14.0</b>	<b>61.4 ± 19.9</b>	<b>67.3 ± 14.6</b>	<b>82.5 ± 22.1</b>	<b>60.2 ± 18.2</b>	<b>100.0 ± –</b>	<b>69.0 ± 5.0</b>

\* Indicates the estimate or proportion has a relative standard error between 25 per cent and 50 per cent and should therefore be used with caution.

- (a) Includes primary carers (aged 15 years and over) with a main recipient aged 0-64 years or a non-main recipient aged 0-64 years with a profound or severe core activity limitation. See section 15.4 for more details.
- (b) Data includes only those persons who undertook a personal interview, and does not include proxy interviews.
- (c) Only includes primary carers who reported receiving assistance from organised services to assist with their caring role in the last 6 months.
- (d) Primary carers who did not state their receipt and satisfaction with the quality of organised services have been excluded from both the numerator and the denominator. Proportions have been calculated excluding these 'not stated' responses. The sample of primary carers who did not state their receipt and satisfaction with the quality of formal services received represent 25.3 per cent of all primary carers in the population for 2012. In 2015, these 'not stated' responses from primary carers represent 14.2% of all primary carers included in the NDA definition (see section 15.4 for more details). Refer to SDAC Summary of Findings Publication (ABS cat. no. 4430.0) for further information about the 'not stated' responses for these data items.
- (e) Cells in the table have been randomly adjusted to avoid the release of confidential data. Discrepancies may occur between sums of the component items and totals. Refer to the SDAC Summary of Findings Publication (ABS cat. no. 4430.0) for more details.
- (f) Includes inner regional, outer regional and remote. Excludes very remote and migratory.
- .. Not applicable. np Not published. – Nil or rounded to zero.

Total number of primary carers who received formal assistance in their caring role in the previous 6 months			
Australia	'000	99.8	10.9
Other English speaking countries (f)	'000	9.3	3.2
All English speaking countries	'000	108.6	11.5
Non-English speaking countries	'000	10.6	3.9
<b>Total</b>	<b>'000</b>	<b>117.6</b>	<b>11.6</b>
Proportion of primary carers who are satisfied with the quality of formal services received to help in their caring role			
Australia	%	70.9	5.6

**Table 15A.61 Proportion of primary carers (carers of people with disability aged 0–64 years) who are satisfied with the quality of formal services received to help in their caring role, by carer country of birth (a), (b), (c), (d), (e)**

	<i>Unit</i>	<i>Estimate</i>	<i>95 per cent CI (±)</i>
Other English speaking countries (f)	%	63.5	21.5
All English speaking countries	%	68.7	5.1
Non-English speaking countries	%	62.1	18.2
<b>Total</b>	<b>%</b>	<b>69.0</b>	<b>5.0</b>

\* Indicates the estimate or proportion has a relative standard error between 25 per cent and 50 per cent and should therefore be used with caution.

- (a) Includes primary carers (aged 15 years and over) with a main recipient aged 0-64 years or a non-main recipient aged 0-64 years with a profound or severe core activity limitation. See section 15.4 for more details.
- (b) Estimates based on the SDAC sample who were primary carers of people, aged 0–64 years who were interviewed personally.
- (c) Only includes primary carers who reported receiving assistance from organised services to assist with their caring role in the last 6 months.
- (d) Primary carers who did not state their receipt of and satisfaction with the quality of organised services have been excluded from both the numerator and the denominator. Proportions have been calculated excluding these 'not stated' responses. The sample of primary carers who did not state their receipt and satisfaction with the quality of formal services received represent 25.3 per cent of all primary carers in the population for 2012. For 2015, these 'not stated' responses from primary carers represent 14.2 per cent of all primary carers included in the NDA definition (see section 15.4 for more details). Refer to SDAC Summary of Findings Publication (ABS cat. no. 4430.0) for further information about the 'not stated' responses for these data items.
- (e) Cells in the table have been randomly adjusted to avoid the release of confidential data. Discrepancies may occur between sums of the component items and totals. Refer to the SDAC Summary of Findings Publication (ABS cat. no. 4430.0) for more details.
- (f) Other English speaking countries are as stated in the English Proficiency Group Classification (Dept of Immigration and Border Protection) and include Canada, Ireland, New Zealand, South Africa, United Kingdom, United States of America and Zimbabwe.
- (g) Non-English speaking countries also includes those persons for whom country of birth was inadequately described or not stated. This is estimated to be less than 0.1 per cent nationally.

\* Indicates the estimate or proportion has a relative standard error between 25 per cent and 50 per cent and should therefore be used with caution.

**Table 15A.63 Proportion of primary carers (carers of people with disability aged 0–64 years) who are satisfied with the range of formal services available to help in their caring role, by carer remoteness area, by State and Territory (a), (b), (c), (d)**

	<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
(a)	Includes primary carers (aged 15 years and over) with a main recipient aged 0-64 years or a non-main recipient aged 0-64 years with a profound or severe core activity limitation. See section 15.4 for more details.									
(b)	Data includes only those persons who undertook a personal interview, and does not include proxy interviews.									
(c)	Primary carers who did not state their satisfaction on the range of organised services available have been excluded from both the numerator and the denominator. Proportions have been calculated excluding these 'not stated' responses. These 'not stated' responses from primary carers represent 25.8 per cent of all primary carers in the population in 2012 and 14.5 per cent of all primary carers included in the NDA definition (see section 15.4 for more details). Refer to SDAC Summary of Findings Publication (ABS cat. no. 4430.0) for further information about the 'not stated' responses for these data items.									
(d)	Cells in the table have been randomly adjusted to avoid the release of confidential data. Discrepancies may occur between sums of the component items and totals. Refer to the SDAC Summary of Findings Publication (ABS cat. no. 4430.0) for more details.									
(e)	Includes inner regional, outer regional and remote areas. Excludes very remote and migratory areas. Refer to the SDAC Summary of Findings publication (ABS cat. no. 4430.0) for further details.									
	.. Not applicable. – Nil or rounded to zero.

- (a) Time series financial data are adjusted to 2015-16 dollars using the General Government Final Consumption Expenditure (GGFCE) chain price deflator (2015-16 = 100). See table 2A.49 and chapter 2 (sections 2.5-6) for more information.
- (b) For this table, local government is included with 'government' for expenditure but included as 'non-government' for service user counts. The ACT and the NT do not have local government provided services. Jurisdictional comparisons thus need to be undertaken with care.
- (c) Data are based on adjusted net expenditure (expenditure minus receipts) divided by the number of service users during the relevant period.
- (d) Data for non-government provided services reflect the cost to government and not the full cost of providing the accommodation. Governments make a contribution towards non-government provided services.
- (e) Changes in the linking procedures implemented for 2007-08 and 2008-09 data may have the effect of slightly increasing the number of unique service users within the CSTDA NMDS for these years.

**Table 15A.67 Real government expenditure per user of NDA accommodation support services (2015-16 dollars) (a), (b), (c), (d), (e), (f)**

	<i>NSW (g)</i>	<i>Vic (h)</i>	<i>Qld (i)</i>	<i>WA (j)</i>	<i>SA (k)</i>	<i>Tas (l)</i>	<i>ACT (m)</i>	<i>NT (n)</i>	<i>Aust (m)</i>
(f)	Data for NSW, Victoria, SA and Tasmania for 2013-14 are affected by the introduction of the NDIS. For those states 2013-14 total government expenditure included 'in-kind' funding to the NDIA, but excluded 'cash' contributions. Where states have provided gross expenditure and 'in-kind' funding, costs per user will be higher than actual in states where NDIS transition has commenced. For Victoria, total government expenditure included both 'cash' and 'in-kind' funding. Care should be taken when comparing the efficiency indicators across jurisdictions and over time.								
(g)	NSW data has had lower-than-average response rates, which has led to under reporting of service user numbers compared to other jurisdictions. Up to 2009-10, some non-government providers have been coded as government and this will affect the comparability of the number of service users from government and non-government sectors over time. NSW expenditure for GH includes expenditure for Other Community and the unit cost here is the average unit cost across both GH and other community clients. The increase in NSW expenditure in 2011-12 is partially the result of a change in the methodology for distributing depreciation expenditure. Cost per user of State or Territory accommodation support services in group homes from 2011-12 in NSW includes services provided in other community settings.								
	NSW has advised that government funding per user of non-government provided accommodation support services in group homes has jumped in NSW for 2014-15 and 2015-16 due to a grant of \$16.5 million in 2014-15 and \$21.1 million in 2015-16. This has led to increased cost per user for each of these two years.								
	NSW has advised that the costs per user for government provided disability services for 2015-16 will be inflated due to a combination of an undercount of service users for that year, the progressive transition of service users to the NDIS and group homes, and the reporting of expenditure which does not exclude transfer of funding to the Commonwealth for transitioned service users.								
(h)	For 2010-11, data for non-government provided accommodation support services in group homes excludes capital grants.								
(i)	Some Government provided accommodation support services receive funding from Queensland Health, the data reported only includes funding provided by the Department of Communities.								
(j)	WA service user data for 2007-08 were provided directly by WA and have not been validated by the AIHW. 2012-13 data are affected by changes to the WA Procurement Reforms that commenced mid-year 2013-14. Approximately 500 service users, previously captured against respite transferred to accommodation and approximately 300 service users were transferred from "government provided accommodation support services in other community settings" to "non-government provided accommodation support services in other community settings". WA data includes expenditure on service users who received services under the WA Government operated trial sites of the NDIS. The trial commenced on 1 July 2014 and ran until 30 June 2017.								
(k)	For SA, data for 2012-13 are not comparable to previous years. A large non-government provider in SA ceased reporting non-NDA clients which were incorrectly included in previous years' data, while another SA agency experienced data reporting problems, resulting in some clients not being reported. Data for 2011-12 are not comparable with other years. A large government service provider in SA ceased reporting case management services for people who received telephone contact only once or twice a year. This contributed to a large decrease in clients.								
(l)	There are no government provided accommodation support services in institutional/residential settings in Tasmania. All government-run group homes have been outsourced from 2008-09 onwards.								
(m)	The ACT did not provide service use data for 2015-16 for the DS NMDS. Australian totals do not include ACT service users or expenditure data for 2015-16.								

**Table 15A.67 Real government expenditure per user of NDA accommodation support services (2015-16 dollars) (a), (b), (c), (d), (e), (f)**

	<i>NSW (g)</i>	<i>Vic (h)</i>	<i>Qld (i)</i>	<i>WA (j)</i>	<i>SA (k)</i>	<i>Tas (l)</i>	<i>ACT (m)</i>	<i>NT (n)</i>	<i>Aust (m)</i>
(n) There are no government provided accommodation support services or non-government provided accommodation support services in institutional/residential settings in the NT. In 2011-12 there was no expenditure reported on non-government accommodation support services in other community settings. From 2009-10 onwards there were no government provided accommodation support services in group homes.

(a) Time series financial data are adjusted to 2015-16 dollars using the General Government Final Consumption Expenditure (GGFCE) chain price deflator (2015-16 = 100). See table 2A.49 and chapter 2 (sections 2.5-6) for more information.

(b) Total expenditure reflects only direct employment and case-based funding expenditure. It does not include expenditure on quality assurance assessment and certification payments or employer incentives such as supported wage system and wage subsidies which cannot be identified against specific user activity types.

(c) Changes in the linking procedures implemented for 2007-08 and 2008-09 data may have the effect of slightly increasing the number of unique service users within the CSTDA NMDS for these years.

(d) Includes users of targeted employment services

(e) In 2012-13, there were 52,426 users whose program was not reported. For the purposes of this table, these have been proportionally allocated to the open and supported programs.

.. Not applicable.

2015-16	4 759	4 277	4 103	5 523	5 095	4 571	5 474	4 652	4 628

- (a) Time series financial data are adjusted to 2015-16 dollars using the General Government Final Consumption Expenditure (GGFCE) chain price deflator (2015-16 = 100). See table 2A.49 and chapter 2 (sections 2.5-6) for more information.
- (b) This indicator is derived using service user data provided by the AIHW. Cost per employment service user data may differ from those reported in the Australian Government's annual report, as the Australian Government and the AIHW use different rules to count the number of employment service users. Where a person has used more than one service outlet during the reporting period, the person is counted more than once by the Australian Government, whereas the AIHW counts each person only once. In addition, the Australian Government includes independent workers in calculating service user numbers, whereas the AIHW does not.
- (c) Service user numbers used to derive these results include a small number of users of services provided by organisations classified as government related, such as local councils. The total user number for 2006-07 includes users of targeted employment services.
- (d) Total expenditure reflects only direct employment and case-based funding expenditure. It does not include expenditure on quality assurance assessment and certification payments or employer incentives such as supported wage system and wage subsidies which cannot be identified against specific user activity types.
- (e) Changes in the linking procedures implemented for 2007-08 and 2008-09 data may have the effect of slightly increasing the number of unique service users within the CSTDA NMDS for these years.

(a) *Numerator* — expenditure (accrual) by jurisdictions on administering the disability service system as a whole. Including the regional program management and administration, the central policy and program management and administration, and the disability program share of corporate administration costs under the umbrella department. Excluding administration expenditure on a service that has been already counted in the direct expenditure on the service — divided by the denominator — total government expenditure on services for people with disability. Including expenditure on both programs and administration, direct expenditure and grants to government service providers, and government grants to non-government service providers (except major capital grants).

(b) See table 15A.66 for the different methods of apportioning departmental costs.

(c) Data for NSW, Victoria, SA and Tasmania for 2013-14 are affected by the introduction of the NDIS. For those states 2013-14 total government expenditure included 'in-kind' funding to the NDIA, but excluded 'cash' contributions. For Victoria, total government expenditure included both 'cash' and 'in-kind' funding. Care should be taken when comparing the efficiency indicators across jurisdictions and over time.

**Table 15A.70 Government administrative expenditure as a proportion of total recurrent expenditure on services (per cent) (a), (b), (c)**

	<i>NSW (d)</i>	<i>Vic</i>	<i>Qld (e)</i>	<i>WA (f)</i>	<i>SA</i>	<i>Tas (g)</i>	<i>ACT</i>	<i>NT</i>	<i>Aus Gov (h)</i>	<i>Aust</i>
(d)	<p>The decrease in NSW administrative expenditure as a proportion of total recurrent expenditure on services in 2008-09 and 2009-10 reflects an improved overhead allocation model which results in better allocation of funding to direct and non-direct service expenditures. The decrease in NSW administration expenditure in 2012-13 results from a change to the way in which administration expenditure has been calculated and from efficiency savings arising from an organisational restructure, which consolidated corporate services of several Government Divisions. NSW provided funding via a transfer (in nominal dollars) of \$131 million (2011-12), \$130 million (2012-13), \$143 million (2013-14), \$152.5 million (2014-15) and \$155.6 million (2015-16) to the Australian Government for the notional support costs for younger people receiving residential and packaged aged care, as required under the National Partnership Agreement on Transitioning Responsibilities for Aged Care and Disability Services. This expenditure is not included in this table (but is included in NSW figures when reporting to NSW central agencies). This expenditure is included in the Aged Care expenditure in chapter 14.</p>									
(e)	<p>Payroll tax data for Queensland include payroll tax, accrued payroll tax and long service leave on-costs recovered payroll tax. Payroll tax is excluded from administrative expenditure data.</p>									
(f)	<p>WA data includes expenditure on service users who received services under the WA Government operated trial sites of the NDIS. The trial commenced on 1 July 2014 and ran until 30 June 2017. The decrease in WA administrative expenditure in 2007-08 mainly reflects the abolition of the capital user charge by Department of Treasury and Finance.</p>									
(g)	<p>In Tasmania, reduction in administrative expenditure for 2009-10 was due to improved processes for aligning administrative and direct service delivery expenditure. From 2012-13 to 2014-15, administrative expenditure varied due to changes in methodology for allocation of corporate and divisional overheads.</p>									
(h)	<p>Australian Government administrative expenditure is an attribution of cost based on average staffing levels.</p>									
(i)	<p>Excludes actual payroll tax for NSW, Victoria and the NT. Actual payroll tax is included: for Queensland from 2007-08 to 2013-14, for SA for all years, for Tasmania from 2007-08 to 2011-12 (and in part for 2012-13).</p>

(a) Government expenditure per service user for Australia, excludes Australian Government expenditure on State and Territory administered services that was not provided as transfer payments.

(b) Data for NSW, Victoria, SA and Tasmania are affected by the introduction of the NDIS.

(c) WA data includes expenditure and service users who received services under the WA Government operated trial sites of the NDIS. The trial commenced on 1 July 2014 and ran until 30 June 2017.

(d) Service user data for the NT includes users of basic community care.

(e) Includes ACT expenditure in numerator but not denominator as the ACT did not provide service use data for 2015-16.

\* Indicates the estimate or proportion has a relative standard error between 25 percent and 50 per cent and should therefore be used with caution.

(a) Underemployed people are defined as "persons with disability aged 15–64 years who are employed and usually work less than 35 hours per week, who wanted to work more hours and would be able to start work with more hours in the next 4 weeks".

(b) Cells in the table have been randomly adjusted to avoid the release of confidential data. Discrepancies may occur between sums of the component items and totals. Refer to the SDAC Summary of Findings Publication (ABS cat. no. 4430.0) for more details.

(c) Includes those with moderate or mild core activity limitations, schooling or employment restrictions and those who do not have a specific limitation or restriction.

(d) Includes those who do not have a specific limitation or restriction.

– Nil or rounded to zero. **np** Not published.

(a) Cells in the table have been randomly adjusted to avoid the release of confidential data. Discrepancies may occur between sums of the component items and totals. Refer to the SDAC Summary of Findings Publication (ABS cat. no. 4430.0) for more details.

(b) For people aged 15–64 years, living in households.

(c) Profound or severe core activity limitation refers to always or sometimes needing assistance with one or more of the core activities. Core activities comprise communication, mobility and self care.

(d) The rates reported in this table include 95 per cent confidence intervals (for example, X per cent ± X per cent).

(e) Includes those with moderate or mild core activity limitations, schooling or employment restrictions and those who do not have a specific limitation or restriction.

(f) Includes those who do not have a specific limitation or restriction.

\* Indicates the estimate or proportion has a relative standard error between 25 percent and 50 per cent and should therefore be used with caution.

- (a) Cells in the table have been randomly adjusted to avoid the release of confidential data. Discrepancies may occur between sums of the component items and totals. Refer to the SDAC Summary of Findings Publication (ABS cat. no. 4430.0) for more details.
- (b) For people aged 15–64 years, living in households.
- (c) Profound or severe core activity limitation refers to always or sometimes needing assistance with one or more of the core activities. Core activities comprise communication, mobility and self care.
- (d) The rates reported in this table include 95 per cent confidence intervals (for example, X per cent ± X per cent).
- (e) Includes those with moderate or mild core activity limitations, schooling or employment restrictions and those who do not have a specific limitation or restriction.
- (f) Includes those who do not have a specific limitation or restriction.

\* Indicates the estimate or proportion has a relative standard error between 25 percent and 50 per cent and should therefore be used with caution.

(a) Cells in the table have been randomly adjusted to avoid the release of confidential data. Discrepancies may occur between sums of the component items and totals. Refer to the SDAC Summary of Findings Publication (ABS cat. no. 4430.0) for more details.

(b) For people aged 15–64 years, living in households.

(c) Profound or severe core activity limitation refers to always or sometimes needing assistance with one or more of the core activities. Core activities comprise communication, mobility and self care.

(d) A person has a restriction if he/she has difficulty participating in life situations, needs assistance from another person or uses an aid. A long term condition is defined as a disease or disorder which has lasted or is likely to last for at least six months; or a disease, disorder or event (e.g. stroke, poisoning, accident etc.) which produces an impairment or restriction which has lasted or is likely to last for at least six months. Long-term conditions have been coded to a classification based on the Australian Standard Classification of Education (ASCED), 2001 (cat. no. 1272.0).

(d) The rates reported in this table include 95 per cent confidence intervals (for example, X per cent ± X per cent).

(e) Includes those with moderate or mild core activity limitations, schooling or employment restrictions and those who do not have a specific limitation or restriction.

(a) The rates reported in this table include 95 per cent confidence intervals (for example, X per cent ± X per cent).

(b) Cells in the table have been randomly adjusted to avoid the release of confidential data. Discrepancies may occur between sums of the component items and totals. Refer to the SDAC Summary of Findings Publication (ABS cat. no. 4430.0) for more details.

(c) Includes inner regional, outer regional and remote areas. Excludes very remote and migratory. Refer to the SDAC Summary of Findings publication (ABS cat. no. 4430.0) further details.

(d) 'Other' includes outer regional and remote areas.

– Nil or rounded to zero. .. Not applicable.

\* Indicates the estimate or proportion has a relative standard error between 25 per cent and 50 per cent and should therefore be used with caution.

(a) The rates reported in this table include 95 per cent confidence intervals (for example, X per cent ± X per cent).

(b) People living on households.

(c) For 2009 and 2015 Other English speaking countries are as stated in the English Proficiency Group Classification (Dept of Immigration and Citizenship) and include Canada, Ireland, New Zealand, South Africa, United Kingdom, United States of America and Zimbabwe.

(d) Non–English speaking countries includes those persons for whom country of birth was inadequately described. This is estimated to be less than 0.1 per cent nationally. Non–English speaking countries include Zimbabwe for 2012.

(e) For 2012 Other English speaking countries are as stated in the English Proficiency Group Classification (Dept of Immigration and Citizenship) and include Canada, Ireland, New Zealand, South Africa, United Kingdom and the United States of America.

<b>Total</b>	<b>%</b>	<b>49.1 ± 2.2</b>	<b>48.5 ± 2.2</b>	<b>48.3 ± 2.7</b>	<b>57.7 ± 5.4</b>	<b>49.9 ± 3.7</b>	<b>46.0 ± 4.3</b>	<b>68.4 ± 7.5</b>	<b>62.2 ± 6.6</b>	<b>50.0 ± 1.0</b>

- (a) Cells in the table have been randomly adjusted to avoid the release of confidential data. Discrepancies may occur between sums of the component items and totals. Refer to the SDAC Summary of Findings Publication (ABS cat. no. 4430.0) for more details.
- (b) Data in Italics indicates a relative standard error (RSE) of between 25 per cent and 50 per cent. Estimates with RSEs greater than 25 per cent should be used with care.
- (c) The rates reported in this table include 95 per cent confidence intervals (for example, X per cent ± X per cent).
- (d) Persons living in households.
- (e) For 2009 and 2015 Other English speaking countries are as stated in the English Proficiency Group Classification (Dept of Immigration and Citizenship) and include Canada, Ireland, New Zealand, South Africa, United Kingdom, United States of America and Zimbabwe.
- (f) Non-English speaking countries includes those persons for whom country of birth was inadequately described. This is estimated to be less than 0.1 per cent nationally. Non-English speaking countries include Zimbabwe for 2012.
- (g) For 2012 Other English speaking countries are as stated in the English Proficiency Group Classification (Dept of Immigration and Citizenship) and include Canada, Ireland, New Zealand, South Africa, United Kingdom and the United States of America.

(a) Includes primary carers (aged 15 years and over) with a main recipient aged 0-64 years or a non-main recipient aged 0-64 years with a profound or severe core activity limitation. See section 15.4 for more details.

(b) The rates reported in this table include 95 per cent confidence intervals (for example, X per cent ± X per cent).

(c) Cells in the table have been randomly adjusted to avoid the release of confidential data.

(d) Includes inner regional, outer regional and remote areas. Excludes very remote and migratory. Refer to the SDAC Summary of Findings publication (ABS cat. no. 4430.0) further details.

.. Not applicable. **np** Not published. – Nil or rounded to zero.

(a) Cells in the table have been randomly adjusted to avoid the release of confidential data. Discrepancies may occur between sums of the component items and totals. Refer to the SDAC Summary of Findings Publication (ABS cat. no. 4430.0) for more details.

(b) Includes those who travelled to a church or place of worship, a restaurant or club, went shopping, participated in sport or visited relatives or friends in the last two weeks.

(c) For people aged 5–64 years, living in households.

(d) The rates reported in this table include 95 per cent confidence intervals (for example, X per cent  $\pm$  X per cent).

(e) Profound or severe core activity limitation refers to always or sometimes needing assistance with one or more of the core activities. Core activities comprise communication, mobility and self care.

(f) Includes those with moderate or mild core activity limitations, schooling or employment restrictions and those who do not have a specific limitation or restriction.

– Nil or rounded to zero.

<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
-------------	------------	------------	------------	-----------	-----------	------------	------------	-----------	-------------

\* Indicates the estimate or proportion has a relative standard error between 25 per cent and 50 per cent and should therefore be used with caution.

- (a) Data in *Italics* indicates a relative standard error (RSE) of between 25 per cent and 50 per cent. Estimates with RSEs greater than 25 per cent should be used with care. Estimates with RSEs greater than 50 per cent are considered too unreliable for general use. These estimates are not published.
- (b) The rates reported in this table include 95 per cent confidence intervals (for example, X per cent  $\pm$  X per cent).
- (c) Persons living in households.
- (d) Other English speaking countries are as stated in the English Proficiency Group Classification (Dept of Immigration and Citizenship) and include Canada, Ireland, New Zealand, South Africa, United Kingdom and the United States of America.
- (e) Non–English speaking countries includes those persons for whom country of birth was inadequately described. Non–English speaking countries include Zimbabwe for 2012.
- (f) Other English speaking countries are as stated in the English Proficiency Group Classification (Dept of Immigration and Citizenship) and include Canada, Ireland, New Zealand, South Africa, United Kingdom, United States of America and Zimbabwe.
- (g) Non–English speaking countries includes those persons for whom country of birth was inadequately described.  
– Nil or rounded to zero. **np** Not published.

\* Indicates the estimate or proportion has a relative standard error between 25 per cent and 50 per cent and should therefore be used with caution.

(a) Cells in the table have been randomly adjusted to avoid the release of confidential data. Discrepancies may occur between sums of the component items and totals. Refer to the SDAC Summary of Findings Publication (ABS cat. no. 4430.0) for more details.

Table 15A.93 **People with disability aged 15–64 years who have had face-to-face contact with family or friends in the previous week, all with reported disability, by country of birth, by State/Territory ('000) (a), (b), (c), (d)**

	<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
(b)	Face-to-face contact with family or friends (outside of the household) in the previous week includes those who have daily and weekly contact. Data excludes those who have fortnightly, monthly, quarterly or no contact, and those who have no family or friends.									
(c)	The rates reported in this table include 95 per cent confidence intervals (for example, X per cent $\pm$ X per cent).									
(d)	Persons living in households.									
(g)	Other English speaking countries are as stated in the English Proficiency Group Classification (Dept of Immigration and Border Protection) and include Canada, Ireland, New Zealand, South Africa, United Kingdom, United States of America and Zimbabwe.									
(h)	Non–English speaking countries includes those persons for whom country of birth was inadequately described. This is estimated to be less than 0.1 per cent nationally in 2015.									
(f)	Non–English speaking countries includes those persons for whom country of birth was inadequately described. Non–English speaking countries include Zimbabwe for 2012.									
(e)	Other English speaking countries are as stated in the English Proficiency Group Classification (Dept of Immigration and Citizenship) and include Canada, Ireland, New Zealand, South Africa, United Kingdom and the United States of America.									
	– Nil or rounded to zero. <b>np</b> Not published.

\* Indicates the estimate or proportion has a relative standard error between 25 per cent and 50 per cent and should therefore be used with caution.

- (a) Cells in the table have been randomly adjusted to avoid the release of confidential data. Discrepancies may occur between sums of the component items and totals. Refer to the SDAC Summary of Findings Publication (ABS cat. no. 4430.0) for more details.
- (b) The rates reported in this table include 95 per cent confidence intervals (for example, X per cent ± X per cent).
- (c) Includes inner regional, outer regional and remote areas. Excludes very remote and migratory. Refer to the SDAC Summary of Findings publication (ABS cat. no. 4430.0) further details.
- (d) Includes outer regional and remote areas.
- .. Not applicable. **np** Not published. – Nil or rounded to zero.
